

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

STATE OF NEW YORK.

No. 1.

IN ASSEMBLY,

January 2, 1877.

LIST OF MEMBERS

OF THE ASSEMBLY OF THE STATE OF NEW YORK FOR 1877.

County.	District.	Name.
Albany.....	1	John Sager.
	2	Jonathan R. Herrick.
	3	William J. Maher.
	4	Edward Curran.
Allegany.....		Sumner Baldwin.
Broome.....		Edwin C. Moody.
Cattaraugus.....	1	Thomas J. King.
	2	Edgar Shannon.
Cayuga.....	1	George I. Post.
	2	John S. Brown.
Chautauqua.....	1	Sherman Williams.
	2	Theodore A. Case.
Chemung.....		Hosea H. Rockwell.
Chenango.....		J. Hudson Skillman.
Clinton.....		Shepard P. Bowen.
Columbia.....	1	Jacob H. Proper.
	2	John T. Hogeboom.
Cortland.....		Deloss McGraw.
Delaware.....	1	William J. Welsh.
	2	Isaac H. Maynard.

County.	District.	Name.
Dutchess	1	Thomas Hammond.
	2	De Witt Webb.
Erie	1	John L. Crowley.
	2	John G. Langner.
	3	Edward Gallagher.
	4	Charles F. Tabor.
	5	Charles A. Orr.
Essex		Benjamin D. Clapp.
Franklin		John I. Gilbert.
Fulton and Hamilton.....		George W. Fay.
Genesee		Eli Taylor.
Greene		Oscar T. Humphrey.
Herkimer.....		Myron A. McKee.
Jefferson.....	1	Charles R. Skinner.
	2	Henry Spicer.
Kings.....	1	Daniel Bradley.
	2	Richard Marvin.
	3	John Shanley.
	4	James G. Tighe.
	5	William W. Stevenson.
	6	John M. Delemeir.
	7	Charles L. Lyon.
	8	Adrian M. Suydam.
	9	John McGroarty.
Lewis		William W. Rice.
Livingston.....		Jonathan B. Morey.
Madison	1	Albert N. Sheldon.
	2	Merchant Billington.
Monroe	1	Willard Hodges.
	2	James S. Graham.
	3	Washington L. Rockwell.
Montgomery		Edward Wemple.
New York.....	1	James Healy.
	2	Thomas F. Grady.
	3	William H. Rooney.
	4	John Galvin.
	5	Peter Mitchell.
	6	Michael Healey.
	7	Isaac I. Hayes.
	8	Martin Nachtman.

County.	District.	Name.
New York.....	9	William H. Corsa.
	10	Christopher Flecke.
	11	Elliot C. Cowdin.
	12	Maurice F. Holahan.
	13	Robert H. Strahan.
	14	Luke F. Cozzans.
	15	James G. Dimond.
	16	Francis B. Spinola.
	17	James E. Coulter.
	18	Stephen J. O'Hare.
	19	Thomas C. E. Ecclesine.
	20	Joseph I. Stein.
	21	J. C. Julius Langbein.
Niagara.....	1	Amos A. Bissell.
	2	Sherburne B. Piper.
Oneida.....	1	James Corbett.
	2	Everett Case.
	3	Benjamin D. Stone.
	4	J. Robert Moore.
Onondaga.....	1	Thomas G. Alvord.
	2	Carroll E. Smith.
	3	C. Fred Herbst.
Ontario.....	1	Dwight B. Backenstose.
	2	Amasa T. Winch.
Orange.....	1	James G. Graham.
	2	Stewart T. Durland.
Orleans.....		Joseph D. Billings.
Oswego.....	1	George B. Sloan.
	2	George M. Case.
	3	DeWitt C. Peck.
Otsego.....	1	James S. Davenport.
	2	Simeon R. Barnes.

OF THE

STATE OF NEW YORK.

TRANSMITTED TO THE LEGISLATURE JANUARY 2, 1877.

JEROME B. PARMENTER, STATE PRINTER.
1877.

STATE OF NEW YORK.

No. 2.

IN ASSEMBLY

January 2, 1877.

ANNUAL MESSAGE OF THE GOVERNOR.

STATE OF NEW YORK:

EXECUTIVE CHAMBER, *January 2, 1877.*

To the Legislature:

At the commencement of my service as chief magistrate of the State, it is gratifying to find the legislative representatives of the people assembled in their respective chambers and ready to unite with me in such measures as the welfare of our constituents may demand. In entering upon our duties it becomes us to acknowledge our dependence upon the Supreme Power which controls the destinies of States and nations, and which has so often interposed for our deliverance from danger, and humbly to implore a continuance of its guidance and protection.

We ought also at all times to remember that we are not here to promote our own individual interests. The people have not chosen us and sent us to their Capitol for any such purpose. On the contrary, they have placed in our hands a great and sacred trust, to be administered for their benefit and for the interest and honor of the inhabitants of the whole State, without regard to locality, religious creed or political party. The money which they pay into the pub-

lic treasury is not our money; nor is it the money of the State, except as the people are the State. It still belongs to them until it is paid out by their agents for the legitimate expenses of their government as provided by the Constitution and laws. If a single dollar be otherwise appropriated or paid, it will be a breach of trust for which there can be no justification or excuse. Let us keep these principles constantly before us as we proceed with our respective duties.

FINANCES.

The accounts of the financial affairs of the State are kept with thirteen different funds, counting the several canal funds as one. The details of the accounts will be found in the Comptroller's report. The following statement exhibits the financial condition of the State at the close of the fiscal year, as it would be if all the funds were condensed into one:

Aggregate balance in the treasury of all the funds, October 1, 1875.....	\$8,126,778 98
Aggregate receipts during the fiscal year ending September 30, 1876.....	18,623,986 29
Total.....	\$26,750,765 27
Deduct payments during the year.....	17,827,711 49
Balance in the treasury September 30, 1876,	<u>\$8,923,053 78</u>

A large proportion of the above balance in the treasury consists of money in the various sinking funds.

The amount of receipts into the treasury on account of the General Fund revenue during the year ending September 30, 1876, was....	\$11,646,517 63
The payments, including the deficiency of \$733,863.77 on the 1st of October, 1875, and also \$4,640,849, transferred to the Bounty Debt Sinking Fund, were.....	11,644,982 98
Balance September 30, 1876.....	<u>\$1,534 65</u>

The balance, although small, is more satisfactory than the large deficits which have almost uniformly appeared for many years past.

DEBT.

On the 30th of September, 1875, the total funded debt was \$28,328,686.40, classified as follows:

General Fund	\$3,119,526 40
Contingent.....	68,000 00
Canal	10,086,660 00
Bounty.....	15,054,500 00
	<hr/>
	<u>\$28,328,686 40</u>

On the 30th of September, 1876, the total funded debt was \$23,315,898.58, classified as follows:

General Fund	\$3,092,238 58
Contingent.....	5,000 00
Canal	10,081,660 00
Bounty	10,137,000 00
	<hr/>
	<u>\$23,315,898 58</u>

Actual reduction of the debt during the year by cancellation	\$5,012,787 82
	<hr/>
Aggregate amount of debt.....	\$23,315,898 58
Deduct money and securities in the sinking funds	14,191,889 50
	<hr/>
Total amount of debt after applying sinking funds	<u>\$9,124,009 08</u>

The bounty debt will mature on the seventh day of April next. The sinking fund, together with the one-third mill tax, now in course of collection, will be sufficient for its full payment.

The balances in the sinking funds on the 30th September, 1876, including money and securities, were as follows :

General Fund.....	\$2,910,529 36
Canal	2,121,050 24
Bounty.....	9,160,309 90
Total	<u>\$14,191,889 50</u>

It must be observed, however, that the amount in the General Fund Debt Sinking Fund cannot all be applied to the payment of that debt, without leaving a large deficiency of means for paying the current expenses of the government. The full amount required for the payment of the debt was contributed from the surplus revenues of the canals, as directed by the Constitution, the last contribution having been received in 1873. But instead of being applied to that object, it was used to pay other appropriations made by the Legislature, and not otherwise provided for, and has never been fully restored. The debt therefore remains uncanceled, and, if ever paid, it must, to a large extent, be paid by taxation. The whole of it — except \$800,000, due in 1878, and \$30,443.76, due on demand — is payable at pleasure, and is held by the State as an investment for the various trust funds. In this condition it will of course remain, the interest upon it being paid to the respective funds for which it is held, so long as the Legislature may choose to leave it in that shape. It would be more satisfactory, and in better accord with the Constitution, to have the whole debt extinguished, and the money belonging to the trust funds invested in other securities. It is believed that the \$800,000 due in 1878 may be paid from the sinking fund without taxation.

CANALS.

The report of the Auditor of the Canal Department exhibits in detail the operations, revenues, debts and expenses of all the canals. It will be unnecessary to present here any thing more than a few of the leading and important facts.

The gross amount of income from tolls and other sources for the year ending 30th September, 1876, was \$1,487,332.89, being \$438,662.74 less than in the preceding year. The cost of collection, ordinary repairs and other charges on revenues amounted to \$1,149,194.61, being \$318,121.34 less than in the preceding year. The Erie canal produced a surplus of revenue over expenses amounting to \$508,953.14. The other canals all show small incomes and large deficiencies of revenue as follows :

	Gross income.	Deficiencies.
Champlain.....	\$94,944 55	\$83,667 51
Oswego	29,048 35	27,175 17
Cayuga and Seneca	11,083 99	14,312 34
Chemung.....	2,104 84	7,689 87
Chenango..	3,717 38	4,602 03
Black River.....	11,339 28	23,734 85
Genesee Valley.....	14,668 50	8,595 60
Crooked Lake	30 48	1,562 41

The year has been one of unprecedented disaster to the boatmen and to all others engaged in the navigation of the canals. In addition to the great depression in every branch of business, there has been an extraordinary competition between the railway lines extending from the Western States to tide-water, which has diverted trade from the canals, and notwithstanding the very low rates of toll, there has been a large falling off in tonnage as well as revenues. Many boats have been laid up; others have been run at a heavy loss and none of them appear to have made any profits.

The effective measures of reform which have been enforced within the last two years, arresting mismanagement and fraud and reducing expenses, have saved the canals from total ruin. Small as the income is, the expenses have been reduced below it, and yet the canals have been kept in complete repair during the entire season. Their future success, if they are to have any, must depend upon a faithful perseverance in this policy.

The question of high or low tolls in the present condition and prospects of canal transportation is one about which there would seem to be no ground for any difference of opinion. Under the Constitution, as now amended, no more money can be expended on the canals in any one year than the gross amount of their revenues for the preceding year. It is, therefore, indispensable for the forwarders to pay such tolls as are required to keep the canals in running order; and no one can reasonably ask them to pay any more, when they are making losses instead of profits on every cargo which they carry. It is true the Constitution requires the canal debt to be provided for from the surplus canal revenues, but no law can enforce impossibilities.

It is to be hoped that the depression in trade will not be of long continuance, and that prosperity may soon return to the canals. It is believed that the railways cannot continue permanently their unreasonable competition without involving themselves in ruin. When such a change shall take place that forwarders can again realize a fair income from their business, they will, of course, be required to pay such tolls as will provide for the canal debt. Until that time it must inevitably be a charge upon the tax-payers of the State. With the usual amount of freight, at fair prices, the present rates of toll will doubtless be sufficient for all purposes, and with continued economy in expenses, they may probably be still further reduced. Since the close of navigation the railway companies have agreed upon an increase of freights; but the past history of such agreements leaves it uncertain whether this one will be of long duration.

It is perhaps unnecessary to add that any expenditures, under present circumstances, for enlargements or extraordinary repairs, should not receive encouragement from any source.

Those who have suffered most severely by the loss of business upon the canals are the boatmen, and although it may not be in the power of the Legislature to relieve them, it is impossible to

withhold from them our sympathy. The number of their boats is about 6,000. They are in one sense partners of the State. They do the work which produces the revenue to keep the canals in repair. Their labor is severe, and their exposure great. In many instances their families live upon the boats, in order to reduce their expenses to the lowest point. No part of the plunder which others have received has ever gone to them; on the contrary, they have suffered from it by paying tolls which have been misapplied. But with all their labor and economy they have been unable during the past season to pay expenses. If any relief can be extended to them in the present depressed condition of trade, it must come from a further saving in the cost of maintaining the canals, and a consequent further reduction in tolls. Even this will not probably be sufficient to carry them safely through another season of such competition as they have encountered during the last year.

THE LATERAL CANALS.

Whether any further appropriations should be made on account of such lateral canals as the Legislature has the right to dispose of, can be best determined after receiving the report of the commissioners appointed by an act of the last session, to examine that subject. It will be seen by the results of the year's business given above, that those canals are rapidly disposing of themselves, and have already become of little value, even to the people living near them.

I learn from the commissioners that they have made the inspection and examination required by the act appointing them, and will soon be prepared to report. The act fixed their compensation, and directed its payment, together with their expenses, but made no appropriation, and they have not been paid. The necessary appropriation should be made.

STATE PRISONS.

The State prisons have kept on their way from bad to worse. The number of convicts in the three prisons September 30, 1876, was as follows :

Auburn	1,281
Clinton.....	623
Sing Sing.....	1,605
Total.....	<u>3,509</u>

The excess of advances from the treasury over receipts from earnings was \$704,379.85. This deficiency is larger by more than \$100,000 than was ever before known. It is due to the present Inspectors to state that they claim the increased deficiency to be largely owing to incumbrances which fell upon them from their predecessors.

A commission was appointed by an act of the Legislature of 1876 to make a thorough investigation of the affairs of the prisons. The commissioners have been actively engaged in the service during the whole summer and autumn. Their report will very soon be submitted to the Legislature, and will, I presume, cover the whole ground of prison management, discipline, and maintenance. I commend it to the attention of the Legislature without further comment at this time.

STATE REFORMATORY AT ELMIRA.

It is gratifying to be able to announce to the Legislature that a large portion of the Reformatory building has been finished and brought into use. With a reasonable appropriation, the entire structure will be completed within the present year. The board of managers, appointed by chapter 207, Laws of 1876, organized in accordance with the act, and succeeded in securing the services of a very competent and efficient superintendent. Having completed and furnished the south wing, they received 170 convicts from the Auburn and Sing Sing prisons, who were immediately

pnt at work upon the north wing, the prison wall and workshops, which have been advanced rapidly towards completion. The superintendent estimates that with an appropriation of \$185,000, and with the privilege of using the prisoners without the interference of contractors, he can fully complete and furnish and bring into use all the buildings, including the prison wall, within the year, and support 300 convicts during the progress of the work, and that then, with possibly a small appropriation for maintenance in 1878, the Reformatory will cease to be a burden upon the State treasury. He is confident that it can be made entirely self-sustaining.

In 1874, the Governor in his annual message estimated the whole cost of the buildings at \$2,000,000. Assuming the above estimate of the superintendent to be correct, they will be completed for a little more than one-half of that sum. But for the ambitious style of architecture adopted at the outset, the cost would have been much less than \$1,000,000.

The design of the Reformatory was the reformation, as well as punishment, of young convicts who had not become hardened in crime. With this object in view it was originally enacted that no convicts should be sentenced to it except such as were over sixteen and under thirty years of age, and convicted of a first offense. It is a source of much regret to the friends of the institution that it should have been, even temporarily, diverted from its original purpose; but the crowded condition of the other prisons, and the necessity of relieving them as far and as speedily as possible, led to the use, for the time being, of the Reformatory for that purpose.

The managers will require some further legislation to aid them in the discharge of their duties, and to promote the objects of the institution. Their views and recommendations will in due time be laid before you.

CONSTITUTIONAL AMENDMENTS.

The people of the State, at the last election, adopted, by an immense majority, the constitutional amendments which had been

approved by two previous Legislatures, and which have thus become a part of the Constitution of the State. They provide for the appointment, by the Governor and Senate, of a Superintendent of State Prisons, with all the powers of the Board of Inspectors, and a Superintendent of Public Works, with all the powers of the Canal Commissioners. A radical change is thus made in the management both of the prisons and of the canals. In each case all power and responsibility are placed in the hands of one controlling executive officer.

Wearied with the frauds, the wasteful and extravagant expenditures which so often attend the management of irresponsible boards, the people have determined to make this great change, with the hope of better results. They undoubtedly desire that the amendments be carried into effect as speedily as possible. I recommend, therefore, that an act be passed with as little delay as may be proper, fixing the salaries of the respective Superintendents, and also the amount of security to be given by each.

A brief act containing these simple provisions will be all that will be necessary before appointing the Superintendents, and enabling them to enter upon their important duties. If further legislation should then be found desirable, either in regard to the canals or the prisons, it could be perfected at the convenience of the Legislature, and with ample time for deliberation.

PUBLIC BUILDINGS.

One phase of the extravagance and folly, amounting almost to lunacy, caused by an inflated currency and inflated modes of life, developed itself in a passion for costly public buildings. Of these the New Capitol takes the lead. Its cost was originally estimated at \$4,500,000. There have already been expended upon it over \$7,500,000, and it will undoubtedly require as much more to complete it; and when completed it will be a vast pile of ornamental stone work, not at all in keeping with the tastes and good sense of plain, substantial people. In addition to this, it is discouraging to

contemplate its completion in view of the enormous annual cost of heating, lighting, cleaning and superintending it.

Following in the wake of the Capitol are several insane asylums, the State Reformatory, houses for normal schools, high schools and other buildings upon which millions of the people's money have been wasted in useless ornaments and luxurious arrangements. In behalf of those which are not yet completed — embracing nearly all of the most costly structures — the usual representation is made that unless we go forward and spend the further amounts required for their completion, we shall lose all that we have expended. Whatever force there may be in this argument, I confess that in the present condition of financial affairs, the actual distress caused in many homes by the payment of their heavy taxes, I should prefer to have the expenditures cease, the tax-payers relieved and the buildings left as they are, at least until the advent of better times. Fully responding to the demands of humanity in behalf of the unfortunate poor, I cannot see the propriety or the justice of reducing a large body of tax-payers to pauperism for the purpose of building gorgeous palaces in which other paupers are to be supported at the public expense.

STATE BOARD OF HEALTH.

Several medical gentlemen of great eminence in their profession have asked my attention to the subject of a State board of health. They believe that such an institution would render essential service in the prevention of sickness and the preservation of life and health. They claim that, in almost every case where local epidemics have prevailed with a severity and fatality which seemed mysterious, their origin can be traced to some neglect of sanitary precautions or to some cause which a properly organized board of health would have discovered and removed. Important as this subject is, it has been impossible for me to find time for such an examination of it as would justify any specific recommendations. I can only ask your careful consideration of it. I do this the more willingly

because I am assured that it is not intended that any expense shall be incurred by the State beyond a moderate salary for the secretary of the proposed board.

COMMISSIONERS OF EMIGRATION.

The condition of the affairs of the Commission of Emigration is embarrassing, and demands prompt consideration. The commission is charged with the duty of watching over all emigrants landed in the city of New York, on their arrival; and, in the cases of any who fall into distress, for some years afterwards.

Heretofore, under authority of the laws of this State, bonds have been required with conditions to indemnify the cities, counties and towns of the State against these passengers becoming a public charge upon them. The practice has been to accept, in lieu of the bond, a certain sum in cash from each passenger, which money constituted the revenue or fund of the commission, out of which it has reimbursed the several counties for any expenditures made in support of distressed emigrants within the period named. This revenue is now entirely cut off by a decision of the Supreme Court of the United States, declaring all such laws unconstitutional. The decision was rendered on the 21st of March, 1876, since which date no commutations have been paid nor bonds given.

Out of the moneys heretofore collected by the Commissioners of Emigration, as agents of the State, the public faith is pledged to provide for all emigrants—in behalf of whom contributions to the fund were made—who may need assistance within five years from the date of their arrival.

There are 120 acres of land on Ward's island upon which were erected hospitals, a refuge, an asylum for insane persons and other buildings, for the use of the commission. The lands were bought and the buildings erected out of the commutation moneys. The title to the property is in the State. The commission estimate its value at \$2,000,000. It is subject to a mortgage of \$200,000.

The Legislature last year, on the recommendation of the Governor, appropriated \$200,000 toward the current expenses from May 1, 1876, to May 1, 1877. Of this there had been expended, up to the third of November last, \$109,000.

I learn by a communication from the president of the commission, dated December 13, 1876, that the number of passengers from foreign ports landed at New York from January 1, 1876, to the above mentioned date, was 109,592. That of these the number which came under the immediate care of the board was 72,326. The number admitted during the same period to the refuge and hospital was 3,953, of which number 687 remained in the institutions,—331 being sick in the hospital, 141 insane in the lunatic asylum, 162 crippled or otherwise disabled in the refuge, and fifty-three children in the nursery.

It seems necessary that some provision be made by which the public faith may be kept with the emigrants—at least until the relief which is sought through a bill pending in Congress is obtained. The importance of the question as to how we are to deal with emigrants is shown by the fact that out of a little more than 8,000,000 reported as arriving since May, 1847, nearly 6,000,000 were landed at New York. Further details will be found in the annual report of the commission.

SAVINGS BANKS.

Recent disasters among our savings banks admonish us of the necessity of rigid restraints against mismanagement. These institutions are created for a special purpose, to wit, to take charge of small savings; the savings of those who handle little money, are inexperienced in investments, and to whom the loss of any part of their limited capital is a serious calamity. Every thing practicable should be done toward absolute security, and the money deposited by this class of persons should never be mixed up with that of others who handle large sums, and are capable of taking care of it

for themselves, nor should it be subjected to the risks which persons of greater means and large experience are accustomed to take.

I recommend a re-examination of the general law passed in 1875, regulating these institutions. Section 34 of that act provides, that for the purpose of ascertaining the surplus held by a savings bank, its interest-paying stocks and bonds shall be estimated at their market value. I suggest instead, that such investments shall not be estimated above cost, nor above par, nor above market value. Any advance in cost is unrealized profit until the stocks are sold; and it may never be realized. If a premium above par has been paid, or is indicated by the current market value, this is sure to disappear if the stocks or bonds are held till maturity; it should not be counted as an asset, except when the bonds have been sold before maturity, and the premium is actually in hand.

I suggest, also, that the privilege, granted by section 27, of leaving ten per cent of the aggregate deposits, and also the current cash daily balances, of savings banks, with an ordinary bank or trust company should be taken away. This is mingling the money of the poor with that of the more speculative and more watchful classes, and subjecting it to the same risks. It is inconsistent with the provision of section 30, which forbids a savings bank lending any part of its funds upon notes, bills of exchange, drafts, or any other personal securities whatever. For such is the very class of securities on which the ordinary business bank will risk the money of the savings bank, in common with that of its other customers. It is, no doubt, desirable that a certain portion of the means of a savings bank should be in such shape that it can be promptly realized; sufficient provision to this end is otherwise made by the same section 27, which now authorizes temporary loans directly by the savings bank itself, upon certain classes of stocks and bonds. I see no reason why a savings bank should not keep its cash means as other banks do, in its own custody, in its own vaults.

An aggregate amount of deposits is now allowed to be made by

one person, up to \$5,000. I suggest that it be reduced to \$1,000, or at most \$2,000; and this inclusive of accumulated interest. Persons of considerable means now put money into a savings bank in order to get better interest than elsewhere. The institutions are not meant for this class. The possession of considerable means implies the capacity to take care of money. Nor do I approve of the provision of section 22, allowing deposits to be received from corporations and societies. Every association must necessarily have a business head, capable of taking proper care of its funds. An association of any kind does not need the aid of a savings bank.

Section 23 implies that savings banks may properly receive deposits of money paid into court or under the order of a surrogate. A separate class of institutions — trust companies — have been provided for this special purpose and such deposits are, for the most part, in large sums. All the creditors of a savings bank ought to be of the same class, to wit, creditors for small sums. I am inclined to the opinion that the disasters among our savings banks are due, to some extent at least, to their having sought, of late years, after a class of business which formerly they never undertook, and for which they are not intended.

Section 33 provides that dividends may be made of not exceeding six per cent per annum. This limit, I think, should be reduced to five per cent. High interest and increased risk always go together. Government bonds pay now only four and a-half per cent per annum, and savings banks ought not to be tempted, by efforts to pay high interest, into dealing in any but the very safest securities.

Section 33 requires every savings bank, when it has acquired a surplus of ten per cent, to divide all accumulations beyond that. I submit that ten per cent is not sufficient guarantee against losses. In view of the great and sudden depreciation to which property of all kinds is sometimes liable, as we know by present experience, I am not sure that any limit should be put upon the accumulation

of a surplus fund. Such a fund had better be too large than too small. It seems to me that the limit of ten per cent is, at all events, much too low. These suggestions are respectfully submitted to your consideration. The purpose I have in view is, that this class of institutions, so valuable to the welfare of the great mass of the community, shall be rigidly confined to the duty for which they were created. They are semi-charitable in their nature, and their aid should not be given to nor their benefits shared by those who need no help.

COMMON SCHOOL STATISTICS FOR THE YEAR ENDING SEPTEMBER 30,
1876.

Total receipts, including balance on hand September 30, 1875.....	\$12,643,969 59
Total expenditures.....	11,410,288 71
Amount paid for teachers' wages.....	7,949,085 17
Amount paid for school-houses, repairs, furniture, etc.....	1,779,124 19
Estimated value of school-houses and sites.....	31,817,904 00
Number of school-houses	11,571
Number of school districts, exclusive of cities..	11,027
Number of teachers employed for the legal term of school	19,341
Number of teachers employed during any portion of the year.....	30,209
Number of children attending public schools...	1,067,199
Number of persons attending normal schools...	6,391
Number of children of school age in private schools	134,404
Number of volumes in school district libraries..	804,802
Number of persons in the State between the ages of five and twenty-one years.....	1,585,601

The foregoing statements should attract attention. Previous to the year 1856, the State appropriated \$800,000 per year for the support of the common schools. The act of 1856 changed the practice by levying a three-quarter mill tax, which produced a

little over \$1,000,000 per year, until 1867, when the rate was raised to one and one-quarter mills, which produced over \$2,000,000, and in consequence of the recent extraordinary increase of valuations, it now produces over \$3,000,000, and for the next fiscal year it will be probably \$3,500,000. Adding to this the amount raised by local taxation, for the same object, we have a grand total of over \$12,000,000.

The amount paid for teachers' wages during the past year was \$7,949,085.17. The whole number of children attending public schools was 1,067,199. The number attending normal schools, 6,391. The number of children of school age in private schools, 134,404. If to all these we add the numbers of those who are instructed at home by private tutors, in academies, colleges and other institutions, not reported, some idea may be formed of the immense amount of money drawn from the people of the State, voluntarily or by taxation, for school purposes. Without intending to intimate the least suspicion that any part of this large amount is unwisely or improperly expended, the subject is of such magnitude as to be worthy of careful examination and scrutiny.

The question whether the State can educate all the children within its limits better than they can be educated in schools organized, conducted and paid for by the parents of the children themselves, has been decided in favor of the State, which is now conducting the experiment on a very large and expensive scale. It is of the utmost importance that the experiment should be successful, and that it should be so conducted as to merit the confidence and support of the entire community. To this end, if there are any errors in the mode of conducting it, they should be corrected before they lead to evils which it may be difficult, if not impossible, to remedy.

The only ground upon which citizens who have no children can justly be compelled to pay taxes for the education of the children of others is, that it is necessary for the safety of the whole

people, under our form of government. Our institutions, by their very theory, carry with them the assumption of a certain grade of intelligence among the citizens. It seems, therefore, to be the duty of a State to see to it that each and every citizen, so far as practicable, shall be educated to such a degree as will enable him to read and understand the laws, the Constitution, and the ballot that he votes on election day. The schools in which education is given to this extent always carry their line of instruction far enough to embrace all the branches usually taught in our common schools. It seems to me to be a clear violation of personal rights for the State to go beyond this and levy taxes to support free academies, high schools and colleges, in which the higher branches of literature and science are taught, and young men prepared for the learned professions. This should be left to individual effort, from which better results always come than from any amount of donations from the State.

It should also be remembered that the expenditure of such large amounts of public money has almost invariably led to great abuses, and there is no security against the same tendency in educational management. The expenditures for school-houses, repairs and furniture, during the last ten years, have amounted to \$19,569,109.97. It is, perhaps, well to inquire whether this large amount has been wisely expended, in the construction of plain, substantial and comfortable school-houses, or whether it has been, to any extent, handled by fraudulent contractors, or devoted to the construction of costly and ornamental buildings for the benefit, possibly, of the owners of adjoining property.

I would also suggest an inquiry as to whether the normal schools are really worth to the system what they cost. I am informed that a very large portion of the pupils instructed in them never follow the profession of teaching for any length of time.

There ought, also, to be found some remedy for the great abuse and expense arising from the number of new school books, and the

frequent changes made, for no good purpose but simply to benefit the publishers and agents. It is undoubtedly true that inducements are frequently offered to school authorities and teachers to aid in the work of changing books and selling new ones. It would be strange if these temptations were always resisted. It seems to me proper that the Legislature should fix some limit to this evil.

Finally, I would recommend a return to the former system of making an appropriation of a specific sum in each year from the State treasury for the benefit of the common schools, and put into the tax levy a rate sufficient to cover the amount — \$2,500,000 at the utmost ought to be, and will be, amply sufficient, if proper care is taken in the use of it. These suggestions are made in a spirit of sincere friendship to our common school system, to the end that it may not be exposed to any just objection; that its administration may be characterized by a wise economy, and by a degree of purity which shall place it above suspicion, and keep it in the future as it now is, strongly intrenched in the confidence of the people.

COLLEGES AND ACADEMIES.

The annual report of the Regents of the University, soon to be communicated to the Legislature, will fully exhibit the condition of the colleges and academies of the State. Notwithstanding the stringency of the times the aggregate attendance in the colleges is somewhat greater, and but little less in the academies, than during former years. Some institutions of either class are adequately endowed, and others are making vigorous efforts to secure such an amount of productive funds as will place them on a secure financial basis.

THE STATE LIBRARY AND MUSEUM OF NATURAL HISTORY.

The Regents of the University, as trustees of the State Library and State Museum of Natural History, will report their condition, in detail, at an early day. Valuable additions to both have been made during the past year, the library having increased to more

than 100,000 volumes. In the departments of law and American history it is unsurpassed by any other State library of the Union.

THE NATIONAL GUARD.

From the report of the Adjutant-General, as well as from my own limited observation, I learn that the condition of the National Guard is entirely satisfactory. The appropriations made for its support and improvement have been carefully and judiciously expended. The organization, spirit and discipline of the officers and men were never better. The improvements in rifle practice, to which special attention has been given during the past year, have been of a very gratifying character, and will be continued. At a comparatively small annual cost the National Guard is kept in such a condition of organization and discipline as to constitute a nucleus around which a large force could, if necessary, be gathered and made effective in a very short time.

At the present time the National Guard consists of eight divisions, eighteen brigades, one regiment and eleven separate troops of cavalry; one battalion and eleven separate batteries of artillery; twenty-five regiments, twelve battalions and eighteen separate companies of infantry — in all comprising 1,546 commissioned officers and 19,878 non-commissioned officers, musicians and privates, making an aggregate force of 21,424, showing an increase of 2,011 over the aggregate of last year.

REDUCTION OF TAXES.

In 1873 the State tax was.....	\$14,800,903 38
In 1874 the State tax was.....	15,727,482 08
In 1875 the State tax was.....	14,206,680 61
In 1876 the State tax was.....	8,529,174 32

The large reduction of taxes for State purposes, shown by the above statement, is due in some measure to the reduced amount required for the bounty debt, but mainly to the stopping of expenditures for new works and extraordinary repairs upon the canals,

and to the other reforms and economies which have been inaugurated and enforced during the last two years. By a rigid adherence to this policy the taxes may be still further reduced during the present year. Unless the people permit a renewal of the wasteful expenditures of former years, they will hereafter have no cause to complain of the amount of State taxes. The load which oppresses them most heavily will be found at their own doors in their town, county and city taxes. When they have the courage to look these in the face, and insist upon their reduction within reasonable limits, they will obtain the full measure of relief to which they are entitled.

The rate of taxation for the current fiscal year was fixed by the Legislature at its last session at three and eleven-twenty-fourths mills. For the next fiscal year it is estimated that two and three-quarter mills will be sufficient. But this estimate is based upon the assumption that the Legislature will decline to make appropriations which are not required for the legitimate expenses of government.

INCREASED VALUATIONS.

The State Assessors inform me that there will be a very large increase in the valuations, especially in the agricultural districts, carrying the total valuations for the whole State up to the probable amount of about \$2,800,000,000. This extraordinary increase is of doubtful propriety. It seems to be an effort to follow upward the unnatural prices caused by the currency inflation, at a time when the inflation has produced its inevitable disasters, and when prices are rapidly falling nearer to actual values. The effect of the increase is to render it uncertain what amount any specified rate will produce. Instead, therefore, of levying specific rates for particular objects, which may produce too much or too little, it would be better to appropriate the amounts required and fix a rate sufficient to cover them, so that, if there be a surplus, it shall remain in the treasury.

The efforts of the assessors should be not so much to increase valuations as to produce a just and equitable distribution of the burdens of taxation among the people. When this point is gained it is of little importance whether the valuations are above or below what are called actual values. For many obvious reasons it would be better that they should be below rather than above. The true value of property is rarely known. It is not a matter of fact, but of opinion. Hence it is always estimated and the tendency usually is to estimate too high.

EXEMPTING CHURCHES, ETC.

It is proper to refer in this connection to propositions which are sometimes made to increase the valuation by changing the policy which has always prevailed in this State of exempting churches, schools and hospitals from taxation. I cannot too strongly express my disapproval of any such change. Our people of all classes and all creeds have surrounded themselves with these institutions of civilization which are foremost in the influences that diminish the expense of government by lessening the infractions of law. They should not be discouraged by the imposition of burdens from which they have hitherto been exempt.

SURPLUS OF THE BANKS.

Taxing the whole surplus of the banks in addition to their capital is neither equal justice nor sound policy. Besides compelling them to pay more than their fair proportion, it induces them to divide their surplus among the stockholders, thereby diminishing the security which it gives to the public so long as it is held by the banks. In times like the present the exigencies of every day may diminish both surplus and security. The subject is submitted to your careful consideration and wise discretion.

LEGISLATION IN APPROPRIATION BILLS.

A very objectionable practice has grown up of inserting general legislation in appropriation bills. The effect of it is to conceal

legislative provisions in places where they ought not to be and where the public generally do not think of looking for them. It also puts it beyond the power of the Governor to withhold his approval from such provisions unless he vetoes the whole appropriation bill in which they are contained. I trust that the practice will be discontinued altogether, and that the question may not be presented as to whether such provisions shall become law or whether the appropriation bills containing them shall be returned disapproved.

THE STATE SURVEY.

Several instances of the pernicious mode of legislating above referred to will be found in the "supply bill" passed at the last session. The most conspicuous among them is the provision for instituting and organizing "an accurate trigonometric and topographical survey of the State." Without any application by the people, with no appreciable evil to remedy, with no practical inconvenience in the experience of a hundred years, and at a period of great pecuniary embarrassment, a plan is enacted in an appropriation bill for embarking the State, against the wishes of its people, in a work which promises to run through half a century, and to cost an unlimited amount of money. The mode and the matter of the enactment are alike objectionable, and I recommend the prompt repeal of that portion of the supply bill.

THE CURRENCY.

The vast agricultural, manufacturing, commercial and financial interests of the State make a sound and stable currency a matter of the highest importance. It is, however, of little use to enter into any extended discussion of the subject here. The country has been deluged with essays in regard to it, and all intelligent readers have as much information as they can hope for from such sources. So far as legislation can produce any effect, it must be looked for in Congress; the State is, of course, powerless in that direction.

Fifteen years ago, wise action in the national legislature would have saved the country from the universal collapse which has fallen upon all business pursuits. At that time the whole amount of currency in circulation in the United States was estimated at between two and three hundred millions of dollars. Within four years from that time, the amount was carried up to nearly eight hundred millions, and has hitherto been kept up to over seven hundred millions. The result is the same as has always been produced by similar experiments, ever since a circulating medium has been known and used in the commercial world. There was a rapid rise of prices, wild speculations, all branches of business unduly stimulated, over-trading, luxurious habits of living, general demoralization, followed by the inevitable revulsions, wide-spread bankruptcy, suspension of industries, and multitudes of people deprived of employment and of the means of supporting life. Whilst we can only look to Congress for any legislative measures of relief from this state of things, it is quite evident that very little can be hoped for in that way. Substantial relief will only be obtained by a correction of the bad habits into which we have been led; by a return, if need be, to the simplest industries, to a reduction of all unnecessary expenditures, and a rigid economy, both in public and in private life.

RAILROAD REPORTS.

Complaints are frequent among persons interested, both stockholders and bondholders, that the reports now rendered by railroad companies, including those operating street roads, are not in such form as to afford a clear and satisfactory view of their condition. These corporations being creatures of the State, endowed with great privileges, it is right that we should require from time to time, from each one of them, a full and clear exposition of its situation. Companies whose affairs are in a good condition will have no objection to this being made known, and it is due to the people

that if any are unsound their condition should be exposed as promptly as may be. Concealment of such a state of facts from all but a few principal managers will often enable those who are most to blame for waste and loss to shift the burden thereof upon the shoulders of innocent persons.

A memorial has been sent to me, addressed to you and to the Legislatures of all the New England States, recommending a certain form of returns, which has been agreed upon, after consultation with some prominent railroad companies, in a conference of the commissioners of those States, and the State Engineer and Deputy State Engineer of this State. The memorial is signed by all these parties. One object in view is that the returns shall be of one and the same form in all the States, with the hope, no doubt, that this uniformity will be extended to those of the whole country. It is obvious that where the line of a railroad extends into two States, as is frequently the case, it must be more or less inconvenient to the company to make up its statements in two different forms, and that, moreover, there will be advantages to the public in having these returns uniform. I suggest to you an amendment of the general railroad law, giving to the State Engineer the power to prescribe the form of the returns — the same power that is vested in the railroad commissioners in Massachusetts — and such other power pertaining in that State to railroad commissioners as may be necessary to insure and enforce a proper exposition of the actual condition of these companies. You will be able to judge of this matter better after an examination of the memorial, and the papers accompanying it, which I shall cause to be sent to you. The form upon which the memorialists agreed will be found in the possession of the State Engineer.

INSECURITY OF PLACES OF PUBLIC RESORT.

The recent calamity at the Brooklyn Theatre, said to be unequalled in horror by any like event heretofore, calls our attention

most forcibly to the duty of providing by law, and by the severest penalties, against such disasters in the future. Those who seek to make money by gathering the people in crowds into their buildings, are bound to take every precaution to insure their absolute safety. The Legislature should enact regulations for all such buildings, so as to provide for the prompt suppression of fire and rapid egress for the crowd in case of alarm. In fact, the provision for safety and for exit should be so complete and so manifest that panics would not occur.

The danger is not limited to theatres and places of public amusement; rooms used for lectures or for public meetings, our large school-houses and even churches are, for the most part, so constructed that in case of panic a large number of the crowd within is likely to be fatally injured in the fierce, natural struggle to escape.

The buildings owned by the public are as faulty as those used for private purposes. We are familiar with one or more fatal disasters among the children who, in cities, are crowded into four-story school-houses. Attention should, also, be given to the security of passengers in cases of fire upon steamboats and railway trains.

Nothing more than this brief allusion to the topic can be necessary. Even without it, I am confident that you would promptly have given your attention to the subject.

MUNICIPAL REFORM.

The report of the commission, appointed by my predecessor, to consider the subject of the government of cities, has not yet been received. I hope that I shall be enabled to present it to you early in your present session. In some respects the government of the city of New York is in almost a chaotic condition; appropriations of money are regulated, not by the Common Council, but by a board of four persons, of whom only one is chosen by the people. The distribution of administrative and legislative powers is imperfect and uncertain. An out-going mayor has power to appoint, in some cases,

subordinate administrative officers for a term exceeding that of the incoming mayor. Of the enormous debt resting upon the city, as I learn from one of the commissioners, the amount of \$85,000,000 has been created by direct action of the State Legislature, without being asked for or approved by the common council of the city or the board of supervisors of the county, or by its tax-payers or its people. There are twenty-one of these objectionable laws still in force, under which the full amount of debt authorized by them has not, as yet, been contracted. It would be well to examine into this matter at once, for the purpose of repealing such of these acts as, in your judgment, should not be left in force. In some of the acts the amount of indebtedness has no limit, but it is provided that, on the simple requisition of a subordinate administrative department, bonds of the city may be issued, provided that they do not exceed a certain sum per annum. The number of years during which the acts may continue to apply is not defined. The laws referred to are, in many instances, imperative, requiring the debt to be contracted.

The evil practice of commanding the creation of debt, for local purposes, by local governments, is not confined to laws relating to the city of New York alone. Upon our statute book will be found many acts "authorizing and requiring" boards of supervisors, trustees of villages and the like, not only to levy extraordinary local taxes, for purely local purposes, but to incur indebtedness for such purposes. The duty of the Legislature in such matters is properly defined in article 8, section 9, of the Constitution, which says: "It shall be the duty of the Legislature to provide for the organization of cities and incorporated villages, and to restrict their power of taxation, contracting debts," etc. Whenever the Legislature undertakes to impose on a neighborhood local taxes or local indebtedness for local purposes, it assumes to have a knowledge of the case which none can have except those who live in the neighborhood affected. It undertakes to discharge the functions of

village trustees, town officers, city aldermen or supervisors of counties; for which functions the men selected especially for these places are better fitted. Whatever evils may occasionally appear in local government should be remedied by the people at home, upon whom the responsibility should rest.

CORRUPT USE OF MONEY IN ELECTIONS.

The Constitution and laws of this State contain many very stringent and excellent provisions for securing the purity of the ballot box and preventing the corrupt use of money in elections. The penalties which they inflict upon those criminals who violate them are very severe. It is, however, apparent that in every important election the laws upon this subject are grossly violated or evaded. I recommend a thorough re-examination and revision of them with a view of rendering convictions more certain and with additional and severer penalties. So vitally important is the preservation of the purity of elections to the permanent existence of our form of government, that in my opinion any man who buys or sells a vote should be forever thereafter disfranchised and subjected to such other penalties as will be most likely to prevent the commission of the crime.

BETTING UPON ELECTIONS.

Another gigantic evil, closely allied to the corrupt use of money, is the practice of betting upon the results of elections. This practice has always existed to some extent; but it, and the evils resulting from it, have recently been developed to an alarming extent. It is unquestionably true that many millions of dollars were staked upon the result of the late election. Every person interested in such bets had a strong motive for corrupting and bribing voters, and there is no doubt that many yielded to the temptation. The heat and excitement of the contest were also greatly intensified by the same cause. I recommend the enactment of a law, with severe penalties, entirely prohibiting all bets, direct, or indirect, upon the result of any election.

NATIONAL AFFAIRS.

The recent presidential election threatens to prove an epoch of solemn portent in our history. For the first time in the twenty-two elections which have been held for President and Vice-President of the United States, the result remains a subject of controversy after the canvass of the votes within the States has been made and announced. The two houses of Congress have been heretofore repeatedly required to pass upon the authenticity and validity of electoral votes, but in no former instance has the election turned upon the questionable votes. In every former case the result has been determined by electoral votes which were not in controversy. In the present instance one candidate for President and one candidate for Vice-President have received 184 undisputed electoral votes, as well as a popular majority exceeding a quarter of a million. Another candidate for President and another candidate for Vice-President have received 165 undisputed electoral votes. All the votes of three States—four in Florida, eight in Louisiana and seven in South Carolina—making nineteen in all, are still in dispute; also one of the three votes of Oregon. In all these cases two sets of returns have been “transmitted to the seat of government, directed to the President of the Senate,” to await the action of the two houses of Congress whose duty it is to verify, ascertain and count the electoral votes.

In a situation involving such momentous results as the chief magistracy of this republic, all the baser as well as the better forces of society are naturally embattled to secure the prize. It is in such crises of history that the controlling force of cardinal principles is liable to be weakened, dangerous concessions to be made, perilous precedents established, sacred traditions violated, and the most important bulwarks of constitutional freedom rendered less secure.

In Louisiana we have seen a State government imposed on the people by the military force of the federal executive, under color of a pretended order of a federal judge, which order in itself was void,

and which led to the resignation of the judge who made it, to escape impeachment. We have seen the government thus imposed by military force condemned as illegal and a mere usurpation, by both houses of Congress, and the electoral votes given under its auspices, rejected in the counting of the presidential votes in 1873 by the concurrent judgment of the same tribunal. We have seen the government so imposed create "a returning board" practically vested with absolute power to revise and, if they please, to reverse the results of the election by the people of the State, and thus organize a political mechanism under which an oligarchy in temporary possession of the legislative power of a State might perpetuate their ascendancy indefinitely.

I pause here in this statement to interpose, in behalf of the people of this great commonwealth, a solemn denial of the power of any State government or of the federal government to vest such powers as are claimed by the Louisiana returning board in any canvassing board whatever.

In the first place, such powers in respect to the choice of presidential electors are not warranted by, but are repugnant to the Constitution of the United States. The provision of section 1 of article 2 of that instrument, "that each State shall appoint, in such manner as the Legislature thereof may direct, its presidential electors," does not confer on the Legislature of a State an unlimited power over the subject. No one will pretend that a temporary majority in the Legislature of a State could grant to an individual or to a set of individuals, the power to appoint presidential electors; that it could make this grant for a period of years, or indefinitely, or to his or their heirs or assigns.

What it cannot do in form it cannot do in substance; what it cannot do directly it cannot do indirectly. The choice which a Legislature is authorized to make for a State, in the mode of appointing presidential electors, is limited to a mere selection between certain known forms of action, recognized in the practice

of popular government, and consistent with the nature of popular government. It is a choice of modes, but must not change or destroy the essential character of the thing itself. It is subject to the condition that "the *State* shall appoint" the presidential electors. The State, that is, the political community known in our jurisprudence and constitutional law by that name, must "appoint," and in doing so it must act by and through its known and rightful organs. At the time this provision of the federal Constitution was adopted, it was contemplated that the Legislature of a State possessing all the governmental powers not withdrawn by the provisions of the State Constitution, or transferred to the government of the Union, might itself choose the electors. And, indeed, that was the mode at first generally practiced by the States. The State Legislature at that time was regarded as the most natural and the legitimate organ of the State. The power to choose presidential electors might properly be conferred upon the people of the State by a general ticket, the voters throughout the State choosing all the electors; or they might be chosen by the people of the State voting in districts, each district choosing one elector. These were methods consonant with the principles of our system of government, and by either of which it could be properly said that the State did, in fact, "appoint" the electors.

It is historically certain that these different modes were in the contemplation of the convention which formed the Constitution. Experiencing some difficulty, however, in imposing this duty upon all the States by any one uniform system, it devolved upon the Legislatures of each State the authority to choose from among these methods, one for the exercise of that power which it granted in declaring that "each State shall appoint."

While the Legislature of a State may provide that presidential electors shall be appointed by an election of the people, it cannot provide that that election shall not be a reality; that it shall be a sham, and that the actual power of determining the choice shall be

invested in a packed committee, whether it be called a "returning board," or by any other name.

Neither can it invest a board of canvassers with indefinite or with arbitrary powers, nor with any authority which, by the principles and practice of our jurisprudence, and the policy of our elective system are not fairly incident to the function of ascertaining the vote of the people. This seems to me to be the obvious, the wise interpretation of the Constitution of the United States and of its laws. Any other doctrine will open the way to abuses, frauds and usurpations, which must end in destroying popular elections. The moment we depart from a strict construction of grants of power in derogation of the integrity and efficiency of the elective system, we shall be able to find no rule that will protect the rights of the people. We shall tempt transient majorities to seek to prolong their power by tampering with the machinery of elections, and the easiest, most convenient and most effectual method for such a purpose is by the contrivance of returning boards, which shall be packed and equipped with powers hitherto unknown to our laws and practically subversive of the will of the people.

In the particular case of Louisiana, other equally grave illegalities are believed to exist. The powers vested in the returning board are inconsistent with the provision in the Constitution of that State which guarantees the elective franchise to voters, and also with the provision which confers the judicial power upon the courts. It is probable that the powers of this board, by the law of Louisiana, do not apply to presidential electors; that the board itself was not constituted in accordance with the law under which it was created; and finally, that a condition, without which the returning board could not get jurisdiction in the cases where it assumed to reject votes of whole districts, was not complied with. There is every reason to believe that the authority exercised by that returning board is void, as repugnant to the Constitution of

the United States, and also to the Constitution and laws of Louisiana.

In this state of the law, that returning board, according to public statements of conceded facts, by manipulations of the returns, have changed a majority for one set of presidential electors of about 9,000 to a majority for another set of about 4,000, which would be equivalent to a change of over 80,000 votes in the State of New York.

In Florida we have seen a board of State canvassers, solemnly adjudged by the highest court in the State to possess none but ministerial powers, assume the authority to reverse the choice of electors as shown on the face of the returns made by the officers who conducted the elections and received the votes ; and to do this in open disobedience and contempt of the judicial tribunal having jurisdiction in such matters, and vested with the right of final judgment.

In South Carolina we have seen the board of State canvassers fabricating a canvass in like disobedience and contempt of the Supreme Court having jurisdiction and the right of final judgment ; we have seen federal soldiery take possession of the capitol of the State, and a corporal at the door determining who were the elect of the people and who were to be permitted to represent them as legislators. Notwithstanding some of these acts have been disavowed by the federal executive, no mark of disapprobation has been put upon the authors of the outrages ; the officer in command goes still unrebuked, and when the returning board were committed to prison for contempt, by the highest court in the State, a judge of the United States District Court is sent down to South Carolina, and, without jurisdiction in the case, grants a writ of *habeas corpus*, and discharges the offenders. These proceedings are the more extraordinary and alarming when we consider that such violations of law and of right have been resorted to to overturn elections, all the officers conducting which, were of the same

political party with the candidates in whose favor these acts have been committed; that the elections were held under the surveillance of troops of the United States, without any constitutional warrant for their presence, and that the judicial decisions thus set at naught cannot be suspected of any partisan bias, for they were rendered both in Florida and South Carolina by judges all of whom were of the same political party with the returning board.

These interferences of the military power have been committed in flagrant violation of the Constitution and laws. They were not provoked by domestic violence; they were not invited in the only way that would have made them constitutional, by the Legislature of the State; and they were continued after the election was over and during all the subsequent proceedings of the canvassing board. Their tendency was to overawe the voters under the pretense of keeping the peace, though by measures in themselves unlawful, and to deliver dishonest officials from the natural sense of responsibility and the natural timidity in regard to the consequences of their acts, which are providential limitations to men's conceptions of the crimes upon which they may venture.

While these things were going on in the South a member of the Cabinet at Washington was acting as chairman of a partisan national committee, and with the co-operation of some of his colleagues in the Cabinet, counseling and systematically stimulating these desperate measures.

The result which these proceedings seem designed to accomplish cannot be secured without one farther step in the processes of usurpation. The fabrication of electoral votes amounts to nothing unless they can be counted by the tribunal whose constitutional duty it is to verify and authenticate them. That inexorable necessity has given birth to a new device for counting the votes, not only unknown to the Constitution but in conflict with the construction hitherto always accepted, and with the invariable practice and precedents. That device is for the President of the Senate to usurp the power

of determining what votes shall be counted and what shall not be counted, and to exercise that power in disregard of the orders of the two houses. It would not be credible that so monstrous a claim as this could be seriously asserted if leading Senators had not publicly avowed it.

Nothing could be more abhorrent to the spirit of our system of government than such a one-man power. The President of the Senate is elected by the Senators, and they in turn are elected by the State legislators. He is, therefore, three removes from the people. If such a power were to have been vested in a single man, a depository would have been chosen not so far removed from popular accountability. But the people of this country will never vest such a power in any one man, however selected. They will never consent to a new construction of the Constitution and laws that bears such fruit. They will stand firmly in the ancient ways, and insist that the electoral votes in this emergency shall be counted as they have always been counted, by the two houses of Congress, and by nobody else. They will look with just suspicion upon the purposes of any who would propose to depart from the precedents which have been hallowed by time, and the uniform practice of the republic from its foundation.

The Constitution of the United States confers upon the President of the Senate no power whatever in respect to the counting of the electoral votes, except "in presence of the Senate and House of Representatives," to "open" all the certificates which may be transmitted by the colleges to the seat of government, directed to him.

The Constitution confers upon the President of the Senate no power to determine the authenticity and validity of an electoral vote, or to interfere in any wise with any such question.

No President of the Senate has ever claimed or exercised such a power at any of the twenty-one presidential elections that have occurred under our Constitution.

The mode of procedure for the counting of electoral votes has been invariably regulated by the two houses of Congress, by concurrent resolution or standing rules adopted before the count. Those resolutions or rules have prescribed every step in the whole process; every function of the tellers and of the President of the Senate, whenever any additional service, even of the most formal sort, has been required of him.

In every instance the counting has been conducted in conformity with the procedure thus prescribed by the two houses; by servants designated by the two houses under instructions and in the presence of the two houses, and with the entire concurrence and the implicit obedience of every President of the Senate who has participated in these ceremonies.

So often as any question has arisen as to the authenticity or validity of an electoral vote, the two houses have assumed and exercised the exclusive power to act upon and determine that question. They have, in contemplation of law, themselves made every count; they have from the first, assumed exclusive jurisdiction to regulate and govern the whole transaction by temporary concurrent orders adopted for the occasion, by standing joint rules and by the enactment of laws. Such has been the uniform and uninterrupted course of precedents, the invariable practice of the government, and the official exposition of the Constitution which has been deliberately adopted, invariably acted upon, and universally accepted.

No fitter repository of all such powers as are vested in or must of necessity be exercised by the government, can be found than the two houses of Congress. They are not only the general agents of the people under our representative system, but in case of the failure of a choice of President and Vice-President by the electoral colleges, they are expressly charged by the Constitution with the duty of making the election.

The people of the United States will never consent to have their Representatives in Congress stripped of these powers, or tolerate

this usurpation by a deputy of the Senate, or by any single person, and still less by an officer who is frequently interested as a candidate in the result of the count.

In this sentiment and purpose the State of New York cordially concurs. Foremost among all our American commonwealths in population, in the variety and extent of her industries and interests, she has in every vicissitude of public affairs put forth all her strength, moral and physical, to maintain the existence and the just authorities of the Union, and she can never consent that the time-consecrated methods of constitutional government shall be supplanted or overthrown by revolutionary expedients.

L. ROBINSON.

ANNUAL REPORT

OF THE

COMPTROLLER

OF THE

STATE OF NEW YORK.

TRANSMITTED TO THE LEGISLATURE JANUARY 8, 1877.

JEROME B. PARMENTER, STATE PRINTER.
1877.

STATE OF NEW YORK.

No. 3.

IN ASSEMBLY,

January 3, 1877.

ANNUAL REPORT OF THE COMPTROLLER.

STATE OF NEW YORK:

COMPTROLLER'S OFFICE,

ALBANY, *January 3, 1877.* }

To the Speaker of the Assembly:

SIR. — I have the honor herewith to transmit to the Legislature the Annual Report prepared by my predecessor, in office, the Hon. Lucius Robinson, exhibiting the condition of the finances of this State at the close of the fiscal year ending September 30, 1876.

I am, respectfully,

Your obedient servant.

F. P. OLCOTT,

Comptroller.

REPORT.

STATE OF NEW-YORK:

COMPTROLLER'S OFFICE,
ALBANY, December 20th, 1876. }

To the Legislature:

In obedience to the statute, which requires the Comptroller to superintend and manage the fiscal concerns of the State, to exhibit the same to the Legislature, and to suggest plans for the improvement and management of the public revenues, I have the honor to submit the following report:

The accounts of the State are kept with so many different funds, that persons who are unacquainted with them are apt to become confused and find it difficult to understand, from the mass of figures, what is the exact financial condition of the State. I have, therefore, drawn together the results of all the accounts and present the same in one brief and simple statement as it would appear if all the funds of the State were consolidated into one. The statement is as follows:

RECEIPTS AND PAYMENTS.

Aggregate balance in the treasury of all the funds, October 1, 1875.....	\$3,126,778 98
Aggregate receipts during the fiscal year ending September 30, 1876	18,623,986 29
	<hr/>
	\$26,750,765 27
Deduct payments during the year.....	17,827,711 49
	<hr/>
Balance in the treasury September 30, 1876.....	<u>\$8,923,053 78</u>

The several funds from which these aggregate results are drawn are, the Canal Fund, the Free School Fund, the Elmira Female Col-

lege Educational Fund, the General Fund Debt Sinking Fund, the Bounty Debt Sinking Fund, the General Fund Revenue, the Long Island Railroad Company Sinking Fund, the Common School Fund, the Literature Fund, the United States Deposit Fund, the College Land Scrip Fund, the Cornell Endowment Fund, and the Military Record Fund.

The following statements exhibit in a condensed form the receipts and payments on account of the several funds above named during the fiscal year ending September 30, 1876, and the balance in the treasury at the beginning and close of said fiscal year.

CANAL FUNDS.

Balance in the treasury October 1, 1875.....	* \$3,834,107 03
Receipts.....	2,842,771 16
	<hr/>
	\$6,676,878 19

Balance in treasury Sept. 30, 1876,		

* Deficiency.

REVENUES.

The following condensed statement gives the revenues and expenditures for the last fiscal year, showing a surplus of \$1,534.65.

Amount of receipts into the treasury during the year ending September 30, 1876 (see Schedule I),	\$11,645,711 85
Amount of warrants drawn on the treasury remaining unpaid September 30, 1876	805 78
	<hr/>
	\$11,646,517 68
Deficiency of the revenue October 1, 1875	\$733,863 77
Amount of warrants drawn on the treasury during the year ending September 30, 1876 (see Schedule II).....	6,097,812 76
Amount transferred to the Bounty Debt Sinking Fund, being proceeds of the two-mill tax levied in 1875, in pursuance of chapter 325, Laws of 1875.....	4,640,849 00
Amount transferred to the following funds for interest on money in the treasury during the year, belonging to said funds, viz.:	
School Fund	\$83,362 27
Literature Fund....	9 08
United States Deposit Fund.....	460 85
General Fund Debt Sinking Fund ...	87,621 27
Long Island R. R. Co. Sinking Fund,	189 98
	<hr/>
	171,643 45
	<hr/>
	\$11,644,168 98
Amount of warrants drawn on the treasury remaining unpaid September 30, 1875	814 00
	<hr/>
	11,644,982 98
Balance of the revenue September 30, 1876...	<hr/>
	\$1,534 05

The foregoing statement presents the account of the General Fund revenue, as it is recorded on the books of this office, but owing to balances due from county treasurers at the close of the fiscal year, and payments on account of the appropriations of 1876, included in the tax payable in 1877, the apparent surplus of \$1,534.65 does not represent the true state of the fund at the date indicated. The following supplementary statement gives the correct result, and shows a surplus of \$763,697.16.

SUPPLEMENTARY STATEMENT.

Balance of the revenue September 30, 1876, as appears in preceding table.....	\$1,534 65
Add for unpaid balances due from county treasurers September 30, 1876, on account of tax of 1875	232,992 05
Add amount paid on account of 1876 appropriations included in the tax levy of that year, but not payable until April and May, 1877	866,640 58
	<hr/>
	\$1,101,167 28
Deduct balances of 1875 appropriations unpaid and in force September 30, 1876.....	337,470 12
	<hr/>
Actual surplus September 30, 1876.....	<u>\$763,697 16</u>

By reference to the last annual report it will be observed that the surplus was estimated at \$915,294.22. The actual result is, therefore, \$151,597.06 below the estimate. The difference is accounted for by the fact that the items of revenue, aside from the State tax, were based on the receipts of the previous year, and the earnings of the State prisons alone have fallen off during the past year over \$136,000 below the amount estimated.

DEBT.

On the 30th September, 1875, the total funded debt was \$28,328,686.40, classified as follows:

General Fund	\$3,119,526 40
Contingent.....	68,000 00
Canal	10,086,660 00
Bounty	15,054,500 00
	<u>\$28,328,686 40</u>

On the 30th September, 1876, the total funded debt was \$23,315,898.58, classified as follows:

General Fund.....	\$3,092,238 58
Contingent.....	5,000 00
Canal.....	10,081,660 00
Bounty	10,137,000 00
	<u>\$23,315,898 58</u>

The following statement shows the amount of the State debt on the 30th September, 1876, after deducting the unapplied balances of the sinking funds at that date:

	Debt on the 30th September, 1876.	Balances of sink- ing funds on 30th September, 1876.	Balance of debt after applying sink- ing funds.
General Fund.....	\$3,092,238 58	\$2,010,529 26	\$181,709 32
Contingent	5,000 00	* 3,861 26	1,138 74
Canal	10,081,660 00	2,121,050 34	7,960,609 76
Bounty	10,137,000 00	+ 9,160,309 90	976,690 10
	<u>\$23,315,898 58</u>	<u>\$14,191,889 50</u>	<u>\$9,127,870 84</u>

The State debt on the 30th September, 1875, after deducting the unapplied balances of the sinking funds, amounted to..... \$14,747,304 26

On the 30th September, 1876, to..... 9,127,870 34

Showing net contributions to the sinking funds during the year, of..... \$5,619,433 92

The actual reduction of the debt during the same period, by cancellation, being..... \$5,012,787 82

* Deficiency. + Deducting interest accrued to October 1st, 1876, payable January 1st, 1877.

GENERAL FUND DEBT.

The following statement gives the items of the General Fund debt, on the 30th September, 1876, and they are presented more in detail in the tables of the appendix accompanying this report:

Astor stock, chapter 302, Laws of 1827, and chapter 86, Laws of 1832	\$561,500 00
Deficiency loans under chapter 216, Laws of 1848,	2,341,887 77
Comptroller's bonds.....	66,155 94
Indian annuities	122,694 87
	<hr/>
	\$3,092,238 58
	<hr/>

The principal of the debt is payable as follows :

On demand	\$30,155 94
At pleasure	2,258 082 64
In 1878	800,000 00
	<hr/>
Paying interest	\$3,088,238 58
Not paying interest	4,000 00
	<hr/>
	\$3,092,238 58
	<hr/>

This debt has been reduced during the last fiscal year by the sum of \$27,287.82. Four thousand dollars of the debt which became due July 1, 1875, had not been presented for payment on the 30th September, 1876, but as the funds for its redemption were provided, the stock ceased to bear interest from date of maturity.

GENERAL FUND DEBT SINKING FUND.

The following statement gives the receipts and payments on account of the General Fund Debt Sinking Fund, for the fiscal year ending September 30, 1876 :

Receipts, viz. :

Balance in the treasury October 1, 1875.	\$3,029,605 70
Transferred from the General Fund, for interest on money in the treasury, during the year.....	87,621 27
	<hr/>
Carried forward.....	\$3,117,226 97

Brought forward..... \$3,117,226 97

Payments, viz. :

Redemption of State stock, 5's, July 1, 1875	\$27,000 00	
Redemption of Comptroller's bond, payable on demand.....	287 82	
Interest on General Fund debt...	166,441 90	
Premium on coin to pay interest on debt.	6,278 44	
Indian annuities.....	6,689 45	
		<u>206,697 61</u>

Balance in treasury September 30, 1876..... \$2,910,529 36

The contributions to this fund from the surplus revenues of the canals, sufficient for the payment and extinguishment of the General Fund debt, were all made as required by section 2, article 7 of the Constitution, the last of such contributions having been received in 1873. They were not, however, applied as that instrument directs, but were used in payment of other appropriations, leaving the General Fund debt still in existence. An amount of money sufficient to extinguish it is in the treasury after the receipt of the taxes of each year, and is reported in the sinking fund; but if used to pay the debt there would be a very large deficiency of money in the treasury for the payment of the current expenses of the government. Of the debt the sum of \$800,000 will be due July 1, 1878, and can probably be paid from the sinking fund without taxation. The whole of the residue is payable at pleasure, and may be redeemed at any time if there is money to redeem it with. It is held by the State in the form of investments for the various trust funds.

BOUNTY DEBT.

On the 30th September, 1876, the outstanding stocks and bonds representing this indebtedness amounted to \$10,137,000, classified as follows :

Registered stock	\$9,278,000 00
Coupon bonds...	859,000 00
	<u>\$10,137,000 00</u>

BOUNTY DEBT SINKING FUND.

The following table gives the receipts and payments on account of this fund, for the fiscal year ending September 30, 1876:

Receipts, viz.:

Balance in the treasury October 1, 1875.....	\$444,762 95
Proceeds of two mill tax levied in 1875, in pursu- ance of chapter 325, Laws of 1865.....	4,640,849 00
Principal of Westchester county bonds due May 1, 1876	12,000 00
Principal of United States, six per cent, registered bond	1,000 00
Interest and premium on investments.....	445,459 61
Premium on stocks exchanged.....	265,931 50
Difference on exchange of stocks returned in pay- ment for additional purchase	680 00
	<hr/> \$5,810,683 06

Payments, viz.:

Interest on debt	\$884,047 50	
Purchase of stocks for invest- ment, viz.:		
Bounty loan, 7's of 1877.....	311,000 00	
Interest on stocks purchased.....	7,946 40	
Premium on stocks purchased...	15,576 10	
Difference on exchange of stocks,	1,080 00	
Commissions on exchange of stocks,	5,269 75	
Transferred for revenue bonds of New York city, received in pay- ment of State tax, as an invest- ment.....	4,000,000 00	
	<hr/>	\$5,224,919 75
Balance in the treasury September 30, 1876..		<hr/> \$585,763 31

Since the close of the fiscal year the further amount of \$565,000 of bounty loan stock has been purchased and canceled, leaving the amount outstanding at the date of this report \$9,572,000. The balance of cash in the sinking fund, together with the proceeds of the one-third mill tax and the securities on hand, will be amply suffi-

cient for the extinguishment of the whole debt at its maturity on the seventh day of April next.

CONTINGENT DEBT.

The only contingent debt of the State, reported last year, was that incurred for the Long Island Railroad Company, amounting to \$68,000, which became due by its terms August 1, 1876. To the close of the fiscal year \$63,000 had been presented for redemption and paid. Funds have been provided for the payment of the remaining \$5,000 on presentation. There is, however, a deficiency in the sinking fund provided for the redemption of this stock of \$8,861.26, owing to the refusal of the railroad company to pay the premium on the coin purchased to pay this debt.

CANAL DEBT AND CANAL REVENUES.

The aggregate of the canal debt, on the 30th September, 1875, was \$10,086,660, with an aggregate unapplied balance of sinking funds of \$1,448,345.51, leaving the real balance unprovided for of \$8,638,314.49. On the 30th September, 1876, the account stood as follows:

Aggregate debt.....	\$10,081,660 00
Aggregate of sinking funds.....	2,121,050 24
Balance unprovided for.....	<u>\$7,960,609 76</u>

The following statement of the canal debt, September 30, 1876, classifies it in reference to the constitutional provisions for its payment, and shows the amount redeemable each year, and the rate of interest.

CANAL DEBT.

(Under article 7, section 1, of the Constitution.)

Stock not bearing interest.....	\$6,160 00
---------------------------------	------------

Redeemable as follows, viz.:

Six per cent July 1, 1837	\$160 00
Five per cent January 1, 1874..	6,000 00
	<u>6,160 00</u>

Total canal debt, under article 7, section 1, of the Constitution	<u>\$6,160 00</u>
--	-------------------

(Under article 7, section 3, of the Constitution.)

For the enlargement of the Erie, the Oswego, etc., viz.:

Stock not bearing interest.....	\$9,500 00
---------------------------------	------------

Redeemable as follows, viz.:

Six per cent November 1, 1873 .	\$9,000

Total canal debt, under section 12, paying interest.....	880,000 00
--	------------

RECAPITULATION OF THE FOREGOING STATEMENT OF THE CANAL DEBT
PAYING INTEREST ON THE 30TH SEPTEMBER, 1875.

Under article 7, section 3, of the Constitution....	\$9,186,000 00
Under article 7, section 12, of the Constitution...	880,000 00
	<u>\$10,066,000 00</u>

Amount in sinking funds, September 30, 1876:

Under section 1, article 7	\$58,347 76
Under section 3, article 7	941,591 73
Under section 12, article 7	1,121,110 75
	<u>\$2,121,050 24</u>

The tolls collected for the year ending September 30, 1875, were.....	\$1,902,990 64
For the year ending September 30, 1876, they were	1,477,331 55

A falling off of.....	<u>\$425,659 09</u>
-----------------------	---------------------

The receipts from all sources for the year ending September 30, 1875, were.....	\$1,925,995 63
For the year ending September 30, 1876, they were	1,487,332 89

A falling off of.....	<u>\$438,662 74</u>
-----------------------	---------------------

The expenses for the year ending September 30, 1875, were.....	\$1,467,315 95
For the year ending September 30, 1876, they were	1,149,194 61

A falling off of.....	<u>\$318,121 34</u>
-----------------------	---------------------

The net revenues for the year ending September 30, 1875, were.....	\$458,679 68
For the year ending September 30, 1876, they were	338,138 28

A falling off of.....	<u>\$120,541 40</u>
-----------------------	---------------------

For all further details relating to the revenues, expenses and debts of the canals, reference is made to the report of the Auditor of the Canal Department.

PUBLIC EXPENDITURES.

The following statement will enable the Legislature to compare the expenditures in certain departments for the years 1875 and 1876:

	1875.	1876.
Clerks in public offices.....	\$78,072 99	\$77,766 27
Expenses of public offices.....	15,333 78	13,671 03
Legislature, pay of members and officers	332,474 10	325,158 91
Legislature, contingent expenses,	103,641 16	133,919 46
Printing for the State	166,945 75	157,079 17
Hall for the State Cabinet of Natural History....	20,877 98	19,496 08
Militia and National Guard.....	247,882 72	300,997 24
Governor, incidental expenses of government	3,950 79	4,061 63
Promotion of agriculture.....	18,261 88	18,623 06
Rivers, roads and bridges.....	28,018 96	31,027 75
State Prisons, including transportation of convicts	914,528 18	938,374 43
New York Institution for Deaf and Dumb.....	121,819 97	96,714 15
New York Institution for Blind, New York.....	43,899 32	45,181 05
Orphan Asylums, etc.....	32,219 14	7,554 74
Quarantine	62,453 18	25,913 15
Insurance Department.....	74,310 38	67,782 59

EXPENDITURES FOR EDUCATIONAL PURPOSES.

The expenditures from the public treasury during the last fiscal year for these purposes were \$3,434,539.85, of which \$2,959,725.13 were the proceeds of a direct tax of one and a-quarter mills for common schools.

The purposes and amounts of the several State appropriations and payments are as follows :

Academies, for dividends.....	\$42,617 02
Academies, for instruction of common school teachers.....	14,872 63
Common school dividends.....	245,400 00
Cornell University.....	40,000 00
Indian schools.....	6,182 09
Normal schools.....	32,080 30
School commissioners' salaries	90,162 68
School tax, one and a-quarter mills	2,959,725 13
Elmira Female College	3,500 00
	<hr/>
	\$3,434,539 85

The expenditures for the same period by the State for the support of asylums and hospitals for the deaf, blind, insane and idiotic, were \$415,089.05.

The following is the schedule of the institutions in aid, or for the support of which, payments have been made from the treasury, with the amounts paid for each :

Deaf and dumb	\$123,764 06
Blind	100,681 05
Insane	154,643 94
Idiot	36,000 00
	<hr/>
	\$415,089 05

These amounts do not include the large sums appropriated for building purposes to the institutions which have been in progress during the year. That class of expenditures will appear in another part of this report.

STATE ASYLUMS FOR THE INSANE.

The following statement shows the amount expended under appropriations by the Legislature for each of the asylums for the insane receiving State aid, either for the erection of buildings or for main-

tenance, from their respective organizations, and showing the aggregate expenditure for that purpose to be \$5,493,771.12.

	State Lunatic Asylum, Utica.	Willard Asy- lum for the In- sane.	Hudson River State Hospital for the Insane.	Buffalo State Asylum for the Insane.	Homeop'thic Asylum for the Insane, Middletown.
From 1837 to 1864	\$358,957 08
1865	19,008 26	\$639 89
1866	21,369 94	64,622 42
1867	22,768 64	118,643 53
1868	16,458 98	87,873 41	\$33,302 00
1869	41,903 77	110,565 80	124,900 49
1870	73,586 14	184,185 04	349,467 00
1871	55,309 13	173,779 56	303,463 06	\$305 13
1872	21,539 06	190,325 01	203,166 66	41,258 13
1873	69,032 31	117,919 75	127,350 00	230,000 00	\$44,000 00
1874	43,680 30	33,303 77	123,250 00	253,000 00	89,000 00
1875	65,851 52	123,597 96	21,770 00	41,784 65	158,915 73
1876	33,000 00	99,041 02	134,748 77	146,000 00	116,500 00
				140,000 00	136,204 10
	\$1,851,364 13	\$1,250,397 16	\$1,450,037 08	\$857,352 91	\$544,619 89

The following were the number of patients in the several asylums at the close of the fiscal years ending September 30, 1874, 1875 and 1876:

	1874.	1875.	1876.
Utica	590	608	561
Willard	879	984	1,175
Poughkeepsie	212	200	191
Middletown	38	80	83
Totals.....	1,719	1,872	2,010

STATE PRISONS.

The following statement shows the expenditures and earnings of each of the prisons for the year ending September 30, 1876:

	Advances from the treasury.	Received from earnings.	Excess of expenditures.
Auburn	\$207,696 08	\$78,776 72	\$128,919 36
Clinton	315,325 78	64,035 77	251,290 01
Sing Sing	381,327 19	91,182 09	290,045 10
Miscellaneous expenditures not distributed, including \$26,279.60 for transportation of convicts	83,925 38
	\$904,419 05	\$333,994 58	\$704,379 85

The excess of advances from the treasury over receipts from earnings are as follows:

In 1867 it was	\$366,874 79
In 1868 it was	512,547 74
In 1869 it was	595,774 45
In 1870 it was	461,304 99
In 1871 it was	470,309 23
In 1872 it was	465,881 84
In 1873 it was	597,289 06
In 1874 it was	588,537 42
In 1875 it was	545,549 67
In 1876 it was	704,379 85

The number of convicts in each of the prisons September 30, 1873, 1874, 1875 and 1876, was as follows:

	1873.	1874.	1875.	1876.
Auburn	1,104	1,202	1,312	1,281
Clinton	567	552	553	623
Sing Sing	1,354	1,306	1,616	1,605
Totals	<u>3,025</u>	<u>3,060</u>	<u>3,481</u>	<u>3,509</u>

STATE REFORMATORY, ELMIRA.

The amount paid during the fiscal year ending September 30, 1876, on this account was as follows, viz.:

Advances to superintendent of construction	\$141,693 08
Advances to the managers appointed by chapter 207, Laws of 1876	55,000 00
	<u>\$196,693 08</u>

And the total amount to the close of the last fiscal year is \$916,811.06.

Under the efficient administration of the managers, and the superintendent appointed by them, the buildings are rapidly approaching completion, with expenditures largely reduced; 170 prisoners have been received from the other prisons, thereby relieving them to that extent; and the institution, when it can be devoted exclusively to the purposes originally intended, gives promise of great usefulness.

NEW CAPITOL.

There was paid from the treasury for the construction of the New Capitol, during the fiscal year ending September 30, 1876, as follows, viz.:

Advances to commissioners.....	\$742,381 73
"Outstanding obligations" for labor and materials, audited by the superintendent.....	165,506 19
Interest on award for land	600 00
	<hr/>
	<u>\$908,487 92</u>

There has been advanced to the commissioners since the 1st of October, 1876, to December 10, \$300,000, making the total amount paid from the State treasury to the date of this report, including the purchase of lands \$7,598,395.16.

Of the appropriation of \$800,000, by chapter 193, Laws of 1876, there remains \$200,000, subject to the draft of the commission.

AUCTION DUTIES.

The receipts from auction duties for the past fiscal year, as compared with those of the previous year, were as follows:

Year ending September 30, 1875.....	\$70,432 05
Year ending September 30, 1876.....	75,788 00
	<hr/>
Increase	<u>\$5,355 95</u>

The following statement shows the amount received for auction duties for ten years, viz.:

1867	\$191,618 67
1868	127,701 72
1869	95,785 64
1870	121,602 18
1871	100,196 68
1872	79,069 96
1873	76,499 37
1874	69,756 59
1875	70,432 05
1876	75,788 00
	<hr/>

SALT DUTIES.

The report of the superintendent of the Onondaga salt springs, shows the following receipts and expenditures for the fiscal year, viz. :

Receipts :	
From duty on salt manufactured	\$55,851 04
From rents and penalties.....	67 00
	<hr/>
	\$55,918 04
Expenditures.....	50,623 38
	<hr/>
Net revenue.....	<u>\$5,294 66</u>

The number of bushels of salt inspected the last year was 5,585,077, against 6,589,676 the preceding year. The estimate of expenses for the ensuing year is \$60,000, same as for the current fiscal year.

TRUST FUNDS.

The following statement exhibits the capital of the several trust funds at the close of the last fiscal year, with the receipts and payments on account of the same, up to its close. The schedules annexed to this report, from I to VIII inclusive, exhibit more in detail the dealings with the funds for the year, and their present condition :

	Capital Sep- tember 30, 1876.	REVENUE, ETC.		
		Receipts dur- ing the year, including bal- ances October 1, 1875.	Payments during the year.	Balance September 30, 1876.
School Fund.....	\$3,105,107 68	\$346,640 31	\$341,744 77	\$4,895 54
Literature Fund.....	271,980 76	56,198 82	42,439 70	13,754 13
United States Deposit Fund.....	4,014,530 71	312,338 59	241,409 33	70,924 27
College Land Scrip Fund.....	473,402 87	31,012 48	46,355 26	* 15,342 78
Cornell Endowment Fund.....	128,596 61	16,104 94	12,000 00	4,104 94
Elmira Female College Educational Fund.....	50,000 00	3,500 00	3,500 00
Long Island Railroad Company Sinking Fund.....	71,607 25	75,468 51	* 3,861 26

SCHOOL FUND.

The investments and present condition of this fund are exhibited in Schedule III; annexed to this report, together with the receipts and disbursements of the revenue for the fiscal year just closed. The

* Deficiency.

increase and diminution of the fund during the year is shown by Schedule IV. There was an actual increase of the capital by the sum of \$25,000 received from the income of the United States Deposit Fund, as provided in article 9, section 1, of the Constitution.

LITERATURE FUND.

The capital of this fund has not been increased during the last fiscal year.

Schedule V exhibits the amount and condition of this fund in detail.

UNITED STATES DEPOSIT FUND.

Schedule VI, in the appendix, is referred to for a statement of the condition of this fund.

COLLEGE LAND SCRIP FUND.

The capital of this fund, on the 30th September, 1876, amounted to \$473,402.87. Of this capital there has been invested during the past fiscal year \$10,000 in State stock, canal deficiency loan, six per cent redeemable July 1, 1891, and \$10,000 in Buffalo city bonds, six per cent redeemable March 15, 1879; also \$9,000 in seven per cent Buffalo city bonds, redeemable July 1, 1916. All these securities were held by the Comptroller in trust for the Long Island Railroad Company Sinking Fund, and were sold, the money being required to redeem the debt of said company falling due August 1, 1876. (For details of investments see Schedule VII.)

The receipts on account of the revenue during the last fiscal year were \$31,012.48 and the payments \$31,332.50, viz.: \$28,000 to Cornell University, and \$3,332.50 premium and accrued interest on stock and bonds purchased.

CORNELL ENDOWMENT FUND.

The capital of this fund, on the 30th of September, 1876, amounted to \$128,596.61. (For particulars see Schedule VII.)

From the revenue of this fund there has been paid to the Cornell University during the year \$12,000.

(For report required by chapter 481, Laws of 1866, see Schedule XXII, in Appendix.)

RECEIPTS AND EXPENDITURES.

The receipts into and payments from the treasury, on account of all the funds, except the Canal and Free School Fund, for the fiscal year ending September 30, 1876, were as follows:

Receipts	\$17,118,732 66
Payments	12,053,721 51

Balance in the treasury September 30, 1876..	<u>\$5,065,011 15</u>
--	-----------------------

The receipts and payments on account of the General Fund revenue for the fiscal year ending September 30, 1877, are estimated as follows:

Estimated receipts	\$5,564,490 64
Estimated payments	4,892,552 29

Estimated surplus September 30, 1877	<u>\$671,938 35</u>
--	---------------------

All estimated payments are based on appropriations now in force and any that may be made by the present Legislature are not taken into account.

The details of these estimates will be found in Schedule X.

STATE OF THE TREASURY.

Balance in the treasury October 1, 1875	\$4,285,798 19
Amount received into the treasury on account of the several funds during the year ending September 30, 1876 (see Schedule I)	12,832,128 69
Amount of warrants drawn on the treasury remaining unpaid September 30, 1876	805 78

	<u>\$17,118,732 66</u>
--	------------------------

Amount of warrants drawn on the treasury on account of the several funds during the year ending September 30, 1876 (see Schedule II)

\$12,052,907 51

Amount of warrants drawn on the treasury remaining unpaid September 30, 1875

814 00

	<u>12,053,721 51</u>
--	----------------------

Balance in the treasury September 30, 1876,	<u><u>\$5,065,011 15</u></u>
---	------------------------------

The balances due from and to the treasury September 30, 1876, were as given in the following statement :

From the Military Record Fund, revenue, deficiency	\$142 74
From College Land Scrip Fund, revenue, deficiency,	15,342 78
From the Treasurer, for balance in the treasury...	5,065,011 15
From the Long Island Railroad Company Sinking Fund, deficiency.....	3,861 26
	<hr/>
	\$5,084,357 93

To the School Fund, viz.:

Capital	\$1,422,028 01
Revenue	4,895 54
	<hr/>
	\$1,426,923 55

To the Literature Fund, viz.:

Capital	\$302 82
Revenue.....	13,754 12
	<hr/>
	14,056 94

To the United States Deposit Fund, viz.:

Capital	\$24,700 03
Revenue.....	70,924 27
	<hr/>
	95,624 30

To the College Land Scrip Fund, viz.:

Capital	16,602 87
---------------	-----------

To the Cornell Endowment Fund, viz.:

Capital	\$29,096 61
Revenue	4,104 94
	<hr/>
	33,201 55

To the General Fund Debt Sinking Fund.....	2,910,529 36
--	--------------

To the Bounty Debt Sinking Fund	585,763 31
---------------------------------	------------

To the Military Record Fund, capital	121 40
--	--------

To General Fund revenue.....	1,534 65
	<hr/>

5,084,357 93

The following statement gives the principal objects to which the General Fund revenues were appropriated for the past fiscal year,

the sources from whence they were derived, and the amounts received and disbursed :

Receipts.

Auction duty	\$75,788 00
Salt duty.....	57,782 10
Interest on deposits	71,783 00
State prisons.....	233,994 58
Fees of public offices.....	7,916 75
State tax	10,970,736 46
Non-resident taxes	92,085 21
Banking department	19,518 25
Railroad companies	12,447 80
Gas-light companies.....	2,420 24

	<hr/>

TAXATION.

The following table shows the assessed valuation of the real and personal property, the rate of taxation for State purposes, and the amount of the tax of each year from 1859 to 1876, both inclusive, 1859 being the year in which the State Board of Equalization was organized and began its labors:

YEAR.	Real estate.	Personal.	Aggregate equalized valuation.	Rate of State tax in mills on each dollar of valuation.	State tax levied, including school tax.
1859.....	\$1,097,564,524	\$307,349,155	\$1,404,913,679	2 1-2	\$3,512,284 26
1860.....			1,419,397,520	3 5-6	5,440,640 48
1861.....			1,441,787,430	3 7-8	5,586,848 79
1862.....			1,441,303,946	4 3-4	6,884,193 75
1863.....			1,451,454,817	5	7,272,274 08
1864.....	1,161,750,000	839,349,877	1,500,999,877	5 1-4	7,880,249 35
1865.....	1,158,327,371	892,552,314	1,550,879,685	4 53-80	7,230,976 53
1866.....	1,196,403,416	834,826,220	1,531,229,636	5 9-16	8,517,464 85
1867.....	1,237,703,092	436,404,683	1,664,107,725	7 3-5	12,647,218 71
1868.....	1,327,409,886	438,685,254	1,766,095,140	5 4-5	10,243,317 01
1869.....	1,418,132,555	441,987,915	1,860,120,770	5 5-8	10,463,179 33
1870.....	1,532,730,007	434,280,278	1,967,011,185	7 41-158	14,285,976 55
1871.....	1,599,980,166	462,607,732	2,052,587,898	5 79-120	11,613,943 61
1872.....	1,644,379,410	447,248,035	2,083,627,445	9 3-8	19,580,882 30
1873.....	1,692,523,071	437,102,315	2,129,625,386	6 95-100	14,800,908 38
1874.....	1,750,693,918	418,608,955	2,169,302,873	7 1-4	15,727,482 08
1875.....	1,960,352,703	407,427,399	2,367,780,102	6	14,206,680 61
1876.....	2,108,323,872	357,941,401	2,466,267,273	3 11-24	8,529,174 32

The gross valuation of taxable property in 1866,

was..... \$1,531,229,636

The gross valuation in 1876, was..... 2,466,267,273

Increase in ten years..... \$935,037,637

Increase of valuation of 1876 over 1875..... \$98,487,171

The State tax for the current fiscal year is 3 11-24 mills, for the following purposes:

For schools..... $1\frac{1}{2}$ mills, per chap. 381, Laws of 1876.

For general purposes, including New Capitol, etc..... $1\frac{7}{8}$ mills, per chap. 381, Laws of 1876.

For bounty debt..... $\frac{1}{8}$ mill, per chap. 381, Laws of 1876.

Total..... $3\frac{11}{24}$ mills.

The above tax of 3 11-24 mills on the present val-

uation will yield..... \$8,529,174 32

For the ensuing fiscal year I recommend the following rate of taxation, viz. :

For the General Fund.....	1 mill.
For schools.....	1 mill.
For the New Capitol and other extraordinary appropriations	$\frac{1}{2}$ mill.
For deficiency in Canal Debt Sinking Fund.....	$\frac{1}{4}$ mill.
Total.....	<u><u>2$\frac{3}{4}$ mills.</u></u>

INCREASED VALUATIONS.

The extraordinary increase in valuations, as shown by the foregoing statements, will attract attention. It appears that the gross valuation in 1876 was \$2,466,267,273, and that the increase of valuation in ten years was \$935,037,637. The local assessors have, during the last year, adopted still higher rates of assessment, and, although official returns are not yet received, I learn from the State assessors that there will be from three to four hundred millions added to the valuation for the ensuing year, making the amount upon which the next tax is to be levied about \$2,800,000,000, and showing an increase in valuations in eleven years of about \$1,300,000,000.

This remarkable increase is owing partly to the natural advance of real values, partly to former under-valuations, but mainly to the fictitious rise in prices caused by the long use of an irredeemable and inflated paper currency. Large cities, centers of trade and speculation, were the first to feel and respond to the effects of inflation. Their assessed valuations increased rapidly, whilst those in the agricultural districts remained stationary, and they complained, not without reason, that they were compelled to bear more than their fair proportion of the taxes. Now that the unnatural stimulus has been succeeded by the collapse and ruin which were inevitable, and when valuations are falling in the commercial metropolis the assessors in the interior suddenly raise their valuations most unreasonably, as if to atone for past delinquencies by rushing to the opposite extreme.

These fluctuations in assessed values are pernicious. It was a

serious mistake when prices, not values, rose so rapidly, for assessors to attempt to follow them. They should have adhered to real and permanent values instead of being governed by inflated prices which were sure to be temporary. Assessments above real and substantial values produce great evils by tempting the Legislature into extravagant expenditures, because the rate of taxation although diminished produces a larger amount of revenue. It is a poor return to the taxpayer when he finds himself called upon for an increased amount of money, to tell him that the assessors have written a larger value opposite to his name on the assessment roll. The important object to be gained is relative equality between all tax-payers. If this is accomplished as nearly as practicable it is of little consequence whether the assessments are somewhat above or below the supposed values. It is of course very difficult to know the real value, as that is not usually a matter of fact, but of opinion only.

Whether the largely increased valuation upon which the next tax is to be levied shall be considered right or wrong it should not be used to inflict heavier burdens of taxation upon the people. The rates should be reduced in proportion to the increase. I have accordingly recommended such reduced rates as I believe will be sufficient if due economy in appropriations shall be observed.

THE SCHOOL TAX.

Ten years ago the State tax for free schools was three-fourths of a mill upon a valuation of \$1,531,229,636, yielding the sum of \$1,148,422.22. For the current fiscal year the tax is $1\frac{1}{4}$ mills upon a valuation of \$2,466,267,273, yielding the sum of \$3,082,834.09. Adding to this amount the local taxes for schools, the aggregate rises to the enormous sum of about \$12,000,000. With the largely increased valuation for the ensuing year, if the same rate be maintained, the amount of tax will be much heavier than ever before. I would respectfully suggest that the rate be reduced to one mill, which will probably produce over \$2,800,000, fully believing that the efficiency and usefulness of the schools will be increased rather than diminished by the exercise of a little of the frugality and

economy which have become necessities in the present condition of financial affairs.

WARRANTS FOR SCHOOL MONEYS.

In connection with this subject, I respectfully ask attention to some difficulties and confusion which arise in the accounts by reason of the law, which makes the Superintendent of Public Instruction a comptroller in relation to a portion of the school moneys.

The tax for the Free School Fund is payable from the State treasury on the warrant of the Superintendent of Public Instruction, countersigned by the Comptroller. In 1876 only five counties in the State paid any portion of this tax into the State treasury, in excess of the amount apportioned to them as their quota, viz.: Columbia, Dutchess, Kings, New York and Westchester. New York was required to pay \$922,259.90, after reserving its apportionment. The money was received into the treasury as follows:

1876. April 18	\$150,000 00
April 24	150,000 00
May 6	100,000 00
May 12	100,000 00
May 15	222,259 90
May 19	200,000 00

It will be observed that no portion of the school tax due from New York was received by the time the first half of the other State taxes were payable. The result was, as in former years, that numerous applications were made to the Comptroller, by county treasurers, for permission to withhold from the amount required to be paid, the difference between the amount raised for school purposes and the amount apportioned, until such time as the Superintendent of Public Instruction should furnish the requisite funds. The Comptroller felt constrained to yield to such requests, based on representations that distress would follow the rigid enforcement of the law for the payment of the taxes, thereby withdrawing the means relied upon to pay in part the wages of teachers and other expenses. The result was, that on the first of May about fifty county treasurers appeared

in arrear on the books in this office, for taxes payable April 15, and which they had actually paid for school purposes.

The revenue from the Common School, Literature and United States Deposit Funds, which is appropriated for educational purposes, has invariably been paid on the warrant of the Comptroller. The payments from this source, with others of a similar nature, amounted during the last year to \$477,407.40. Appropriations to the amount of \$32,080.80 were paid by the Comptroller during the last fiscal year to various Normal schools, from the General Fund. During the same period, appropriations to the several State Normal schools amounting to \$144,000 were in force, payable on the warrant of the Superintendent of Public Instruction, from the Free School Fund. This system (or want of system) of paying money to the same institutions from various funds by different officers, is calculated to confuse and complicate the accounts, and may lead to serious errors.

There is another complication by reason of the present system. Chapter 110, Laws of 1871, limits the compensation of the county treasurers, with the exception of a few counties, to \$500 for paying the State tax into the State treasury, viz., one-half of one per cent for receiving and one-half of one per cent for paying. It is claimed that the school tax is liable for its proportion of this charge. Many of the treasurers now receive the full compensation allowed by law, irrespective of the school tax, and the strictest care and watchfulness is required to prevent overpayment by reason of the division of the accounts. It is therefore very important that all of the State taxes should be charged and settled on the books of a single department.

Previous to the law authorizing the Superintendent to draw warrants, no moneys were paid out of the treasury aside from canal funds except upon the warrant of the Comptroller. I am not aware that any inconvenience whatever was experienced thereby. It appears to me that it would relieve the Superintendent from inconvenience to return to the same practice. He is now obliged to draw his own warrants for a portion of the school moneys, which must be counter-

signed by the Comptroller before they can be paid. The Comptroller has no means at his command of verifying the accounts and is therefore obliged to countersign them simply upon his confidence in the capacity and integrity of the Superintendent. Such a countersignature is of no value. The law should be changed so that all warrants should be drawn by the Comptroller. If this be not done he should be relieved from the necessity of countersigning warrants of the correctness of which he knows nothing.

LEGISLATIVE PRINTING.

During the past year a very large reduction has been made in the cost of legislative printing. Within the last ten years the expenditures for this purpose have varied from \$85,000 to \$226,000 per annum, the average being about \$120,000. The contracts have usually been made upon blind and crafty bids, which no one but an expert could understand, and the cost was swollen by an immense quantity of printing which was illegal and of little use to any one except to the contractor. The late Secretary of State and Comptroller having failed to make a contract in December, 1875, owing to the unsatisfactory character of the bids, the duty devolved upon the present incumbents of those offices, who succeeded in making a contract on the 8th February, 1876, by which the contractor bound himself to do all the work required by law for the gross sum of of \$47,500 per session. The result has been most gratifying, as will be seen by the following statement:

Amount paid and claimed for legislative printing from January 1, 1875, to February 8, 1876, thirteen months and eight days.....	\$139,130 81
Amount paid and to be paid for legislative printing for the same length of time under the present contract	52,513 89
Amount saved under present contract.....	<u>\$86,616 92</u>

As there is a small balance claimed by the former contractor which has not been finally adjusted, the amount of saving may be slightly varied, but not to any large extent.

It is respectfully suggested that hereafter all contracts for legislative printing should be for a gross sum: It will not only save money but will also save the necessity of experts to interpret juggling bids. Provision should also be made, with the assent of the present contractor, either to continue his contract to the end of the year 1878, or to make a new contract in December, 1877, so as to avoid the inconvenience of changing contractors in the middle of a legislative session.

REDUCTION OF TAXES.

In 1873 the State tax was.....	\$14,800,903 38
In 1874 the State tax was.....	15,727,482 08
In 1875 the State tax was.....	14,206,680 61
In 1876 the State tax was.....	8,529,174 32

These figures show that the State has entered earnestly into the work of economy, retrenchment and reform. No department of the public service has suffered by the reduction of expenses. On the contrary there has been manifest improvement in consequence of the correction of abuses and the arrest of wasteful and corrupt uses of public moneys. By a faithful continuance of the same wise and just policy, the expenditures and the taxes may be still further reduced and the overburdened tax-payers still further relieved. It is believed that this may be done during the present year to the extent of over a million of dollars without injury to any public interest. If the people will insist upon and enforce, in their towns, counties and cities, the same economical policy, they will find much less suffering from heavy taxes than they have hitherto endured.

DEATH OF MR. PHELPS.

Philip Phelps, late Deputy Comptroller, died in July last in the eighty-eighth year of his age. He had been connected with this office fifty years; two years as clerk and forty-eight as deputy. He was originally appointed in 1826, by the late Governor Marcy, then

Comptroller, and with a very brief interruption was continued through all subsequent administrations to the time of his death. The State never had nor could have a more competent and faithful officer. A public meeting was held at the Comptroller's office for the purpose of paying a suitable tribute to his memory. The proceedings of the meeting are appended to this report in pursuance of a request contained in one of the resolutions, and as an appropriate record of the life of a public servant of unsurpassed purity and worth.

Mr. Henry Gallien, who has been for many years the second deputy, has been appointed Deputy Comptroller in place of Mr. Phelps.

L. ROBINSON,
Comptroller.

In Memoriam.

IN MEMORY OF PHILIP PHELPS,

LATE DEPUTY COMPTROLLER,

DIED MONDAY, JULY 10, 1876.

At a meeting of State officers and citizens, held at the Comptroller's office, in the State Hall, in the city of Albany, on the 13th day of July, 1876, for the purpose of paying a suitable tribute to the memory of PHILIP PHELPS, late Deputy Comptroller, deceased, the Lieutenant-Governor, William Dorsheimer, was called to the chair, and the Auditor, George W. Schuyler, was chosen secretary.

Comptroller Robinson stated the object of the meeting, and read the following letters:

ALBION, *July 12th*, 1876.

HON. L. ROBINSON, *Comptroller* :

DEAR SIR. — Your favor, inviting me to be present to-morrow at a meeting to pay a proper tribute to the memory of the late Deputy Comptroller, PHILIP PHELPS, is received, and I regret that my engagements are such as to render it impracticable to attend. He occupied the position under me during one term, and it affords me pleasure to bear testimony to his high character, his strict integrity, and to the perfect accuracy and faithfulness with which he discharged every official duty. He has furnished a bright example of a long life of official usefulness, without a stain or suspicion of wrong. As the practical disbursing of millions of public money, I do not believe he was ever benefited a penny by any official act, nor that, through favoritism or other improper motive, he ever swerved from the path of strict fidelity and rectitude. He was an honest man, in the normal sense of that term, and hence unassuming and unpretentious — performing every official act from a fixed and conscientious sense of duty, and never for self-aggrandizement or other selfish or unworthy motive. He has rendered the State great service, which I hope will be publicly recognized and suitably remembered. While Comptroller, our relations were of the most cordial and confidential character, and I am gratified with this oppor-

tunity to acknowledge his services to me in the discharge of official duties, and to express my high respect and esteem for him as a man, a Christian and a public officer, and I deeply sympathize with his family in their bereavement.

Yours truly.

S. E. CHURCH.

U. S. TREASURY, NEW YORK, *July 12th, 1876.*

HON. LUCIUS ROBINSON:

DEAR SIR. — I regret that official duties will prevent my attending the funeral of Mr. PHELPS, late Deputy Comptroller, of whose decease you inform me in your note of yesterday. The occasion is one that calls for some expression of the public regard and confidence which he so largely enjoyed during fifty years of official service, and I am glad, therefore, that those who knew him best will, in such form as may be thought most proper, place on record their estimate of his character, and their testimony of the fidelity with which he discharged every duty devolved on him in one of the most important and responsible positions under the State government.

Respect for the memory of such a man is a sentiment, the growth and perpetuity of which are so essential to a pure and honest administration of public affairs, that, should it ever cease to manifest itself, it will mark a decadence in the virtue of the people, the baleful effects of which must be felt through every branch of the public service.

Believing this, I would hold up the life and conduct of Mr. PHELPS as worthy to be read and emulated by all men, confident that the history of the State furnishes no brighter example of fidelity to its interests, and of all that is commendable in those who are charged with the duty of protecting them.

Very respectfully and truly.

THOMAS HILLHOUSE

ALBANY, *July 12th, 1876.*

HON. L. ROBINSON, *Comptroller:*

I regret that I am not able to be present at the meeting called upon the occasion of the death of Mr. PHELPS, the late Deputy Comptroller. I would gladly pay tribute to the memory of one so deservedly respected and honored by all who knew him. The value of his services in that position, which he so ably filled for near half a century, none better knows or can better appreciate than yourself, who, for four years of peculiar responsibility and labor, was brought in daily contact with

him, and upon whose fidelity and watchful care of the public interests you, as the head of the department and the chief financial officer of the State, had necessarily greatly to rely. Although his position was subordinate, it cannot be denied that the value of his services was not inferior to those occupying more prominent positions. For intelligence, for integrity, for a faithful, conscientious discharge of his responsible duties, and a care for the interests of the State, he had no superior. He was courteous, dignified and gentlemanly in his intercourse with others, but at the same time firm and decided in all that concerned official duty. From his first appointment to the office of Deputy Comptroller by Mr. Marcy, in 1828, to the time of his enforced withdrawal from active duties, he enjoyed the confidence and respect of every successive Comptroller, and at all times was regarded by the State government and the public as a trustworthy and honored public servant, and his valuable services were recognized by the Legislature by the enactment, unanimously passed, continuing to him his office and its emoluments during his life, after the infirmities of age were upon him and he was disabled for the performance of the active duties of the trust.

I look with complacency upon the part I took in recommending that recognition of his worth.

Again regretting that I cannot unite with you in paying fitting tribute to his memory,

I am, very respectfully, yours.

W. F. ALLEN.

NATIONAL COMMERCIAL BANK, }
ALBANY, *July 13th*, 1876. }

DEAR SIR. — Attendance at the funeral of Mr. Prentice will prevent my being present at the meeting this day, called by Judge Allen and yourself, to pay respect to the memory of Deputy Comptroller PHILIP PHELPS, deceased.

I am aware that no words of mine can add to the high esteem in which he has been held by this entire community, and by the people of the State, and yet my personal and official relations with Mr. PHELPS were, for many years, so close and pleasant as to forbid silence.

During his entire official connection with your department, with the exception of two years, this bank has been the State depository, and its officers have had full opportunity to witness his extraordinary fidelity, and the wonderful accuracy with which he discharged every duty.

The man does not live, nor ever did live, who could move PHILIP PHELPS from the strict path of duty.

Excuse the use of this language to one so intimately connected with

him as yourself, and so much better able to appreciate his personal worth and the value of his services.

His memory will long be an inspiration to those in public employ.

I remain, very truly and respectfully,

Your obedient servant.

ROBT. H. PRUYN, *President.*

The Hon. LUCIUS ROBINSON, *Comptroller, etc.*

Comptroller Robinson then offered the following resolutions :

Resolved, That the death of PHILIP PHELPS has closed a long life illustrated throughout by a degree of personal purity and official integrity which could not be surpassed, and which is rarely equalled. In 1828 he was promoted by William L. Marcy, then Comptroller, from a clerkship in the office to the responsible position of Deputy Comptroller, which, with a very brief interruption, he continued to hold from that time until his death, a period of forty-eight years. Although firm and decided in his political principles, his high character and invaluable services caused him to be retained through all changes of politics and parties. He was not ambitious for promotion, and no prospect of pecuniary advantage could swerve him from the strictest line of truth and justice. An intelligent and faithful performance of his whole duty was the rule of his life. Courteous, affable and easy of access to all, there was, nevertheless, in his personal presence, and in the atmosphere which seemed to surround him, an influence which repelled and caused to stand back every one who might desire to approach him with improper suggestions. Through all his long life and public service, although constantly exposed to temptations, no one ever suspected him of yielding to them in any manner. There can be little reason to sorrow for him, when, at a ripe old age, cheered by a Christian's faith, he goes to his final account, with a record so entirely pure, and leaving to the world an example so worthy of imitation.

Resolved, That we tender to the family of the deceased assurances of our deep sympathy in their bereavement.

Resolved, That a copy of these resolutions be signed by the officers of this meeting and transmitted to the family of the deceased, and that the Comptroller be requested to append them to his next annual report.

The Honorable John V. L. Pruyn then addressed the meeting in a few appropriate remarks, and the resolutions were thereupon unanimously adopted.

WILLIAM DORSHEIMER,

Chairman.

GEO. W. SCHUYLER, *Secretary.*

APPENDIX.

SCHEDULES REFERRED TO IN THE ANNUAL REPORT OF THE COMPTROLLER.

Schedule I shows the moneys received into the treasury during the year ending 30th September, 1876.

Schedule II shows the amount of warrants drawn on the treasury during the same year.

Schedule III shows the condition of the School Fund on the 30th September, 1876.

Schedule IV shows the increase and diminution of the capital of the School Fund during the year ending 30th September, 1876.

Schedule V shows the condition of the Literature Fund on the 30th September, 1876.

Schedule VI shows the condition of the United States Deposit Fund on the 30th September, 1876.

Schedule VII shows the condition of the Mariners', College Land Scrip and Cornell Endowment Funds on the 30th September, 1876.

Schedule VIII shows the condition of the Bounty Debt Sinking Fund, the Elmira Female College Educational Fund, the receipts and payments on account of the Military Record Fund, during the fiscal year ending the 30th September, 1876, and the amount of annuities payable to the several Indian tribes.

Schedule IX gives the particulars of the General Fund and Contingent State Debts.

Schedule X is an estimate of the receipts and payments for ordinary expenses of government and other purposes for the fiscal year, commencing October 1, 1876.

Schedule XI shows the amount of the four and three-fourths mill tax, levied in 1875, on the valuation of the real and personal estate in each county, the expenses of collection, and the amount payable into the treasury; also the amount of unpaid taxes returned to the Comptroller's office and admitted.

Schedule XII gives the names of the clerks in the public offices (except the Canal, Banking and Insurance Departments), the amount paid to each during the year, and their present salaries.

Schedule XIII is an estimate of the appropriations required for the expenses of government for the fiscal year, commencing on the 1st October, 1877.

Schedule XIV shows the amount of duties paid by the several auctioneers of the State during the year ending 30th September, 1876.

Schedule XV is the report made to the Comptroller by the Superintendent of the Onondaga Salt Springs.

Schedule XVI gives the cost of stationery delivered to the public offices during the year.

Schedule XVII shows the amount of town, county, school and State taxes, and the rate of taxation, with the aggregate equalized valuations of real and personal estate in the several counties upon the returns of 1875.

Schedule XVIII shows the valuations of real and personal estate in the several counties, as returned to the Comptroller's office for the year 1876.

Schedule XIX shows the aggregate valuations of real and personal property, the State and local taxes, and the rate per cent for each year from 1845 to 1876, inclusive.

Schedule XX shows the rate of State tax on each dollar of the aggregate valuations of property from 1816 to 1876, both inclusive.

Schedule XXI shows the stocks purchased and exchanged on account of the Bounty Debt Sinking Fund, during the year ending 30th September, 1876.

Schedule XXII is a report of the Treasurer of Cornell University in respect to College Land Scrip.

Schedule XXIII shows the amount of taxes on lands of non-residents returned for the years 1873, 1874 and 1875, with the amount thereof admitted and rejected from said returns; also the amount of said rejected taxes which have been corrected and subsequently admitted.

(I.)

SCHEDULE

Of moneys received into the treasury during the year ending September 30, 1876.

ON ACCOUNT OF THE GENERAL FUND.

Auction duty		\$75,788 00
Salt duty		57,782 10
Fees of office of Secretary of State.....	\$3,894 25	
Fees of Comptroller's office.....	525 19	
Fees of office of Court of Appeals	3,497 31	
		7,916 75
Peddlers' licenses		1,120 00
Sales of Natural History of the State.....		160 00
Sale of General Fund lands.....		926 22
Tolls of Cayuga lake inlet		165 67
State tax, exclusive of one and one-fourth-mill tax for common schools (for amount of tax levied in 1875, see Schedule XII).....		10,970,736 46
For expenses of committees of Commissioners of the Land Office to examine lands under water.....		50 00
Interest on deposits of the Treasurer.....		71,783 00
Fees of notaries.....		708 00
Fees of Court of Arbitration		814 85
From shore inspector, paid by treasurer of Queens county		42 17

State Prison Earnings.

Auburn	\$78,776 72	
Clinton.....	64,035 77	
Sing Sing.....	91,182 09	
		233,994 58
Asylum for insane convicts, paid by counties.....		12,669 78

Miscellaneous Receipts.

J. O. Donnell, clerk, balance unexpended of Assembly contingent fund.....	\$97 05	
G. R. Young, agent and warden of Sing Sing prison, unexpended balance of ap- propriation for iron bedsteads.....	8 33	
Carried forward	\$105 38	\$11,434,657 53

Brought forward	\$105 38	\$11,434,657 53
C. N. Ross, Treasurer, balance of canal trust fund on deposit in Albany County Bank.....	91 69	
Thomas Raines, for old carpet sold	24 00	
Paid by Comptroller for stationery sold ..	130 98	
Conscience Money:		
Received by mail from source unknown ..	43 50	
Paid by Charles Stebbins, being received by him from an unknown source, supposed to belong to the State treasury...	300 00	
Paid by Rev. James McGowan, parish priest of Cadyville, Clinton county, being amount restored through him to the State, less express charges	299 70	
		995 25

MONEYS RECEIVED ON ACCOUNT OF PREVIOUS ADVANCES, OR TO BE REPAID FROM THE TREASURY.

Non-resident Taxes.

Arrears of taxes	\$87,078 74

REPORT OF CORNELL UNIVERSITY IN RELATION TO COLLEGE LAND SCRIP.

To the Comptroller of the State of New York :

In pursuance of the requirements of chapter 481 of the Laws of 1866,
I, Joseph W. Williams, treasurer, respectfully report :

That for the year ending November 1, 1876, contracts for the sale of
land and of pine timber have been made as follows, viz. :

For 17,447 78-100 acres of land for the price of.....	\$81,075 12
For the pine timber on 2,292 16-100 acres of land for the price of.....	7,822 00
The cash receipts during the same period were.....	76,689 14
The cash disbursements during same period were.....	<u>73,463 47</u>

Respectfully submitted.

J. W. WILLIAMS,
Treasurer.

TOMPKINS COUNTY, ss. :

Joseph W. Williams, being duly sworn, deposes and says : That he
is the treasurer of the Cornell University ; that he has read the forego-
ing report and carefully examined the books and accounts upon which
it is founded, and that the same is correct and true to the best of his
knowledge, information and belief.

J. W. WILLIAMS.

Sworn before me this 2d day }
of December, 1876. }

[L. S.]

G. VAN RENSSELAER,

Notary Public.

ANNUAL FINANCIAL REPORT

OF THE

Auditor of the Canal Department

OF THE

STATE OF NEW YORK.

TRANSMITTED TO THE LEGISLATURE JANUARY 3, 1877.

JEROME B. PARMENTER, STATE PRINTER.
1877.

STATE OF NEW YORK.

No. 4.

IN ASSEMBLY,

January 3, 1877.

ANNUAL FINANCIAL REPORT

OF THE

AUDITOR OF THE CANAL DEPARTMENT.

STATE OF NEW YORK:

CANAL DEPARTMENT,

ALBANY, *January 3, 1877.* }

To the Speaker of the Assembly:

As required by law, I have the honor herewith to transmit the Annual Financial Report of this Department, for the fiscal year ending September 30, 1876.

Respectfully yours.

G. W. SCHUYLER,

Auditor.

FINANCIAL REPORT OF THE AUDITOR.

STATE OF NEW YORK:

CANAL DEPARTMENT, }
ALBANY, December 11, 1876. }

To the Legislature of the State of New York:

In compliance with the provisions of act chapter 177 of the Laws of 1861, I respectfully submit the following report of the receipts and payments on account of the canals and canal debt, and the balances of the funds on hand, the depositories of the same, and the condition thereof at the close of the fiscal year ending September 30, 1876:

REVENUES AND EXPENDITURES OF THE FISCAL YEAR.

Statement of the revenues of the canals, with the expenses of collecting the tolls, and ordinary repairs during the fiscal year ending September 30, 1876:

Amount required to purchase coin for the payment thereof for the fiscal year ending September 30, 1876, was	65,928 20
	<u>\$617,088 20</u>

REVENUES — COMPARATIVE STATEMENT.

The following statement shows the aggregate receipts and payments on account of the ordinary expenses of the canals for the last two years:

	1875.	1876.
Receipts from tolls, etc.....	\$1,925,995 63	\$1,487,332 89
Balance of appropriation for con- creting the sixteen locks, and retrunking upper and lower Mo- hawk aqueducts, reserved from revenue of 1875		52,859 01
	<u>\$1,925,995 63</u>	<u>\$1,540,191 90</u>
Payments to superintendents for repairs	\$985,105 10	\$830,677 02
Payments by Canal Commissioners for repairs.....	279,616 69	205,165 98
Payments to division engineers for repairs		7,039 47
Payments to collectors and their assistants.....	75,857 41	73,371 15
Payments to weighmasters and their assistants	12,118 09	10,883 22
Refunding tolls, salaries of officers, etc.....	61,759 65	74,916 78
Carried forward.....	\$1,414,456 94	\$1,202,053 62

Brought forward.....	\$1,414,456 94	\$1,202,053 62
Reserved balance of appropriation for concreting the sixteen locks, and retring upper and lower Mohawk aqueducts.....	52,859 01
Total expenses for the year...	\$1,467,315 95	\$1,202,053 62
Net receipts.....	458,679 68	338,138 28

This statement shows a falling off in the toll receipts of the last fiscal year, as compared with those of 1875, of \$438,662.74; a decrease in payments of \$265,262.33, and a loss in net receipts of \$120,541.40.

In order to have met all the constitutional obligations resting on the canals, the surplus revenues, for the year ending 30th September, 1876, should have been sufficient to have made the following contributions or payments, to wit:

To pay the interest in coin on the canal debt under article 7, section 3.....	\$617,088 20
To pay the sinking fund for the redemption of the principal of the debt under article 7, section 3...	450,000 00
To pay the General Fund for the support of govern- ment, in pursuance of article 7, section 3.....	200,000 00
Net revenue required.....	\$1,267,088 20
Net revenue earned.....	338,138 28
Actual deficiency for year ending 30th September, 1876	\$928,949 92

OF THE CANAL DEBT SINKING FUND.

Under the seventh article of the Constitution, three separate and distinct sinking funds were created for the payment of the principal and interest of the canal debt stocks chargeable to each of the funds. The means to supply two of these funds, those under sections 1 and 3, are, in the first instance, to be taken from the surplus revenues of the canals, and, in case there be a deficiency in the revenue, then by loans upon the credit of the respective funds, or by equitable taxes.

The sums needed by the sinking fund, under section 12, are supplied by an annual tax.

The sinking fund under section 2, for the payment of the General

Fund debt, has been fully supplied, and no further contributions from the canal revenues are necessary.

The condition of the several sinking funds for the payment of the canal debt stocks, on the 30th of September, 1876, was as follows :

SINKING FUND — ARTICLE SEVEN, SECTION ONE.

There has been no change in the condition of this fund since the last report.

The balance on hand 30th September, 1876, was \$58,347.76, and the canal debt outstanding, with which it is chargeable, is \$6,160, which draws no interest.

SINKING FUND — ARTICLE SEVEN, SECTION THREE.

The balance to the credit of this fund on the 30th September, 1876, was \$941,591.73, but if there had been no failure in the revenues to supply the annual contribution, together with the sum required to pay the interest on the debt, the balance to the credit of the fund at that date would have been \$1,670,541.65. The difference between these two amounts represents the deficiency existing at the close of the fiscal year, and is accounted for as follows :

There should have been paid into the fund from the surplus revenues —

For interest in coin on the debt for one year	\$617,088 20
The annual contribution of	450,000 00
Total required	<u>\$1,067,088 20</u>
Amount realized	<u>338,138 28</u>
Deficiency	<u><u>\$728,949 92</u></u>

This deficiency, with the interest thereon for twenty months (the time required to realize from tax), amounting to \$51,026.49, will have to be provided by taxes.

At the close of the fiscal year ending 30th September, 1875, there was a deficiency in this fund of \$630,325.66, which, together with the interest thereon, was made good by a transfer of \$655,538.69 from the fund to provide for extraordinary repairs, in pursuance of section 7 of chapter 425, of the Laws of 1876.

There are no unappropriated Canal Fund moneys now in the treasury which can be similarly disposed of, and a tax for the deficiency now existing is unavoidable.

Documents four and five, pages 26, 27, of this report, are exhibits of the receipts and payments in detail, on account of this fund during the last financial year.

SINKING FUND—ARTICLE SEVEN, SECTION TWELVE.

This fund is replenished by an annual tax for the payment of the interest and the principal of the floating debt loan. The balance to its credit on 30th September, 1876, was \$1,121,110.75.

The amount of the debt outstanding and drawing interest is \$880,000, which matures 1st December, 1877.

The amount required to pay the annual interest at six per cent, at rates current for coin the past year, is \$59,073.51.

This sinking fund is now full and sufficient for the payment of interest, and the reimbursement of the principal, in coin, at maturity. After paying the interest on the debt to its maturity, and the reimbursement of the principal, it is estimated there will be a surplus in the neighborhood of \$100,000.

UNAVAILABLE DEPOSITS.

At the close of the fiscal year ending 30th September, 1875, the amount deposited in banks unavailable was (see last report, page 51)	\$233,242 66
There has since been received from the receiver of the New York and Erie Bank of Buffalo, a dividend of three per cent, amounting to.....	3,710 13
	<hr/>
	\$229,532 53
During the fiscal year ending 30th September, 1876, the Watkins National Bank failed, with deposits of canal fund moneys amounting to.....	14,070 50
	<hr/>
Making a total of unavailable deposits 30th September, 1876, of	\$243,603 03
	<hr/>

There has been received from the receiver of the Watkins National Bank, since the close of the fiscal year, a dividend of fifty per cent. The assets of this bank are said to be ample to pay depositors ultimately in full, but the State holding a bond of indemnity, with good securities, is secure against loss.

The aggregate of unavailable deposits will not probably be materially reduced. The ultimate loss to the State will, no doubt, exceed the surplus in the sinking fund under article 7, section 1, and the

prospective surplus of sinking fund under section 12, both of which funds may properly be charged with the loss.

FUND FOR THE RECONSTRUCTION OF THE ONEIDA LAKE CANAL.

The balance to the credit of this fund on the 30th September, 1876, amounted to \$48,810.70.

The above balance comprises the unexpended sum of the appropriations, under chapters 850, Laws of 1872, and 339, Laws of 1874. The entire amount of this fund will be unavailable for the purposes of the appropriations after 15th June, 1877, unless the same shall be reappropriated.

RECEIPTS AND EXPENDITURES ON ACCOUNT OF THE CANALS.

The receipts from tolls and other sources of income other than taxes, and the expenditures on account of each and all the canals for the fiscal year ending 30th September, 1876, will be found in detail in documents thirty to fifty-three, inclusive. The substance of these several accounts, in a condensed form, is exhibited in the following tabulation :

TABLE

Showing for each Canal: 1. The income derived from tolls and other sources. 2. Payments for collection, ordinary repairs and miscellaneous charges on the revenues. 3. The surplus of revenue or profit in operating. 4. The deficiency of revenue, or loss in operating. 5. Payments from proceeds of taxes for extraordinary repairs, damages and other purposes. 6. Total payments from earnings and taxes. 7. Income in excess of all payments. 8. Payments in excess of income.

The period embraced in this table is for the fiscal year ending 30th September, 1876.

CANALS.	1. Income from tolls and other sources.	2. Cost of collec- tion, ordinary repairs and miscellaneous charges on revenues.	3. Surplus of revenue.	4. Deficiency of revenue.	5. Payments for extraordinary re- pairs, enlarge- ment, recon- struction, &c., of Canal, Ad- ministrators and Canal Board.	6. Total payments.	7. Income in ex- cess of all payments.	8. Payments in excess of in- come.

* Includes \$52,859.01 reserved from the revenues of the previous fiscal year.

The deductions to be made from the preceding table are as follows:

The total income or revenue from all sources to the credit of all the canals, as shown in column 1, was	\$1,540,191 90
The payments from the revenues for collection, ordinary repairs, and miscellaneous expenses, which are a charge on the revenues, as shown in column 2, were	1,202,053 62
Surplus revenues (deducting 2 from 1)	<u>\$338,138 28</u>

The profit and loss in operating the several canals are shown separately and in the aggregate in columns 3 and 4.

The profitable canals earned (see column 3)	\$509,478 06
The non-paying canals lost (see column 4)	171,339 78

The amount paid on account of each and all the canals from proceeds of taxes, for extraordinary repairs and improvements, for awards made by the Canal Appraisers and Canal Board, and the interest thereon, is shown in column 5: the aggregate was....

\$510,650 18

The total payments on account of all the canals from their revenues and from proceeds of taxes, as shown in column 6, being the product of columns 2 and 5, was	\$1,712,703 80
---	----------------

The total income from tolls and other sources other than taxes, as shown in column 1, was	1,540,191 90
---	--------------

Total payments in excess of income	<u>\$172,511 90</u>
--	---------------------

The income of each canal in excess of total disbursements, or the disbursements in excess of income, as the case may be, is shown in columns 7 and 8.

Separating the constitutional canals from those which may be sold, leased or otherwise disposed of, as provided in section 6 of the Constitution as amended, we glean the following results in operating them for the last fiscal year :

CONSTITUTIONAL CANALS.

CANALS.	Receipts.	Cost of collect'n and ordinary repairs.	Surplus.	Deficiency.
Erie.....	\$1,372,563 94	\$363,610 80	\$508,953 14

ESTIMATED CANAL REVENUES FOR THE FISCAL YEAR COMMENCING 1ST OCTOBER, 1876.

The toll receipts for the first three months of the fiscal year commencing 1st October, 1876, show a falling off compared with the corresponding period of the previous year equal to nineteen per cent. Using this data as a basis of calculation, we have:

Receipts from September 1, 1876, to the close of navigation	\$597,547 36
Estimated receipts from the opening of navigation in the spring of 1877, to September 1st, same year..	598,906 04
	<hr/>
Total receipts	\$1,196,453 40
The actual cost for maintaining the canals for the fiscal year ending 30th September, 1876, was....	1,202,053 62
	<hr/>
Estimated deficiency for maintenance.....	\$5,600 22
	<hr/>

From the above calculation, which is only partly estimated, it would appear that the prospective revenues for the current fiscal year ending 30th September, 1877, will fall short of the sum expended for maintenance the previous year, and below the gross receipts of any year since 1832.

Should any thing occur to add to the cost of repairs, or should competition for freights upon the opening of navigation in spring of 1877 be more active than heretofore, the deficiency will be larger than estimated.

THE CONSTITUTIONAL AMENDMENT LIMITING EXPENDITURES IN ANY YEAR TO THE GROSS INCOME OF THE PREVIOUS YEAR.

On the 1st of January, 1875, the financial article of the Constitution, as amended by vote of the people, November 3, 1874, became operative.

The sixth section of the article, as amended, contains this provision :

" Hereafter the expenditures for collection, superintendence, ordinary and extraordinary repairs on the canals named in this section (the Erie, the Oswego, the Champlain and the Cayuga and Seneca), shall not exceed, in any year, their gross receipts for the previous year."

When the amendment was first proposed in the Legislature of 1874 the gross revenues of all the canals for the fiscal year ending 30th September, 1873, amounted to \$3,027,568.67, which was the lowest aggregate, with but a single exception, for the twelve years

preceding. There seemed to be no serious objection to the amendment when proposed, as there should be none in principle. Those who favored lower rates of toll than then prevailing reasoned that by reducing and restricting expenditures a corresponding reduction in rates would assuredly follow, and those who were determined that the canals should be self-supporting, and make the necessary annual contributions towards sinking fund and payment of interest on the canal debt, argued that a restriction of expenditures to income would naturally compel the imposition of such tolls as would meet all the constitutional demands upon the revenues of the canals besides making all needed repairs and improvements. The possibility at any time of the income falling below the cost of repairs was neither contemplated nor provided for.

The gross income of the four canals, named in the amendment, for the last fiscal year which closed September 30, 1876, was..... \$1,445,401 54

The cost of collection, ordinary repairs and other charges, aside from contributions for interest and sinking fund, was..... 1,170,027 47

Leaving a margin of only..... \$275,374 07

which could be expended, during the current fiscal year, for ordinary repairs or the reparation of breaks, in excess of what was expended during the last fiscal year. Under the restrictions of the Constitution, or until the canal debt has been fully paid or provided for, no portion of the canal revenues can be expended for extraordinary repairs or improvements. Such repairs must be made from funds raised by taxation.

During the past year there were no breaks which added materially to the cost of repairs, and nothing occurred to interfere with the system of rigid economy which prevailed. Labor and materials were cheap, and it is exceedingly doubtful whether the four canals embraced in the amendment can be maintained at the same aggregate cost for any lengthened period, without detriment to navigation and allowing the more perishable portion of the structures to decay, a policy which would ultimately require large outlays for reconstruction.

If in any year the income of the canals should fall to a lower sum than the actual cost of maintenance, or a series of disastrous breaks should occur, resulting from floods which no human skill or foresight can prevent, involving extraordinary expenditures for repairs, how is the emergency to be met? Either the constitutional restriction must

be ignored, or the work of reparation be postponed until the obstacle shall have been removed by another amendment.

However much people may differ in regard to the management of the canals, or in respect to the rates of toll which should be charged for their use, there is no disagreement as to the policy and importance of liberally maintaining and perpetuating our canal system.

The effect of the amendment on the future of our canals does not appear to have been duly considered in all its bearings when originally proposed, nor is it probable that there was any design, on the part of those proposing it, or those voting for it, to prohibit improvements which would make them more useful to the public, and more indispensable in the years to come than they have been in the past.

The Auditor believes that the adoption of the amendment in question, though apparently designed for a good purpose, was exceedingly unfortunate, in view of the present diminished and diminishing revenues, unless the Legislature shall anticipate and be prepared for an emergency which is liable to present itself.

STEAM ON THE CANAL—RESULTS OF EXPERIMENTS.

Much has been written by my predecessors, in their reports, on the subject of steam as a motor on our canals. In compliance with suggestions emanating from this department, the Legislature, by act, chapter 868 of the Laws of 1871, sought to stimulate the inventive genius of the country by inviting and rewarding the practical and profitable introduction upon the canals of steam, caloric, electricity, or any motor other than animal power, for the propulsion of boats. No promise was made in said act to accept or reward any invention or device, no matter how meritorious, unless it could readily be adapted to the present canal boats, and the motor, whatever it might be, was placed within or upon the boat employing it.

All systems of towage were excluded from participation in the act. The device sought was for propulsion. Each boat entered for competition was required to have within itself its power of locomotion, under such control that it could easily be stopped or backed by the use and power of its own machinery.

Under the stimulus of the act mechanical devices were placed in boats then in use, and which had previously been towed by animal power, but all such attempts failed in the requisite degree of speed and economy. New boats were also constructed after models especially designed for steam propulsion, and while it was claimed that

some of them performed well, making the requisite speed, and carrying the amount of cargo required, which was 200 tons, they were unable to compete with horse-boats carrying forty to fifty tons more of cargo, and consequently proved failures financially. Even if they had been successful, the device was not such as was required under the act, because it could not be applied successfully to the present canal boats. Notwithstanding these boats, under a special act, received a large appropriation from the State, none of them have been employed, to the Auditor's knowledge, since the year their owners received the bounty from the State.

The attempt to introduce steam as a motor on each boat, or as a means of propelling freight boats, has virtually been abandoned, and probably no farther efforts in that direction will again be made, with any hope of financial success, unless some radical change is made in the dimensions of the locks.

The Belgian system of cable towing has been in operation during the past season between Buffalo and Middleport, employing two tugs, for the purpose of demonstrating its perfect adaptability to the present canal, and to invite the co-operation of capitalists to aid in extending it. By this system it is claimed that boats have been drawn in trains of seven to ten boats, at three times the speed of boats towed by horses, and at much less cost. All accounts seem to agree that this system, if extended through the entire length of the Erie canal, would be able to tow all the boats navigating it, and at double the rate of speed now attained.

Besides reducing the time for trips one-half, it is also claimed the daily expenses of the boats thus towed could be materially reduced from present cost, because one-half the crew now employed could with safety be dispensed with.

If all that is claimed for this system be true, it would seem strange, indeed, if the requisite amount of capital cannot be obtained to place it in full and successful operation on the Erie canal at an early day.

The pride of the State should not rest satisfied until the tonnage of the Erie canal is moved by some other motor than the wretched system now employed.

As for fifty years, the poor, jaded, ill used horse still plods his weary way on our tow-paths. At first his work was light. From two to three horses were employed in towing well-proportioned boats, of light draft, with cargoes not exceeding thirty tons; but now, two horses are compelled to drag box-shapen craft, drawing six feet of water, and laden with cargoes of 250 tons; and people wonder why the time

required to make trips from Buffalo to tide-water has been increased from six to eleven days.

The great obstacle to the successful application of steam to the propulsion of boats appears to be this: The present boats towed by animal power are constructed as lightly as possible, and as large as the chambers of the locks will permit, so that their water displacement is nearly equal to the full dimensions of the locks. There is no regulation which limits the dimensions of the boat, or prescribes the form, except that the bow is required to be of an elliptical or semi-circular shape, the versed sine of which shall not be less than one-fourth of the chord. Such boats will carry 250 tons in six feet of water. The application of steam power as a means of propelling such craft is totally impracticable.

Boats designed for successful propulsion by steam must be of symmetrical form, with sharp bows and sterns, and when thus constructed rarely exceed 200 tons carrying capacity. In order to carry even 200 tons, they are too light to be durable. This disparity in cargoes gives the horse-boats too great an advantage over the steamers, and when freights are transported at a moderate profit by the former, the latter can only run at a loss.

After thirty years or more of experiments, these facts appear to have been established:

The propelling of canal boats by steam power by the aid of machinery placed within them is impracticable, because unremunerative when brought into competition with larger boats, or boats carrying larger cargoes.

That train towage by steam is practicable, and that the Belgian system is pronounced the safest, the most economical, and the least objectionable method yet devised; and while some portion of the time gained by the increased speed may be lost at the locks, the net gain would still be greatly in its favor, and far in advance of the present system of animal towage.

THE EFFECTS OF RAILROAD COMPETITION ON THE REVENUES AND TONNAGE OF THE CANALS.

The entire canal debt, under the third section of article seven of the Constitution on the 1st of January, 1872, amounted to \$9,285,000, all of which matured between that date and 1st October, 1875. As the several installments became due, the means for reimbursement, excepting \$99,000 paid from the sinking fund, were procured by deficiency loans on the credit of the sinking fund, running from ten to eighteen years.

This process of liquidation, in plain words, was simply an extension made necessary in consequence of a failure in the revenues to carry out the financial plan of the Constitution. For the last two years the surplus revenues of the canals have not been sufficient to pay in full the interest at six per cent on a small debt of \$9,185,000, and have totally failed to contribute any thing to the sinking fund, for the redemption of the debt, on the credit of which the loans were obtained.

The deficiency for the fiscal year ending 30th September, 1875, was made good by a diversion of funds which previously had been raised by tax, and appropriated for the improvement of the canals, but the deficiency of the last fiscal year ending 30th September, 1876, will require the imposition of a tax to meet it.

These deficiencies are the result of two causes, reduced tolls and reduced tonnage. The greatest loss in tonnage seems to have followed the greatest reduction in tolls, when precisely the opposite result was predicted by those who advocated the reduction.

This loss of tonnage is attributed to the fact that the two main railway companies of this State have been transporting freight at rates which made it impossible for a large portion of canal carriers to run their boats.

From the second week in June to the second week in October, 1876, the railroads carried wheat from Buffalo to New York at an average of six cents per bushel, which was below the actual cost by the average of canal boats, and about one-half the actual cost by rail, as appears by the sworn returns of the New York Central and Hudson River Railroad Company for the fiscal year ending 30th September, 1875, and on file in the office of the State Engineer and Surveyor.

This ruinous competition with the water route was not confined to Buffalo, but rates of freight were equally depressed at the principal shipping points at the west, the tendency of which was to lessen shipments by lake, and to increase through shipments by rail.

It is not within the power of the State to aid the canals by any farther reduction in the rates of toll. The revenue derived from the present rates, the last fiscal year, was but slightly in excess of the cost of maintenance, and if the past policy of the roads shall be continued the coming season, it is certain that the revenues for the current fiscal year, which commenced October 1, 1876, will fall short of the sum needed for collection and repairs.

The pending campaign against the water route is unquestionably

causing great loss to the roads. Of this fact we only know what the officers of the roads choose to make public. For the fiscal year ending September 30, 1869, the year preceding the reduction in canal tolls, the gross earnings of the New York Central and Hudson River Railroad Company exceeded the payments, other than for construction, \$1,137,767.65. From 1870 to 1874, both years included, the average annual surplus was only \$80,413.00; and for 1875, the payments, other than for construction, exceeded the gross earnings, \$1,581,654.29.

But, if the effect of this competition shall be to destroy the canals, and the lake interests as well, the roads will have abundant opportunities, in the future, to make good all their losses and reap substantial gains.

This conspiracy of the railroads, although, for the time being, productive of cheap and unremunerative rates of transportation, causes no diversions from the trade of rival States, and threatens the impoverishment of thousands of individuals, by rendering worthless the vast equipments of lakes and canals.

It is asserted that, and undoubtedly in truth, within the last three years, New York's proportion of the whole grain trade has fallen twelve per cent.

We know that the canals have lost heavily in tonnage, and the railroads have gained in a corresponding degree. The evidence is conclusive that the gains of the railroads are simply diversions from the canals.

The State of New York made valuable concessions to the various roads, which now form its main trunk line, to which they were not entitled under their original charters. If these concessions are being abused, and are likely to prove the destruction of our canal system and the source of onerous taxes, public policy and the public interest would seem to justify their revocation.

The Auditor, with this brief recital, submits the subject to the earnest consideration of the Legislature, fully impressed that its importance demands immediate attention and the most searching investigation. He believes that our canals have reached the darkest period of their existence, and that a crisis is impending which will require great sagacity and fearless legislation to extricate them from their peril.

Respectfully submitted.

G. W. SCHUYLER,

Auditor.

DOCUMENTS

ACCOMPANYING THE REPORT OF THE AUDITOR.

(No. 1.)

There was on deposit in sundry banks to the credit of the Treasurer of the State, on account of the Canal Fund, on the 30th September, 1875 (see page 50 of the last report):

The sum of	\$3,884,107 08	
And in the custody of the Auditor, securities invested on account of the Canal Fund.....	\$50,000 00	
Real estate, etc., of the Bank of Corning	3,799 00	53,799 00

--	---------------------

RECAPITULATION OF THE FOREGOING STATEMENT OF THE CANAL DEBT PAYING INTEREST, ON THE 30TH SEPTEMBER, 1876.

Under article 7, section 3 of the Constitution	\$9,186,000 00
Under article 7, section 12 of the Constitution	880,000 00
	<u>\$10,066 000 00</u>

STATEMENT of the Canal Debt, 30th September, 1876, showing each description of stock, the amount redeemable in each year, and the annual interest on the same.

WHEN DUE.	Five per cent.	Six per cent.	Total.
1887		\$160 00	\$160 00
1878		9,500 00	9,500 00
1874	\$6,000 00		6,000 00
Pays no interest	\$6,000 00	\$9,660 00	\$15,660 00
1877		\$880,000 00	\$880,000 00
1882		847,500 00	847,500 00
1887		1,562,900 00	1,562,900 00
1891		4,302,600 00	4,302,600 00
1892		2,000,000 00	2,000,000 00
1895		473,000 00	473,000 00
Debt paying interest		\$10,066,000 00	\$10,066,000 00
Debt not paying interest	\$6,000 00	9,660 00	15,660 00
Total debt	\$6,000 00	\$10,075,660 00	\$10,081,660 00
Annual interest		\$603,960 00	\$603,960 00

AN ANALYSIS OF THE FOREGOING TABLE.

	Principal of debt and sections of article 7 of the Constitution.	Annual interest of the debt.
Section 3, 6's	\$9,186,000 00	\$551,160 00
Section 12, 6's	880,000 00	52,800 00
	<u>\$10,066,000 00</u>	<u>\$603,960 00</u>

The interest on the debt is six per cent.

Of the above debt paying interest, there was held
on the 30th September, 1876:

On the United States account	\$9,112,500 00
On foreign account	953,500 00
	<u>\$10,066,000 00</u>

(No. 55.)

STATEMENT showing the balance on hand September 30, 1876, how deposited and invested, together with the names of the accounts to which it belongs.

ANNUAL REPORT

OF THE

Superintendent of the Banking Department

OF THE

STATE OF NEW YORK.

TRANSMITTED TO THE LEGISLATURE JANUARY 10, 1877.

JEROME B. PARMENTER, STATE PRINTER.
1877.

STATE OF NEW YORK.

No. 5.

IN ASSEMBLY,

January 10, 1877.

ANNUAL REPORT

OF THE

SUPERINTENDENT OF THE BANKING DEPARTMENT.

STATE OF NEW YORK:

BANKING DEPARTMENT,

ALBANY, December 30, 1876. }

To the Honorable the Speaker of the Assembly:

SIR.—I have the honor herewith to transmit to the Legislature the Annual Report of this Department, as required by chapter 164, Laws of 1851.

I am, very respectfully,

Your obedient servant.

DE WITT C. ELLIS,

Superintendent.

REPORT.

BANKING DEPARTMENT, }
ALBANY, December 30, 1876. }

To the Honorable the Legislature of the State of New York :

Eighty-four banks organized under the general banking law of the State, reported to this department September 30, 1875. The same number reported at the close of the last fiscal year. Four new banks * were established during the year, to wit :

The Fifth Avenue Bank, October 15, 1875.

The Bank of Rome, November 16, 1875.

The Cuba State Bank, December 27, 1875.

The Bank of Batavia, July 11, 1876.

Four banks were closed during the year. They are : Bank of Havana ; Bank of Cazenovia ; Manufacturers and Builders' Bank, New York, and Security Bank, Watertown. All of these went into liquidation and passed beyond the jurisdiction of this department. Under present laws I have no cognizance, officially, of the transactions in respect to a banking association after it ceases to exercise its functions as a bank. I have, therefore, no knowledge of the present condition of any of these closed institutions.

Ten trust, loan or mortgage companies also reported July 1, 1876. The New York Guaranty and Indemnity Company has reduced its capital to \$750,000, which is invested in real estate now leased. The company terminated its financial operations in other ways, and consequently no longer reports to the Superintendent.

* The Brewers and Grocers' Bank in New York city was organized since October 1, and is now open.

THE COMPARATIVE CONDITION OF THE BANKS.

The following summaries of the quarterly reports of all the banks, made upon the days respectively named, show the condition of the banks at the close of each of the last two fiscal years.

Condition of the banks in the State, September 18, 1875:

Resources.

Loans and discounts less due from directors and brokers	\$68,191,919
Overdrafts	123,361
Due from banks	8,330,767
Due from directors	2,258,304
Real estate	-2,178,418
Specie	815,256
Cash items	7,637,815
Stocks, promissory notes and United States indebtedness certificates	4,388,820
Bonds and mortgages	397,442
Bills of solvent banks, and United States demand and legal tender notes	11,892,563
Loss and expense account	745,339
Assets not included in either of the above heads ...	111,665
Add for cents	249
Total resources	\$107,071,918

Liabilities.

Capital	\$24,915,090
Notes in circulation	77,895
Surplus fund	3,096,094
Profits	6,408,670
Due banks	7,554,808
Due individuals and corporations other than banks and depositors	1,059,361
Due treasurer of the State of New York	1,865,224
Due depositors on demand	61,834,937
Amount due not included in either of the above heads	259,689
Add for cents	150
Total liabilities	\$107,071,918

Condition of the banks September 23, 1876 :

<i>Resources.</i>	
Loans and discounts	\$63,062,801
Due from directors of the bank included in loans and discounts	\$2,132,894
Overdrafts.....	93,470
Due from trust companies, State, national and private banks and brokers.....	6,884,113
Real estate.....	2,246,714
Specie.....	1,609,943
Bonds and mortgages.....	368,148
Stocks	6,850,375
United States legal tender notes and circulating notes of national banks.....	11,285,947
Cash items.....	7,779,216
Loss and expense account.....	487,719
Assets not included under either of the above heads,	90,937
Add for cents.....	261
	<hr/>
	\$100,759,644
	<hr/>

<i>Liabilities.</i>	
Capital	\$24,463,317
Surplus fund	2,564,756
Undivided profits.....	6,021,340
Circulation.....	70,435
Due depositors on demand.....	56,774,912
Due to trust companies, State, national and private banks and brokers.....	8,786,415
Due individuals and corporations other than banks and depositors.....	370,265
Due Treasurer of the State of New York.....	1,489,324
Amount due not included under either of the above heads.....	218,744
Add for cents.....	136
	<hr/>
	\$100,759,644
	<hr/>

The comparison is evidence of continued inactivity in business. The amount of capital is nearly the same this year as

last, but the deposits, as well as the discounts, have declined approximately five millions of dollars.

THE CONDITION OF TRUST COMPANIES.

The trust companies and other moneyed corporations under the supervision of the Superintendent, made the following report of their condition on June 30, 1875 :

<i>Resources.</i>	
Bonds and mortgages.....	\$5,876,634
Stock investments.....	22,151,283
Par value of the same.....	\$22,311,525
Estimated market value of the same...	23,378,042
Amount loaned on collateral securities.....	19,635,475
Amount loaned on personal securities.....	13,092,646
Overdrafts.....	3,240
Due from directors or trustees.....	2,793
Due from banks	443
Real estate.	1,494,381
Cash on deposit in banks or other moneyed institutions.....	5,119,082
Cash on hand	138,707
Other assets not included in either of the above heads,	2,140,229
Add for cents.....	35
Total resources.....	\$69,654,948

<i>Liabilities.</i>	
Capital paid in.....	\$11,584,475
Surplus and other profits.....	5,144,083
Deposits in trust.	29,442,552
General deposits.....	20,923,017
Other liabilities not included in either of the above heads	2,560,803
Add for cents	18
Total liabilities.....	\$69,654,948

BANKING DEPARTMENT.

9

June 30, 1876, they reported their condition to be :

Resources.

Bonds and mortgages.....	\$5,968,060
Stock investments	22,595,010
Par value of the same	\$21,540,628
Estimated market value of the same..	24,097,211
Amount loaned on collateral securities	21,918,012
Amount loaned on personal securities.....	13,228,743
Overdrafts	4,262
Due from directors or trustees	504
Due from banks	97,359
Real estate.....	753,252
Cash on deposit in banks or other moneyed institutions	5,305,613
Cash on hand	167,981
Other assets not included in either of the above heads.....	2,295,286
Add for cents	5
Total resources	<u>\$72,334,087</u>

Liabilities.

Capital paid in.....	\$9,999,250
Surplus and other profits.....	5,253,772
Deposits in trust.....	31,446,285
General deposits.....	22,503,163
Other liabilities not included in either of the above heads.....	3,131,614
Add for cents	3
Total liabilities	<u>\$72,334,087</u>

BANK BILLS DESTROYED.

There were received and destroyed in the department during the last year, \$1,409 in State bank notes ; \$293 were bills of associated banks, and \$1,116 were those issued by incorporated banks. The amount of circulating notes canceled during the year, is \$113,238.

STATE BILLS REDEEMABLE.

The great majority of State bills now sent to the department for redemption are not redeemable, because the period fixed by law for redemption has expired. The question whether any State bill is redeemable at a given date, can be settled by any person by reference to two tables. Table No. 11 gives the banks whose notes are no longer redeemable. Table No. 9 states the banks which are redeeming their notes at the date of this report. Table No. 7 presents the incorporated banks now redeeming their notes.

THE REDEMPTION OF CIRCULATION.

The aggregate circulation of State banks outstanding on the 30th of September, 1876, was \$735,988.50. The total amount September 30, 1875, was \$849,226.50; the reduction in the sum being \$113,238. The decrease during the year in secured circulation is \$50,745. The decrease in unsecured bills, which were issued by incorporated banks, is \$62,493. The secured circulation outstanding September 30, 1876, was \$167,783. The unsecured circulation at the same date was \$568,205.50.

THE SECURITIES ON DEPOSIT IN TRUST.

The Superintendent held in trust September 30, 1876, \$1,380,425.07. Of these, \$23,900 were bonds and mortgages; cash, \$105,725.07; stocks, \$1,250,800. The amount deposited by banks is \$580,046.09; and by trust and loan companies, \$800,378.98. The total decrease in the securities during the last year was \$82,962.37.

THE INCORPORATED BANKS.

Under the act of 1873 (chap. 585), fourteen of the old incorporated banks have either closed or are now closing their circulation accounts; another has closed its accounts under a special law. There still remain fifteen more of the same class of banks, whose representatives yet fail to act under the law of

1873. I apprehend that one, possibly two, of these have to-day no legal representatives, and in consequence the accounts of the two banks will not be settled and closed with the department in the way provided by the act of 1873, or by a similar method.

LOAN AND BUILDING ASSOCIATIONS.

The Legislature of 1875 passed an act (chap. 564) providing that building, mutual loan and accumulating fund associations should report annually to the Superintendent of the Banking Department; and further, that such companies should be examined once in two years by a person appointed by the Superintendent. The act is crude and incomplete. There is no provision in it for the assessment of the associations to pay the expenses which may be incurred in the execution of the law. No appropriation was made for that purpose. It is not proper or practicable for me to expend the funds raised for meeting expenses on account of other corporations, by the assessment of such corporations, where there is no provision for the reimbursement of such expenditures by a tax upon the building and loan associations reporting to the department. Upwards of two hundred of these associations reported last year. It seems to me that one of two courses should be now taken; either the act of 1875 should be repealed, or provision should be made by the amendment of the law to raise the requisite money to give efficiency and facility to the execution of its provisions, so far as they call for the supervision of the associations by the Superintendent.

SAFE DEPOSIT COMPANIES.

A similar condition also exists in respect to the safe deposit companies, which was created by a law (chap. 613) passed in 1875. The same necessity exists for action by the Legislature in respect to these corporations as in the case of the building associations. I respectfully submit to you the question, whether the law of 1875 shall be repealed, or supplemented by further legislation.

FURTHER RECOMMENDATIONS.

I have heretofore recommended that legislation be enacted to revise, simplify, amend and more exactly define and establish the provisions of the general banking act and the amendments thereto. Without repeating the reasons which I have presented before for such action by the Legislature, I respectfully renew the recommendations, to wit:

1. That the banking laws be codified, reduced and amended, so as to insure brevity, simplicity and symmetry in them.
2. That the responsibility of stockholders in banks for the debts of the banks be precisely defined by law.
3. That the assumption and use of corporate titles by private bankers be prohibited.
4. That the laws which provide for the taxation of bank capital be made more clear in their terms, and be so framed that banks shall not be inequitably and excessively taxed in comparison with other property of equal value.

FUTURE PROSPECTS.

The long continued depression of business has tended to discourage the formation of new banks. Capital has sought permanent investments rather than active employment in trade. The wants of the community for banking facilities have been amply supplied, and the present outlook for an increase in the number of banks in the State is not flattering. Capital, ever watchful of its own interests, will not be wanting, for banking purposes, whenever a revival of trade shall warrant its profitable use. With a final settlement of the pending political problem, and a clearly defined national policy in regard to a speedy resumption of specie payment, we may look for a healthy and lasting improvement in business activities. Until then, the cloud of fear and doubt which has hung over the business community for the last three years will not be lifted, and commerce, now palsied, will look in vain for real and permanent prosperity.

DE WITT C. ELLIS,

Superintendent.

TABLES

ACCOMPANYING THE

ANNUAL REPORT OF THE SUPERINTENDENT OF THE
BANKING DEPARTMENT FOR 1876.

TABLE No. 1.

Showing the aggregate of the securities held and the total circulation issued and outstanding at the close of the fiscal year ending September 30, 1876.

The total amount of outstanding circulation issued to banking associations, individual bankers and late incorporated banks whose circulation is secured, and the amount and character of the securities deposited and held in trust for its redemption, were as follows, viz.:

Outstanding circulation	\$167,783 00
-------------------------------	--------------

SECURITIES.

New York State 5 per cent stock	\$6,000 00	
New York State 6 per cent stock	34,900 00	
New York State 7 per cent stock	190,000 00

STATE OF NEW YORK.

No. 6.

IN ASSEMBLY,

January 9, 1877.

ANNUAL REPORT

OF THE NEW CAPITOL COMMISSION.

To the Legislature of the State of New York:

The New Capitol Commissioners transmit herewith a detailed account of the receipts and expenditures of the commission during the year 1876.

By this it appears that, on the 1st day of January, 1876, there was an unexpended balance of former appropriations of \$201,038.45. the amount appropriated by chapter 193, Laws of 1876, was \$800,000; there was received from sales the sum of \$90.64, making the total sum of money at the disposal of the commission during the year \$1,001,123.89. The expenditures for the year amount to \$796,106.17, leaving unexpended \$205,016.92.

There is outstanding an unpaid account of the Hallowell Granite Company, for the month of December, of \$5,398.27, leaving at the disposal of the commission, over and above all expenditures and outstanding accounts, the sum of \$199,618.65.

It is to be noted that the sum of \$47,400 was paid to the contractor for the granite, being the per centage which had been reserved from all former payments. This amount is not properly chargeable to the operations of the year.

There is also herewith transmitted the annual report of James W. Eaton, Esq., superintendent of the New Capitol, giving a detailed account of the work done and the expenditures made during the year.

Owing to the veto by the Governor of a portion of the appropria-

tion contained in the supply bill, when it passed the Legislature, the building is not so far advanced as was expected and intended when the subject of the New Capitol was last before the Legislature.

The superintendent recommends that a full force of stone-cutters be kept at work during the winter. The number of stone-cutters was, in the month of December, reduced to the usual winter complement; and the unexpended balance of the appropriation will be sufficient to employ about 300 men until the 15th of May.

If the usual summer force of 550 men could be employed during the winter, all of the stone needed for the building to the roof line may be prepared and made ready for use by the first day of May next.

The laying of the walls might be resumed as soon as the weather should permit and the building be ready for the roof in the early summer.

To this end we recommend that an appropriation of \$200,000 be made at once and in advance of the supply bill.

The commission also suggest that, inasmuch as all of this work will be done during this year, it will be best to have it performed during the winter, when employment is scarce and most needed by the laboring classes.

The commission call attention to the reduced price at which materials have been contracted for during the past year. The reduction in the cost of rough stone alone is about seventy-five per cent.

The act of 1876 contains the following provision: "The general plan for the exterior of the New Capitol, according to which the building has thus far been constructed, having been adopted with the approval of the Commissioners of the Land Office and the Governor, in pursuance of law, the same shall not be changed or modified except upon like approval of the Governor and a majority of the Commissioners of the Land Office."

The commission having approved modifications suggested by the advisory board, and which were set forth in the report of this commission to the Legislature, dated March 21, 1876, submitted the same to the Commissioners of the Land Office on the fifth day of June, 1876.

The Commissioners of the Land Office thereupon adopted the following preamble and resolution:

Whereas, It appears the general plans for the exterior of the New Capitol, heretofore approved of by the Commissioners of the Land

Office and the Governor, have not been carried into effect in the construction of the building,

Resolved, That the Commissioners of the Land Office do hereby approve the changes and modifications in the general plan for the exterior of the New Capitol, shown upon the designs of the advisory board this day submitted, up to the roof line of said building.

The Governor afterward approved the said plans. Since the said date the work upon the exterior of the New Capitol has been carried forward in accordance with the plans and designs thus approved by the Commissioners of the Land Office and the Governor. Work upon the interior of the said building has been carried forward upon the original plans and designs as modified by the advisory board, in accordance with the report of the said board, transmitted to the Legislature on March 3, 1876.

On the 1st day of July, 1876, the services of Thomas Fuller, architect, were dispensed with, and on the first day of September, Messrs. Frederick Law Olmsted, Leopold Eidlitz and Henry H. Richardson were employed as architects of the New Capitol.

The act of 1876 contained the following provision :

"The commissioners are hereby directed to report to the Legislature, at the opening of its next session, full detailed plans and specifications for the completion of the whole work, by contract or contracts. They are also required to secure by advertisement estimates or bids for the construction of the work, the furnishing of materials therefor, from responsible parties, which estimates or bids shall be accompanied by such securities as the said commissioners shall deem to be necessary, in order to guarantee the faithful performance of any contract or contracts that may be made. All such estimates or bids shall also be embraced in the report to be made to the Legislature as above required." Those requirements made necessary the preparation of all plans, designs, working drawings and specifications, required for the construction of the whole building, and owing to the great labor involved, the advertisements were not issued until the 28th day of December last.

Bids will be received up to the twentieth day of this month, and within a few days thereafter the commissioners will be able to report in full to the Legislature. The act of 1876 directs that "The New Capitol Commissioners shall cause the work on the New Capitol building, to be progressed with such diligence as shall insure its readiness for full occupancy, by the 1st day of January, 1879, and if

practicable, to complete and render tenantable some portion thereof at an earlier date."

The commissioners are of opinion that the building, with the exception of the tower and the eastern approaches, may be made ready for occupancy on the 1st day of January, 1879, but this will require larger appropriations than have been made during the last few years. The commissioners recommend, that for the year 1877, there be appropriated \$1,200,000, and that they be expressly authorized to make such contracts as may be needed to finish the building, with the exception aforesaid, by the 1st of January, 1879.

The commissioners intend to let the contract for the roof upon the bids which may be received in response to the advertisement, issued on the 28th day of December, 1876. The contract for the wood work should also be let at an early day, for whoever shall contract for the said work, should have ample time to obtain the material which will be required.

There is not space enough near the building to carry on the work of construction conveniently. This difficulty will be more severely felt when there are several classes of work in progress at the same time and, therefore, the commissioners are of opinion that Congress Hall should be removed immediately after the adjournment of the Legislature.

All of which is respectfully submitted.

WILLIAM DORSHEIMER,

Lieutenant-Governor.

CHARLES S. FAIRCHILD,

Attorney-General.

GEORGE W. SCHUYLER,

Auditor.

ALBANY, January 9, 1877.

STATEMENT.

The following is a statement in detail of the receipts and disbursements on account of the New Capitol, from January 1, 1876, to January 1, 1877 :

SUPERINTENDENT'S REPORT.

NEW CAPITOL, OFFICE OF THE SUPERINTENDENT, }
ALBANY, *December 30, 1876.* }

To the New Capitol Commission :

GENTLEMEN.— I respectfully submit the following report in regard to this work during the year 1876. The general progress of construction has been as follows :

GRANITE WORK.

The walls have been raised as follows :

	Ft.	In.
North-east corner pavilion	9	6½
South-east corner pavilion	14	6½
North-east curtain	8	6½
South-east curtain	14	6½
East portico	6	
Two curtain walls, south front	11	3½
Tower walls	6	
South portico walls	15	6½
South-west and north-west corner pavilions	15	6½
Curtain walls, west front	15	6½
Portico, west front	6	
One curtain, north front	11	3½
One curtain, north front	5	3½
North portico walls	15	6½
Side walls of central court	15	6½
Walls of west end of central court	20	0½
Walls of east end of central court	15	6½
Tower walls, two sides	14	8
Tower walls, two sides	13	5
The two principal staircase halls	9	10
West staircase hall and pilasters in corridor	17	6
Walls of small courts	43	2

The four granite piers to support the large columns in Assembly chamber have been built to hights as follows:

	Ft.	In.
One.....	43	6
One.....	54	4
Two.....	59	8

Four bases, columns and caps have been placed in central court.

BRICK WORK.

The exterior walls are all backed up to the top of the cut stone.

The corridor on the south side of the south small court, being twelve feet wide and fifty-one feet long, has been covered with brick arching, the walls on either side raised to a main hight of twenty-nine feet, and the wall between corridor and small court, raised to an average hight of thirty-six feet above the floor line of the principal story.

The corridor on east side of south small court, being fifteen feet wide and sixty feet long, has been covered with brick arching and the walls raised to a main hight of twenty-nine feet above the floor line of the principal story.

The corridor on the north side of north small court, twelve feet wide and forty-eight feet long, has been covered with brick arching, and the walls on either side raised to a main hight of twenty-eight feet three inches above the floor line of the principal story.

The interior brick walls have been raised to a uniform hight of twenty-six feet four inches, from floor line of principal story.

EXTRAORDINARY EXPENSES.

Besides the usual covering of the walls for protection from the weather, the settlement of a few old accounts and the payment of the retained percentages (amounting to \$47,400), due upon the completion of the granite contract, there has been nothing but ordinary expenses except those incurred in consequence of the changes in the plans.

CONTRACTS.

In accordance with the Laws of 1875, after being duly advertised for, bids were received and contracts for material and work, having been approved by your board, were awarded as follows, being in each case to the lowest bidder.

For furnishing coal, May twenty-sixth, to D. W. Herrick, as follows:

120 tons Lackawanna chestnut, at.....	\$5 50
20 tons Lackawanna egg, at.....	5 75
70 tons Cumberland, at.....	6 90

For furnishing 400 barrels fresh burned Sing Sing lime to Wm. Fuller & Sons, at..... \$1 27

For furnishing bond-stone, to J. M. Scribner, as follows:

1,800 feet lineal, one foot seven inches wide, at nineteen and one-half cents; 1,300 feet lineal, two feet seven inches wide at thirty-two and one-half cents.

For furnishing brick:

1,000,000 to Geo. Dunn, per M.....	\$4 85
3,000,000 to Thos. Torley, per M.....	5 30

For furnishing 5,000 barrels best quality fresh ground hydraulic cement, to the Howe's Cave Lime and Cement Company, at seventy cents per barrel of 300 pounds cement.

For furnishing all sand-stone, and doing all the cutting of all sand-stone required for the interior of the Senate and Assembly chambers, to Sinclair & Milne, for \$427,110.

For furnishing unwrought granite for the gallery-story of the building, from the sill course to the top of the cornice, or such part thereof as the commission may determine, to the Hallowell Granite Company, at the following prices:

Hallowell granite, at.....	99 cents per cubic foot
Jonesborough granite, at.....	95 cents per cubic foot
Fox Island granite, at.....	85 cents per cubic foot
Spruce Head granite, at.....	74 cents per cubic foot

For furnishing coal, November twentieth, to F. N. Sill & Son, as follows:

100 tons Lackawanna chestnut, at.....	\$5 00
50 tons Cumberland, at.....	7 50

For furnishing 1,000 cubic yards good clean sharp sand, November twenty-eighth, to John Colloton, at ninety cents.

DETAILED ACCOUNT OF GRANITE.

On hand January 1st, 1876.

Cubic feet, wrought.....	19,961, 1'
Cubic feet, unwrought.....	23,400, 6'

Received during 1876.

56,141, 7' cubic feet unwrought (computed with allowance of inch margin), in completion of old contract, per foot.....	\$1 35
35,467, 7' cubic feet unwrought, on new contract (computed plan lines), per foot.....	99 cents

Wrought on Grounds at Albany.

Cubic feet.....	81,237, 8"
-----------------	------------

Wrought by Contract.

Cubic feet (pilaster caps).....	2,582, 0"
---------------------------------	-----------

Set in Walls.

Cubic feet wrought.....	77,666, 9"
Cubic feet unwrought.....	12,881, 0"

On hand December 30th, 1876.

Cubic feet wrought.....	26,114, 0"
Cubic feet unwrought.....	19,683' 0"

The foregoing shows 1,374 cubic feet used more than the accounts call for. That amount of stone was cut from granite spalls for the facing of the small courts.

SAND-STONE.

In accordance with contract, Messrs. Sinclair & Milne have furnished 14,735 cubic feet of sand-stone, wrought, ready to be placed in the building; of this, 5,496 cubic feet have been set.

DETAILED ACCOUNT OF OTHER MATERIALS.

	On hand January 1, 1876.	Received.	Used.	On hand December 30, 1876.
Brick.....	77,893	3,550,600	2,876,749	751,744
Barrels cement.....	1,661	3,700	4,895	466
Barrels Rosendale cement.....	16	16
Barrels lime.....	3	475	457	21
Lineal feet flag-stone	194	4,189	4,383
Yards sand.....	393	1,564½	1,779½	178

During the latter part of the year bond-stone have been cut from granite spalls at a less cost than flag-stone can be procured for.

DETAILED ACCOUNT OF EXPENSES OF, AND WORK DONE IN, STONE-
CUTTING AND BRICK AND STONE MASONRY DEPARTMENTS.

Stone-cutting.

Wages of cutters.....	\$257,069 23
Wages of men handling stone for cutters, carrying patterns, etc.....	13,223 03
Wages of men at receiving and transfer derricks.....	3,210 52
Materials for tools, etc.....	3,230 21
Proportion of wages of time-keepers, watermen, etc..	3,782 00
Work done in machinist department.....	3,319 95
Work done in carpenter department.....	1,413 65
Work done in blacksmith department.....	32,058 94
	<hr/>
	\$317,307 53
	<hr/>

Work Done.

Cutting 81,238 cubic feet granite.....	\$289,478 08
Miscellaneous work, as follows: Incise cutting on frieze of cornice and stone in tower.....	12,510 86
Cutting bond-stone.....	1,559 60
General fitting and cutting, rough cutting, backing, etc,	5,127 41
Work on alterations.....	8,631 58
	<hr/>
	\$317,307 53
	<hr/>

BRICK MASONRY.

Wages of brick masons and helpers.....	\$21,537 05
Hoisting brick, etc. (including fuel and all expenses of engines).....	5,562 44
	<hr/>
	\$27,099 49
	<hr/>

Work Done.

Miscellaneous work, scaffolding, etc.....	\$612 06
Work on alterations.....	7,541 84
Laying 2,876,749 bricks.....	18,945 59
	<hr/>
	\$27,099 49

Work Done.

Setting 90,548 cubic feet of granite.....	\$19,769 45
Setting 4,383 lineal feet and 3,963 cubic feet bond-stone.....	1,019 00
Setting 5 496 cubic feet sand-stone.....	945 60
Work on alterations.....	1,440 78
	<hr/>
	\$23,174 83
	<hr/>

I recommend very strongly, as I did last year, that, if possible, arrangements shall be made to keep a full force of cutters at work during the winter and spring. It would undoubtedly be to the advantage of the work besides the great benefit to the workmen and their families.

I append a detailed statement of the accounts against the work audited by me during the year, for payment by the commission.

All of which is respectfully submitted.

JAMES W. EATON,
Superintendent.

STATEMENT OF AUDITS.

The following is a statement, in detail, of the accounts against the work, which I have audited for payment by the commission :

1876.

Feb. 1. Thomas Fuller, architect, salary for January, 1876	\$833 33

ANNUAL REPORT

OF THE

ADJUTANT-GENERAL

OF THE

STATE OF NEW YORK.

TRANSMITTED TO THE LEGISLATURE JANUARY 8, 1877.

JEROME B. PARMENTER, STATE PRINTER.

1877.

STATE OF NEW YORK.

No. 7.

IN ASSEMBLY,

January 3, 1877.

ANNUAL REPORT

OF THE

ADJUTANT-GENERAL OF THE STATE OF NEW YORK.

STATE OF NEW YORK:

EXECUTIVE CHAMBER, }
ALBANY, *January 3, 1877.* }

To the Legislature :

I have the honor to transmit herewith the Annual Report of the
Adjutant-General.

L. ROBINSON.

R E P O R T.

GENERAL HEAD-QUARTERS, STATE OF NEW YORK, }
ADJUTANT-GENERAL'S OFFICE, }
ALBANY, *December 30, 1876.* }

To His Excellency SAMUEL J. TILDEN, *Governor and Commander-in-Chief:*

SIR.—I have the honor of making the following report from this department for the year 1876.

The general excellence which has characterized the National Guard for several years past still continues, and it is gratifying to observe that the organization is constantly improving and gaining in popularity, notwithstanding the abolishment of the exemption from taxation, which it was deemed by many would prove very detrimental.

Although a considerable reduction in the number of the organizations was made last year by the disbandment of several weak and inefficient ones, no disadvantage resulted therefrom; but, to the contrary, the remainder, as a whole, has been improved both in strength and efficiency.

This improvement may be, in a measure, attributed to the enthusiasm which the introduction of rifle practice created, but still more to the increase of the appropriations by the Legislature, which increase gives much more aid to each organization.

It may now be fairly claimed for the National Guard that it is an organization of which the State may well feel proud; but to keep it up to its present standard the appropriation of \$275,000 must be continued yearly.

ORGANIZATION.

The only change made in the organization during the current year has been an increase of the number of separate troops of cavalry and separate companies of infantry. Of the former, there has been one added, and of the latter, eleven.

At the present time the National Guard consists of eight divisions; eighteen brigades; one regiment and eleven separate troops of cavalry; one battalion and eleven separate batteries of artillery;

twenty-six regiments, eleven battalions, and eighteen separate companies of infantry; in all, comprising 1,546 commissioned officers and 19,878 non-commissioned officers, musicians and privates, and making an aggregate force of 21,424, thus showing an increase of 2,011 over the aggregate of last year.

RIFLE PRACTICE.

During the year rifle ranges have been established and brought into use in several of the division districts, and now, in addition to that of the National Rifle Association, at Creedmoor, which is used by the First and Second Divisions, there are the following, viz.: The Seventh Division Rifle Association range, near Rochester, used by the Seventh Division; the Sixth Division Rifle Association range, at East Syracuse, used by the Sixth Division; the Bay View Rifle Association range, near Buffalo, used by the Eighth Division; the Hudson River Rifle Association range, near Poughkeepsie; the Yonkers Rifle Association range, near Yonkers, and the American Rifle Association range, near Mount Vernon, used by the Fifth Division; the Third Division Rifle Association range, near Albany, to be used by the Third Division; and also a range near Oswego, used by the Forty-eighth Regiment; a range near Ithaca, used by the Fiftieth Battalion, and a range near Auburn, used by the Forty-ninth Regiment.

There has been great activity in rifle practice with all the organizations having ranges convenient, and so much improvement in the shooting has been made that marksmen are numerous, and it is no longer a question whether National Guardsmen can fire the pieces with which they are armed.

The International Rifle Match took place at Creedmoor on the twelfth, thirteenth and fourteenth of September last, and again the American team were victorious. As a majority of the teams are members of the National Guard, and the same was the case last year, their repeated success may be mentioned with becoming pride, and it may be fairly claimed as evidence of what is being accomplished by rifle practice in that body of citizen soldiery.

For information in detail with respect to rifle practice in the National Guard, reference is made to the report of Colonel George W. Wingate, General Inspector of Rifle Practice, appended hereto; but before dismissing this subject I must remark that care should be taken not to make this practice too onerous, and thus diminish its popularity.

THE CENTENNIAL.

Several organizations of the National Guard visited Philadelphia and participated in the Centennial anniversary. Although the number participating was not as large as had been expected, owing to the great expense attending the visit, and which, in the failure of obtaining an appropriation by the Legislature, they were obliged to bear themselves, the few who appeared there reflected credit upon the State. The Fairmount park commissioners very generously provided camping grounds for the troops in the park, and Brigadier-General James W. Latta, Adjutant-General of Pennsylvania, was very obliging in his courtesies and attentions.

WAR CLAIMS AGAINST THE UNITED STATES.

The prosecution of the war claims of the State against the United States has been continued with unabated vigor, and there has been recovered, since the date of my last annual report, the amount of \$80,744.57, making in all recovered during the past two years \$162,614.85, which, after paying all the indebtedness of the State to the United States, left a balance due the State of \$57,047.80, and that sum of money has been received from the United States and paid into the State treasury.

There yet remain many just claims of this character from which a considerable amount should be recovered, and, therefore, I have to recommend that the special appropriation for paying the expenses attending the prosecution thereof, be continued.

In the appendix will found the report of Brevet Brig.-Gen. Jno. B. Stonehouse, an assistant in this department having charge of these claims, giving information with respect to the discharge of his duties, and also a statement in detail of the account between the United States and this State relating to the same.

THE MILITARY CODE.

So many amendments of the Military Code have been made since it was revised in 1870, that the provisions of law now in force relating to the military department could not be readily ascertained; and therefore it has been deemed necessary to have printed a new edition of the Code containing the law as it exists at present.

Copies of this new edition have been distributed to all the commissioned officers of the National Guard, and also to all the county treasurers in whose counties there are organizations.

THE GENERAL REGULATIONS.

Since the adoption of the general regulations in 1854, so many modifications of the laws relating to the military forces of the State have been made, that many of those regulations were rendered obsolete and others required amending to conform to the law. Therefore a thorough revision of the regulations has been made, and a new edition is now in press, and copies of the same will be distributed to all the commissioned officers of the National Guard at an early day.

MUSTER-OUT ROLLS OF VOLUNTEERS.

The copying of the muster-out rolls of volunteers on file in this office has been continued during the current year, several clerks being employed especially for that purpose. The importance of this work has been so fully explained in my last two annual reports that I only deem it necessary now to recommend that the special appropriation for that purpose be renewed.

BUREAU OF MILITARY STATISTICS.

The record of visitors shows that the interest of the public in the Bureau of Military Statistics does not diminish, and the management of the same has been entirely satisfactory.

For detailed information respecting the bureau reference is made to the report of Miss L. Dempsey, the clerk in charge, which will be found in the appendix.

CONCLUSION.

In closing this report, I should be doing injustice to my own feelings were I not to express my obligations to Brevet Major-General John B. Woodward, Inspector-General, and to the other active members of your staff, as well as to all the officers of the National Guard having important duties to perform in connection with this department, for the great assistance they have rendered me; and I gratefully acknowledge the fidelity and industry with which Colonel Alfred H. Taylor, Assistant Adjutant-General, and the clerks associated with him in this office, have discharged their respective duties.

The usual information, in detail, will be found in the appendix, and I would call especial attention to the excellent reports of the heads of departments, the commandants of divisions and the inspectors, contained therein.

All of which is respectfully submitted by

Your obedient servant.

FRANKLIN TOWNSEND,
Adjutant-General.

APPENDICES
ACCOMPANYING THE
REPORT
OF THE
ADJUTANT-GENERAL.

APPENDICES ACCOMPANYING THIS REPORT.

- A. Reports of commandants of divisions.
- B. Register of the military force of the State of New York.
- C. Abstract of muster and inspection rolls for the year 1876, by regiments, brigades and divisions.
- D. Recapitulation of the military force of the State of New York.
- E. Table of military districts.
- F. List of commissions issued during the year 1876.
- G. General orders and circulars issued during the year 1876.
- H. Report of General J. B. Stonehouse as to the condition of the claims of the State of New York against the United States for war expenditures.
- I. Report of Miss L. Dempsey, in charge of Bureau of Military Statistics.
- K. The annual report of the Inspector-General for the year 1876, including reports of division and brigade inspectors, and the report of the General Inspector of Rifle Practice.
- L. The report of the Paymaster-General for the year 1876.

(A.)
REPORT

OF

MAJOR-GENERAL ALEXANDER SHALER, COMMANDING FIRST
DIVISION, N. G. S. N. Y.

HEAD-QUARTERS FIRST DIVISION, N. G. S. N. Y., }
NEW YORK, *December 30, 1876.* }

GENERAL. — I have the honor, in compliance with the requirements of General Orders No. 13, series 1874, general head-quarters, to make the following report for the year ending December 31, 1876 :

Parades of the division were made on two occasions ; the first on the evening of July third, in participation of the popular celebration of the one hundredth anniversary of the National Independence, and the second for review by his Excellency the Commander-in-Chief on the third day of October. The last mentioned was the first parade of the entire division fully uniformed, armed and equipped, since the changes in its organization, which were in progress at the time the last annual report was made, went into effect. Of the general appearance of the division on that occasion, I deem it unnecessary to speak or to express an opinion, for the obvious reason that the whole ceremony took place under the eye of the Commander-in-Chief ; but I desire to invite attention to the fact that though the disbandments last ordered, as a matter of course, resulted in a temporary decrease of nearly 2,000 men in the aggregate of the division, its ultimate and anticipated result, the strengthening of the remaining organizations, has been attained to a considerable degree within the present year, as will appear by the comparison of the aggregates taken from the quarterly returns.

Third quarter, 1875.....	8,230
Fourth quarter, 1875.....	6,295
Loss since third quarter, 1875.....	<u>1,935</u>

First quarter, 1876, 6,500, gain since fourth quarter, 1875....	205
Second quarter, 1876, 6,854, gain since first quarter, 1876...	354
Third quarter, 1876, 6,919, gain since second quarter, 1876..	65
Net gains since fourth quarter, 1875.....	<u>624</u>

Still more conclusive, as an evidence of the wisdom of the policy pursued, as well as instructive, are the following comparisons made from the parade reports of the division for the occasions named, the two first being prior and the last two subsequent to the reorganization:

	Present.	Absent.	Aggregate.	Percentage present.
July 5, 1875.....	4,637	3,307	7,944	.5837
October 13, 1875	4,614	2,985	7,599	.6071
July 3, 1876 *.....	3,858	1,515	5,373	.7180
October 3, 1876	4,713	1,716	6,429	.7330

As the Third Regiment cavalry did not parade upon either of the two occasions last year, it is also omitted in the figures for this year, for the purpose of enabling a better comparison. Its reports for the two parades of this year was as follows:

	Present.	Absent.	Aggregate.	Percentage present.
July 3, 1876	374	103	477	.7840
October 3, 1876	285	189	474	.6012

Giving due weight to the effect of the long continued depression in business upon an organization which is so largely maintained by the expenditure of time and money on the part of its individual members, as well as to the natural reaction following upon the extraordinary military spirit and enthusiasm engendered by the last war, it is, in my judgment, justifiable cause for congratulation when such favorable comparisons as the above are possible.

The Second Brigade was inspected and reviewed by me on the afternoon of October third, just prior to the division review, one regiment (the Eleventh) arriving upon the ground too late to permit of its being allowed to take part in the ceremony.

A meeting for the instruction of the division staff, the brigade commanders and their staffs, and of the field officers of the several regiments, was held on the evening of the eleventh instant, at which the attendance was more than ordinarily good.

* The Seventh Regiment was absent from this parade, in camp at Philadelphia.

During the year the cavalry and infantry organizations of the division were ordered to Creedmoor for rifle practice at various times, the dates of which, together with the results and full particulars, are comprehensively reported upon by the several inspectors of rifle practice.

In connection therewith, I beg leave to offer the suggestion that a permanent regimental camp be established by the State at Creedmoor during the coming season, to be used in turn by the several organizations of this and the neighboring divisions, for the period of, say one week each. All the time required could be devoted to target practice, while the residue could be very profitably employed in company and battalion drills, in acquiring proficiency in the routine of guard and general camp duties, and in gaining a general knowledge of the practical out-door duties of a soldier.

All the rifle practice required for the entire season could be had within the period suggested, which would thus do away with the necessity and expense of more frequent transportation to and from Creedmoor.

I would recommend in any event, whether the plan suggested be adopted or not, that the practice in future be by separate organizations, instead of, as during the past season, by detachments from different organizations upon the same day.

The facilities are good at Creedmoor for all these purposes, and having fully considered the subject in all its aspects, I deem the plan to be entirely feasible, and feel fully justified in commending it to the favorable consideration of general headquarters.

In the matter of armories only two changes can, as yet, be reported as having been fully accomplished since the date of my last report.

The Fifth Regiment infantry has been assigned to the armory in West Twenty-third street, formerly occupied by the Seventy-ninth Regiment, which, though superior in many essentials to their former quarters, is objectionable by reason of being located over a stable.

The Third Regiment cavalry has been removed to the city armory at the corner of White and Elm streets, and is occupying that portion of the building formerly used by the Ninety-sixth Regiment for similar purposes. Relative to its fitness as an armory for a mounted organization, and the want of proper facilities for mounted drills, I desire to invite your attention to that portion of the Division Inspector's report relating to this subject, with the remark that I fully concur in the conclusions reached by that officer.

For the Separate Troop, it gives me pleasure to say, provision is about to be made by the city authorities, in the matter of an armory, by the leasing for its use of the premises Nos. 7, 9 and 11 West Thirteenth street, for a term of years, which, though not entirely adequate to its wants, is yet so vast an improvement in respect to the facilities for mounted drills that it will afford, that the organization may well be satisfied with the proposed change, and may also be expected to show an improvement in drill and general efficiency as a consequence.

With reference to the armory of the Ninth Regiment, the effort which has been made to remove this large and prosperous organization from its present commodious and suitable quarters in West Twenty-sixth street, to a location in every way less desirable, and in fact unsuitable, will, it is now believed, not prove successful.

Before concluding, I desire again to invite your attention to the matter of the unserviceable armament of the two batteries of this division, both of them good organizations and deserving the encouragement which the issue of guns, corresponding to the arms now in use by the cavalry and infantry of the National Guard in effectiveness, would give them.

Very respectfully.

ALEXANDER SHALER,
Major-General.

To Major-General FRANKLIN TOWNSEND, *Adjutant-General, S. N. Y.*

REPORT OF MAJOR-GENERAL THOMAS S. DAKIN,
COMMANDING SECOND DIVISION, N. G. S. N. Y.

HEAD-QUARTERS SECOND DIVISION, N. G. S. N. Y.,
BROOKLYN, *December 31, 1876.*

GENERAL. — In compliance with the provisions of General Orders No. 13, series 1874, from general head-quarters State of New York, I have the honor to furnish this my annual report.

The division 'paraded, in obedience to orders from these head-quarters, October second, for review by his Excellency Samuel J. Tilden, Governor and Commander-in-Chief, at Prospect park parade

ground, the total strength of the organizations present being as follows :

Major-General commanding and staff.....	13	
Battery B, Second Division, mounted.....	72	
		85

FIFTH BRIGADE.

Brigadier-General James Jourdan commanding and staff,	9	
Thirteenth regiment infantry.....	342	
Fourteenth regiment infantry.....	308	
Twenty-eighth regiment infantry.....	311	
Fifteenth battalion infantry.....	188	
Separate troop cavalry.....	80	
		1,238

ELEVENTH BRIGADE.

Brigadier-General Ira L. Beebe commanding and staff..	5	
Twenty-third regiment infantry.....	473	
Thirty-second regiment infantry.....	297	
Forty-seventh regiment infantry.....	307	
Gatling battery, mounted.....	35	
Separate troop cavalry.....	46	
		1,168
Aggregate.....		2,486

ANNUAL INSPECTION AND MUSTER.

The inspection and muster of the organizations were held in the month of October, for details of which I would respectfully refer to the customary reports of the division and brigade inspectors.

The total strength present of the organizations of the Fifth Brigade was as follows, that of 1875 being also given for ready reference and comparison :

	1876.	1875.	Total strength present.
Brig.-Gen. James Jourdan and staff....	9	2	1,309
Thirteenth regiment infantry	372	284	
Fourteenth regiment infantry	343	340	
Twenty-eighth regiment infantry.....	310	349	
Fifteenth battalion infantry.....	191	177	
Separate troop cavalry.....	84	61	
	1,309	1,213	
	1,213		
Increase.....	96		

ELEVENTH BRIGADE.

	1876.	1875.	Total strength present.
Brig.-Gen. Ira L. Beebe and staff.....	10	10	1,326
Twenty-third regiment infantry.....	590	567	
Thirty-second regiment infantry.....	322	341	
Forty-seventh regiment infantry.....	331	357	
Separate troop cavalry.	46	39	
Gatling battery.....	27	33	
	1,326	1,347	
	1,347		
Decrease.....	21		

	1876.	1875.	Total strength present.
Battery B, second division.....	68	69	124
Separate company infantry, second division, organized since last muster..	56	
	124	69	
	69		
Increase.....	55		

SUMMARY.

	1876.	1875.	Total strength present of division.
Division commander and staff.....	15	12	
Battery B artillery, second division ...	68	69	
Separate company infantry, second div.	56	
Fifth brigade	1,309	1,213	
Eleventh brigade	1,326	1,347	
	2,774	2,641	2,774
	2,641		
Total increase present over 1875..	133		

PARADE RETURNS FOR UNIFORM AND EQUIPMENT FUND.

The last returns indicate the number of enlisted men who have made the number, and kind of parades entitling them to receive the benefit of this fund, the totals of 1875 being given for the reason before mentioned.

	1876.	1875.
Thirteenth regiment infantry.....	347	244
Fourteenth regiment infantry.....	377	343
Twenty-eighth regiment infantry.....	329	358
Fifteenth battalion infantry	195	176
Twenty-third regiment infantry.....	520	392
Thirty-second regiment infantry	324	334
Forty-seventh regiment infantry.....	325	334
Separate troop cavalry, fifth brigade.....	83	58
Separate troop cavalry, eleventh brigade.....	31	40
Gatling battery, eleventh brigade	37	34
Battery B, second division	58	63
Separate company infantry, second division	59
	2,685	2,376

TOTAL STRENGTH OF DIVISION.

The last quarterly returns of this date show the strength of the various organizations to be as follows, that of 1875 being given also:

	1876.	1875.	Aggregate strength.
Division commander and staff.....	15	12	1,765
Fifth brigade commander and staff....	9	9	
Thirteenth regiment infantry	507	427	
Fourteenth regiment infantry	483	483	
Fifteenth battalion infantry	224	212	
Twenty-eighth regiment infantry	430	398	
Separate troop cavalry, fifth brigade...	97	63	
	1,765	1,604	1,559
Eleventh brigade commander and staff.	12	10	
Twenty-third regiment infantry.....	623	602	
Thirty-second regiment infantry.....	387	388	
Forty-seventh regiment infantry	437	420	
Gatling battery.....	40	38	
Separate troop cavalry.....	60	56	
	1,559	1,514	154
Battery B, second division.....	74	79	
Separate company infantry, second div.	80	
	154	79	3,478
Grand total.....	3,478	3,197	
Total increase over 1875.....	281		

ARMORIES.

I can report nothing in reference to armories in addition to what is included in my last report, except the repairing and rebuilding of the State arsenal by the county, at an expense of \$60,000, for occupancy by the Fourteenth Regiment. A new building, 94 x 182 feet, will be erected, communicating with the arsenal proper, thus affording this organization proper armory accommodations, and of which it is expected the regiment will be able to avail itself by the first of August next.

ORGANIZATIONS.

The Thirteenth Regiment deserves special mention for its increase of 116 men since the annual inspection in 1875. Numerically, this regiment now occupies the second position in the division.

The Twenty-third Regiment is the only organization of this division that participated in the Centennial celebration at Philadelphia, in July last. The neglect, upon the part of the commanding officer, to furnish a report in detail of the duty performed, together with what occurred upon this important occasion, prevents a more complete report. This regiment, at its annual inspection, mustered present ninety-one and one-half per cent of its total strength, being greater than any other regimental organization.

Battery A, attached to these head-quarters, was disbanded, and in compliance with General Orders No. 31, series 1875, was mustered out of service in January last.

A company of infantry (eighty men) has been organized in the town of Flushing, Queens county, and attached to these head-quarters.

The division shows at this date a moderate and healthy increase in numbers over the preceding year.

Nothing more occurs to me worthy of mention, except to express my hearty congratulations to the State and division upon the very satisfactory condition in which the division now finds itself. This condition is wholly attributable to the earnest efforts of the officers and men to strengthen their respective organizations, and to act in harmony with the division and brigade commanders in every thing that could contribute to the success and prosperity of the division.

RECOMMENDATIONS.

I am convinced that it would be a benefit to the service if a moderate compensation could be given to the chiefs of staff and adjutants of regimental and battalion organizations, as it cannot be denied that the arduous duties now imposed upon them, requiring a large portion of their time, would seem to justify the State in appropriating for this purpose a sum in part equal to the services rendered. I would further recommend that the pay allowed to brigade inspectors be discontinued, as the duties performed by them are trivial, or at any rate quite moderate, when compared with those of the officers in whose interest this recommendation is respectfully presented.

Permit me again to renew the recommendation, urged in my last report, in reference to overcoats for enlisted men.

I have the honor to remain, very respectfully,

Your obedient servant.

THOS. S. DAKIN,

Major-General.

Major-General FRANKLIN TOWNSEND,

Adjutant-General, State of New York.

REPORT OF MAJOR-GENERAL J. B. CARR, COMMAND- ING THIRD DIVISION, N. G. S. N. Y.

HEAD-QUARTERS THIRD DIVISION, N. G. S. N. Y., }
TROY N. Y., *January 1st, 1877.* }

Major-General FRANKLIN TOWNSEND, *Adjutant-General, S. N. Y.,
Albany, N. Y.:*

GENERAL. — Pursuant to the requirements of paragraph 4, section 3, General Orders No. 13, issued from general head-quarters May 18, 1874, I have the honor to report the following movements of the troops of this command during the year ending December 31st, 1876.

DIVISION.

I did not deem it expedient to order a parade of the entire division during the year.

NINTH BRIGADE.

January 1 — Parade in the city of Albany to celebrate the beginning of the centennial year of American Independence.

February 22 — Parade in the city of Albany to celebrate Washington's birthday.

July 4 — Parade in the city of Albany to celebrate the one hundredth anniversary of our National Independence.

September 28 — Annual muster, inspection and review by Maj.-Gen. Jno. B. Woodward, Inspector-General, State of New York.

TENTH BRIGADE.

July 4 — Parade of Second Battalion, Battery B, Battalion of Artillery and First and Fourth Separate Companies of infantry in the city of Troy, to celebrate the one hundredth anniversary of our National Independence.

October 12 — Annual inspection, muster and review of a portion of this command, on which occasion I reviewed them, accompanied by my staff.

The separate companies of this command are fine organizations, composed of good material, well officered and are improving in discipline.

Companies A and B of the Second Battalion refused to obey the orders to parade July fourth, for the reason that an organization of Orangemen were invited to participate in the Centennial anniversary celebration. I am happy to say that the commissioned officers of these companies were an exception, and reported promptly for duty. The delinquent men were court-martialed and punished for their disobedience.

THIRTEENTH BRIGADE.

A separate company of infantry is being organized in this brigade, but up to the present time I have no reports of their condition.

The brigade commandants are devoting much time and attention to the condition of their commands, weeding out bad material and replacing it with good, and the entire division is steadily improving in numbers, quality and discipline.

Very respectfully yours.

J. B. CARR,
Major-General.

REPORT OF MAJOR-GENERAL JAS. W. HUSTED, COMMANDING FIFTH DIVISION, N. G. S. N. Y.

HEAD-QUARTERS FIFTH DIVISION, N. G. S. N. Y., }
PEEKSKILL, *January 1, 1877.* }

GENERAL.—In compliance with orders, I have the honor to report the following information concerning this command.

I did not regard it desirable to order a division parade during the year, on account of the difficulty in procuring transportation.

There have been the usual brigade reviews. The brigade review of the Seventh Brigade was conducted at White Plains, Westchester county, upon the occasion of the celebration of the centennial of the battle of White Plains, October 28, 1876. I was present with my

staff, and reviewed the command. Although the review was conducted in the midst of a pelting snow storm, the movements and bearing of the troops were highly commendable. Colonel John T. Underhill, Twenty-seventh Regiment, commanded the brigade, in the absence of Brigadier-General James A. Blauvelt, who was absent by reason of sickness. The Twenty-seventh Regiment deserve special commendation for their steadiness and fine appearance. The Sixteenth Battalion were also fully up to their usual high standard. The occasion was marked by the first parade of the First Separate Troop, attached to this brigade. This organization, commanded by Captain S. O. Howe, is made up of a fine body of young men from the vicinity of Mount Vernon. They were well mounted, and exhibited a knowledge of drill hardly to be expected from so young an organization.

The Eighth Brigade, commanded by Brigadier-General George Parker, fully sustains its reputation, and is exhibiting steady progress. For a more detailed report of this brigade, I refer you to the report of the brigade commander.

The subject of rifle practice has received, during the past year, more than usual attention in this command. On the 25th day of October, 1876, the division match was held at Poughkeepsie, at which there were competing teams from the Twenty-seventh Regiment and Sixteenth Battalion, Seventh Brigade, and from the Twenty-first Regiment and Twentieth Battalion, Eighth Brigade. The Twenty-first Regiment took the prize with a fine score. The effect of the match upon the troops has been efficacious, and produced a spirit of emulation so highly desirable in securing good results in this all-important branch of our soldiery. For further particulars of this match I would refer you to the special report made by Colonel John Bodine, inspector of rifle practice on my staff, forwarded herewith.* It is hardly necessary for me to add that the importance of the State in sustaining these ranges should not be forgotten by the Commander-in-Chief. Your views upon this question are so well known that it seems supererogatory for me to speak of it. I trust that sufficient appropriations may be made to uphold and sustain the three ranges established in my division district, viz.: The Hudson River Rifle Association, at Poughkeepsie; the Yonkers Rifle Association, at Morsemere, Yonkers, and the American Rifle Association, at Glendrake, Mount Vernon, upon all of which ranges

* See report of General Inspector of Rifle Practice.

much good work in the way of rifle practice has been done by the National Guard during the last year.

I am, very respectfully, your obedient servant.

JAMES W. HUSTED,
Major-General.

To Major-General FRANKLIN TOWNSEND,
Adjutant-General, Albany, N. Y.

REPORT OF MAJOR-GENERAL HENRY BRINKER, COM-
MANDING SEVENTH DIVISION, N. G. S. N. Y.

HEAD-QUARTERS SEVENTH DIVISION, N. G. S. N. Y., }
ROCHESTER, N. Y., *January 2, 1877.* }

To Major-General FRANKLIN TOWNSEND, *Adjutant-General State of
New York :*

GENERAL.—In compliance with General Orders No. 13, series of 1874, from general head-quarters, State of New York, I have the honor to submit the following report.

Division parades were had as follows :

July 4, 1876.—In celebration of the one hundredth anniversary of our Independence, and for review by his honor the mayor and city officials of Rochester.

October 5, 1876—The Twenty-fifth Brigade at the city of Rochester.

October 11, 1876—The Twentieth Brigade at the city of Elmira.

October 12, 1876—The Separate Troop of infantry at Penn Yan, rifle practice. In addition to the parades above noted, all the infantry, artillery and cavalry of the division were ordered to parade for rifle practice at the Seventh Division rifle range, at various times during the year, and for full statement thereof I beg to refer you to the reports of the inspectors of rifle practice heretofore forwarded. Considerable improvement has been made, during the past year in the part of the division at Rochester.

The State prize was competed for on the 24th day of November, 1876, by teams from all the commands, and was won by the team of H company Fifty-fourth Regiment, N. G. S. N. Y., after an exciting contest.

September 6, 1876 — Nathaniel R. Boswell, sheriff of Ontario county, made requisition on the division commander for fifty men to aid him in the execution of Charles Eighmey, on the 8th day of September 1876, to report at Canandaigua at nine o'clock A. M., which was promptly responded to, and the expense of the same was paid by Ontario county.

No material changes have taken place in the command during the past year.

I am, general, very respectfully,
Your obedient servant.

HENRY BRINKER,
Major-General, Commanding Seventh Division, N. G. S. N. Y.

HEAD-QUARTERS TWENTY-FIFTH BRIGADE, N. G. S. N. Y., }
ROCHESTER, N. Y., *January 3, 1877.* }

Major-General FRANKLIN TOWNSEND, *Adjutant-General S. N. Y. :*

GENERAL.—In compliance with General Orders, I have the honor to submit my second annual report as commander of the Twenty-fifth Brigade, N. G. S. N. Y.

It is now a little over one year and a-half since I held my present position, and, although my predecessor had infused new life and activity into the command, I can safely say some advance has been made in discipline and proficiency of the brigade during the past year, all subordinate officers and men working harmoniously to that end.

During the past winter frequent company and battalion drills were had at the arsenal, which, as a rule, were well attended and much earnest labor bestowed. These drills will speedily be resumed for the present winter.

There have been four street parades of the brigade during the past year: one on twenty-second February, one on thirtieth May, one on fourth July and one on fourth October; and, on each occasion, the number present was quite satisfactory. The fourth October, the day of our annual review and inspection, proved to be very unfavorable, it having rained part of the afternoon and all the night previous to, and the forenoon of, the day on which the review took place, so that we were obliged to dispense with a part of the programme—

in consequence of the wet and mud — and have the review on Clinton street, dismounted, near the arsenal, and the troops inspected in and in front of the arsenal, instead of on the grounds of the Driving Park Association, as contemplated. As a result of this state of things, the ranks were not quite as full as they otherwise would have been, and the officers and men could not acquit themselves as well as they would have done had the weather been fair. I must not omit, in this connection, to mention the fact that Major-General John B. Woodward, Inspector-General, S. N. Y., honored us with his presence on the day of inspection; and I might here add that more frequent visitations on the part of our superiors would have a salutary effect.

During the summer the companies of the Fifty-fourth Regiment, the batteries of the First Battalion light artillery, and the Separate Troop cavalry, composing this brigade, have practiced rifle shooting at the Seventh Division range, under proper orders and instructions, and have improved very considerably in the use of fire-arms, quite a large number having qualified as marksmen. This practice has increased the interest of the men and stimulated them to greater exertions in their duties, and, in that way, is doing a vast deal of good.

N. R. Boswell, sheriff of Ontario county, N. Y., having made a requisition on Major-General Henry Brinker for a company of infantry to do guard duty at the execution of a criminal, at Canandaigua, on the 8th of October, 1876, Colonel George A. Begy was ordered to detail a company from the Fifty-fourth Regiment for that purpose, and in compliance with such order dispatched D company to discharge that unpleasant duty.

In conclusion, I think I may say that the brigade, under all the circumstances, is in a healthy condition; but, in order to bring the military of the State to a higher state of excellence, much more should and must be done by the State than has been heretofore done. Without going into detail, I venture to suggest that some provision should be made which would enable the National Guard to have the benefit of camp and field practice, without which it would be difficult, if not impossible, to wield large bodies of men effectively. A week spent in camp, once a year, would be of vast service to the National Guard, and it appears to me to be the most urgent thing now required; and to afford this, money will be needed, which, in my judgment, should be furnished by the State, as most of the men

belonging to the National Guard are dependent on their daily earnings for the support of themselves and families, and are not able, if they had the disposition, to serve the State and pay for so doing.

I am, general, very respectfully,

Your obedient servant.

WILLIAM H. BRIGGS,

Brigadier-General.

REPORT OF MAJOR-GENERAL R. L. HOWARD, COM-
MANDING SEVENTH DIVISION, N. G. S. N. Y.

HEAD-QUARTERS EIGHTH DIVISION, N. G. S. N. Y., }
BUFFALO, *December 11, 1876.* }

GENERAL.—In compliance with paragraph 4, subdivision 4, General Orders No. 13, series of 1874, I have the honor to submit the following report of the movements of this division during this year now closing.

July 4 — The Sixty-fifth and Seventy-fourth Regiments of infantry, Battery A, light artillery, Thirty-first Brigade, and the First Troop of cavalry, Eighth Division, paraded in honor of the one hundredth anniversary of American Independence. Though the troops were formed and the march made in a heavy rain storm, each command paraded with full ranks and made a creditable appearance.

July 31 — Accompanied by my staff, I reviewed that portion of the Thirty-first Brigade located in Buffalo. The troops were commanded by their veteran and efficient commander, Brigadier-General Wm. F. Rogers, and presented a good appearance. Though small in numbers, attributable in a large degree to the fact that the majority of the National Guard in this city is composed of mechanics, who are dependent upon day-labor for support. These men are often threatened by their employers with discharge if they parade, and as their services to the State are voluntarily performed, and without compensation, a natural result is their failing to comply with orders, preferring to stand such punishment as may be imposed upon them, or defend their dereliction of duty upon the plea of impossibility to obey orders, except at the cost of their living.

On the twelfth day of October last, the First Troop of cavalry of this division was inspected and mustered, and, I regret to say, only about one-third being present. This troop was organized but not equipped at my last annual report, and now numbers 120 members.

It has eighty-five full sets of equipments and uniforms, is comfortably quartered in the State arsenal, and, except for its unqualified commandant, ought to make as good an organization as there is in the State, and by the changing of its present captain for one competent, I shall next year report to you that it is in good and efficient condition, well officered and disciplined.

There has been organized in this division, and attached to the Thirty-first Brigade, during the past year, five separate companies of infantry, composed of good material, with competent officers, and numbering about 500 men. These companies have each been separately mustered and inspected. For a detailed account of their movements and condition I respectfully refer you to the report of Brigadier-General Wm. F. Rogers, accompanying this report.

During the present year the Bay View Rifle Range of the Eighth Division has been completed. Though late in the season, before it was formally opened for the use of the National Guard, considerable progress has been made. Owing to sickness I have not given it the attention it deserves, or that I wish I had been able to, but some of my staff officers have made fair scores, and another year will develop more interest and to the encouragement of the national guard. We were fortunate to have Brevet Major-General John B. Woodward, Inspector-General, present at the opening of the range, and who kindly suggested several improvements, which have been acted upon. I desire to make personal mention of Lieutenant-Colonel E. C. Cochrane, Acting Inspector of Rifle Practice of this division, Major Ebenezer A. Rockwood, Inspector of Rifle Practice, Thirty-first Brigade, and Major George E. Mann, Engineer, Thirty-first Brigade, all of whom have given much time to the range and rifle practice, and I consider that it is to their energy the success of the range this year is in great part due. Detailed reports of rifle practice and of the various matches have been forwarded by the proper officers to the Inspector of Rifle Practice.

Before closing this report I desire to call your attention to the necessity of the proper uniforming and equipping the soldiers of the National Guard. At present the troops of the division have but one uniform. They have neither overcoats (except a few bought by this city for the Sixty-fifth and Seventy-fourth Regiments), blankets, knapsacks, haversacks or canteens, of which all are essentially necessary to a soldier's outfit. Exposure to cold and inclement weather may occur at any moment, and it seems to me an injustice to compel

men to perform military service not supplied with articles necessary to their health and a proper discharge of duty. In my opinion I do not think it advisable for the troops to furnish and own equipments, such as greatcoats, blankets, etc., as I believe it conducive to a spirit of independence from the State, and calculated to create indifference ; and, as they receive no pay, their sense of duty is farther removed from what it should be with each article provided. If the great State of New York does not feel able to properly provide for its 20,000 National Guard, let it be reduced to a number it can properly support.

In conclusion I would add, that in my efforts to improve the efficiency of my command, I have been warmly supported by both officers and men, and my thanks are due to them, as they are for the many courtesies I have received from your's and the other staff departments.

Hoping that in each succeeding year new improvements may be made throughout the National Guard,

I am, general, very respectfully yours.

R. L. HOWARD,

Major-General Commanding.

Major-General FRANKLIN TOWNSEND, *Adjutant-General.*

(Copy.)

HEAD-QUARTERS THIRTY-FIRST BRIGADE,
EIGHTH DIVISION, N. G. S. N. Y.,
BUFFALO, *December 12, 1876.* }

Colonel WM. S. BULL, *Asst. Adjt.-Gen., Eighth Division, N. G., Buffalo, N. Y.:*

COLONEL. — Pursuant to General Orders No. 13, series of 1874, I have the honor to make the following report :

June 19, 1876, the Sixty-fifth and Seventy-fourth Regiments paraded with one day's rations, pursuant to General Orders No. 5, from their head-quarters, for drill and instructions upon the parade. The morning was occupied by battalion drill, under the command of the colonels. In the afternoon the regiments were consolidated into one battalion, and drilled by myself as instructor.

Upon the fourth of July, that portion of the brigade stationed in Buffalo paraded in honor of American Independence.

July 31, 1876, the Sixty-fifth and Seventy-fourth Regiments and Battery A paraded for annual inspection and muster, and were reviewed by the major-general commanding the Eighth Division, accompanied by his staff. The various separate companies of infantry attached to this brigade have passed their annual inspection and muster at their respective armories in the towns in which they are stationed, at different times and separately.

It seems desirable to me that in future the annual inspection and muster of the entire brigade should take place upon one day, and out of town companies should, for that purpose, be ordered here upon that day. There are many reasons for this, among which are, that men are prevented from mustering in more than one organization, and that by bringing the separate companies where they may see the city troops, and be seen by them, a greater interest and rivalry will be stirred in both; the brigade made more of a unit, and a great deal of time saved the brigade inspector.

During the past year five separate companies of infantry have been added to the brigade, being a total of 506 men. These companies are, I am happy to say, efficient, live organizations, and will, I doubt not, add much to the brigade in every respect.

I have this year caused the brigade inspector to inspect the companies of the Sixty-fifth and Seventy-fourth Regiments separately, and report to me their efficiency in drill, and also the fitness of their officers for command. I also, during the winters of 1875 and 1876, gathered the commissioned officers of the two regiments together at different times for drill and instruction in the school of the company, and I think these inspections and drills have had a very beneficial effect. There has been much interest manifested this year in the rifle range. All the city companies have practiced somewhat, and I hope that next year will see a marked improvement in the marksmanship of the brigade.

In closing my report, allow me to suggest that it would greatly assist me if all papers from departments above were to pass through the regular channels. At various times during the past year I have received information from my subordinates which should have reached me through division head-quarters.

I have the honor to be, colonel, very respectfully.

WM. F. ROGERS,
Brigadier-General.

(B.)

GENERAL ORDERS AND CIRCULARS

ISSUED DURING THE YEAR 1876.

GENERAL HEAD-QUARTERS, STATE OF NEW YORK,
ADJUTANT-GENERAL'S OFFICE, ALBANY, *January 15, 1876.*

GENERAL ORDERS }
No. 1. }

I. The following is announced from these head-quarters as the "figure of merit" or comparative efficiency in rifle practice displayed by the different organizations of the National Guard during the year 1875, as shown by the report of the General Inspector of Rifle Practice:

INFANTRY.

Order of merit.	REGIMENT.	Number present for practice.	Number present last inspection.	Average points — third class.	MARKSMEN.		FIRST CLASS.		SECOND CLASS.		THIRD CLASS.		Figure of merit.

6	Rochester cav....	33	..	13.31	0	3.12	0	0	3	9.37	15.40

II. The following list of those who have qualified as "Marksmen" during the same period is hereby promulgated for the information of the National Guard. The skill they have displayed in this most important portion of a soldier's duty

merits warm commendation. It is hoped that the honorable distinction they have won will inspire their comrades during the coming year to emulate their example, and thus secure the same trophy for themselves, and a high "figure of merit" for their regiments.

As to the right to wear the "Marksman's Badge," during the year, can only be retained by annually making the prescribed score, it is hoped that those who have already earned the right to wear it will keep up their interest in rifle practice, and spare no pains to retain their names on the roll of marksmen, to be hereafter annually published from these head-quarters.

MARKSMEN

REPORTED AS QUALIFYING DURING THE YEAR ENDING DECEMBER 1, 1875.

Number.	NAMES.	RANK.	SCORES.		Total.
			300 Yds.	500 Yds.

GENERAL ORDERS, }
 No. 4. }

The State Military Examining Board, constituted by General Orders, No. 8, series 1875, which convened at Norwich, Chenango county, on the 24th, and at New York city on the 28th of February, 1876, having made the following recommendations to the Commander-in-Chief, the same are hereby approved and confirmed:

I. That Colonel E. J. Loomis be retained in the service, in command of the One Hundred and Third Regiment National Guard, his statements and explanations being satisfactory in the matter submitted to the board for examination.

II. That the commission of Second Lieutenant William H. Finlay, Seventy-fourth Regiment, be vacated for disobedience of the orders of the Commander-in-Chief, in not appearing for examination.

III. That the commissions of the following named officers be vacated, they being, in the opinion of the board, unqualified for the offices now held by them, owing to deficiency in tactical knowledge:

Colonel Albert F. Smith, Forty-eighth regiment.

First Lieutenant Frederick Flesler, Twenty-eighth regiment.

Second Lieutenant James Peattie, Twenty-first regiment.

By order of the Commander-in-Chief.

GENERAL ORDERS, }
No. 5. }

The following amendments of the Military Code are published for the information and government of the National Guard :

LAWS OF NEW YORK — CHAP. 29.

AN ACT to amend chapter eighty of the Laws of eighteen hundred and seventy, entitled "An act to provide for the enrollment of the militia, for the organization of the National Guard of the State of New York, and for the public defense, and entitled the Military Code."

PASSED February 23, 1876; three-fifths being present, and two-thirds of the members in each House present concurring therein.*

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. Section forty-two of chapter eighty of the Laws of eighteen hundred and seventy, entitled "An act to provide for the enrollment of the militia, for the organization of the National Guard of the State of New York, and for the public defense, and entitled the Military Code," is hereby amended so as to read as follows :

§ 42. It shall be the duty of the Inspector-General to visit, at least once in every two years, each regimental and battalion district in the State. He shall critically inspect, as often as he may deem necessary every branch connected with the military service, including armories, arsenals and military storehouses; and he shall report to general head-quarters the improvement in discipline and tactical instruction of the National Guard, as well as other matters appertaining to his department. The General Inspector of Rifle Practice shall have charge of rifle practice throughout the State, and shall direct the manner in which the same shall be conducted. He shall report direct to the Inspector-General. The division, brigade, regimental and battalion inspectors of rifle practice shall perform such duties as may from time to time be prescribed by the General Inspector of Rifle Practice, with the approval of the Inspector-General. On the approval of the Commander-in-Chief, expenditures may be made from the appropriations for military purposes, for services and expenses in maintaining rifle ranges, and promoting rifle practice in the National Guard.

§ 2. Section seventy of said act is hereby amended so as to read as follows :

§ 70. In case of the election or appointment of a supernumerary officer to office in a regiment, battalion, troop, battery or company, he may be commissioned with rank from the same date as that conferred by his previous commission for like office; and the Commander-in-Chief may assign any supernumerary officer of sufficient rank to fill a vacancy on the staff of any Major-General or Brigadier-General or commandant of regiment or battalion who requests the same.

* See § 6 of article 11 of the Constitution of the State of New York.

§ 3. Section two hundred and fifty-three of said act is hereby amended so as to read as follows :

§ 253. Every non-commissioned officer, musician and private of the National Guard originally enlisting shall be held to duty therein for the term of five years, and in case of re-enlisting, for the term for which he re-enlists, unless disability after enlistment shall incapacitate him to perform such duty, and he shall be regularly discharged in consequence thereof by the commandant of his regiment, battalion, separate troop, battery or company; provided, however, that every such non-commissioned officer, musician and private, shall continue to be held to duty, and shall retain his rank and be eligible to promotion, after the expiration of his term of enlistment or re-enlistment so long as he or the commandant of his troop, battery or company omits to apply for his discharge, as provided in the next succeeding section; and on such application being made, his discharge shall not be granted until the expiration of three months from the date of the application; except when the application is made by the commandant of his troop, battery or company, in which case the discharge may be granted immediately, and also further provided that every non-commissioned officer, musician and private who enlisted prior to the first day of May, eighteen hundred and seventy-five, shall serve the whole length of the term for which he enlisted. Every commissioned officer, and every non-commissioned officer, musician and private of the National Guard shall be exempt from jury duty during the time he shall perform military service; and every such person who shall have so served five or more years and been honorably discharged, shall forever after be exempt from jury duty. Except as herein otherwise provided, no non-commissioned officer, musician or private of the National Guard shall be discharged from service, except for physical disability or expiration of term of enlistment. Discharges for physical disability shall be granted only upon the certificate of the regimental or battalion surgeon, and in the case of a separate troop, battery or company, of the surgeon of the division or brigade to which such separate troop, battery or company is attached; always provided, however, that the commandant of each division may, for sufficient reason, and in his discretion, grant discharges to enlisted men in his division, at any time, upon the recommendation of the commandant of the troop, battery or company, with the approval of the commandant of the regiment or battalion and of the brigade to which they belong, and in case of a separate regiment, battalion, troop, battery or company attached to a division, upon the recommendation of the commandant of such separate regiment, battalion, troop, battery or company; but no enlisted man shall be discharged from service unless he produces the certificate of his immediate commanding officer that he has turned over or satisfactorily accounted for all property issued to him. Commanding officers of divisions, regiments and battalions, and of separate troops, batteries or companies, shall make returns to the Adjutant-General, on the last day of March, June, September and December, in each year, of all discharges granted by them during the previous three months, giving the names and grades of the persons so discharged, and specifying the causes for which discharged.

§ 4. Section two hundred and fifty-four of said act is hereby amended so as to read as follows :

§ 254. Whenever any non-commissioned officer, musician or private of the National Guard shall have performed service therein for the term of five years from the date of enlistment, or for the term for which he may have re-enlisted, properly uniformed, armed and equipped, according to the provisions of this act, he or the commandant of his troop, battery or company shall be entitled to apply for his dis-

charge from the service; and, upon his so applying, and presenting the certificate of the commandant of his troop, battery or company, that he has performed such service, and that he has turned over or satisfactorily accounted for all property issued to him, which certificate the said commandant shall give him, if warranted by the facts, or upon the commandant of his troop, battery or company so applying and certifying to such facts, the commandant of the regiment or battalion to which he belongs, or in case of a separate regiment, battalion, troop, battery or company, the commandant of the brigade or division to which it is attached shall grant him a full discharge from the service at the expiration of three months from the date of the application; but if the application be made by the commandant of his troop, battery or company, the discharge may be granted immediately, for sufficient reason and in his discretion, by the officer authorized to grant the same.

§ 5. All acts or parts of acts conflicting with the provisions of this act are hereby repealed; but such repeal shall not affect any legal proceedings commenced under such conflicting acts.

§ 6. This act shall take effect immediately.

STATE OF NEW YORK,
OFFICE OF THE SECRETARY OF STATE, } ss.:

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom and of the whole of said original law.

JOHN BIGELOW,
Secretary of State.

By order of the Commander-in-Chief.

FRANKLIN TOWNSEND,
Adjutant-General.

GENERAL HEAD-QUARTERS, STATE OF NEW YORK, }

GENERAL ORDERS, }
No. 6. }

The proceedings, findings and opinion of the Court of Inquiry appointed by Special Orders, No. 38, current series, of these head-quarters, are hereby approved, and the Court of Inquiry is hereby dissolved.

For the information and instruction of the National Guard, the opinion of Brigadier-General William G. Ward, who constituted the Court of Inquiry, is published herein, as follows:

OPINION.

The court is therefore of opinion that General Woodward is wholly blameless in this matter.

And that Captain Douglass committed a serious breach of decorum, at the very least, in publishing such a letter without taking steps to verify his statements.

He seems to have allowed his feelings to far outrun his judgment, and to have taken a most improper way of ventilating his grievances, which are clearly shown to be imaginary.

By order of the Commander-in-Chief.

FRANKLIN TOWNSEND,
Adjutant-General.

GENERAL HEAD-QUARTERS, STATE OF NEW YORK,
ADJUTANT-GENERAL'S OFFICE, ALBANY, April 1, 1876. }GENERAL ORDERS,

Patrick F. Bulger, Lieutenant-Colonel, with rank from December 6, 1876. Original.

THIRTY-SECOND REGIMENT.

Valentine Ebel, First Lieutenant, with rank from November 23, 1876, vice John A. Dillmeier, promoted.

Hermann Holzapfel, First Lieutenant, with rank from November 23, 1876, vice Charles Waage, promoted.

Jacob Seibert, Second Lieutenant, with rank from November 23, 1876, vice Hermann Holzapfel, promoted.

Henry Schnurbusch, Second Lieutenant, with rank from November 23, 1876, vice Henry Mueller, resigned.

Charles Stachelroth, Second Lieutenant, with rank from November 23, 1876, vice Robert Spitzer, promoted.

Frederick W. Parisette, Second Lieutenant, with rank from November 16, 1876, vice Stanislaus R. Blumke, commission vacated.

George J. Schwenck, Second Lieutenant, with rank from November 16, 1876, vice Herman Berls, removed from district.

THIRTY-FIFTH BATTALION.

Barney Patnoe, Captain, with rank from December 5, 1876, vice Samuel S. Guy, failed to qualify.

John J. Hartigan, First Lieutenant, with rank from December 5, 1876, vice Philip Hickey, resigned.

Samuel B. Berow, Second Lieutenant, with rank from December 5, 1876, vice Henry Bolter, resigned.

Andrew J. Moore, First Lieutenant, with rank from December 4, 1876, vice Alfred McCutchen, failed to qualify.

FORTY-SEVENTH REGIMENT.

Charles O. Olcott, First Lieutenant, with rank from November, 17, 1876, vice Alvah G. Brown, promoted.

Howard A. Sperry, Second Lieutenant, with rank from November 17, 1876, vice Charles O. Olcott, promoted.

FORTY-NINTH REGIMENT.

William M. Kirby, First Lieutenant, with rank from November 29, 1876, vice Frank R. Rathbun, resigned.

FIRST SEPARATE COMPANY OF INFANTRY, TWENTY-FIRST BRIGADE.

Frank J. Bailey, Second Lieutenant, with rank from September 25, 1876, vice Frederick H. Mitchell, resigned.

BREVET COMMISSION.

First Lieutenant and Adjutant, William M. Kirby, Forty-ninth Regiment, Captain by brevet.

The following resignations in the National Guard, State of New York, have been accepted during the same period:

Date.	Regiment.	Brigade.	Division.	Name.	Office.
1876.					
Dec. 4	23	11	2	Henry Edward Roehr.....	Colonel.
4	23	11	2	Clarence W. Montgomery.....	Second Lieutenant.

29	25	9	3	Christ. Frischknecht.....	First Lieutenant.

By order of the Commander-in-Chief.

FRANKLIN TOWNSEND,
Adjutant-General.

GENERAL HEAD-QUARTERS, STATE OF NEW YORK, }
ADJUTANT-GENERAL'S OFFICE, ALBANY, April 17, 1876. }

CIRCULAR, }
No. 1. }

To the end that all the organizations of the National Guard may be informed of the arrangements made by the State of Pennsylvania for the encampment of the "organized Militia and National Guard" in Fairmount park, on the occasion of the Centennial Exhibition, the following communication from the Adjutant-General of that State is published:

ADJUTANT-GENERAL'S OFFICE, }
HARRISBURG, April 11, 1876. }

General FRANKLIN TOWNSEND, *Adjutant-General of New York, Albany, N. Y.:*

GENERAL.—About two hundred and sixty (260) acres of land within the limits of Fairmount park, and about a mile in its farthest distance from the exposition buildings, have been designated by the Park Commission for the encampment of the organized Militia and National Guard.

The Governor of Pennsylvania is charged by the commissioners with the allotment and assignment of the grounds to the military bodies who may visit Philadelphia during the Centennial. It is intended to set the land apart by States, and it is consequently desirable that as early as practicable you report—

I. What, if any organizations from your State, intend to visit the Exhibition for the purpose of encampment, and when.

II. The number of men in each organization who are expected to be present on the occasion, and

III. The names of each Regimental, Battalion and Company Commandant, and the designation, by letter, name or number of the several bodies.

It is understood that all bodies must come provided with Camp Equipage, and arrange for and provide themselves with their subsistence.

As some inquiries may be necessary before the detailed information requested can be given, it is, in view of the near approach of the opening of the Exhibition, earnestly desired that, if possible, in the acknowledgment of this communication, you furnish such probabilities as you may deem sufficiently reliable for immediate advice.

Very truly yours.

(Signed) JAMES W. LATTA,
Adjutant-General Penn.

Organizations of the National Guard intending to visit Philadelphia during the Centennial Exhibition will make a report to these head-quarters at the earliest moment practicable, giving the information desired by Adjutant-General Latta, and also make a requisition for the necessary number of tents, which is all the aid that the means at the disposal of the Military Department of the State will admit of.

By order of the Commander-in-Chief.

FRANKLIN TOWNSEND,
Adjutant-General.

GENERAL HEAD-QUARTERS, STATE OF NEW YORK, }
ADJUTANT-GENERAL'S OFFICE, ALBANY, *November 28, 1876.* }

CIRCULAR, {
No. 13. }

As there seems to be some misapprehension with respect to the provisions of the Military Code, relating to the returns of the parades for Uniform and Equipment Fund, section 118 thereof is published herewith, accompanied by the following instructions, viz. :

The parades of the Regiment or Battalion must be of the *whole organisation*, and not of a wing only, and include those made for the purposes of a drill, as well as all others that occur during the year.

The parades of Companies of a Regiment or Battalion, or of a Separate Troop, Battery or Company, include, in like manner, all of the parades of the whole of such organizations during the year.

In the new form of blanks for the parade returns for Uniforms and Equipment Fund, distributed herewith, the first column on the left will be filled with consecutive numbers of the men recorded; and the heading of each of the narrow columns, under "Occasions of Parade," are to be filled with the date and the kind—that is, whether Regimental, Battalion or Company—of parade; and in those columns, opposite each man's name, either the letter "P" or the letter "A" will be inserted, to denote his presence or absence, as the case may be.

SECTION 118, MILITARY CODE.

In lieu of uniforms and equipments being furnished by the State to non-commissioned officers and privates, as heretofore provided by law, there shall annually be paid by the State to the military fund of each Regiment, Battalion and Separate Troop, Battery or Company of Infantry for the purpose of aiding the non-commis-

sioned officers, musicians and privates of said organizations in procuring their uniforms and equipments, a sum equal to seven dollars for each of its non-commissioned officers, musicians and privates, who paraded during the year preceding, fully uniformed, armed and equipped, according to the provisions of this act, at least seven different times, four of which shall have been on the occasion of Regimental, Battalion Separate Troop, Battery or Company parades. And in order to determine the amount of money to which each Regiment, Battalion, Separate Troop, Battery or Company will be entitled under the provisions of this section, the commandant of each Regiment, Battalion and Separate Troop, Battery or Company, shall transmit to the Adjutant-General, during the month of December, and prior to the fifteenth day thereof in every year, a roll giving the name and description of each non-commissioned officer, musician and private in his command who paraded at least seven different times, as hereinbefore specified, stating the occasions, during the year next preceding the said month of December, which roll the said commandant shall certify to on honor. And for the purpose of paying the said sums of money, the Comptroller shall draw his warrants upon the Treasurer in favor of the county treasurers, in the same manner as is provided in section 178 of this act, on the certificate of the Adjutant-General and Inspector-General, approved by the Commander-in-Chief, showing the amount that each Regiment, Battalion, Separate Troop, Battery or Company is entitled to. The said money thus appropriated for uniforms and equipments shall be held sacred and inviolate for such purpose, and shall not, in any event, be expended for any other ; provided, however, that uniforms and equipments may be furnished to new organizations in the first instance directly by the State ; and, also, further provided, that equipments required prior to the 1st day of October, 1875, may be furnished under the provisions of the laws in force at the time of the passage of this act. But the provisions of this section and the next preceding one relating to equipments shall not apply to the enlisted men of the Cavalry and Artillery, except in so far as their personal equipments are concerned.

FRANKLIN TOWNSEND,
Adjutant-General.

GENERAL HEAD-QUARTERS, STATE OF NEW YORK, }
ADJUTANT-GENERAL'S OFFICE, ALBANY *December 6, 1876.* }

CIRCULAR, {
No. 2. }

Supplemental to the instructions contained in Circular No. 1, bearing date November 28, 1876, the following will be observed, viz. :

Only those parades of Regiments, Battalions and Companies of Regiments and Battalions, and of Separate Troops, Batteries or Companies, which have been made under specific orders, can be included in the returns of parades for Uniform and Equipment Fund, and copies of all such orders must accompany the returns.

FRANKLIN TOWNSEND.
Adjutant-General.

(H.)

REPORT OF GEN. J. B. STONEHOUSE

AS TO THE

CONDITION OF THE CLAIMS OF THE STATE OF NEW YORK AGAINST
THE UNITED STATES FOR WAR EXPENDITURES.

ADJUTANT GENERAL'S OFFICE, }
ALBANY, December 30, 1876. }

Major-General FRANKLIN TOWNSEND, *Adjutant-General*:

GENERAL. — I have the honor to make the following report, showing the present condition of the account of the State of New York against the United States for war expenditures.

Since the date of my last report I have obtained an additional allowance as below stated, viz.:

On disallowed and suspended items of the first and second installments.....	\$14,291 98
On disallowed and suspended items of the third installment.....	9,311 04
On disallowed and suspended items of the fourth installment.....	28,321 06
On disallowed and suspended items of the fifth installment.....	19,945 86
On disallowed and suspended items of the sixth installment.....	8,874 68
	<hr/>
	\$80,744 57
Add balance carried to the credit of the State on general account at last settlement, after completing payment of direct tax.....	640 03
	<hr/>
	\$81,384 60

At the time of this settlement there was on file in the office of the Third Auditor of the treasury, a charge of the Surgeon-General of the army against the State of \$24,336.80, which was deducted from the above amount as follows:

Brought forward.....	\$81,364 60
For bedding and furniture of the "Ira Harris" U. S. Hospital at Albany, turned over to the State December 31, 1865.....	\$10,644 55
For hospital furniture, bedding etc., furnished quarantine department April 30, 1866.....	18,510 25
	<hr/>
	\$29,174 80

From which was deducted on account of the quarantine department against the United States, as follows :

For medical care U. S. soldiers, \$3,673 00	
For transportation and burials, 1,165 00	
	<hr/>
	4,838 00
	<hr/>
	24,336 80

Leaving a balance of..... \$57,047 80
Which has been received and paid into the treasury of the State.

It will be seen by the annexed statement of the account that there still remains, disallowed, suspended and unexamined a balance in favor of the State of \$1,343,949.02; of this amount a large portion will, probably, never be recovered. I hope, however, to secure a considerable additional allowance during the ensuing year.

I am, general, very respectfully,

Your obedient servant.

J. B. STONEHOUSE,

Assistant in Adjutant-General's Department.

THE UNITED STATES IN ACCOUNT WITH THE STATE OF NEW YORK.

(I.)

REPORT OF MISS L. DEMPSEY,

IN

CHARGE OF THE BUREAU OF MILITARY STATISTICS.

BUREAU OF MILITARY STATISTICS,
ALBANY, *December 31, 1876.* }

Major-General FRANKLIN TOWNSEND, *Adjutant-General, S. N. Y.:*

GENERAL. — I have the honor respectfully to submit the following report of the Bureau of Military Statistics, for the year ending December 31, 1876 :

The interest manifested in this bureau by the general public remains unabated. About 21,000 persons visited it during the past year, of which 9,800 registered their names on the visitors record.

Donations to the library and museum have been received from the following named persons :

Dr. Van Rensselaer, Mrs. A. C. Durant, Capt. A. H. Spierre, Mr. Fred. J. Graham, Mr. Jacob Gramm, A. F. Lawyer, M. D., Capt. John J. Carroll, Col. R. S. Oliver, Capt. James Smith, Mr. J. E. Bailey, Mr. Frank Delaney, Col. Chas. B. Stuart. The donations were promptly acknowledged and properly registered.

The provision of law that no article once deposited in the bureau can be withdrawn therefrom, meets with general favor. However desirable it may be to display the colors of the late volunteer military organizations at reunions and parades of their survivors, the majority of those who fought under them, prefer that they should be carefully preserved by the State in a suitable place where they can be seen at all times by those who choose to visit it, rather than that they should be subject to mutilation, if not destruction, by being transported from place to place, and by being exhibited in the open air, the prey of the elements.

The records and relics in custody of your department, which are deposited in this bureau, are, in accordance with your instructions,

preserved with the greatest care, and are each business day on exhibition to the general public.

They are of great value to the historian, of general interest to all, and of special interest to those who participated in the scenes which they represent, and to their survivors, and will be so to their descendants. They are records and emblems of the loyalty and patriotism of the people of our State.

With special care should the tattered and blood stained colors be preserved, for they tell more eloquently than language of the heroism and devotion of their defenders.

"The blood and the tears of our people
Have made them forever divine."

Most respectfully.

LIZZIE DEMPSEY,

In charge of Bureau of Military Statistics.

(K.)

ANNUAL REPORT OF THE INSPECTOR-GENERAL

FOR THE

YEAR 1876, INCLUDING REPORTS OF DIVISION AND BRIGADE
INSPECTORS, AND THE REPORT OF THE GENERAL INSPECTOR
OF RIFLE PRACTICE.

STATE OF NEW YORK:

INSPECTOR-GENERAL'S OFFICE,
NEW YORK, *December 31, 1876.* }

GENERAL.—In compliance with the provisions of the Military Code, I have the honor respectfully to submit the following report of this office:

INSPECTIONS.

In my report dated December 31, 1875, the returns showed that there had been actually inspected and mustered by the several division and brigade inspectors, a total of 19,457 officers and men. The aggregate for 1876 is, as shown in accompanying table, marked A, 21,193 officers and men, of whom 15,155 have passed inspection present, and 6,035 were absent. The proportion of absentees is greatly in excess of what it should be, and is not to be accounted for properly. Table B, herewith, shows the force, present and absent, in each brigade. This table furnishes interesting matter for examination and comparison, and is a pretty faithful index of the efficiency of the several component organizations.

With the exception of the First and Second Brigades, and a few separate Batteries and Troops, all of the organizations of the First and Second Divisions were mustered and inspected at night, and in their armories or the arsenal. I consider this feature so objectionable that I again recommend that it be stopped by orders of the Commander-in-Chief. It is prolific in irregularities, and renders the inspection returns of little value as exhibit of actual condition of the various organizations. The following figures are taken from table B, herewith, and are extracted to show that the First and

Second Brigades, which were properly mustered and inspected in Tompkins square, during daylight, reported with as good strength as the others, who were favored with night inspections, in the cramped accommodations afforded by armory drill rooms :

Day Inspections.

	Present.	Absent.	Total.
First Brigade	1,443	394	1,837
Second Brigade.....	1,776	338	2,114

Night Inspections.

	Present.	Absent.	Total.
Third Brigade.....	1,857	336	2,193
Fifth Brigade	1,305	442	1,747
Eleventh Brigade.....	1,326	244	1,570

In the Divisions other than the First and Second, the majority of inspections appear to have been conducted in the open air, the proportion of absentees in some being exceedingly large; for example :

	Present.	Absent.	Total.
Ninth Brigade	594	638	1,232
Twenty-third Brigade	254	246	500
Twenty-fourth Brigade	545	520	1,065

The above are the only ones where the absentees are about fifty per cent of total. The several reports, as to each organization, will locate those that are most lacking in efficiency.

I have attended in person at almost all the inspections in the First and Second Divisions and a majority of those in the Third, Fifth and Seventh Divisions; and commend the reports of the several Brigade Inspectors as faithful exhibits of the appearance and condition of the troops.

PARADES.

Section 45 of the Military Code directs the Inspector-General to state in his annual report "what general and field officers have been in command of parades and encampments," etc., etc. I submit with this report a file of all Division, Brigade, Regimental, Battalion, Troop, Battery and Separate Company orders, which have been filed at this office during the year, and which will indicate the parades which have taken place. I have extracted from them, and submit herewith, table marked C, which shows what parades of the National

Guard have taken place, by Division, Brigade, Regiment, Battalion, Battery, Troop, etc. The aggregate amount of duty will be seen to be very large, and were the parades compensated for by payment to those present, the sum required would be a very large one.

In reading this table, it should be borne in mind that all of the duty done is entirely free from monetary compensation.

The Commander-in-Chief inspected and reviewed the troops composing the First and Second Divisions on the second and third of October, and I have personally attended a great many parades and drills in the other divisions. It is gratifying to be able to report, that in a very large majority of the parades, I have found the commanding officers working hard, and very intelligently instructing their commands, and discipline in the force is consequently rapidly improving. I have omitted from the table parades for rifle practice, that subject being fully set forth in the report of the General Inspector of Rifle Practice.

ENCAMPMENTS.

The principal encampments during the past year were those of the Seventh and Twenty-third Regiments located in Fairmount park, Philadelphia, in immediate vicinity to the United States Centennial Exposition grounds, I was present throughout the whole term of the encampment, and have to report most admirably conducted encampments in both instances, and the regiments have done the State very great honor and service by their exhibition of discipline and deportment. The weather was unfortunately so excessively hot as to prevent any great amount of time being devoted to drill. Guard mounting, dress parade and reviews by distinguished visitors were the daily features of the camp. The only assistance thus far rendered by the State, was a full supply of tents to the Twenty-third Regiment and a very small number of wall tents to the Seventh Regiment, the latter having purchased a sufficient quantity of wall tents for their own use. Transportation to and from the encampment and the rations consumed whilst there, were paid for by the organizations themselves.

I also visited an encampment at Pelham, Westchester county, of the Twenty-seventh regiment, and report favorably upon its general features.

ARSENALS.

I have to report the condition of the several arsenals to be as follows :

Brooklyn.—This building has, under provisions of law, been turned over to the county of Kings, and an expenditure of \$60,000 is now being made thereon to render it available for use as an armory for the Fourteenth regiment infantry.

New York.—In excellent order, with exception of a leak over the southerly wall, which requires attention.

Albany.—In satisfactory order.

Troy.—Requires painting and a general cleaning to render it sufficiently attractive for occupancy by good organizations.

Schenectady.—This building, being about to be used by a company of infantry, some money should be expended upon it by either the county or State. It has been long out of use.

Utica.—Steam-heating apparatus has been supplied, and the building is now in perfect order.

Oswego.—Appears to require nothing done, beyond ordinary repairs; an excellent building, admirably adapted for its uses.

Norwich.—A small wooden structure, hardly worthy of any expense being put upon it.

Syracuse.—I regret to say that faults of construction or workmanship in erecting have developed, which will render an expenditure of considerable money to remedy.

Auburn.—Heating apparatus having been supplied, the building is now in perfect order for use, and should not be a cause of expense to the State for some years.

Canandaigua.—Of no value; should be restored to donors, and all expenses stopped.

Rochester.—This building should be excavated to provide a gun room under lower floor; also, to preserve the timbers now rotting by contact with the earth.

Buffalo.—Some slight repairs needed, as is usual in buildings occupied by so many troops as this is.

CAMP EQUIPAGE.

A considerable addition has been made by purchase, rendered necessary, for use of troops encamping in Philadelphia. I have inspected and found in excellent order, stored in the arsenal in New York city, ready for immediate use:

137 wall tents, pins and poles complete.

84 wall tent flies.

419 wedge or A tents, with poles.

17 hospital tents, with poles and pins.

15 hospital tent flies.

These do not constitute the entire supply, but were all that I found stored as above.

ARMS.

These are now quite uniform for the cavalry and infantry, being of the Remington system. Carbines for the former and rifles for the latter bring all of fifty caliber, which is a great saving in matter of supply of ammunition.

EQUIPMENTS.

Under the new provisions of the Code, the State does not now make issue, except in cases of new organizations; this will materially lessen the responsibilities of commanding officers.

UNIFORMS.

These are also the property of organizations through operation of law, and not issued except in first instance, upon organization of new commands.

OWNERSHIP OF UNIFORMS AND EQUIPMENTS.

This is a matter which apparently needs a settlement. The State contributed largely through operation of "uniform and equipment" fund, to the purchase of these, the soldiers making up the balance of cost when needed. It becomes a matter of argument and dispute when a soldier's term of enlistment expires, whether he should surrender his uniform to his commanding officer or retain possession. Legislative enactment, or orders from the Commander-in-Chief, should set this point beyond further controversy.

CARE OF ARMS AND PROPERTY.

Larger experience and a more careful examination of State property in hands of the troops shows, in very many instances, a lack of care. The custom is to appoint an armorer, and to him is given the care and responsibility, and the commanding officer considers his whole duty done in the matter. Thousands of dollars of property are annually wasted by reason of incompetency or neglect of these armorers, and it is very important that measures be taken to hold commanding officers to a strict accountability. Thus far the only remedy applied, has been bad reports by inspecting officers, and reprimands. In my opinion, if a material penalty were applied in a

few prominent instances, the armorers would soon realize the need of devoting to their duties the time and labor needed for their proper discharge. The Chief of Ordnance should have control of this matter, and it seems as if the power was supplied in sections 51 and 55 of the Military Code.

RIFLE PRACTICE.

The report of Colonel George W. Wingate, General Inspector of Rifle Practice, submitted herewith, is so complete in setting forth the operations of the troops in respect to this all-important portion of their duties, as to render it needful for me merely to call your attention thereto.

REORGANIZATION.

I very respectfully renew my recommendation of a year ago, viz., a very general reformation of Division and Brigade districts. The present formation was made when the total force was upward of 50,000 men—the law has since limited the strength to 20,000 non-commissioned officers, musicians and privates. The disbandments which have been rendered necessary in reducing the force to this number have greatly disarranged the majority of districts, and as the present law is not likely to be changed so as to allow the maximum strength to be replaced at 50,000, it seems desirable that a new and permanent designation of districts and assignment of organizations thereto should be made. In order to show this need more fully I submit herewith table marked D, which shows the aggregate strength of the various arms as now assigned to each division and brigade, the figures being taken from returns furnished to me by the Division and Brigade Inspectors. The number of Divisions should be reduced, but very few of them having commands of a size commensurate with the rank of the commanding officers. The same applies to Brigade districts—which now number *eighteen* an average command of but little over 1,000 men to each. The number should be reduced to a total of ten or twelve, and renumbered accordingly. With this accomplished I am sure that the National Guard, will, under the impetus of reawakened interest excited by rifle practice, and perfected organization, make a still greater stride toward placing itself in the front rank of the volunteer military organizations of the United States.

I call your attention to the accompanying reports of the several Division and Brigade Inspectors. I am indebted to these officers for

services rendered to me in very many matters which have required attention in their several districts. These reports show, as clearly as the present system will allow, the condition of the troops inspected by them.

Very respectfully, your obedient servant.

JNO. B. WOODWARD,

Inspector-General.

Major-General FRANKLIN TOWNSEND, *Adjutant-General.*

TABLE A.

INSPECTORS' REPORTS, AGGREGATED BY DIVISIONS.

	Commissioned officers.	Non-comms'd officers.	Musicians.	Privates.	Present.	Absent.	Total.

Twenty-eighth Brigade, none.

Thirty-first Brigade, June nineteenth.

PARADES OF BATTERIES.

Battery K, First Division, dismounted parades, July third, July twenty-first; mounted parades, in camp at New Dorp, S. I., August twenty-sixth to August twenty-ninth, October third.

Battery B, First Division, dismounted, February sixth, June twenty-first, July third, December fifth; one platoon mounted, balance dismounted, May thirtieth, August thirtieth, September first; mounted, in camp, September ninth, tenth, eleventh, October third.

Battery B, Second Division, mounted, May thirtieth, June nineteenth, July sixth, October second, October twenty-third.

Howitzer, Eleventh Brigade, mounted, May thirtieth, July third, October second, October twenty-fifth.

Battery, Ninth Brigade, failed to supply copies of orders.

Battery, Tenth Brigade, failed to supply copies of orders.

Battery, Twenty-fourth Brigade, April twenty-seventh, one platoon mounted; June sixth and July fourth, mounted; August twenty-seventh, at Rome, mounted; September twenty-second, at Auburn, mounted.

Battery, Twenty-fifth Brigade, dismounted, January eighteenth, February first, fifteenth, twenty-ninth, March fourteenth, twenty-eighth, April eleventh and fifteenth, February twenty-second, May thirtieth, June sixth, August seventeenth, September fifth, October third; mounted, July fourth, September twentieth, October fifth.

Battery, Twenty-eighth Brigade, failed to forward copies of orders.

Battery, Eighth Brigade, failed to forward copies of orders.

Battery, Twentieth Brigade, mounted, May thirtieth, June sixth, July fourth, August eighth, September sixth and twenty-third.

Battery, Thirty-first Brigade, dismounted, March tenth, April twenty-first, May nineteenth, July twenty-fourth, October third and twenty-seventh; mounted, July fourth, July thirty-first; officers and non-commissioned officers, mounted, February twenty-second.

CAVALRY PARADES.

Third Regiment Cavalry (dismounted), by wing, mounted September twelfth, fourteenth, nineteenth and twenty-first; by regiment mounted, September twenty-eighth, October third and thirtieth.

Separate Troop, First Division, mounted, April twelfth, May thirtieth, June twelfth, July third, August twenty-eighth, September twentieth, October third.

Washington Greys Troop, First Division, September sixth, October third and thirtieth.

Separate Troop, Sixth Division, July fourth, August thirtieth, September twenty-second.

Separate Troop, Eighth Division, May thirtieth, June twenty-ninth, July fourth, September twenty-eighth and thirtieth, October twelfth.

Separate Troop, Fifth Brigade, April twenty-sixth, July third, October second.

Separate Troop, Seventh Brigade, September twenty-second, October twenty-eighth, November thirtieth.

Separate Troop, Eleventh Brigade, April twenty-sixth, July third, October second.

Separate Troop, Twenty-fourth Brigade, May twenty-third, June nineteenth, July fourth, October nineteenth.

Separate Troop, Twenty-fifth Brigade, failed to forward copies of orders.

PARADES BY REGIMENT OR BATTALIONS OF INFANTRY.

Second Battalion, by wing, January eighteenth, and twenty-first, April twenty-fifth and twenty-seventh, October ninth and tenth; by battalion, February twenty-second, July fourth, September first, October twelfth.

Fifth Regiment, by regiment, April twenty-fourth, June sixth, July third, September ninth and eighteenth, October third.

Seventh regiment, by regiment, May twelfth, July first, to July seventh (in camp, Fairmount park, Philadelphia), June second and sixteenth, September sixth and sixteenth, October third and twenty-fourth.

Eighth Regiment, by wing, March twentieth and twenty-ninth, May twelfth and twenty-second; by regiment, March third and fifteenth, April fifth, thirteenth, eighteenth and twenty-first, July third, August fourth, September sixth, October third and nineteenth.

Ninth Regiment, by wings, May eighth and eleventh; by regiment, May seventeenth and twenty-seventh, July third, September ninth, October third and seventeenth.

Tenth Regiment, by regiment, February twenty-second, July fourth, September twenty-eighth, November fourth.

Eleventh regiment, by wings, January sixth, thirteenth, twentieth and twenty-seventh, March second, ninth, sixteenth and twenty-third; by regiment, February fifteenth and twenty-second, April thirteenth and twenty-seventh, May twenty-fifth, July third, October third and eighteenth.

Twelfth Regiment, by wings, January twenty-sixth and twenty-

seventh; February second, third and twenty-eighth, March second, twenty-seventh and twenty-eighth, April sixth, seventh, tenth and eleventh; by regiment, March tenth, April third, fourteenth and twentieth, June seventh, July third, September ninth, October third.

Thirteenth Regiment, by regiment, January twenty-fifth, February twenty-ninth, March eighth, sixteenth and twenty-seventh, April fourteenth and eighteenth, June thirteenth, July third, September twenty-sixth, October second and twenty-fifth, December seventh, twelfth and twenty-eighth.

Fourteenth Regiment, by regiment, January twenty-eighth, February seventh, fifteenth and twenty-fourth, March twenty-third and twenty-seventh, April fourth and thirteenth, May twelfth and eighteenth, June fourteenth, October second and twenty-sixth.

Fifteenth Battalion, by battalion, January twentieth, March first, April tenth and seventeenth, June fifteenth, July third, October second and twenty-sixth, November sixteenth and twenty-eighth.

Sixteenth Battalion, by battalion, August sixteenth, seventeenth and eighteenth, October seventeenth and twenty-eighth, November thirtieth.

Nineteenth Battalion, by battalion, November fifteenth.

Twentieth Battalion, by battalion, June fifteenth, July fourth, May thirtieth, October nineteenth, November tenth.

Twenty-first Regiment, by regiment, February eleventh, March seventh, May eleventh, June sixth, fifteenth and thirtieth, July fourth, September fourth and twenty-sixth, October nineteenth, December sixth.

Twenty-second Regiment, by wing, March twenty-fourth and thirty-first, April seventh, thirteenth, eighteenth, twenty-first, twenty-fifth and twenty-eighth, May second, fifth, ninth, twelfth, sixteenth and nineteenth; by regiment, May twenty-sixth, June first, eighth and sixteenth, July third, September ninth, October third, November twenty-fourth, December twenty-second.

Twenty-third Regiment, by wing, March twenty-ninth, April sixth, eleventh and twenty-first; by regiment, May third and twenty-fourth, July first to sixth (in camp at Fairmount park, Philadelphia), October second and twenty-fifth, November twenty-eighth, December ninth.

Twenty-fifth Regiment, by regiment, February tenth and twenty-second, June second, July fourth, September fourth and twenty-eighth, November twenty-third.

Twenty-sixth Battalion, by battalion, May thirtieth, June fourteenth, July fourth, September seventh.

Twenty-seventh Regiment, by regiment, in camp at Glen Drake, June fifth, seventh, ninth and twelfth.

Twenty-eighth Regiment, by wings, January twentieth and twenty-seventh, February third, tenth, seventeenth and twenty-fourth; by regiment, January thirteenth, March second, ninth, sixteenth and twenty-third, April sixth, thirteenth, twentieth and twenty-seventh. In camp July first, third and fourth, October second and twenty-third, December tenth.

Thirty-second Regiment, by wings, March eighth, fifteenth, twenty-second, twenty-ninth, April fifth, twelfth, nineteenth and twenty-sixth, May third and tenth; by regiment, February sixteenth, eighteenth and twenty-second, May nineteenth and twenty-second, July third, October second and twenty-sixth.

Thirty-fifth Battalion, by battalion, May thirtieth, October seventeenth and eighteenth.

Forty-fourth Battalion, by battalion, September first, October second, tenth and eleventh.

Forty-seventh Regiment, by wings, January twentieth, twenty-first and thirty-first, February first, fifteenth and seventeenth, March seventh, tenth, thirteenth and fifteenth; by regiment, January fourteenth, April seventh, tenth, twelfth and twenty-seventh, May second and eighth, June fifteenth and twenty-second, July third, October second and twenty-fourth, December ninth.

Forty-eighth Regiment, by regiment, July fourth, October nineteenth, November thirteenth and twentieth.

Forty-ninth Regiment, by regiment, June twentieth, July fourth and twenty-seventh, September twenty-second, October eleventh, thirtieth and thirty-first.

Fiftieth Battalion, by battalion, in camp at Shelldrake from September eighth to twelfth.

Fifty-first Regiment, by wing, right wing each alternate Thursday, from June eighth; left wing each alternate Thursday from June fifteenth; by regiment, February twenty-second, July fourth, October fourth, eighteenth and twenty-fifth.

Fifty-fourth Regiment, by wings, March eighth, sixteenth, twenty-second and thirtieth, April fifth, thirteenth, nineteenth and twenty-seventh, May third, eleventh, seventeenth and twenty-fifth; by regiment, February twenty-second, May thirtieth, July fourth, August seventh, October fifth.

Sixty-fifth Regiment, by wings, January thirty-first, February seventh, March sixth and twentieth, April twenty-fourth and twenty-fifth, May tenth and fifteenth, June thirteenth and twenty-sixth; by regiment, January eighteenth, February twenty-second and twenty-ninth, March twenty-eighth, May twenty-third, June fifth, and nineteenth, July fourth and thirty-first, November twenty-eighth, December twentieth.

Sixty-ninth Regiment, by wing, November twenty-seventh and twenty-eighth, September twenty-sixth and twenty-ninth; by regiment, January thirty-first, March thirteenth and seventeenth, April twenty-fourth, May fifteenth, June fifth and thirteenth, July third, September sixth, October third, ninth and seventeenth, December twenty-first.

Seventy-first Regiment, by wings, January twenty-first, February eleventh, March third and twenty-second, April tenth; by regiment, February twenty-second, May tenth, July third (in Philadelphia July twenty-fourth), September sixth, October third and sixteenth.

Seventy-fourth Regiment, by regiment, January twenty-first, February twenty-second, March fifteenth and twenty-first, April fifth, June nineteenth, July fourth and thirty-first.

One Hundred and Third Regiment, by regiment, October nineteenth.

One Hundred and Sixth Battalion, no copies of orders furnished.

One Hundred and Tenth Battalion, by battalion, July fourth, September seventh and twenty-ninth, October eleventh.

NOTE.—The above are taken from such orders as have been forwarded to this office, and it may happen that full credit is not given in each case owing to non-receipt of orders.

REPORTS OF DIVISION AND BRIGADE INSPECTORS, SUBMITTED WITH
ANNUAL REPORT OF THE INSPECTOR-GENERAL, DECEMBER 31, 1876.

First Division, Colonel Carl Jussen, Division Inspector.

Second Division, Colonel Isaac F. Bissell, Division Inspector.

Third Division, Colonel W. H. Lawton, Division Inspector.

Fifth Division, Colonel Ed. D. Hayt, Division Inspector.

Seventh Division, Colonel E. Bloss Parsons, Division Inspector.

Eighth Division, Colonel Albert J. Barnard, Division Inspector.

No report received from inspectors fourth and sixth divisions.

First Brigade, Major Robert Lenox Belknap, Brigade Inspector.

Second Brigade, Brevet Lieutenant-Colonel W. H. King, acting Brigade Inspector.

Third Brigade, Major Daniel D. Wylie, Brigade Inspector.

Fifth Brigade, Lieutenant-Colonel Samuel Richards, Brigade Inspector.

Seventh Brigade, Major R. Livingston Luckey, Brigade Inspector.

Eighth Brigade, Brevet-Major Wm. Haubernestel, acting Brigade Inspector.

Ninth Brigade, Major H. C. Littlefield, Brigade Inspector.

Tenth Brigade, Major George H. Otis, Brigade Inspector.

Eleventh Brigade, Major James E. Hayes, Brigade Inspector.

Twenty-first Brigade, Major Geo. T. Hollingsworth, Brigade Inspector.

Twenty-third Brigade, Major William G. Wise, Brigade Inspector.

Twenty-fourth Brigade, Major R. C. Day, Brigade Inspector.

Twenty-fifth Brigade, Major George Hyland, Jr., Brigade Inspector.

Twenty-eighth Brigade, Major K. S. Van Voorhees, Brigade Inspector.

Thirty-first Brigade, Major John A. Holloway, Brigade Inspector.

No reports received from Inspectors Thirteenth, Sixteenth and Twentieth Brigades.

HEAD-QUARTERS FIRST DIVISION, N. G. S. N. Y., }
NEW YORK, *December 20, 1876.* }

GENERAL.—In obedience to your circular letter of the first instant, I have the honor to report in addition to the copy of my report to the Adjutant-General, S. N. Y., herewith inclosed, the following information not contained in the report referred to:

The weather was upon each occasion of inspection very favorable, and there were no "exceptional causes to prevent or assist attendance."

The new armory of the Third Regiment Cavalry is at the corner of White and Elm streets.

Very respectfully.

CARL JUSSEN,

Col. and Division Inspector.

To Brevet Major-General JOHN B. WOODWARD, *Inspector-General,*
S. N. Y.

HEAD-QUARTERS FIRST DIVISION, N. G. S. N. Y., }
 NEW YORK, *December, 18, 1876.* }

GENERAL.—I have the honor to forward herewith the muster rolls and inspection returns of the cavalry and artillery organizations of this division, as required by the Military Code, and to report as follows :

THIRD REGIMENT CAVALRY.

This regiment having but recently been provided with horse-equipments, for the first time in three years paraded mounted at the annual inspection. Lacking a suitable parade ground in this city, permission was requested of the proper authorities to use Prospect park parade ground, which was courteously granted, and the ceremony took place there at about noon on October thirtieth. The records of those present, absent, and the aggregate is shown in the subjoined table :

	Present.	Absent.	Present and absent.
Field and staff.....	8	4	12
Troop A	28	21	49
Troop B	33	22	55
Troop D	31	15	46
Troop F	40	22	71
Troop G	45	21	66
Troop H	35	29	64
Troop I	42	16	58
Troop K	27	25	52
Aggregate	<u>298</u>	<u>175</u>	<u>473</u>
1875.			
Aggregate	<u>315</u>	<u>130</u>	<u>445</u>
Decrease.....	17
Increase	45	28

It is but fair to say, in noting the increased per centage of absentees, that the inspection last year was held indoors and at night; still it cannot be denied, also, that the regiment, having received the official encouragement, the lack of which was before thought to have a depressing influence upon it, did not make as good a showing as was reasonably anticipated, especially when it is understood that the weather left nothing to be desired.

When the fact that the organization had been for nearly three years dismounted, is taken into consideration, it must be said that its general appearance on parade was quite as good as might have been expected, and I record with much pleasure, a slight, but very necessary improvement in its condition as to drill, discipline and instruction.

The requirements mentioned in the report of last year's inspection, which were thought necessary to make it an effective organization, have been in part filled; the regiment having received very good and serviceable horse equipments and has also been assigned to a new armory, better in all respects than its old one, but still lacking an essential feature as a cavalry armory, of which I shall take the liberty to more fully express my views in this report. The issue of carbines which was recommended before, has not yet been effected and I respectfully reiterate the recommendation.

SEPARATE TROOP.

The inspection and muster of this troop took place at New Dorp, Staten Island, in August twenty-eighth, simultaneously with that of battery K, at about two o'clock P. M.

The record of present and absent which is as below given, shows a commendable increase, both in the per centage of present and in the aggregate:

	Present.	Absent.	Present and absent.
Eighteen hundred and seventy-six.....	51	12	63
Eighteen hundred and seventy-five.....	41	15	56
Decrease.....	...	3
Increase	10	7

In other respects the troop maintains its previous good standard.

FIRST TROOP WASHINGTON GREYS.

The inspection and muster of this troop was made simultaneously with that of the Third Regiment of Cavalry at Prospect Park parade ground on the thirtieth of October, with the following result:

	Present.	Absent.	Present and absent.
Eighteen hundred and seventy-six.....	45	16	61
Eighteen hundred and seventy-five.....	38	18	56
Decrease.....	...	2
Increase	7	5

This also is a good numerical showing, and in all other respects the troop was found to be in very good condition.

BATTERY B.

The battery was inspected and mustered on September eleven, at about noon, at "Camp Vilmar," Brooklyn, where it was encamped for three days. Its record of present and absent, as shown by the following table, was excellent :

	Present.	Absent.	Present and absent.
Eighteen hundred and seventy-six.....	92	16	108
Eighteen hundred and seventy-five.....	68	14	82
Decrease
Increase	24	2	26

In point of equipment it is in somewhat better condition than it was last year, though still far from complete. Its armament remains the same and is not all that it should be. Progress has been made in instruction, and generally its condition is improved.

BATTERY K

Was encamped at New Dorp, Staten Island, "Camp Mitchell," for three days, and was there inspected on August twenty-eighth, at about 2 o'clock P. M. It paraded with four guns, the number of men, as shown by the table below given, being only sufficient to man that number :

	Present.	Absent.	Present and absent.
Eighteen hundred and seventy-six.....	62	8	70
Eighteen hundred and seventy-five.....	52	11	63
Decrease	3
Increase	10	...	7

The comparison with the figures for last year indicate a healthy growth in numbers, both as to the per centage of present and the aggregate. The battery was quite perfect in equipment, but with reference to its armament, the remarks made upon the occasion of the inspection for 1875 remain still entirely applicable. A change from their old, unserviceable and untrustworthy guns to effective weapons of a new pattern is very desirable.

GENERAL REMARKS.

With respect to the cavalry arm, generally, as represented in this division, I beg leave to say that, under existing circumstances, a high degree of efficiency cannot be expected. In all arms of the National Guard service, by far the greater part of the instruction is, of necessity, imparted at night and consequently indoors, and instruction in horsemanship (being what our cavalymen most need) is here impossible to any useful extent, by reason of the lack of proper facilities therefor. The few mounted drills had, which are necessarily held out of doors, where it is impracticable to give the required rudimentary instruction, do not at all suffice, their effect being barely noticeable upon the efficiency of the organizations. To make efficient cavalry soldiers it is absolutely necessary that an armory, or, more properly, a drill room be provided for the joint use of the cavalry of this division, large enough to permit of the instruction of a platoon mounted. Without the advantages which would accrue if such a provision were made, the cavalry cannot be said to enjoy facilities for promoting efficiency corresponding to those possessed by the infantry; and comparisons as to the efficiency of the two arms are therefore unjust to the former, especially when the fact is considered that, by far, less time and labor are required to perfect foot soldiers than are needed to make good cavalymen.

Very respectfully.

CARL JUSSEN,

Colonel and Division Inspector.

To Major-General FRANKLIN TOWNSEND, Adjutant-General, S. N. Y.

HEAD-QUARTERS SECOND DIVISION, N. G. S. N. Y., }
BROOKLYN, November 13, 1876. }

GENERAL.—I have the honor to report herewith the result of the inspection and muster of Battery B, Artillery, and First Separate Company of Infantry, Second Division, muster-rolls of same duly forwarded to general head-quarters.

The battery was inspected on Monday, October second, at Prospect Park parade ground, in pursuance to special order No. 27 from these head-quarters. The inspection was preceded by a review, which was very poorly conducted. The general appearance was good, the uniforms and equipments of the men being clean and in good con-

dition, the recent repainting of gun and caisson carriages and issue of new wheel harness adding very much to the appearance of the battery. As regards instruction, there is a great deficiency in this department, due, as I believe, in a great measure to a misunderstanding of the language, the organization being entirely composed of Gerinans, who do not seem to comprehend the orders when given in English. The men, physically, are good soldiers, and would, with careful instruction, make a superior organization. This defect will, however, to a great extent be remedied the coming drill season, and I hope, in my next report, to give a more favorable showing in this particular. The following is the result of the muster :

	Present.	Absent.	Total.
Officers.....	3	3
Non-commissioned officers.....	14	14
Musicians.....	3	3
Privates.....	48	3	51
	<u>68</u>	<u>3</u>	<u>71</u>

Showing a net loss as follows :

Died.....	1
Discharged.....	10
Promoted to Division staff.....	1
Expelled.....	2
	<u>14</u>
Gains :	
Enlistments.....	8
Net loss.....	<u>6</u>

The battery is still quartered in the Kings county armory, located corner Bushwick avenue and Stagg street.

The First Separate Company of Infantry, Second Division, was inspected and mustered, at Flushing, L. I., on the evening of the twenty-sixth day of October, at eight o'clock, in the basement of the Town hall, where they are at present quartered ; a place totally inadequate for the purpose and the wants of this company (they have, however, made requisition on the county supervisors for more suitable quarters). The inspection was mainly informal, the men not being uniformed as yet, and not far enough advanced to handle their rifles. The instructor (Capt. Robinson) is an officer of the old school, but I

think with a careful study of the new tactics he will make a fair officer, and eventually will make of this company an organization that will reflect credit on him and the division. The following is the result of the muster :

	Present.	Absent.	Total.
Officers.....	3	3
Non-commissioned officers	14	14
Musicians.....	3	3
Privates	36	9	45
	<u>56</u>	<u>9</u>	<u>65</u>

I am, very respectfully, your obedient servant.

ISAAO F. BISSELL,

Colonel and Inspector, Second Division.

Major-Gen. JOHN B. WOODWARD, *Inspector-Gen., S. N. Y.*

HEAD-QUARTERS THIRD DIVISION, N. G. S. N. Y., }
TROY, November 28, 1876. }

Brevet Major-General J. B. WOODWARD, *Inspector-General, S. N. Y.:*

GENERAL.—In compliance with section 47 of the Military Code, and your circular of November twenty-second, I have the honor to report that the brigades composing the Third Division were inspected by the Brigade Inspectors, and their reports will arrive at your department in due time.

The Tenth Brigade, commanded by Brigadier-General Alonzo Alden, were inspected and reviewed by the division commander, Major-General J. B. Carr, accompanied by his staff, at two o'clock, October 12, 1876.

Lieutenant-Colonel Michael Timpane, has been promoted to the command of the Second Battalion.

The Separate Company of Infantry, Captain Chadwick, located at Cohoes, have been furnished with uniforms, arms and equipments, and reported for inspection and review with full ranks.

The Tibbits Corps, also a Separate Company of Infantry, located at Troy, commanded by Joseph Egolf, organized and mustered in May last. The officers and privates all served in the last rebellion. The brigade paraded at Troy, July fourth, and now consists of the Second Battalion, three Separate Companies, all Infantry, and Battery B, artillery.

The numerical number of the brigade has increased since my last annual report, and their appearance and discipline was highly gratifying to their commanding officers.

W. H. LAWTON,
Colonel and Inspector, Third Division, N. Y. S. N. G.

HEAD-QUARTERS FIFTH DIVISION, N. G. S. N. Y., }
INSPECTOR'S OFFICE, NEWBURGH, N. Y., *December 18, 1876.* }

Brevet Major-General J. B. WOODWARD, *Inspector-General, S. N. Y.:*

GENERAL.—In compliance with the Military Code and circular letter December first, Inspector-General's Office, I have the honor to report a parade of the Seventh Brigade, Brigadier-General J. H. Blauvelt commanding, at White Plains, Westchester county, October thirtieth, on the occasion of the centennial anniversary of the battle of White Plains and the laying of the corner-stone of a monument commemorative of that revolutionary event.

The brigade was reviewed at that time by Major-General James W. Husted commanding the division, accompanied by his staff, and presented a creditable and soldierly appearance.

In consequence of a severe storm no inspection was made, as both officers and men suffered greatly from the exposure and were dismissed as soon as possible.

This parade clearly proved the necessity of providing the troops with overcoats, for it is asking too much of a soldier, even when performing necessary military duty, to expose himself to the inclemency of the weather without proper clothing at the risk of becoming permanently disabled.

No review of the Eighth Brigade has been held during the past year by the Major-General commanding the division, but the brigade paraded with full ranks and was reviewed by Brigadier-General George Parker, commanding the Eighth Brigade, at Kingston, N. Y., June fifteenth.

The regiments, battalions and battery attached to the division have been thoroughly inspected by the Brigade Inspector, reports of which have been forwarded to you, and to which I would respectively refer you for more detailed information.

I am general, your very obedient servant.

ED. D. HAYT,
Colonel and Inspector Fifth Division, N. G. S. N. Y.

HEAD-QUARTERS SEVENTH DIVISION, N. G. S. N. Y., }
ROCHESTER, N. Y., December 13, 1876. }

Major-General JOHN B. WOODWARD, *Inspector-General, S. N. Y.* :

GENERAL. — In compliance with instructions, I have the honor to report that the annual muster and inspection of the Twentieth Brigade and Separate Company of Infantry, Seventh Division, took place on the 11th and 12th of October, 1876.

The One Hundred and Sixth and One Hundred and Tenth Battalions were ordered to assemble at Elmira, at which place I inspected the command, also the books, papers, etc., belonging thereto.

The One Hundred and Tenth is in fair condition as regards efficiency, but its numbers have been greatly depleted by the many in command whose term of office has expired.

Battery A, Twentieth Brigade, Captain E. T. Walker, made a very creditable appearance, reporting for duty eighty-two men. The company has a very good hall for drill which it has obtained by its own exertions, with but little help from the State. Under its very efficient captain the command cannot but prosper.

On the twelfth of October I reviewed and inspected the First Separate Company of Infantry at Penn Yan, and am happy to state that for drill, neatness of uniform and equipments, as well as for general efficiency this company cannot be excelled by any in the division. The commander, Captain W. W. Eastman, is an old soldier, and very competent. His company consists of the best young men of the town, and they, together with all the people of the place, take a great pride and interest in the welfare of the organization.

I would earnestly call the attention of the Inspector-General to the arsenal at Rochester. As now arranged the companies are obliged to barrack their field pieces in the hall of the building, and in this way they not only occupy the space necessarily traversed by the infantry in going to and from their company rooms, but are also destroying the floor. There is but a small cellar under the arsenal at present, and I would most urgently request that the space under the entire building be excavated, and that entrance for these pieces be made from the rear. In this way, at very slight expense, the arsenal may be greatly improved and made much more convenient for infantry, cavalry and artillery.

I am, very respectfully, your obedient servant.

E. B. PARSONS,

Colonel and Inspector-General, Seventh Division, N. G.
To Major-General J. B. WOODWARD.

STATE OF NEW YORK:

HEAD-QUARTERS EIGHTH DIVISION, NATIONAL GUARD, }
BUFFALO, December 15, 1876.

Major-General JOHN B. WOODWARD, *Inspector-General, S. N. Y.*:

GENERAL.—In compliance with section 47 of the Military Code, I have the honor respectfully to submit the following report of this division:

On the thirty-first of July, so much of the Thirty-first Brigade as is located in this city had their annual inspection. At four o'clock P. M. the troops passed in review before the Major-General commanding this Division, who was attended by his staff in full uniform. The inspection and review were held in that portion of our park known as "The Parade," which is well adapted for military purposes, it having been laid out with that object in view. The troops appeared decidedly better on this occasion than at the general review last fall, the marching and manœuvering being executed with more spirit and promptness. The officers' drills held last winter, under the direction of General Rogers commanding the Thirty-first Brigade, have undoubtedly been the means of imparting confidence to the officers, and thus proved of great benefit to both the Sixty-fifth and Seventy-fourth Regiments.

Battery A, Thirty-first Brigade is deserving of special mention for their fine appearance, good discipline and drill, and their good influence cannot but be felt among the men of the Sixty-fifth Regiment, with whom they are quartered.

The review above referred to and the parade on the fourth of July, are the only parades attended by the Major-General commanding this Division during the past year.

On the twelfth of October last, at three o'clock P. M., I mustered and inspected the First Separate Troop of Cavalry attached to this Division, and regret that I cannot say much in their favor, excepting that the arms and equipments are all in good order and showed that they had received the requisite attention. This troop newly organized last year, gave promise of being one of the best and most efficient companies in this command, but the drills have not been well attended and the discipline is lax. Captain Ritt, commanding the troop, promises a better state of things this year if he be permitted to retain his command.

The repeal of the exemption law has undoubtedly had a bad effect

among the larger share of the enlisted men in this division, for there are many who considered the benefit of the law as some compensation for the time lost from their work while attending parades.

Our new rifle range has done much toward keeping up a spirit of rivalry between the different organizations, and has been the means of awakening a new interest in military matters.

The several separate companies of infantry in this command have all made a good record during the year, for further particulars concerning which I would respectfully refer you to the report of Major John Halloway, Inspector Thirty-first Brigade, which I have the honor to inclose herewith.

Yours respectfully.

ALBERT J. BARNARD,
Colonel and Inspector Eighth Division, N. Y. S. N. G.

HEAD-QUARTERS FIRST BRIGADE,
FIRST DIVISION, N. G. S. N. Y., No. 24 PINE STREET, }
NEW YORK, December 9, 1876. }

Brevet Major-General J. B. WOODWARD, *Inspector-General, S. N. Y.:*

GENERAL. — In compliance with your circular letter, I have the honor to submit the following report of the condition of the First Brigade:

The annual inspections of the regiments comprising the brigade were made as follows:

Fifth Regiment Infantry, June sixth, at four P. M.; weather fine.

Twelfth Regiment, Infantry, June seventh, at four P. M.; weather fine.

Twenty-second Regiment Infantry, June sixteenth, at four P. M.; weather fine.

A detailed report of these inspections was made by me to the Adjutant-General, in July last, in compliance with section 153, Military Code. I would respectfully refer you to a copy of the same, hereto appended, for the information therein contained.

Marked progress has been made, during the past year, in the efficiency of the several regiments.

I have attended a large proportion of the drills, and can testify to the instruction given as being careful and thorough. The disbandments and changes which occurred, about the beginning of the year, somewhat disturbed, for the time being, the discipline of the Fifth

and Twelfth Regiments, as they received a considerable number of accessions from the disbanded regiments, and it necessarily took some time for the new material to become settled in their places. At this same time the Twenty-second Regiment made a change in its uniform. Owing to these circumstances, the drill season for battalion movements, which usually commences in January, was hardly inaugurated until some weeks thereafter. In spite of these drawbacks, the proficiency in drill has been fully equal, if not superior, to former years. There has been a marked improvement in the company officers. The vacancies occurring have been filled with competent men, who have satisfactorily passed the Brigade Board of Examination.

The subjects in which the candidates for the various grades are examined, are as follows:

FOR SECOND LIEUTENANTS.

School of the Soldier; School of the Company; paragraphs 752 to 766, and 786 to 807, Upton's Tactics; writing, filing and indorsing official letters; Theory of Rifle Practice, "Wingate's Manual," as far as and including "Position and Aiming Drill."

FOR FIRST LIEUTENANTS.

Same as Second Lieutenants; and, in addition, sections 618 to 654 General Regulations, State New York; School for Skirmishers; General Order No. 4, Series 1875, head-quarters First Brigade; paragraphs 377, 378, 490, 498, 499, 506, 432 and 438 Upton's Tactics.

FOR CAPTAINS.

Same as for First and Second Lieutenants, and, in addition, School of the Battalion; paragraphs 808 to 819, Upton's Tactics; sections 602 to 617, General Regulations; office duties; ceremonies; Wingate's Manual as far as part 4.

FOR FIELD OFFICERS.

School of the Battalion—School of the Brigade—Ceremonies—A general knowledge of the General Regulations and the Code.

The board has been composed during the last year, of Lieutenant-Colonel S. Van R. Oruger, Twelfth Infantry; President, Lieutenant-Colonel Kraeger, Fifth Infantry, and the Brigade Inspector.

During the past summer the brigade has paraded for Rifle Practice at Creedmoor, in compliance with orders from head-quarters First Divi-

sion. For the details of this service I would respectfully refer you to the report of Major Cowperthwait, Brigade Inspector of Rifle Practice, and would invite careful attention and consideration to the recommendations therein contained. The present condition of public opinion, which unfortunately is inclined to look upon the visits to Creedmoor as partaking largely of the nature of a frolic, encourages employers to throw obstacles in the way of their employees absenting themselves from business, at a time when the working force of mercantile establishments is generally reduced by the customary summer vacations.

The working classes, which form a large proportion of the ranks, can ill afford, in such times as these, to sacrifice a few days' wages for military duty.

These facts impress upon my mind the urgent necessity of arranging the schedule of practice in such a way as to obtain the largest results with the very smallest expenditure of time.

The practice, as at present arranged, seems to aim at making each man an expert shot at long distances. I submit if this is either possible, practicable or expedient. Many men, by reason of their physical condition, nervous temperament or defective eyesight, cannot possibly become marksmen; others require a larger amount of drill and practice, in order to qualify for the first class, than can possibly be afforded, even with the present liberal apportionment of time; to the third class it is, therefore, impracticable to raise such to any high rank of proficiency.

The present arrangement does not permit of a man shooting in all the classes and obtaining a marksman's badge in one day. A second trip must be made even by a proficient shot, who has easily qualified. In the case of a man who had been obliged to give a second day to third class practice, should he be very successful he is still obliged to devote an additional day, should he be ambitious of a marksman's badge. An opportunity to complete the course in one day would act as a powerful incentive to each man to do his best.

These circumstances all tend to discourage a man, neither proficient nor enthusiastic, and to disgust him with rifle practice; a result, in my judgment, to be avoided with great care. All soldiers are grumblers, and volunteers particularly so. The privations, self-denial and inconvenience to which they are subjected, all go to make them impatient of devoting much time to any thing in which they

are not particularly interested — I, therefore, think it exceedingly important to arrange the requirements of rifle practice, if possible, in such a way as to relieve the men as much as practicable, consistent with proficiency.

In order that a regiment should prove effective in service, it is not necessary that every man, or even a large proportion of them, should be able to hit a single man at 500 yards. A few good shots for skirmish duty are desirable, but if the men are accustomed to handling their pieces, and can deliver their fire at proper elevation at 150 or 200 yards, they would be sufficiently well qualified for any duty for which they might be required. Any thing further than that may safely be left to the natural stimulus of emulation.

The changes from one range to another consume much time. Were one range omitted it would be possible to fire in all the classes, and also for marksman's badge, during the hours of a favorable practice day. I would respectfully bespeak your very careful consideration of the suggestion of Major Cowperthwait, as contained in his report, that the shooting for the second class be reduced to two sighting and five scoring shots at 300 yards — position kneeling. This would, in my opinion, accomplish the very important result desired.

The armories of each of the regiments are in very fair condition. The Twelfth and Twenty-second have both facilities for rifle practice. The Fifth have, as yet, failed to fit up the gallery which was used by the late Seventy-ninth Regiment, and which was well suited for the purpose.

In my last report I called attention to the fact that the regiments are unprovided with overcoats.

The Twenty-second Infantry alone paraded for inspection with overcoats rolled. These, so far as I was able to judge, are in good condition. The necessity for the employment of the troops during the winter season for guard duty or otherwise, as in the case of the recent calamity in Brooklyn, would point to the necessity of providing overcoats for the serviceable troops.

Should the public require the services of the Fifth or Twelfth Regiments of Infantry during the winter season, the loss of life from exposure would be very great. I would earnestly urge an additional appropriation to meet this great want.

With reference to each regiment I would say: The Fifth Regiment of Infantry has made very marked progress. A careful and

systematic routine of office duty has been inaugurated in accordance with regulations; the efficiency of the officers has greatly improved, they at present realizing that something more than popularity is necessary to enable them to either secure or retain commissions. The prompt punishment awarded to Max Ebler, formerly Captain of Company G, who was convicted by a general court-martial of drunkenness while on duty at Creedmoor, has had a most beneficial effect in convincing the members of this command that no irregularities will be winked at.

The Twelfth Regiment of Infantry has, during the past two years, been weeding out all material which could not be relied upon to do drill duty. The process reduced the aggregate of 1875 to 441, from 466 in 1874. This year, with eight in place of ten companies, as heretofore, the aggregate is 468. The regiment is in a good condition financially, I am informed owes nothing, and most of the companies have balances in their treasuries. Recruiting is active, returns showing forty additions during the last few weeks.

The Twenty-second Regiment Infantry has made an important change in their uniform, which greatly improves their appearance. A portion of the command participated in the procession at Philadelphia, on July fourth.

The efficiency of this brigade, in common with that of the entire First Division, suffer materially from want of a proper parade ground, in which sufficient space is afforded for the evolutions prescribed for a brigade. Tompkins square has been "improved" to such an extent as to greatly decrease the area of the parade ground; the shape of which, that of a lozenge with unequal angles, interposes many practical difficulties to the manœuvering of a regiment even. The ball grounds in Central park are well suited for these purposes. The park commissioners, I am given to understand, oppose any such use of the park, for the reason: First, that opening their gates to the National Guard would also open them to other organizations; second, that the presence of troops would frighten horses, and so interfere with the enjoyment of the park by a large class of citizens; and, third, that such use, together with the tramping of the officers' horses would greatly damage the sod.

In answer to the first objection, it may be said that the laws of the State place the National Guard in a position not approached by any other organization; so that a rule in its favor and discriminating against any other bodies of men can very properly be made.

The troops can be marched in by the Seventh avenue gate, in column of fours; thus meeting the second objection, as the path is at no place contiguous to the driving road.

The use of the ground twice a month during the time when the grass is growing vigorously would not occasion any perceptible damage to a strong turf, and in any event the damage could be repaired at a cost of but a small sum—a great gain to the tax-payers over any such project as contemplates an outlay of several millions of dollars on a parade ground on the Harlem river, so far off, as greatly to impair its usefulness, except for camping—for this the nature of the ground makes it too unhealthy.

The use of the ground could be restricted to the brigades or division when parading as such. The use of the park upon such occasions, in the opinion of many persons, would add greatly to the attractiveness of the park and would greatly benefit the service by enabling citizens to judge of its proficiency, so removing many erroneous impressions, which at present prevail.

I would respectfully recommend such a change in the laws of the State as would settle this matter in the manner indicated.

Tables showing strength of the brigade, and of the regiments composing it, have been made upon the blanks furnished for the purpose, and are appended.

All of which is respectfully submitted.

Very respectfully, your obedient servant.

ROBERT LENOX BELKNAP,

Major and Inspector First Brigade.

ROBERT LENOX BELKNAP,
Major and Brigade Inspector, First Brigade.

HEAD-QUARTERS FIRST BRIGADE,
FIRST DIVISION, N. Y. S. N. G.,
12th July, 1876. }

GENERAL.—Having just completed the annual inspection and muster of the regiments comprising the First Brigade, I have the honor, respectfully, to submit the following report :

At the time of my last report the brigade consisted of the Twelfth, Twenty-second, Sixty-ninth, Seventy-first and Seventy-ninth Regiments of Infantry.

In compliance with G. O. No. 31, 1875, A. G. O., the Seventy-ninth Regiment, Infantry, was mustered out of the service by me, on the 30th December, 1875. By the same order the Sixty-ninth and Seventy-first Regiments, Infantry, were relieved from duty in this brigade, and the Fifth Regiment, Infantry, was directed to report for orders to Brig. Gen. W. G. Ward, commanding this brigade.

FIFTH REGIMENT, INFANTRY.

In compliance with G. O. 4, C. S., Head-quarters First Brigade, this regiment paraded in full dress uniform in Tompkins square at 4 o'clock P. M., on the sixth June, for muster, discipline, inspection and review.

The regiment was equalized in ten commands of twenty-two files front. Owing to the condition of the square, battalion movements were dispensed with and the regiment formed for review. This was very creditably executed, the men being exceedingly steady and presenting a fine appearance. Much improvement in drill was made by the command toward the close of the last drill season, and which is mainly to be attributed to the theoretical instructions given to the officers, who were convened for that purpose on several occasions by direction of Gen. Ward.

The books and records are now correctly kept in compliance with the prescribed forms.

Upon conclusion of the muster the regiment took possession of its new armory, being the one recently occupied by the late Seventy-ninth Regiment Infantry.

There were present at the muster 538, absent 155, total 693. Of these nineteen per cent were recruited during the past year. Sixty-seven of these new men (or fifty-four per cent) came from the late Ninety-sixth Regiment, Infantry. The following table shows the details of the muster:

INSPECTION RETURN,

Fifth Infantry, First Brigade, First Division, N. G. S. N. Y., made at New York city, June 6, 1876, by Major Robt. Lenox Belknap, Brigade Inspector.

TWELFTH REGIMENT, INFANTRY.

Important changes have take place in this command since my last report.

In compliance with G. O. Nos. 10 and 43, C. S., A. G. O., three weak companies were consolidated with the remaining companies, and shortly thereafter I had the pleasure of mustering into service a new company now known as "Company I," and mainly composed of former members of the late Seventy-ninth Regiment Infantry. These reorganizations have greatly increased the efficiency of the regiment.

In conformity with G. O. No. 4, C. S., First Brigade, this command paraded in Tompkins square, on seventh June, for muster, discipline, inspection and review, equalized into eight commands of sixteen files front, and wearing their fatigue uniform.

The first passage in review was marred by the guide overrunning the marker. Upon a repetition every thing was excellent. The salutes were finely rendered, and the marching steady.

I was sorry to find the men more slouchy in their dress than I have ever seen them, coats being unbuttoned, and belts unadjusted.

The instruction of the officers and men is most thorough, and the discipline excellent.

The books and records are in fine order, and correctly kept. In the armory every thing is about as it should be for the proper preservation of the State property.

There were present at muster 367 out of 468, leaving 101 as absent, this being a gain of twenty-seven in present and twenty-seven in aggregate over last year.

The recruits who joined during last year form twenty-three per cent of the present membership. Of these thirty-four are from the late Seventy-ninth, thirty-one from the late Sixth, two from the late Eighty-fourth and one from the late Ninety-sixth Regiments, Infantry, making sixty-eight per cent of the recruits.

The following table shows the details of the muster :

INSPECTION RETURN,
*Twelfth Infantry, First Brigade, First Division N. G. S. N. Y., made at New York city, June 7, 1876, by Major
 Robert Lenox Belknap, Brigade Inspector.*

TWENTY-SECOND REGIMENT, INFANTRY.

This command paraded in the Plaza, Union square, on the sixteenth of June, for muster, discipline, inspection and review, in compliance with G. O. No. 74, C. S., and S. O. No. 14, C. S., head-quarters First Brigade, appearing in their new fatigue uniform, with knapsacks and overcoats rolled, and being equalized into ten commands of twenty-four files front. The review was admirable, as also were the passages in quick and double time.

A careful examination of the books and records showed them to be correctly and accurately kept. The armory is in good condition, being substantially as at time of my last report.

The muster showed there were present 529 officers and men; absent 135, making a total of 664, being a gain of fifteen in present and twenty-one in aggregate over that of last year. Since the last inspection, this regiment has recruited twenty-three per cent of its present numbers. No men from recently disbanded organizations have connected themselves with this command.

The following tables give the details of the muster :

STRENGTH OF FIRST BRIGADE (OFFICERS AND MEN), AS APPEARS
FROM MUSTER.

	Present.	Absent.	Total.
General William G. Ward and staff.....	9	3	12
Fifth Regiment, Infantry.....	536	155	691
Twelfth Regiment, Infantry.....	367	101	468
Twenty-second Regiment, Infantry.....	514	129	643
Total.....	1,426	388	1,814

It appears from the rolls that of the above, 135 were formerly members of regiments which have been disbanded, viz.:

From the late Sixth Regiment, Infantry.....	31
From the late Seventy-ninth Regiment, Infantry.....	34
From the late Eighty-fourth Regiment, Infantry.....	2
From the late Ninety-sixth Regiment, Infantry.....	68
	<u>135</u>

From the record at brigade head-quarters, I have compiled the following table of per centages of present at the regular occasions for the assembly of the different regiments from the time of the inspection 1875 to that of 1876.

TABLE OF PER CENTAGES.

	Ride practice, Greensboro.	Battalion drill.	Street parades.	Annual inspection, 1876.	Average on all occasions.	Average membership.
Fifth Regiment, Infantry.....576878	.6077	653
Twelfth Regiment, Infantry.....	.6820	.5056	.6099	.7889	.6070	466
Twenty-second Regiment, Infantry.....	.8024	.5687	.6487	.7975	.5782	635
First Brigade, 1876.....	.4423	.5487	.6508	.7888	.5976	1,774
First Brigade, 1875.....4929	.5988	.70	.5411
Gain.....0558	.0805	.0888	.0565

The arms, equipments and clothing of the regiments are in good serviceable condition, and were they provided with overcoats, there would be nothing to be desired in this connection.

General William G. Ward, commanding the brigade, was present at these inspections, attended by his staff, all of whom were uniformed, armed and equipped according to law.

I desire to avail myself of this opportunity to express my thanks to the officers connected with the brigade for the uniform courtesy and kindness extended to me when discharging my official duties.

I have the honor to remain, General,

Very respectfully your obedient servant.

(Signed) ROBERT LENOX BELKNAP,
Major, Inspector First Brigade.

Major-General FRANKLIN TOWNSEND, *Adjutant-General, S. N. Y.*

OFFICE OF THE BRIGADE INSPECTOR, SECOND BRIGADE,
N. G. S. N. Y., No. 99 NASSAU STREET,
NEW YORK, *December 12, 1876.*

Brevet Major-General JOHN B. WOODWARD, *Inspector-General, State of New York :*

GENERAL. — In compliance with the request in your letter dated first instant, I have the honor to transmit herewith a copy of my report to Major-General Franklin Townsend, Adjutant-General, State of New York, and consolidated returns of the inspections of the brigade staff and the regiments composing this brigade, for your perusal, knowing that a large amount of the information required by yourself will be found therein.

I have also the honor to report that the armory of the Seventy-first Regiment, located at the junction of Broadway and Sixth avenue, at Thirty-sixth street, is, as far as I can ascertain, in good condition.

That of the Ninth Regiment, on the north side of West Twenty-sixth street, between Seventh and Eighth avenues, in excellent condition ; and that of the Eleventh Regiment, at Center Market, in a fair condition. The company rooms are not provided with furniture, at least only partially, and that of a poorer quality, and something should be done for the command to make the members more comfortable while using it.

The rifle ranges in each of the armories I have not particularly examined, consequently will leave the report of them to be made by the Brigade Inspector of Rifle Practice.

Your most obedient servant.

WM. H. KING,
Lieutenant-Colonel and Brigade Inspector, Second Brigade.

OFFICE OF THE BRIGADE INSPECTOR, SECOND BRIGADE, }
N. G. S. N. Y., No. 99 NASSAU STREET, }
NEW YORK, December 12, 1876. }

Major-General FRANKLIN TOWNSEND, *Adjutant-General, State of New York:*

GENERAL.—In compliance with section 153 of the "Military Code," I have the honor to submit the following report of the reviews and inspections of the several regiments in this brigade, attended by Brigadier-General Frederick Vilmar, commanding the Second Brigade, N. G. S. N. Y., with the Brigade Staff, including myself, uniformed, armed and equipped according to law and regulation.

On the 11th day of January, 1876, in compliance with orders from your head-quarters, I attended at the armory of the Eighty-fourth Regiment, corner of Fourth street and Broadway, for the purpose of mustering the regiment out of service.

The command was under Colonel Frederick A. Conkling, assisted by Lieutenant-Colonel Beattie and Major Conkling. None of the members were in uniform and the discipline was very poor.

On the evening of January 12, 1876, in compliance with orders from your head-quarters, I attended at the armory of the Ninety-sixth Regiment, N. G. S. N. Y., situate at the corner of Elm and White streets in this city, and mustered said regiment out of service of the State. Colonel A. Stauff was present and in command.

The regiment was in uniform, and although the members were few in numbers, yet very good discipline was shown. After the ceremony of mustering had been concluded, and farewell addresses had been delivered to the men by Colonel Stauff and others, several members of the regiment left the armory under the command of Adjutant Ebler and immediately thereafter joined the Fifth Regiment of Infantry, N. G. S. N. Y.

On the 16th day of October, 1876, at two o'clock in the afternoon, at Tompkins' square in New York city, I inspected the Seventy-first Regiment of Infantry, Brigadier-General Vilmar and staff being present, and also inspected by me. Their uniform is in accordance with regulation.

The review was tendered to General Vilmar. The passage was good, the men marching steadily, the officers, as a rule, saluting at a proper distance and in a proper manner.

None of the field or staff officers of the regiment appeared mounted.

As this regiment has been but a short time attached to this brigade

I have never before had the honor to inspect it, therefore I cannot state any thing in relation to its improvement either in military appearance, drill or discipline. Although the day was very windy and cold, and the men were without overcoats, yet good discipline was observed.

On the seventeenth day of October, 1876, at two o'clock in the afternoon, at Tompkins square, in this city, I inspected the Ninth Regiment of Infantry. Brigadier-General Vilmar was present with his staff, and received the review. The passage was excellent, the salutes of the officers, with few exceptions, being also good. All the field and staff, with one exception, were mounted. Too much credit cannot be given to the officers of the regiment for their efforts in bringing the regiment up to and maintaining it at a proper standard. In one company, Company A, commanded by Captain Cottman, every member was present; the company numbered 112. In the cases of two or three other companies but two or three were absent.

As the regiment has performed a large amount of duty during the past year, the numbers present upon this occasion evinces an interest among the members for the welfare of the regiment, and a determination on their part to increase its membership to such an extent as to make it the largest in the city.

Although the day was cold, and the men suffered some by reason of not having overcoats, and some discontent was shown by a few because the ceremony had taken place in the daytime and upon the field, instead of in the evening and in the armory, yet the discipline was good. The uniforms were not as bright as usual, because of their constant use.

On the 18th of October, 1876, at two o'clock in the afternoon, at Tompkins square, in this city, I inspected the Eleventh Regiment of Infantry.

Brigadier-General Frederick Vilmar was present with his staff and received the review.

The passage and salutes were creditable. The field and staff were mounted. As there are a large number of the officers who had but a little time previous received their commissions, and had not had sufficient time to become acquainted with their men, and as there were present quite a number of recruits, the discipline was not as good as that of the two regiments last above mentioned.

During the inspection of the regiments of this brigade I noticed that the sights of several of the rifles had been filed, or in some way,

tampered with. I endeavored, so far as time and other circumstances would permit, to ascertain who had been guilty of changing the sights, but was wholly unsuccessful, as not only the owner of the pieces but the armorers denied any knowledge of any alterations in the rifles.

I deem it a part of my duty in reporting the inspections made by me to state an occurrence which took place upon the field while inspecting the Seventy-first Regiment. Immediately after arriving on the ground a letter was handed me by a person claiming to be Captain Demarets of that regiment, protesting against the inspection and muster of members of Company A, of said regiment, except as members of such company. No notice was taken of the letter, nor of the person delivering the letter (he being, at the time, in citizen's dress), and the inspection and muster went on in the usual manner. No rolls of Company A were furnished me. Upon inquiry of Colonel Vose I was informed that Company A had been consolidated, by orders from your head-quarters, with other companies. When the name of one claiming to be a member of Company A was called, he, at the instance and by the advice of Captain Desmarets, as I am informed, refused to answer his name as a member of the company then being mustered, and I was compelled to reduce him (he being a sergeant), to the ranks, and send him away from the company, and ordered the Adjutant of the regiment, who was then present, to prefer charges against him. I was then told that if prompt action had not been taken in the case, a like trouble would have been experienced in the other cases of members of A company. As Captain Desmarets is now, as I understand, a supernumerary officer, and amenable to military discipline, some action should be taken to prevent a future interference of officers with the management or control of companies or regiments to which they do not belong.

I have also the honor to transmit herewith consolidated returns of the inspections of brigade staff and the regiments of this brigade.

Your obedient servant.

WM. H. KING,
Lieut.-Col. and Brig. Insp., Second Brig.

Second Brigade, commanded by Brigadier-General Frederick Vilmar, mustered and inspected by Lieutenant-Colonel Wm. H. King, at New York city, on the 16th, 17th and 18th days of October, 1876.

OFFICE OF BRIGADE INSPECTOR,
THIRD BRIGADE, FIRST DIVISION, N. G. S. N. Y., }
NEW YORK, December 15, 1876.

Brevet Major-General JOHN B. WOODWARD, *Inspector-General, State New York:*

GENERAL.—In compliance with circular letter under date of December first, I have the honor to submit the following report:

Pursuant to General Orders No. 31, C. S., 1875, from general headquarters, the Ninth Regiment of the Third Brigade was transferred to the Second Brigade, and the Sixty-ninth Regiment, by same order, was transferred from First Brigade to Third Brigade, so that at the present date the command is composed of the following regiments: Seventh, Eighth and Sixty-ninth.

Under this head I would most respectfully but earnestly call the attention of my superiors in office to the labor and anxiety attendant on organizing and *maintaining* company, regimental and brigade organizations, and keeping up that *esprit du corps* so absolutely necessary in the State National Guard, and which is greatly stimulated by the social element, or in other words, by the bonds of friendship which have become so strongly cemented by long service in the *same organization*; many members are thus retained who, by their experience and ability, are valuable to the State service, but when these associations are sundered are most likely to take their discharge from further duty. Constant contact and communication with mem-

bers of the National Guard, for many years, to say nothing of my own experience, has taught me that this element of friendship to which I have referred, whilst not interfering with strict discipline, enters more largely than is generally supposed in furthering and keeping up a standard of excellency, and should not be disturbed unless positively necessary.

MISSING PROPERTY.

The stand of colors and rifles missing, at the date of last report, have never been recovered.

INSPECTIONS.

The Seventh Regiment, Col. Emmons Clark, paraded in full uniform for muster and inspection on the evening of October twenty-fourth, at eight o'clock, in regimental armory. Want of space prevented going through the ceremony of review, although Brig-Gen. Varian and staff were present for that purpose. The inspection was a thoroughly satisfactory one, the arms and equipments being in fine condition, and the minute attention given to all the details of the duty required gave ample evidence that the command has lost none of the characteristics for which it is distinguished.

In numbers the regiment has gained six since last inspection, making a total of 978 members, of whom 895 were present.

EIGHTH REGIMENT.

This command, Col. Geo. D. Scott, paraded in full uniform for muster, inspection and review at State arsenal, corner Seventh avenue and Thirty-fifth street, on the evening of October nineteenth, at eight o'clock.

The muster and inspection were preceded by a review by the Brigade Commander, Gen. Varian, and staff, and was handsomely executed despite the lack of space necessary for such ceremony. This regiment has made rapid strides in improvement the past year, which was especially manifest in increased numbers, soldierly bearing and discipline. The arms and equipments are in prime condition, but the men are sadly in need of overcoats. The inspection of 1875 showed a total of 493 members, of whom ninety-seven were absent. This year the total reached 649, of whom 523 were present, a gain of 156 members.

SIXTY-NINTH REGIMENT.

This regiment, Col. James Cavanagh, paraded in full uniform for the annual muster and inspection at the State Arsenal, on the evening of October seventeenth, at eight o'clock. Brig.-Gen. Varian and staff were present, and reviewed the organization previous to inspection. The command presented a creditable appearance, arms and equipments being in fine condition, and there seemed on the part of the officers and men a desire to show to best advantage possible. A great deal of work is necessary, however, to bring the regiment up to the standard of first class, and nothing but close application on the part of officers in command, and steady drill, will enable them even to approximate to that position.

The muster rolls showed a total of 556 men, of whom 429 were present, absentees nearly twenty-five per cent.

On account of the unusual amount of duty performed by the several regiments just previous to inspection, and also by reason of want of proper out-door space, the brigade commander, at the request of the several regimental commandants, directed that the service required should be executed in the evening.

REGIMENTAL RECORDS.

The books and records at the several regimental head-quarters, I found, in most instances, were properly kept; in some companies, in order to simplify and render more intelligible, I recommended changes, but, as a whole, the officers in charge of records are entitled to great credit for their uniform accuracy, where so many changes are occurring, and so much business transacted.

PARADE GROUND AND ARMORIES.

I sincerely trust that the recommendation of my predecessor in office, made in his last report to you, on the subject of a parade ground, will be taken into serious consideration by the proper officials, and, if necessary, to recommend legislation on the subject, so that by the time that out-door space is needed, the coming season, the grounds in Central park, originally intended for them, shall be available.

I can also second most heartily his proposition in regard to *brigade armories*, as neither of the regimental armories of the brigade are adapted to the wants of the service, and are, by far, more expensive than the plan proposed.

Herewith I beg to transmit the return of the strength of the brigade and the separate returns of each regiment, in accordance with blanks furnished from your office.

All of which is respectfully submitted.

I have the honor to be, General,

Very respectfully, your obedient servant.

DANIEL D. WYLIE,
Major and Brigade Inspector.

HEAD-QUARTERS FIFTH BRIGADE, N. G. S. N. Y., }
BROOKLYN, *November 8, 1876.* }

GENERAL. — I have the honor to submit the annexed report of the annual inspection and muster of the several organizations composing this brigade, for 1876, which took place on the evenings of October twenty-third, twenty-fifth, twenty-sixth, twenty-seventh and thirtieth, at their respective armories.

TWENTY-EIGHTH REGIMENT.

The Twenty-eighth Regiment was inspected and mustered at its armory, corner of Stagg street and Bushwick boulevard, on the evening of October twenty-third, the inspection being preceded by a review, which was conducted by Lieut. Col. Frederick W. Obernier, and received by Colonel Joseph Burger, he being the ranking officer present in uniform; General James Jourdan and a portion of his staff being present in citizens' dress. The ceremony of review was performed fairly creditable, taking into consideration the contracted space afforded for this purpose; indeed a company of fifty men would be somewhat circumscribed in its movements in the drill room allotted to this organization for battalion purposes; therefore, it would hardly be fair to comment too severely on this part of the proceedings. There is, however, no excuse for officers not knowing how and at what distance they should salute the reviewing officer, the prescribed form being so plain that it does not require a very high order of military excellence to understand, and yet the error is one which a large number of officers in this and other organizations commit.

Immediately after the review, I proceeded to inspect the arms and equipments of the members, all of which I found to be in very good condition, with the exception of the arms used by Company C,

which were exceedingly dirty, and apparently not having the necessary care and attention which they should have to keep them in good order. The Colonel's attention was called to the matter, who gave the Captain orders to have them properly cared for in the future. In my opinion, a school for officers in this organization, with an efficient instructor, would add very materially to its proficiency. The same would apply to a great extent in the other organizations attached to the brigade, as well.

The General commanding the brigade has taken steps to prevent officers-elect from obtaining commissions, unless they are qualified to perform the duties of the office to which they may be elected, by appointing a board of examiners, composed of the commandants of regiments of the brigade, who are required to make a written report to the Brigade Commander, as to the intelligence and military qualifications of any officer who may come before it; therefore, the entire responsibility of having efficient subordinate officers rests with the officers composing this board, and as they are good soldiers and strict disciplinarians, it is, of course, to be expected that none but those who are found to be qualified in every particular will receive a favorable report.

The following was the result of the muster: 306 present and 126 absent; aggregate, 432. Although the military appearance of this command was very fair, the officers and enlisted men attentive during the entire proceedings, there is evidently a lack of discipline, or such a large proportion of the members would not have been absent. Company D showing two men more absent than present. E Company only two present more than absent, and I Company fourteen more absent than present. This large per centage may be accounted for to some extent by reason of the exceedingly severe storm which prevailed, and this being the last day of registration in the city, at which I was informed a number of the members of the regiment were occupied as registers and supervisors.

I take great pleasure in stating that the books and records, both the regimental and those of the companies, are excellently kept, and reflect great credit on the retiring Adjutant, Albion G. Pape, who has been untiring and indefatigable in his efforts to maintain the excellent system established by him.

The books and records of the head-quarters are as near perfection as can possibly be expected in any National Guard organization.

I regret having to report that an attempt was made to muster men

in I Company of this command who were not members, they never having enlisted, and were instructed to answer to certain names of regularly enlisted men who were absent.

THIRTEENTH REGIMENT.

This regiment was inspected and mustered at its new and commodious armory on the evening of October twenty-fifth. Preceding the inspection a review took place, the regiment being commanded by Major William R. Syme, during this part of the ceremony. This being the first time that the Major has had command of the regiment since his promotion to that office, the review was not as satisfactorily performed as it would have been had the Major been less embarrassed than he appeared to be on this occasion. Having been associated with him for many years in the Thirteenth, and thereby having had the opportunity of judging of his qualifications more impartially than some of those who saw this, his first experience in command, therefore, I am satisfied that he is capable of performing any duty which may devolve upon him as field officer, in a much more satisfactory manner than was manifested by him on the occasion of this review.

The review was received by Colonel Philip H. Riggs, the Brigade Commander and staff being present in citizens' clothes, as on the occasion of the inspection of the Twenty-eighth Regiment. The command presented a very fine appearance and remained very steady in line during the review. The passage in column of companies was well executed, excepting that two of the officers saluted rather awkwardly, failing to pay any attention whatever to the reviewing officer. The size of the drill-room gave ample opportunity of preserving company distances, which was taken advantage of very handsomely by the commandants.

Upon the termination of the review, I proceeded to inspect the arms, clothing and equipments of the regiment, all of which were found to be in excellent condition, excepting some eleven rifles, which are out of order and unfit for use, but can be readily put in order by the Regimental Armorer, if he was furnished with the necessary material, such as springs, blocks, screws, hammers, sights, etc. Upon a suitable requisition I would recommend that said material be so supplied.

As the regiment is recruiting rapidly, I would also recommend that an additional sixty Remington rifles be furnished, increasing the

number to four hundred. Tompions should also be supplied for the rifles.

After the inspection and muster, dress parade took place, Colonel Briggs commanding. This ceremony was performed in good style, the command remaining as steady as statues while at parade rest, and presented a splendid front. Great care has evidently been taken in the instruction of the manual of arms in this organization, nearly all the companies showing a high degree of proficiency in this branch of drill.

The books and records of the regiment appear to be kept correctly and well. A little more attention, however, on the part of the Adjutant, would facilitate the transaction of business, both at regimental and brigade head-quarters.

The muster shows 374 present, 129 absent; aggregate 503. This command, as in the case of the Twenty-eighth, shows a much larger per centage of absent than it should, if all company commandants exhibited the *esprit du corps* that might be expected from an organization whose past record stands as high as the Thirteenth.

The regiment shows a much larger per centage of gain, in the aggregate, than the other organizations attached to the brigade, excepting the Separate Troop of Cavalry.

FIFTEENTH BATTALION.

This organization paraded for inspection and muster at its armory, corner Fulton and Orange streets, Thursday evening, October twenty-sixth. Promptly at the hour named in brigade orders, 7.30 p. m., the battalion was formed and turned over to the Lieutenant-Colonel, John B. Meyenborg, who immediately gave the proper orders for review, which were received by the acting Brigade Inspector, the Brigade Commander being present, accompanied by his staff in citizens' clothes. The review was performed very well, taking into consideration that the drill-room of the armory is entirely inadequate to the purpose for which it is used.

The lack of sufficient space and accommodation prevent the proper instruction from being imparted to this organization in battalion movements, but, notwithstanding these difficulties, the energy and attention displayed by Lieutenant-Colonel Meyenborg has resulted in showing an improved condition of the battalion, both in discipline and proficiency.

The arms, clothing and equipments were found to be in excellent

condition, with the exception of eight rifles, which, however, can be easily put in perfect order by the armorer.

The books and records of the battalion are only indifferently kept. A good Adjutant would add very materially to this part of regimental duty. At present there appears to be no system of keeping records at battalion head-quarters, or by company commandants.

The muster shows a less per centage absent in this than the other organizations of the brigade, excepting the Separate Troop of Cavalry, there being 191 present and thirty-one absent; aggregate, 222.

SEPARATE TROOP OF CAVALRY.

This organization was inspected and mustered at its present quarters, corner of Henry and Cranberry streets, on Friday, October twenty-seventh. Promptly at 7.30 o'clock, P. M., the hour named in brigade orders, the troop was prepared for inspection by Captain Louis Sandhusen. This officer being desirous of having the troop reviewed preceding the inspection and muster, that ceremony was gone through with and performed very handsomely, the passage in review being by platoons, of which there were four. Immediately after the review I proceeded to inspect the arms, clothing and equipments of the command, and found all to be in perfect condition, with the exception of twelve carbines, which can be put in order by the armorer of the troop, if, on the proper requisition, springs, hammers, etc., be furnished for that purpose.

Captain Sandhusen is one of the most attentive and industrious officers in the National Guard, and is deserving of the greatest praise in bringing his command to such a high degree of excellence. I doubt if there is an organization of the kind in the State its superior. The quarters set apart for this command is certainly not fit for any such purpose as it is intended, the building having been condemned as unsafe both by the State and county authorities.

The result of the muster shows a very large gain since last year, eighty-four being present and nine absent; aggregate, ninety-three; last muster, sixty-one present and two absent; aggregate, sixty-three, showing a gain in the aggregate of thirty enlisted men.

FOURTEENTH REGIMENT.

This regiment assembled for review, inspection and muster on the evening of October thirtieth, at its armory, North Portland avenue. Regimental line was formed at 8.10 o'clock, forty minutes later than

the time named in brigade orders. The command was turned over by the Adjutant to Major Harry W. Michel, who held command during the review, which was taken by Colonel James McLeer, he being the ranking officer, as on the occasion of the inspection and muster of the Twenty-eighth and Thirteenth Regiments. General Jourdan and staff were present in citizens' clothes.

Lientenant-Colonel Charles Schurig was absent on account of severe illness. The ceremony of review was performed very creditably, with the exception of a few slight errors on the part of the Major, which, I presume, were caused by the extremely limited space afforded for purposes of this kind.

The command presented a very fine appearance, the men remaining as steady as regulars during the review in line. In passing in review by companies, some of the officers failed to look toward the reviewing officer. This is a fault which prevails pretty generally throughout the brigade, which is wholly inexcusable.

Many of the officers of this command are those who actively participated in the campaigns of the war, including the three field officers, in which two of whom each lost an arm.

With three such active and energetic officers as compose the field of the regiment, it is expected that it will continue to steadily increase in numbers, discipline and drill.

Before another drill season, it is hoped that the command will have an armory sufficiently large and adequate for all purposes, the board of supervisors of the county having appropriated \$60,000 toward remodeling and building an addition to the State Arsenal, which has been set apart by the State for the use of the regiment; the money being available, it is expected that work will be commenced immediately, in anticipation of which there will, without doubt, be a large increase in numbers shown at the next annual inspection.

I find the arms, clothing and equipments of the members of this command to be in good condition.

On examination of the books and records of the regiment, I found that there appeared to be an entire lack of system in keeping the records at head-quarters, some of the most important papers not having been kept at all. The Quartermaster seemed to have entire charge of regimental papers, the Adjutant apparently not having much knowledge of this part of his regimental duties.

The commandants of companies have more to contend against, so far as keeping their records is concerned, than at head-quarters, there

being only one available room for the ten companies. There is, however, no excuse for not having files of orders complete. Steps will be taken by the Colonel, forthwith, to have this evil remedied, and by next inspection a much better state of affairs in this respect will exist.

The muster shows 343 present and 148 absent; aggregate, 486.

I am very sorry to have to report that one company (K) in this command made an effort to have men mustered who were not members, but who were instructed to answer to the names of regularly enlisted members who were absent, as in the case of the Twenty-eighth. I found two of this class, which I, of course, refused to muster. An officer having a proper appreciation of his commission would not tolerate such a proceeding. For the sake of the good name and discipline of the regiment, I sincerely hope that it will not occur again.

Accompanying this report, please find recapitulation of muster of the several organizations, and by brigade.

Muster rolls have been forwarded this day by Adams Express.

I have the honor to be,

Very respectfully, your obedient servant.

SAMUEL RICHARDS,

Lt.-Col. and Asst. Adj.-Gen., Acting Brigade Inspector.

Major Gen. JOHN B. WOODWARD, *Inspector General, N. G. S. N. Y.*

INSPECTOR'S DEPARTMENT,

SEVENTH BRIGADE, FIFTH DIVISION, N. G. S. N. Y., }

DOBBS FERRY, N. Y., *December 27, 1876.* }

Brevet Major General JOHN B. WOODWARD, *Inspector-General, State New York:*

GENERAL.—In compliance with your circular letter, dated December 1, 1876, calling my attention to sections 47, 55 and 153 of the Military Code, I have the honor to forward the following report, showing the strength and condition of the Seventh Brigade, Fifth Division, N. G. S. N. Y., at the inspection and muster made as follows:

The officer commanding this brigade, Brig-Gen. James H. Blauvelt, was the recipient of an invitation from a committee representing the citizens of White Plains, Westchester county, to participate in the cele-

bration of the anniversary of the battle of White Plains, on the the 28th day of October, 1876. Having accepted the invitation, orders were issued from brigade head-quarters ordering the several organizations of the brigade to assemble at White Plains on the 28th day of October, 1876, fully uniformed, armed and equipped for annual inspection and muster, brigade staff and regimental and battalion field and staff officers to report mounted. In compliance therewith the following organizations reported for duty: Twenty-seventh Regiment, Sixteenth Battalion and First Separate Troop, Eagle Cavalry, Seventh Brigade. On account of a cold and severe rain and snow storm having set in, it was impossible to inspect and muster more than two organizations, as there was no accommodation or shelter for the men. After the inspection and muster the brigade line was formed. On account of the severe illness of Brig.-Gen. Blauvelt, Col. John T. Underhill, commanding the Twenty-seventh Regiment, was temporarily in command of the brigade. Line formed, the command wheeled into column of companies and paraded through the principal streets of the town and was reviewed by Major-General James W. Husted, on Chatterton hill, the old battle-ground of White Plains. As it was raining, the troops, as soon as they passed in review, marched from the grounds and arriving at their respective places of assembly, were dismissed.

In regard to the inspection and muster of this brigade, the Twenty-seventh Regiment, commanded by Major John W. Coburn, paraded at White Plains, on October 28, 1876, at 10 A. M., for annual inspection and muster. As the weather was cold and a rain and snow storm was falling, it was with great difficulty that the inspection and muster of this regiment was made. In fact, while I was mustering the men the muster rolls were so wet that the names of the men were almost blotted out, and in one or two rolls it was necessary to compare rolls to find what the name had been. The men were remarkably well behaved, showing good discipline, and as soon as a company was mustered it was marched to the nearest trees for shelter. As the men have no overcoats they were wet and were unable to dry their clothing; thus they were in wet uniforms from 10 A. M. to 5 P. M. Col. Underhill has, for a long time, been without any field officers, and only a Lieutenant, acting as Adjutant, to assist him, and he deserves credit for the improvement his command has made since last muster. The men were prompt in roll-call and handled their pieces well. Uniforms were in good condition, but wet. Equipments were in good order.

Rifles were in good condition, but find that some of the companies who use public halls for armories also use a room in same building for the use or accommodation of keeping their rifles. I do not consider it safe to leave State property, especially rifles, unguarded, and recommend that such companies be better provided for. I also find that Companies A, Captain John J. Sauran; G, Captain Frederick Lambert; K, Captain Anthony McOwen, are using a public hall for drill-room or armory. For the use of this room they have been personally held for rent, and are unable to receive any pay from the city authorities since the annexation of that portion of Westchester county to the city of New York. Company K, of this command, not being provided with muster rolls, on the day of muster, were inspected and mustered at their armory at Morrisania, on the twenty-ninth day of November, 7.30 P. M., and appeared to very good advantage in drill and discipline. Uniforms, good condition; arms, good condition. This regiment was in camp for one week at Glendrake, and was visited by the General commanding, accompanied by his staff.

The Sixteenth Battalion was present and reported at White Plains on October 28, 1876, for inspection and muster, but as the storm was so great they were ordered to assemble by companies at their respective armories for annual inspection and muster, as follows:

Field, staff and band, at Sing Sing, on November sixteenth, at 7.30 P. M.

Non-commissioned staff with the companies located in their respective districts.

Company A, at Peekskill, on November seventeenth, at 7.30 P. M.

Company B, at Nyack, on November twenty-seventh, at 7.30 P. M.

Company C, at Sing Sing, on November sixteenth, at 7.30 P. M.

Company D, at Yonkers, on November thirteenth, at 7.30 P. M.

Company E, at Tarrytown, on November fourteenth, at 7.30 P. M.

Company F, at Yonkers, on November thirteenth, at 7.30 P. M.,
Company D armory.

The field and staff of this battalion made a fine appearance, being well uniformed, armed and equipped, and showed discipline. The band (a new one) were fully uniformed and gave some very good music during the evening. Their instruments were in good condition and well cleaned.

Company A was inspected and mustered, at Peekskill, on the seventeenth day of November, at 7.30 P. M. The company assembled promptly and was ready for inspection at 7.45 P. M. The uniforms

were in good condition and well cleaned. Equipments were clean and in good order. Arms were bright and well preserved. This company has a good-sized armory, but the room is often used as a ball room, and when so used the company cannot drill; notwithstanding this inconvenience, the company is much better drilled than it was six months ago and promises greater improvement.

Company B was inspected and mustered at Nyack, on the twenty-seventh day of November, at 7.30 P. M. The company assembled, showing promptness and good order. The uniforms were in good condition and had been kept clean. The equipments were in good order and clean, rifles were bright and in good order. This company has at present a small room for an armory, but are making an addition that will give them a good sized room. I find that the company has made great improvement in drill and discipline, and although they have lost their Captain, they have two good Lieutenants, and with the enlargement of their armory, they will, in all probability, make improvement in their drill.

Company C was inspected and mustered at Sing Sing, on the sixteenth day of November, at 7.30 P. M. This company made a fine appearance and was prompt in all duties; company was formed at 7.30, prompt. The uniforms were in capital order, being well preserved and brushed. Equipments were in good order and clean. Rifles were in good condition and were well cleaned. The company has made progress since last muster, and are better instructed in handling their rifles and in drilling than they were last year. The members of this company have for some time endeavored to be the leading company of the battalion, and are losing no opportunity to gain the position.

Company D was inspected and mustered at Yonkers, on the thirteenth day of November, at 7.30 P. M. This company was prompt on assembly, and were uniformed in clean uniforms. Equipments were in very good order and nicely cleaned. Rifles were well cleaned and showed that care had been taken of them. The company has lost no ground since last muster, and, in fact, has made good improvement, and is determined to keep its reputation. The discipline and drill is very good and there is evidence of instruction having been given. There has been some changes in the officers of this company, but not to its disadvantage.

Company E was inspected and mustered at Tarrytown, on the fourteenth day of November, at 7.30 P. M. This company assem-

bled at 7.35 p. m., and was in fair time. The uniforms were in good condition and clean. The equipments were in good condition and clean. The rifles were in good order and well cleaned. This company has some very good material in the ranks and should have more and better officers. The present Captain does not attend to his duties pending the acceptance of his resignation. The Lieutenant in command has given much time and attention to the welfare of the company, but should have the assistance of a Captain. The company has made improvement since last muster and now is in need of a better and much larger armory. It was with much difficulty that the inspection was completed, on account of the narrowness of the room.

Company F was inspected and mustered at Yonkers on the thirteenth day of November, at 7.30 p. m. This company was mustered at Yonkers, at the armory of Company D, on account of their own armory having been destroyed by fire. This company is a new one, and was organized in the spring of 1876, with First Lieutenant Wm. J. Travers in command. The company has made rapid progress, and is determined to be the leading company of the battalion, and therefore the members have paid close attention to duty, and having a good officer, are doing exceedingly well. The other companies of the battalion have noticed this, and competition is great, and as matters now stand, this battalion bids fair to be the best in the Fifth Division.

This battalion has made a change in the field — that of promoting Adjutant W. A. Downs to the majority. The field and line officers have been indefatigable in their exertions to place the battalion best in the division. The reputation which this command has gained, since its organization, for drill, discipline and soldierly appearance, is still maintained, and the organization is a credit to our State. Lt.-Col. Cooley has used every means to advance the standing and reputation of his battalion, and deserves the credit which is justly due him. This battalion paraded at Bridgeport on the occasion of the unveiling of the statue of the Soldiers and Sailors' Monument, on seventeenth August. Although it was a rainy day the parade took place, and the Sixteenth Battalion was out with full ranks, making a fine appearance, and was equal in military or soldierly bearing, drill and discipline, to any body of men present. The members of this battalion paraded during a heavy rain storm, and their uniforms became thoroughly wet; many of the men being unable to procure any means by which they

could dry their uniforms were compelled to wear their wet clothing until they returned home. This is the second parade this year that this battalion has had to parade during a storm, and I respectfully urge they be furnished with overcoats.

NINETEENTH BATTALION.

In compliance with General Orders from brigade head-quarters this battalion paraded at Newburgh, on Wednesday, November 15, 1876, at 4:30 P. M., for annual inspection and muster. The command is composed of five companies, A, C, D, E and F, and has some very good material in the ranks, and with proper management, could be made a good organization. The officers (with a few exceptions) are indifferent, letting things go just as they happen to be, good or bad, and as the men see no disposition on the part of the officers to enforce discipline or order, they get just as indifferent, and the result is, the battalion had made no parades, held no drills, in fact, has done nothing. I find the great cause of this lack of discipline is in the field officers. The Lieutenant-Colonel resides twelve miles from regimental head-quarters, and is more or less of his time confined to the house, leaving the Major to look out for the management of the battalion, while the Major does nothing, waiting for the Lieutenant-Colonel to get well. This is the way the organization has been running for about a year. At the inspection and muster, as shown in report sent to the Adjutant-General, a copy of which I herewith inclose, the number present was not a company strength; only four companies were present, C, D, E and F, and one man from Company A. The officers appeared in all manner of uniforms; some with caps, others with hats, some with military pants, others with black civilian, some with epaulets, others with straps. The adjutant appeared without plume, epaulets, shoulder-straps, baldrick or aiguilet, and as the officers appeared so did the men. The uniforms worn were in fair condition. The equipments were in fair condition, and the rifles were fully as good. At present I know of no other report to make, other than to say there are two companies who manifested a disposition to make a military appearance, and had the weather been pleasant, probably would have presented a larger number of men.

FIRST SEPARATE TROOP EAGLE CAVALRY.

In compliance with General Orders from brigade head-quarters this troop paraded at White Plains, on October 28, 1876, for annual

inspection and muster. This troop was organized on March 15, 1876, and is commanded by Captain S. O. Howe, who is well supported and assisted by his two Lieutenants, James M. Jarvis and Alphonse L. Embury. The troop has made good use of the time since its organization, having drills, meetings for instruction and parades. At White Plains they appeared well mounted, and every man knew his position, and in executing the commands given by Captain Howe, it was plainly seen that both officers and men knew what they were about. The troop paraded at Bridgeport, in August, 1876, and were complimented by military men present who took part in the parade. The uniforms are in good condition; equipments in good condition; arms in good condition; men well mounted. I am informed that Lieutenants James M. Jarvis and Alphonse L. Embury have not, as yet, received their commissions, but have held and acted in the position of Lieutenants since August 7, 1876.

Having furnished the above report of the several organizations of this brigade, I respectfully call your attention to the fact that I have been delayed in making my report on account of having received my muster-rolls, in many cases, in such incomplete condition, and thereby necessitating the returning of the same for correction; and delay in mails, etc., has delayed me. But for this fact the muster-rolls and the report herewith furnished would have been forwarded long since.

I am, General, very respectfully,

Your obedient servant.

R. LIVINGSTON LUCKEY,

Major and Brigade Inspector Seventh Brigade, Fifth Division, N. G. S. N. Y.

HEAD-QUARTERS EIGHTH BRIGADE, FIFTH DIVISION, }
N. G. S. N. Y., POUGHKEEPSIE, Dec. 15, 1876. }

revet Major-General J. B. WOODWARD, *Inspector-General, S. N. Y.:*

GENERAL. — In compliance with instructions, as per circular letter the first instant, I have the honor to submit the following report the condition of the several organizations comprising the Eighth igade, Fifth Division, N. G. S. N. Y.:

There has been but one brigade parade during the year; this arred at Kingston, on the fifteenth of June last. All the organi- ons comprising the command were present with full ranks.

General Parker commanded, and was accompanied by his full staff. The command was reviewed by the Mayor and Common Council of the city of Kingston. General Woodward and Colonel Taylor of the Governor's Staff were present, but not in uniform.

A parade of the brigade was ordered for the nineteenth of October, at Poughkeepsie, but a difficulty in the matter of transportation occurring at the last moment, the Twentieth Battalion were unable to report, and, consequently, the Twenty-first Regiment and Battery A paraded and were reviewed and inspected by General Parker, at Poughkeepsie; and the Twentieth Battalion paraded for inspection by Colonel Coddington, at Kingston. In addition to these inspections I have visited the armories of the several commands and carefully inspected the property and books of each organization.

The Twenty-first Regiment, with head-quarters at Poughkeepsie, consists of nine companies and a fine band of twenty musicians. The six city companies, A, B, D, F, and G and I, occupy the same convenient quarters reported last year. Companies C (formerly K), at Wappinger's Falls, and H, at Fishkill, are comfortably situated in armories which are leased by the county. Company E, at Pleasant Valley, was disbanded May 1, 1876, and a fine company of sixty members, designated E Company, was organized May 2, 1876, at Fishkill, occupying rooms in the armory with Company H.

On close inspection of the Twenty-first Regiment, I found all arms and accoutrements in good condition, and the books properly kept and well written up. In tactical movements the companies acquitted themselves in a manner that reflected credit on their instructors.

Battery A, located at Poughkeepsie, is very well situated in an armory leased by the county. At the spring parade, held at Kingston, the entire battery, accompanied by General Parker and staff, proceeded overland to the place of meeting, a distance, by the route taken, of twenty-two miles. They started at 4.30 A. M., and, after a march of nine miles, halted for breakfast, after which the march was resumed and Kingston ferry reached at 11 A. M. The day was one of the hottest of the season, but the command reached their destination in much better shape than could have been expected. Owing to the small capacity of the ferry boat and the refusal of the captain of the ferry to make any other than the regular trips, they were subjected to an annoying delay. At the annual muster and inspection they performed the different manoeuvres in a

creditable manner, and a searching inspection found every thing in good condition.

The Twentieth Battalion, as regards armories, is, I regret to say, in no better condition than reported last year. Company A, at Sangerties, having the most convenient quarters, Company B, at Kingston, comfortably situated, but not as well as could be desired, while Companies C, D, E and F occupy the same miserable apartments before reported. The commands, with the exception of Company E, which failed to appear, passed a very creditable inspection. In conclusion, I beg to state that the brigade is in better condition than it was last year in many respects, and that there is every promise of continued improvement. I inclose returns of the Twenty-first Regiment, Twentieth Battalion, Battery A and the brigade, and have the honor, General, to subscribe myself

Your obedient servant.

WILLIAM HAUBENESTAL,

Capt. and Bret.-Major Twenty-first Infantry, Acting Inspector.

HEAD-QUARTERS NINTH BRIGADE, THIRD DIVISION, }
N. G. S. N. Y., ALBANY, *November 28, 1876.* }

Brevet-Major-Gen. JOHN B. WOODWARD, *Inspector-General, S. N. Y.:*

GENERAL. — I have the honor to submit the annual report of the Ninth Brigade, consisting of the Tenth and Twenty-fifth Regiments, Cavalry and Battery A.

Pursuant to General Orders No. 5, the brigade paraded for muster, inspection and review, September 28, 1876, at 10.30 A. M. The ranks of the separate commands were well filled, and arms, uniforms and accoutrements were in good order. By the aid of several of the officers, the Inspector made rapid progress in the muster and inspection, and finished the same quickly, but in a thorough manner. Through the kindness of the park commissioners, the command was permitted to occupy the park. We greatly need a parade ground, and most strenuous efforts will be made to obtain one. It would be unjust to criticise where all were so nearly perfect. If any defect was noticeable, it was in the salutes of some of the officers, which were not sufficiently well timed.

TWENTY-FIFTH REGIMENT.

In this regiment we find cause for complaint. Several companies, not well officered, have lost in strength and discipline. The regiment possesses splendid quarters and a most energetic Colonel, and the summary treatment of delinquent officers, non-commissioned officers and privates, now in force, will restore to this time-honored regiment its prestige.

Colonel Andes, commanding, is a thorough gentleman and experienced officer, and it is through no fault or neglect of his that I am compelled to find fault. The repeal of the exemption clause does much to discourage old soldiers; but the evil effects of this measure having been overcome, I predict for this command a bright future.

Arms and clothing, with the exception of pants, are in the best condition, and the property of the State has been properly cared for. A court-martial, ordered for the trial of delinquents, will have a salutary influence in maintaining discipline, and will secure a large average attendance hereafter.

TENTH REGIMENT.

This regiment, under command of Colonel Oliver, has been constantly improving. The field and staff officers always appear finely uniformed and mounted, and to the great interest they have taken in the regiment a great portion of its success is due.

On May first seven companies, with regimental head-quarters, were placed in one armory. Companies A and B retaining their old companies' quarters. These two companies are well supported, and cannot be surpassed by any organization in the State. They always do the regiment credit, both at home and abroad. Just interest has been manifested in this regiment in rifle practice, and the men are rapidly becoming adepts at the art.

The rapid growth and constant improvement of the Tenth Regiment affords great pleasure to all interested in its success.

BATTERY A.

The labors of this battery have been quite arduous during this centennial year. Under command of Brevet Major Pochin, this organization maintains its proficiency, and to his watchful care its success is due. It is well uniformed and equipped, and seems to possess all the elements that make a first class organization. Drills are held semi-monthly, and in no way have they deteriorated from

the past. At the annual review the guns, carriages and harness were in a neat condition. In point of instruction the officers and men were not deficient; uniforms were appropriate and in good condition, and the passage in review was excellent.

CAVALRY.

This command presented a fine appearance. Under its new commander, Capt. Schindler, it is steadily improving. The troop is fully equipped, and well mounted, and in point of drill and general instruction a marked improvement was noticeable.

In closing this report you will permit me to make mention of the numerous parades held during the year. The brigade paraded in full force at midnight on centennial eve. When the clock struck twelve, the column started promptly on its line of march, and Albany witnessed a sight, the like of which was never seen before. The several commands turned out in unusual force; the streets through which the procession passed were brilliantly illuminated and densely crowded, and the year was ushered in a fitting manner. The brigade also paraded on Washington's birthday, the Fourth of July, and on the twenty-eighth of September, for annual inspection muster and review.

I remain with respect, yours truly.

HENRY C. LITTLEFIELD,

Major and Inspector.

HEAD-QUARTERS TENTH BRIGADE, THIRD DIVISION, N. G. S. N. Y., }
TROY, N. Y., *December 4, 1876.* }

GENERAL.—Conforming to the requirements of section 47 of the Military Code, and your circular of December 1, 1876, I have the honor to submit the following report:

The changes in this command during the past year have been as follows:

MUSTERED OUT.

The Second Separate Company of Infantry, located at Cohoes, was mustered out of service on the 27th of April, 1876.

MUSTERED IN.

The Third Separate Company of Infantry was organized, and mustered in at Cohoes on the 4th day of March, 1876.

The Second Separate Company of Infantry was organized and mus-

tered in at Whitehall on the 4th day of May, 1876, taking the number of the company mustered out at Cohoes on the twenty-seventh April.

The Fourth Separate Company of Infantry was duly organized and mustered into the service of the State in the city of Troy on the 30th day of May, 1876.

The Fifth Separate Company of Infantry, located at Glens Falls, Warren county, N. Y., was duly mustered in on the 17th day of November, 1876. This company is not yet armed or equipped.

The Tenth Brigade as now organized, consists of one howitzer battery, one battalion (four companies), and five separate companies of infantry, located as follows:

One howitzer battery, four guns, at Troy.

One battalion infantry (second), four companies, at Troy.

One separate company (first), at Port Henry, Essex county.

One separate company (second), at Whitehall, Washington county.

One separate company (third), at Cohoes, Albany county.

One separate company (fourth), at Troy.

One separate company (fifth), at Glen's Falls, Warren county, and numbers according to the returns herewith enclosed, 829 men, 621 of whom were present at the last inspection and muster.

Owing to the large extent of territory covered by the brigade district, it was impracticable to inspect and muster the entire brigade at one time, orders were therefore issued for inspection and muster as follows:

For organizations located at Troy and in its immediate vicinity, at Green Island, on the twelfth day of October.

For the Second Separate Company, at Whitehall, October nineteenth.

For the First Separate Company, at Port Henry, October twentieth.

Brigadier-General Alonzo Alden and staff, were present on each of the days above mentioned, and reviewed and inspected the several commands.

Unavoidable circumstances prevented me from being present at Whitehall and Port Henry, on the occasion of the inspection and muster of the commands located at those places, at Glen's Falls, at the inspection and muster-in of the Fifth Separate Company, and at the inspection and muster-in of the Fourth Separate Company in this city, but there is every evidence that the duties they were detailed to perform in my absence were faithfully performed by

Brevet Lieutenant-Colonel Tallmadge, Captain Patten and Captain Austin, acting Brigade Inspectors.

That portion of the brigade located in this city and its vicinity was inspected and mustered by me at Green Island, on the afternoon of the twelfth day of October, the morning of that day having been devoted to inspection and review by Major-General Joseph B. Carr, commanding Third Division, and staff.

The Howitzer Battery and the Third and Fourth Separate Companies, in all their movements show careful attention to drill, and in discipline they are inferior to none. The Second Battalion, while passing in review marched only tolerably steady, and the general carriage and deportment of the men indicated quite plainly that attention to drill did not occupy much of their time, and that discipline is a word few of them know the meaning of or care to maintain. In battalion movements, a few of which were attempted, they utterly failed. It is evident that there has not been the attention paid to drill during the last year, that is necessary to make even a respectable appearance on parade, and the discipline observed by "target companies, that parade only once or twice in a year to have a "good time," is quite equal to that of the battalion. Company A is totally demoralized, the men having dropped their rifles and broken ranks, leaving on the double quick for a box of crackers and cheese near by, while I was inspecting the arms of the company, and it was with no little difficulty that the men could be got into their places and kept there long enough for the inspection and muster to be completed.

In my remarks in the muster-roll I have recommended the disbanding of the company. The officers and men of the company have expressed to Lieutenant-Colonel Timpane, commanding the battalion, their regret for the conduct of that day, and desire to have no action taken on that recommendation, assuring him that hereafter they will do their whole duty. With this statement of facts on my part, and the assurance on the part of the company of better things hereafter, I leave the subject without urging the execution of my recommendation.

With the exception of the Fifth Separate Company, all the troops composing this brigade are well armed and equipped, have comfortable armories and good protection for the property of the State placed in their charge.

The Fourth Separate Company has no company books. I would

recommend that a complete set be furnished Captain Joseph Egolf at once, in order that his records may be written up from the organization of the company while it is possible to do so.

I am, General, very respectfully your obedient servant.

GEO. H. OTIS,

Major and Inspector Tenth Brigade.

Brevet Major-General JNO. B. WOODWARD, *Inspector-General.*

HEAD-QUARTERS ELEVENTH BRIGADE, N. G. S. N. Y., }
BROOKLYN, *December 6, 1876.* }

GENERAL. — I have the honor to acknowledge the receipt of your circular of the first instant.

It is impossible for me to speak of the improvement or decline in drill and discipline of the several organizations comprising the Eleventh Brigade. I had the honor at the annual muster in October of making my first inspection of this brigade, and the information then gained as to its present efficiency I have embodied in a report to Adjutant-General Townsend, and herewith attach a copy, to which I respectfully refer you for the information required in your circular.

I am, General, very respectfully, your obedient servant,

JAMES E. HAYES,

Major and Inspector.

Brevet-Major-Gen. JOHN B. WOODWARD, *Inspector-General, S. N. Y.*

HEAD-QUARTERS ELEVENTH BRIGADE, N. G. S. N. Y., }
BROOKLYN, *November 27, 1876.* }

GENERAL. — Pursuant to instructions I have the honor to submit my report of the annual muster and inspections of the several organizations of this brigade held on the dates hereinafter mentioned.

FORTY-SEVENTH REGIMENT.

This command was inspected and mustered on the evening of October 24th, at their armory, North Second and Fourth streets, Brooklyn, E. D. Lieut.-Col. W. H. Brownell was in command, the Colonel of the regiment being absent. The line was formed with the usual readiness and precision of this organization, and the review which was held by Brigadier-General Ira L. Beebe, was creditably executed. After this ceremony I proceeded to minutely inspect the

dress, arms and equipments. The arms were found in admirable order, but the dampness of the armory requires great care and labor on the part of the armorer to keep them in proper condition. The accoutrements, with the exception of the cartridge-boxes, were in good condition. The majority of the boxes had the old tin case; many had lost this; and but very few were supplied with wooden blocks for metallic cartridges.

It is to be hoped that this regiment will succeed in the efforts they are now making to procure a new armory. The size, location and condition of the present one are barriers to the complete success of this ably officered and thoroughly disciplined organization. The books and papers are in the main in good order.

TWENTY-THIRD REGIMENT.

This regiment was inspected and mustered on the evening of October twenty-fifth, at their armory in Clermont avenue, Brooklyn. Brigadier-General Ira L. Beebe received the review, which ceremony was well executed in every particular. In the inspection which followed, dress, arms and equipments were found in the best possible condition. In a word, I consider this regiment so completely organized, efficiently officered and so fully equipped as to be ready at all times to discharge any duties required of them.

The regimental books of record are perfect in their keeping and comprehensiveness; the descriptive book is a marvel of convenience and completeness of detail. The books and papers of the several companies were in fine order and correct in every particular. The attendance is excellent, and the muster will show it to have a smaller per centage of absentees, no doubt, than any regiment in the State.

THIRTY-SECOND REGIMENT.

This command was inspected and mustered at the Kings county armory, Brooklyn, E. D., on the evening of the twenty-sixth day of October. Preceding the inspection a review was tendered Brigadier-General Ira L. Beebe, which was not, in any degree, satisfactory, owing, possibly, to the small space within the limits of which the ceremony was executed, but most noticeably accountable to the lamentable ignorance or indifference of company officers.

The armory is occupied by three other organizations, the Twenty-eighth Regiment Infantry, Separate Troop Cavalry and Battery B, artillery, which sadly interferes with the necessary drills for instruction required for this command.

The arms and accoutrements are in excellent order. The regimental books of record and files of papers are in splendid shape, and the books and papers of the several companies, with the exception of Companies G and H, are fairly kept.

GATTLING BATTERY.

This command was reviewed, inspected and mustered at the "Plaza," Prospect park, Brooklyn, on the twenty-fifth day of October, at four P. M. The review was well executed, and the general appearance of the men and horses good. The side arms and accoutrements were in a very creditable condition. Being unable to make a minute inspection of the pieces at the above date, on the fifteenth instant, at the armory of this organization, corner Henry and Cranberry streets, in this city, I carefully examined the horse equipments, carbines and pieces, and found all in good shape and well cared for.

The per centage of absentees, as shown in the muster, is quite large, but the attendance, generally, is good.

SEPARATE TROOP CAVALRY.

This organization was inspected and mustered at their quarters in the Kings county armory on the twenty-sixth day of October, at 7.30 P. M. I found it composed of a fine body of men, splendidly equipped and well officered, but somewhat lacking in instruction and discipline. An improvement in this respect is now provided for. The arms are in excellent condition and the equipments in good order and well cared for.

The books and papers were not in order and far from complete, but I have promises for the future of more attention to this duty.

I have never had the honor of inspecting the organizations prior to this annual muster, and, in submitting this, my first report, am unable to make any criticism on their past position or present improvement.

The brigade commander and staff, fully equipped, were present at each inspection.

Attached please find recapitulation of strength, present and absent, by organization and by brigade; also comparisons as to losses and gains.

I am, General, very respectfully, your obedient servant.

JAMES E. HAYES,

Major and Inspector.

Major-General FRANKLIN TOWNSEND, *Adjutant-General, S. N. Y.*

HEAD-QUARTERS TWENTY-FIRST BRIGADE, N. G. S. N. Y., }
UTICA, December 10, 1876.

To Brev. Major-Gen. JOHN B. WOODWARD, *Inspector-Gen., S. N. Y.:*

GENERAL. — In compliance with your circular of December 1, 1876, from your office, I have the honor to report the inspection of the various organizations of the Twenty-first Brigade, National Guard, for 1876, as follows:

The Twenty-sixth Battalion, located at Utica, and First and Second Separate Companies and First Separate Troop of Cavalry, located at Rome, N. Y., were ordered by the Brigadier-General commanding to assemble at Utica, N. Y., for inspection, muster and review, on the seventh day of September, at 2 o'clock P. M., and on said day said battalion, First and Second Separate Companies and First Separate Troop of Cavalry were reviewed by Brig.-General S. Dering and staff, a full staff being present. The review and marching were very good, indeed. The appearance and marching of the two separate companies of Rome were excellent. They do great credit to the brigade. Also the Troop of Cavalry; they are a fine body of men, every member owning his horse; they are splendidly equipped. Their commander, Captain Wm. Ames, a fine officer, handles them finely. They are an A No. 1 organization. I find the arms, equipments and clothing in very good order. Altogether this portion of the brigade shows a decided improvement over last year's inspection. Major Murray, inspector of rifle practice, informs me that he is perfecting the necessary arrangements for candle practice in the armory, which will be a very great inducement to get the men regularly together for drill and practice.

These organizations number 425 men, of which 351 were present.

I find the Rome organizations have obtained very fair quarters for their armory; the rooms are small, but in the absence of better they get along pretty well. The armory in this city is now a very fine one; the drill-room large and airy; the company's meeting rooms of good size and convenient.

The Bacon Cadets, an independent organization in this city, still hold the fifty stand of Springfield muskets; they are in good hands, being well taken care of.

On Thursday, October nineteenth, the One Hundred and Third Regiment, Col. E. J. Loomis commanding, head-quarters Norwich, N. Y., were ordered to parade for muster, inspection and review at 2 o'clock P. M., and on said day the said regiment were reviewed by

General Dering and a part of his staff. I cannot report any improvement since last muster. There was a great lack of attendance, mainly on account of so many of its members being at the Centennial. There is also a lack of soldierly appearance and discipline in its ranks, which I was very sorry to see, for at the regiment's last inspection I noticed that it was composed of a very fine body of soldierly men, marching and appearing very well. Their arms, equipments and uniforms were in very good condition then.

The regiment is composed mainly of farmers and farmers' sons, and I find on inquiry that at times when their regimental parades are ordered their duties in the fields are such they cannot leave them, in fact caring but very little whether they parade or not, as there is no compensation for what they do now.

I made an inspection of arms and equipments of One Hundred and Third Regiment, as per special order from these head-quarters December 1, 1876.

I find 350 Remington breech-loading rifles in very fair condition, but few out of repair. I find, also, 340 set of equipments complete. There are about forty plates with the pins broken off. There is, also, one brass six pound gun complete, all right.

All of which is respectfully submitted.

Your most obedient servant.

G. T. HOLLINGWORTH,

Major and Brigade Inspector Twenty-first Brigade, N. G. S. N. Y.

HEAD-QUARTERS TWENTY-THIRD BRIGADE, N. Y., }
AUBURN, N. Y., December 19, 1876. }

GENERAL. — In obedience to your circular of first instant I have the honor to report that this brigade as at the date of my last report embraces only the Forty-ninth Regiment Infantry, commanded by Colonel J. E. Storke, and consists of ten companies, eight of which (A, B, C, D, E, F, G and H) are located in this city, and two companies (I and K) at Seneca Falls, Seneca county, distant from these head-quarters sixteen miles by rail.

The requisite number of regimental parades have been made during the year. I regret that I cannot report any improvement, as a regiment, in drill and discipline. In these important respects the regiment has not held its own. Regimental drills have been few, and brief in duration. Attention at company drills has not been good. A fall-

ing off of interest in the regiment, on the part of its members, has been manifest, principally owing to the causes to which I adverted in this connection in my last report, namely, the condition of the company armories, and the repeal of the tax exemption law.

The Auburn companies have been compelled, until within three months, to occupy the wretched quarters heretofore described, damp, small, gloomy and dangerous to drill in, the public property exposed to destruction from rust and mildew, and some of it to theft for lack of sufficient fastenings to the rooms.

This serious drawback to the efficiency of the regiment is now removed. On the fourth October it took possession of the new stone armory, which is handsome, substantial, and in the main, convenient. The company rooms are hardly large enough, but are so superior to those heretofore occupied that no fault should be found. The good effects of the removal are already apparent in the pride the companies evince in the care and decoration of their rooms, and better care of arms and equipments, and will lead, it is to be hoped, to a better attendance in company drills. I trust the inspecting officer next year may be able to report an improvement in drill, discipline and attendance.

The armory has not yet been formally delivered to the State. There are defects in its building that should be remedied before it is accepted. I recommend that the building be examined carefully by a competent and disinterested expert before this is done.

The annual inspection and muster of the Forty-ninth Regiment took place by order of Brig.-Gen. McDougall on thirtieth and thirty-first October. The eight companies located in Auburn on thirtieth inst., at 2 P. M., in the drill-room of the new armory, which, however, is not of sufficient length to allow them to form in column by companies without crowding too much. The weather was good, and there was nothing to prevent review and muster out of doors, and nothing specially to prevent a good attendance. The inspection and muster of Companies I and K took place at Seneca Falls on thirty-first October at 2 P. M., in the armory occupied by these companies; the weather was not good, or it would have been held out of doors. Since my last report these companies have moved into new and better rooms for an armory, rented for them by the supervisors of Seneca county, which has been fitted up neatly and conveniently. The officers and men of both companies deserve commendation for the evident pride taken by them in their new quarters.

The consolidated tables accompanying this report will give you the details of officers and men present and absent, and total strength of the regiment. The muster rolls forwarded to general head-quarters, at Albany, furnish details of arms, equipment and clothing.

Company I, Capt. Almy, went into camp on tenth August, forty strong, at Glen Cove, on Cayuga lake, three miles north of Sheldrake, for three days, breaking camp fourteenth August at 9 A. M. Strict discipline was enforced, and the men exercised in company evolutions and target practice.

The repeal of the tax exemption law, and the failure to substitute any other compensation in its place, has seriously injured the efficiency of the Forty-ninth Regiment, and to a greater or less extent, all other organizations of the National Guard of the State outside of the cities of New York and Brooklyn. Its members are composed, to a large extent, of another class than in the cities named, who, while willing and desirous to do military duty, cannot afford to lose the value of the time thus occupied, and, as their enlistments expire, and many before (in the absence of courts-martial to punish), withdraw from the service. The men who enlisted under the tax exemption law, and are cut off from its benefits by its repeal, think the State has not kept faith with them. This feeling of injustice, whether right or wrong, greatly prevails. No measure will do so much for the improvement of the National Guard, outside of the large cities, as a law granting a moderate per diem pay for actual duty.

As no Brigade Inspector of Rifle Practice is attached to the Brigade Staff, it becomes my pleasant duty to report the operations of the Forty-ninth Regiment in that direction, wherein it has fairly won high distinction.

This is the first year the regiment has had any organized rifle practice. Under the orders of Colonel Storke and the supervision of Captain D. M. Dunning, Regimental Inspector of Rifle Practice, a team was formed last spring who devoted as much time to practice as possible.

It made its first appearance outside of the regiment at the match of the Sixth Division, held at East Syracuse, June thirteenth, and open to teams of six men each. The match was won by the Forty-ninth Regiment team making a score of 203 out of a possible 300.

At the officers' match of the Sixth Division, at same meeting, the first prize was won by Captain C. W. Jennings, commanding Company B, making a score of forty-three out of a possible fifty. The

second prize was won by Colonel Storke, making a score of forty-one out of a possible fifty.

The Forty-ninth thus carried off the honors of the division match, which is especially notable as being the first time its team had ever shot in competition with any other.

It was represented at the State matches at Creedmoor, September eighteenth and nineteenth, by a team of twelve men, and won the first prize for a score of 390 (with a high wind) out of a possible 600. The prize was presented by the Commander-in-Chief. At this meeting seventeen regiments participated, with teams of twelve men each, making 204 in all. The twelve men making the highest score of the 204 were selected for an inter-state team under Colonel Wingate, General Inspector of Rifle Practice. Of this team of twelve men selected from 204 picked men of seventeen regiments, the Forty-ninth Regiment had the honor of furnishing four members, one-third of the entire team, two of them second and third, respectively, on the list. The Forty-ninth team has practiced under great disadvantages with poor ranges. State targets have now been received and a new range laid out for practice the coming season, when it is hoped it will add new laurels to those already won.

Colonel Storke and Captain Dunning have taken much interest in the rifle practice, and are entitled to great credit for the honorable record of the regiment this year.

I am, General, very respectfully,
Your obedient servant.

WM. G. WISE,

Major and Inspector Twenty-third Brigade, N. G.

Major-General JOHN B. WOODWARD, *Inspector-General, N. G.,
New York.*

HEAD-QUARTERS TWENTY-FOURTH BRIGADE, N. G. S. N. Y., }
OSWEGO, N. Y., *December 18, 1876.* }

Brevet Maj.-Gen. J. B. WOODWARD, *Inspector-General, N. G. S. N. Y. :*

GENERAL.—In compliance with your circular of December 1, 1876, from your office, I have the honor to report the muster and inspection of the several regiments, troop and battery, comprising the Twenty-fourth Brigade, for the year 1876, at the following stations and dates :

Battery of Artillery, at Syracuse, October 18, 1876.

Forty-eighth Regiment, Infantry, at Oswego, October 19, 1876.

Separate Troop, Cavalry, at Oswego, October 19, 1876.

Fifty-first Regiment, Infantry, at Syracuse, October 25, 1876.

The arms, equipments and clothing of the above organizations are all in very good condition. There is marked improvement in drill and military appearance of the cavalry, artillery and Forty-eighth Regiment. I am sorry to make an exception of the Fifty-first Regiment; there is no head to it; and although there seems very good material to make a first-class regiment, it is, in my humble judgment, one of the poorest in the State.

I am General, your obedient servant.

R. C. DAY,

Major and Brigade Inspector.

OFFICE INSPECTOR, TWENTY-FIFTH BRIGADE, }
N. G. S. N. Y., *January 1, 1877.* }

Major-General JNO. B. WOODWARD:

GENERAL.—I have the honor herewith to transmit to you a report of the returns of the annual review and inspection of the Twenty-fifth Brigade, at Rochester, N. Y., on the 5th day of October, 1876, at three o' clock P. M., during a rain which had continued all day.

The men appeared finely and in good condition. Colonel Erbelting's command of artillery are worthy of mention, having improved since the last annual inspection. The equipments and pieces in good order.

The Fifty-fourth Regiment appeared as well as usual. Equipments in good condition. The Separate Troop of Cavalry, Colonel Miller, also appeared well and showed improvement in discipline. General Briggs was in command of the brigade, accompanied by his staff, in full uniform.

The brigade was reviewed by the Inspector-General and General Brinker, commanding Seventh Division, who was accompanied by his staff, in full uniform. Owing to the inclemency of the weather very few evolutions were performed.

I have the honor to be, General, very respectfully,

Your obedient servant.

GEO. HYLAND, JR.,

Brevet Lieutenant-Colonel, Inspector, etc.

OFFICE OF INSPECTOR, TWENTY-EIGHTH BRIGADE, }
ITHACA, N. Y., December 1, 1876. }

Brevet Major-General JOHN B. WOODWARD, *Inspector-General*,
S. N. Y.:

GENERAL. — In compliance with circular, Inspector-General's office, December 1, 1876, I have the honor to make the following report:

The Fiftieth Battalion of Infantry and section of Artillery, Twenty-eighth Brigade, located in Tompkins county, head-quarters at Ithaca, were ordered to parade for review and inspection on Saturday, September ninth, at Sheldrake, in Cayuga county, twenty miles from Ithaca.

The Fiftieth Battalion went into camp at that place on the eighth of September and remained until the twelfth. The review and inspection took place on the ninth, as ordered. The review was conducted by Brigadier-General Chas. F. Blood, commanding brigade, accompanied by his staff. At inspection, the arms, equipments and clothing were found to be in good order, but the number present was small. One cause of the slimness in attendance was the idea entertained by many that they could not be ordered out of the brigade district, and consequently would not be subject to fines; another reason was that the men did not feel able or willing to lose their time and furnish their own rations and receive nothing in return. Owing to the inclemency of the weather and the time taken up by rifle practice and review and inspection, but little was accomplished in company and battalion drill. The order for the inspection of the section of artillery was not promulgated by the Lieutenant commanding, and the section has not been inspected. All the companies in the Fiftieth Battalion have armories, and the arms appear to be well cared for.

The Forty-fourth Battalion of Infantry and Battery A, Twenty-eighth Brigade, located in Broome county, head-quarters Binghamton, and the First Separate Company of Infantry, Twenty-eighth Brigade, head-quarters Oneonta, Otsego county, were ordered to parade for review and inspection, at Binghamton, on the 11th of October, 1876. The troops present were reviewed by Brigadier-General Chas. F. Blood, accompanied by his staff. The general appearance and marching of the men was an improvement on that of last year. The Forty-fourth labors under the disadvantage of having no armories or drill-rooms, and during the summer has had no nominal head, the

Lieutenant-Colonel commanding having sent in his resignation last spring and the Major being absent from the place.

I have tried for years to have the Colonel or Captains disencumber their rolls of the many names that are always marked absent at muster, but, as yet, without success. The arms and equipments were in good order.

The battery paraded mounted and made a fine appearance. I can report a marked improvement since last inspection.

The First Separate Company from Oneonta traveled sixty-four miles to reach the place of muster, paraded ninety officers and men, and made a splendid appearance. Their marching was excellent, and in their manual and all their movements they showed careful drill. Their uniforms, arms and equipments were in perfect order.

In conclusion, General, allow me to say that the want of remuneration to the men for the time and expense they are to in performing the duties required of them, is one great cause of the decline in attendance and the little interest manifested. The appropriations to the regimental and uniform funds are ample to meet all the requirements, and were a per diem allowance allowed to the men, enough to meet their expenses, there would be no difficulty in having an encampment of four or five days every year, and it is only in encampments that the country organizations, scattered as they are, can be advanced in discipline and drill. The military organization of the State should be supported by the State, and it does not seem fair that a county should be taxed to furnish armories and drill-rooms, and its enrolled citizens give their time and money to keep up their organizations, while adjoining counties, equally benefited, are at no expense whatever.

Accompanying this please find report of the strength, present and absent, of the various organizations comprising the Twenty-eighth Brigade.

I am, General, very respectfully,
Your obedient servant.

K. S. VAN VOORHEES,
Brevet Colonel and Inspector, Twenty-eighth Brigade.

HEAD-QUARTERS THIRTY-FIRST BRIGADE,
EIGHTH DIVISION, NATIONAL GUARD,
474 MAIN STREET, BUFFALO, *December 12, 1876.* }

GENERAL. — In compliance with your circular dated November twenty-second, I have the honor to submit the following report:

SEVENTY-FOURTH REGIMENT, INFANTRY.

This command during the past year has had the great misfortune to be without its superior officer, Col. Evans, having been confined to his house the greater part of the past season, but at great personal sacrifice has attended all the principal reviews and parades, thus showing more than ordinary interest in the welfare of his command; but the fact of his long-continued absence from drills, officers' meetings, etc., has had a very bad effect.

The regiment has fine officers, and is well calculated to make a fine organization.

There has been great interest displayed in the regiment during the season of rifle practice, company and individual scores averaging very fair.

The regiment has made during the year seven battalion and wing drills, and four parades.

The regiment is located in its own armory, county property, it being the largest drill room in the city; it has fine, commodious quarters, and is in every way admirably situated.

SIXTY-FIFTH REGIMENT, INFANTRY.

This command is located at the State arsenal, in which there is a fine drill-room. The entire building is well heated, and has, in every case, fine company quarters; also commodious regimental headquarters; there is inclosed gun racks for rifles, and all State property is well protected.

The regiment has made during the past season previous to July thirty-first, fourteen battalion and wing drills and seven parades.

With few exceptions the line officers are fully competent for their respective positions. There has been in some of the companies some active recruiting during the past three months. Their last battalion drill showing a marked improvement over previous drills, and from indications it is the commencement of a new life in the regiment.

BATTERY A, LIGHT ARTILLERY, THIRTY-FIRST BRIGADE.

This command is located at the State arsenal, having fine company quarters and store room, and are well provided in all respects, recent improvements placing them where they justly deserve. This command has, in its commandant, one of the best drilled officers in the brigade, who has so infused his own interest in his command that it ranks second to none. Company drills are well attended. Its Captain has the misfortune, at present, to be without active subordinate officers, thus entailing upon himself the entire duties of his command.

The discipline of the battery is excellent, and the proficiency in drill, mounted and dismounted, at which they have arrived, reflects great credit on Capt. Linderman. It has made during the season, previous to muster, forty-one company drills and parades, thirty-one company drills and ten parades.

FIRST SEPARATE COMPANY, INFANTRY.

This command is located at Jamestown. The entire organization is composed of Swedes, and are well drilled in company movements. They had the misfortune, early in the season, to be burned out, without loss, however, of any State property, and have been unable since to secure suitable quarters, the board of supervisors seeming desirous to do no more than they are compelled. As a result, it is only owing to the capable officer in command and the great interest displayed by the entire organization, that the company has not been completely demoralized. The company has had one field day and five parades during the year.

SECOND SEPARATE COMPANY, INFANTRY.

This command is located at Ellicottville. Previous to muster it had made four parades and two drills. Its officers are old army officers, and with the material the company is composed, it is calculated to make a fine organization. They have very contracted quarters for so large a company, having a full complement, but there is a good arrangement for the protection of all State property.

THIRD SEPARATE COMPANY, INFANTRY.

This command is located at Westfield; has good company quarters, gun racks, etc., well arranged, with large drill room. The members are somewhat scattered, but the average attendance to company drills shows conclusively the interest taken by them in the success of the

company. The commandant is well fitted for his position and receives good support from his subordinate officers. Previous to muster, the company had made ten company parades and drills. There is a fine band enlisted in the company.

FOURTH SEPARATE COMPANY, INFANTRY.

This command is located at Warsaw ; it has a full complement of men ; the officers are well fitted for their respective positions, and the company is composed of a very intelligent body of men. This is a new organization, but it has arrived at great proficiency in drill, all its members displaying great interest in all matters pertaining to the success of the company, it being the only one of the separate companies who competed for the State prize. It has good, commodious quarters. Previous to muster it had made ten parades and company drills.

FIFTH SEPARATE COMPANY, INFANTRY

is located at Batavia. The board of supervisors are, at present, constructing suitable quarters for this large command, it numbering a full complement. It has made, since its organization, seven company drills and parades, average attendance being very large. There is every indication of this company becoming one of the best in the brigade.

SIXTH SEPARATE COMPANY, INFANTRY

is located at Lockport, and, thanks to its commandant, has most excellent quarters, large drill room, dressing room, with inclosed gun-case, and officers' quarters. It has a full complement and applicants enough to form a battalion. It is a fine organization throughout. Owing to delay in their arms arriving, they had but two parades previous to muster. I must confess my gratification of the proficiency of drill and thorough discipline displayed by this command, which is destined to become the crack company of the brigade. It has enlisted as privates a fine band of fourteen pieces.

The experiment of forming separate companies in this district has proven a perfect success. With one exception, it has secured the encouragement and assistance of the local authorities, and cannot fail to prove beneficial to the brigade. Allow the suggestion that they ought to be provided with overcoats.

The brigade, under command of Brigadier-General William F. Rogers, has made, during the past year, three parades. The General

attended on all occasions, by staff, armed and equipped as required by law.

The reason of the inspection and muster of the commands situated in the city occurring at so early a date, July thirty-first, is from the fact of invariably selecting a stormy day by delaying the date later. I have inclosed my report to Adjutant-General Franklin Townsend, to which I respectfully refer you for additional information. I also inclose completed blanks, as per letter of instructions, November twenty-second.

I have the honor to be your obedient servant.

JOHN A. HOLLOWAY,

Major and Inspector, Thirty-first Brigade.

To Brev. Maj.-Gen. JOHN B. WOODWARD, *Inspector-General, S. N. Y.*

REPORT OF GENERAL INSPECTOR OF RIFLE PRACTICE.

STATE OF NEW YORK:

INSPECTOR-GENERAL'S OFFICE,
OFFICE OF GENERAL INSPECTOR OF RIFLE PRACTICE, }
208 BROADWAY, NEW YORK, Dec. 30, 1876.

GENERAL. — The rifle practice of the National Guard during the past year has been chiefly remarkable for the increased interest displayed by the interior divisions, the number and character of the rifle ranges that have been established throughout the State, and the good order and discipline displayed by the troops using them.

RIFLE RANGES.

Up to 1874 Creedmoor was the only range in the State of New York used officially by the National Guard, and that was only opened for practice in 1873. In 1874 ranges were established at Mount Vernon, Westchester county, and at Oswego, and in 1875 at Poughkeepsie, Yonkers, Newburgh and Rochester. To these have been added, during 1876, ranges at Buffalo, Elmira, Auburn, Watertown, Binghamton, Ithaca. Others are contemplated at Albany and several other points. The following is a brief description of the official ranges now in use throughout the State, which do not include a large number of private ranges, in regard to which no information has been received.

Those at Syracuse, Oswego, Auburn, Ithaca, Rochester and Buffalo were personally inspected by me in July, and that at Poughkeepsie during November last.

Creedmoor, the range used by the First and Second Divisions, comprising about half the military force of the State, is situated on Long Island, twelve miles from Hunter's Point. It is a perfectly level plain of eighty acres, has thirty targets beside a "running deer," and is considered one of the best equipped and handsomest ranges in the world. By a contract entered into between the Adjutant-General and the National Rifle Association (who own it), the National Guard are allowed the use of fifteen targets and markers on three days in each week, from April to November first, for which the State pays \$4,000 a year. The State has also issued forty-six target slabs to the range during the past year, to replace those worn out by the practice of the troops during the last three years.

The State prize is shot for on this range by teams from nearly all the regiments of the National Guard. Some twenty teams and nine or ten rifle clubs being camped upon the ground during the fall matches of the National Association, the State issuing tents for that purpose. During the past season this range has been used by over 8,000 troops, practicing under orders. In addition, a large number have visited it for individual practice, the total number being at least 12,000.

The barriers behind the targets are artificial, that in the rear of the main line of targets (twenty in number), being an earthen embankment twenty-two feet high and 570 feet long, surmounted by a double fence fifteen feet high, and filled with stone; those behind the other targets being double fences twenty-five and thirty feet high, respectively, and filled in like manner.

The only range in the Fourth Division is one at Watertown, recently established by the Thirty-fifth Battalion. It has two targets, placed twenty feet apart, and arranged on the Creedmoor plan, which can be used up to 600 yards, the line of fire being east by north. A natural embankment extends in rear of the targets. This range has received six iron target slabs from the State.

The main range of the Fifth Division is at Poughkeepsie, about a mile east of the city limits. It consists of an undulating field of about 100 acres, which is leased by the Fifth Division Rifle Association, at an annual rental of \$300. A single butt is erected on the Creedmoor plan, ninety feet long, arranged for five targets, all of

which may be used up to 1,000 yards. The range is in good working order, although it would be improved by either leveling or filling in a portion of it at the 500 yard firing points, or by erecting a few firing platforms. It has received \$500 and twelve iron target-slabs from the State, and is used by the Twentieth and Twenty-first Regiments, as well as for the competitions for the prize offered by the State to the division.

The range at Yonkers is known as Morsemere, and is used mainly by the Sixteenth Battalion. It has eight wooden targets, available up to 500 yards, as well as a "moving man" target. It has a telegraph to the marker's butts, tents at the firing points, fitted up with stoves, etc. (so as to allow of practice during cold weather), and is in good order. It has received \$500 from the State.

The range at Mount Vernon is known as Glendrake. It is managed by the American Rifle Association, and is mainly used by the Twenty-seventh Regiment. This organization spent a week in camp on this range in June last, with most satisfactory results. The range contains sixty-four acres, including a plain of twenty-four acres, used as a parade and camping ground. The targets are wooden frames, covered with canvass, and work like a window-sash, being lowered after each shot, and the shot-hole pasted over with a paper seal. There are three pits, each containing one second and one third-class target, which can be used up to 600 yards, the line of fire being from west to east. The pits are walled, ditched, covered, and connected by speaking-tubes, and a telegraph is stretched from each pit to each firing point.

The principal range of the Sixth Division is situated on the Central railroad, six miles from Syracuse. It has been constructed by the Sixth Division Rifle Association, who lease the ground. It contains fifty acres, and has four targets, each of which can be used up to 1,000 yards, and more can be erected if desired. The ground being flat, an artificial embankment, thirty-five feet high, has been erected to arrest the bullets.

This range has received \$1,500 and twelve target-slabs from the State, and is in good order. Besides the division matches, this range is used for practice by the Fifty-first Regiment and by the Separate Troop of Cavalry.

In addition, the Forty-eighth Regiment of this division has a good and very accessible range on the government grounds at Oswego, on which three targets are erected; one for short range, one for 500

yards, and one for 600 yards practice. They have received no aid from the State, except the loan of seven target-slabs, two of which are used by one of the companies at Hannibal.

The Forty-fourth Battalion of this division have a range two miles east of Binghamton, about twenty-five yards wide by 700 long, a hill in the rear serving as a barrier. They use board and cloth targets. They have received no aid from the State.

The Forty-ninth Regiment of this division have a range on the fair grounds, at Auburn, on which they practice up to 400 yards, and can, when desired, practice at 500, and they have received five target slabs from the State.

This range has been only recently completed, the regiment having previously shot on a temporary range on the outskirts of the town, and under considerable disadvantages, notwithstanding which they have acquired such skill as to have borne off the State prize at the last competition, for which Colonel Storke is entitled to commendation.

A range has also been established on the fair grounds at Ithaca, which is used by the Fiftieth Battalion. It has two targets, and can be used up to about 400 yards. It has received eight target slabs from the State.

The first Separate Company of the Twenty-eighth Brigade, of this division, have a range at Oneonta, which has received two target slabs from the State.

The main range of the Seventh Division is at Rochester, on the Genesee river, and about four miles from the city, and contains about sixty acres, leased by the Seventh Division Rifle Association. The targets are placed at the north end, where a sand hill, seventy feet high, forms a natural barrier. One butt is erected 185 feet long, on the Creedmoor system, on which five iron targets are erected, which can all be used up to 600 yards. In addition, there is a wooden target for long range practice which can be used up to 1,000 yards. This range is fenced, has a number of horse sheds and other buildings, and is complete in all respects. It has cost about \$14,000, and has received from the State \$1,500 and eight target slabs. Its present improved condition may be mainly ascribed to the energy and zeal displayed by the Division Commander, Major-General Henry Brinker. Besides the division matches this range is used by the Fifty-fourth Regiment, two batteries of artillery, and the Separate Troop of Cavalry, Twenty-fifth Brigade. The One Hundred and Tenth Battalion, of this division, have a range in process of construc-

tion, about two miles north of Elmira, which will permit of practice up to 500 yards. They have received no aid from the State.

The Eighth Division have a very complete range at Bay View, on the lake, and about eight miles from the city, containing sixty acres which have been made perfectly level. It has two artificial embankments thirty-five feet high, and shot proof; one being arranged for short and mid-range practice, and one for long range. The former has six targets, but will accommodate eight; the latter is arranged for three targets, but will accommodate more. The grounds are fenced and in good order. They have cost about \$15,000. The aid granted by the State has been \$1,500, and the loan of fourteen target slabs. This range which has only recently been completed is used by the Sixty-fifth and Seventy-fourth Regiments, and one or two separate companies. These ranges are controlled either by rifle associations organized under chapter 368, Laws of 1865, or directly by the organization of the National Guard using them. In the former case the different associations are required (chap. 288, Laws of 1874) to constitute the General Inspector of Rifle Practice, the Brigadier-General, and the Division Inspectors of Rifle Practice of the district in which they are located *ex officio* directors of their association before receiving any aid from the State, and the Brigadier-General of such district is authorized to direct their use at any time by the troops of his command without compensation. The Inspector-General, Chief of Ordnance and the Major-Generals commanding the First and Second Divisions are also, by law, constituted *ex officio* members of the National Rifle Association.

The aid granted to the different ranges by the State is fixed by the Adjutant-General, and has varied in accordance with the needs of the National Guard in the different military districts. As a rule, \$1,500 has been allowed to each division district for the purpose of fitting up and maintaining its ranges, the amount being reduced whenever practicable. Iron targets are freely issued, which remain the property of the State, bonds being given for their custody and return, if required.

In aiding the different ranges the endeavor has been to help only those localities where the interest taken has been sufficiently active to induce the formation of a rifle association, and the establishment of a range, so as to insure the best results. The policy has also been to encourage purely military shooting with military weapons, and a general instruction of the rank and file, as distin-

guished from the development of a few expert marksmen at extremely long ranges.

The tendency in laying out and constructing rifle ranges has been to make them upon too large and costly a scale. This should be checked in the future. From 500 to 600 yards is the utmost distance that is required for military practice. To obtain a larger range than this is difficult and expensive, and the number who desire to shoot at greater distances is always small. Neither is it necessary that they should be exactly level, as inequalities of the ground can be overcome by the erection of firing platforms, at a slight expense. Accessibility is of the greatest importance, and is too apt to be disregarded from an erroneous idea of the necessity of having a 1,000 yards range. If a range is not convenient it will never become popular, nor will it be likely to have many good shots. If land is high the right to shoot over it on certain days can generally be secured at a moderate expense, which, in most cases, will be sufficient when the number to practice is not large.

IMPROVEMENT IN MARKSMANSHIP.

The skill displayed by the troops in their practice during the last year has been in proportion to the care that has been devoted to their instruction in their armories during the drill season.

In those organizations where the commanding officer is interested in the subject, and the company officers have been careful and thorough in the instruction of their commands in "aiming" and "position drill," and in assisting them upon the range, the improvement has been marked. In those where but little attention has been paid to the matter by these officers the improvement depends mainly upon the individual interest which may happen to exist, and is frequently but little changed from last year. The aggregate number of men of whose practice I have received reports was 10,687, as against 7,670 in 1875. Of these 5,266, or about fifty per cent, qualified in the third class (at 100 and 150 yards), as against 3,285 in 1875; of these 2,881, or about fifty-five per cent, qualified in the second class, at 300 and 400 yards, as against 862 in 1875, *a gain of 850 per cent.* The total number reported as qualifying as marksmen was 907 (as against 533 in 1875), being 8.48 per cent of those shooting.

Some reports, however, are delayed, but the result, I think, would be to increase these per centages.

For the purpose of securing a method of comparison in regard to

the shooting of the different organizations, a calculation is annually made known as their figure of merit. This is obtained by adding together the average points made in the third class (which gives the average skill of the entire rank and file), the per centage of marksmen (which gives the proportion of skilled shots), and the excess which the per centage of first-class shots may bear to that of the third class (which shows the extent to which the regiment has improved).

The following is a tabular statement of the comparative shooting of each regiment, troop or battery, in the National Guard, from which returns have been received, and which establishes their relative efficiency in marksmanship, for the year ending December 1, 1876:

INFANTRY.

Order of merit.	REGIMENT.	Number present for practice.	Number present last inspection.	Average points in third class.	MARKSMEN.		1st CLASS SHOTS.		2d CLASS SHOTS.		3d CLASS SHOTS.		Figure of merit.

The following table shows the comparison between the rifle practice of 1876 and 1876, it being recollected that a *decrease* in the number of third-class shots indicates an improvement in skill:

Order.	REGIMENT.	NO. PRESENT FOR PRACTICE.		AV'G POINTS IN THIRD CLASS.		PER CENTAGE MARKSMEN.		PER CENTAGE 1ST CLASS SHOTS.		PER CENTAGE 2D CLASS SHOTS.		PER CENTAGE 3D CLASS SHOTS.		FIGURE OF MERIT.	
		Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.
1	Washington Greys.....	23		2.17		24.17		10.16		8.27		31.45		36.45	
2	Twelfth.....	67		2.29		1.94		22.69		23.97				24.43	
3	Sixteenth battalion.....	67		13.50		0		.8		12				11.25	
4	Seventy-first.....	209			1.04	11.47		10.63		16.63		28.19		10.44	
5	Twenty-third.....	199		2.39		6.02		3.01		4.83		27.26		8.41	
6	Seventh.....	118		.86		5.13		11.73						6.01	
7	Thirty-second.....	173		1.54			3.46		4.04					6.0	
8	Sixty-ninth.....	305			.81	5.23		12.51		43.50				8.27	
9	Twenty-second.....	216		.66		3.79		10.39				23.93		8.84	
10	Fourteenth.....	72			.08	2.51		1.21				13.56		3.78	
11	Ninth.....	353		2.53		2.53		23.55		23.30				2.84	
12	Fifth.....		9	2.53		.91		9.78				13.56		3.50	
13	Thirteenth.....	116		1.53						3.41		21.02		2.72	
14	Forty-seventh.....		54	4.15		3.97		31		23.31		1.50		2.23	
15	Eleventh.....	400						35.14				14.14		1.18	
16	Fifteenth battalion.....	150			3.71	3.27		8.66				9.31		.16	
17	Eighth.....	73		2.36		.96		10.93				3.29			
18	Separate troop, fifth brigade.....	83		1.11		.6		18.64							1.28
19	Separate troop, eleventh brigade.....	16		1.54				2.56				2.57			1.94

These figures show an average improvement in the "*figure of merit*," of the infantry regiments of the First and Second Divisions, of 5.02, which is equivalent to a gain of 18.17 per cent.

In the Second Division, the close of the season finds but .33 per cent of those practicing remaining in the third class as against more than .50 per cent remaining in that class December, 1875. In the First Division there are but .36 per cent of those practicing remaining in the third class against over .60 per cent in 1875. These per centages demonstrate the progress that is being made towards attaining the desired object, the general instruction of the entire rank and file.

The returns of 1875 were not sufficiently full to enable an accurate comparison to be made in regard to the other divisions, but I think that the general per centage of improvement even higher than this.

The Twelfth Infantry and the Washington Grey Troop of Cavalry, who, respectively, lead the lists of infantry and cavalry, have the honor of being the first organizations in the State who have a larger number of first-class shots than third-class.

They owe their success to the interest taken by their officers in rifle practice and the thoroughness in which the men have been instructed in their armories during the drill season. They have both adopted a system of competition armory practice during the past drill season, which has excited much interest among their members, and which the result proves could be imitated with advantage by other organizations.

The Eighth, although the only regiment showing a decrease in their "*figure of merit*," yet stands second in the list. They have received a number of recruits during the past season, whose average points in the third-class practice have been slightly less than last year, reducing their average 2.26. In other respects they have gained, their falling off in all being but 1.28.

Special credit is due to the larger regiments, such as the Seventh, Ninth and Twenty-third, for the improvement they have shown, the difficulty of bestowing careful individual instruction increasing with the strength of the regiment.

Each competitor qualifying as a marksman receives from the State a badge which he is allowed to retain so long as he annually qualifies for it. Those first issued consisted of crossed rifles, surmounted by the word "marksman," embroidered on cloth, and were worn on the left forearm. These not proving durable, by directions of the Adjutant-

General, I have designed a bronze medal as a substitute. This will give more satisfaction to those winning it, and its durability will make it more economical to the State. The names and scores of the marksmen qualifying during the year are hereto annexed. The names of those who qualified in 1875 are italicized. A comparison with the returns of that year will show that but few who are still in the National Guard have failed to requalify.

Those who qualify as marksmen in the beginning of the season are excused from further practice; but to prevent the figure of merit of their regiment from being impaired by their absence, they are allowed to credit them as making twenty-five points each in third-class practice.

Experience has shown that this is too low, and I think that hereafter thirty-five points should be allowed for each marksman who qualifies without shooting in the third class.

The general improvement in marksmanship would have been somewhat greater if the sub-caliber rifles ordered in August, 1875, for armory practice, had been delivered by the contractor in time for use during the drill season of 1875. From some difficulty in their manufacture but twenty have been delivered which corresponded with the sample. These are now distributed as follows, viz.: Two to the Fifth, Eighth, Ninth, Eleventh, Thirteenth, Nineteenth, Twenty-third, Forty-seventh, Fifty-fourth Regiments, and One Hundred and Tenth Battalion. A few of these are inaccurate from want of care in the manufacture. The others shoot well.

The improvement shown by the regiments of the interior has been marked. They find in rifle practice the first opportunity afforded them of measuring themselves against the "crack" organizations of the cities and to obtain a reputation beyond their immediate locality. Their ranges are also more accessible, the business of their members less engrossing, and consequently their opportunities for practice are greater than those who belong to the First or Second Divisions, and the result cannot but be that they will, as a whole, eventually display a higher average standard of marksmanship.

Rifle practice has also been found beneficial in other respects, both in the cities and country districts. The emulation excited in the different matches, and the reputation which attaches to a successful rifleman lends an incentive which not only increases the skill of the rank and file, but is of great service to the National Guard by inducing the enlistment of many who would not otherwise have

become interested in it, and in stimulating local pride in the different organizations. At the same time, while recognizing the importance of this branch of military instruction, care must be taken not to require the expenditure of too much time from the troops, nor to make the practice burdensome upon either men or officers.

INSPECTORS OF RIFLE PRACTICE.

The various Division, Brigade and Regimental Inspectors of Rifle Practice have been uniformly selected by their commanding officers from their familiarity with their duties, and with few exceptions are zealous and efficient officers. I would respectfully call attention to their reports, which are hereto annexed (particularly to that of Major Cowperthwait, First Brigade), and desire to express my obligations to them for the assistance I have received at their hands. I have to regret the loss, through promotion, of Major D. D. Wylie, Inspector of Rifle Practice, Third Brigade. From the comparative novelty of the system, the duties of Inspectors of Rifle Practice during the past year have been extremely onerous. This will be less so in the future, as the company officers become more familiar with this branch of military instruction, and realize that they themselves and not their regimental Inspector of Rifle Practice are the proper instructors of their commands in shooting as in every other portion of their drill, and are responsible for its being properly performed, and that the inspectors' duties are merely supervising. Regimental commanders, however, should be careful to see that the company officers are instructed in this branch of their duties, so as to qualify them to instruct those under their command. An important step in this direction has been taken by Brig.-Gen. Wm. G. Ward, commanding the First Brigade, in requiring officers appearing before the Brigade Examining Board to pass an examination in respect to those portions of the Manual of Rifle Practice, in which they would be required to act as instructors if commissioned. It is hoped that this course will be adopted in other brigades.

Every endeavor has been made throughout the practice of the year to impress upon both officers and men that the main object of a rifle range is "to test what has been taught," and that the rank and file of the National Guard can and should acquire a knowledge of the proper method of using the weapons with which they are armed by careful instruction in "aiming and position drill" in their armories during the drill season and not during the limited time they are able to spend in practicing upon the range.

PRACTICE AT CREEDMOOR.

Prior to April 25, 1876, I prepared a plan for the practice of the First and Second Divisions at Creedmoor during the season, dividing the days available for that purpose proportionately between them. On that day I forwarded a copy of this plan to the Major-Generals commanding these divisions in a letter in which I requested they should consider them as suggestions merely, and that they should not interfere with their making any other arrangements for the practice of their commands on the day assigned them which they might consider preferable. No change was made, however, by either commander in the plan suggested by me. This was substantially the same as was pursued last year, the troops being sent by brigades, the third class in detachments of three companies from each regiment (increased from two last year), and the second class by wings, each detachment being commanded by a brigade officer of the day, and the practice transportation and issue of ammunition being under the direction of the Brigade Inspector of Rifle Practice.

The advantage of this system is that the small detachments permit the various regimental Inspectors of Rifle Practice a greater opportunity for supervision and instruction than if the number were greater. That the control exercised by the brigade officers insures a uniformity of discipline and practice, which is important to maintain, and which the experience of 1874 has shown cannot always be expected from regiments having a low standard of discipline when sent alone, and that it places each regiment of the brigade on an equal footing in respect to the weather. This view is taken by a number of officers, including Brigadier-Generals Ward and Vilmar. On the other hand, the officers of some of the best regiments claim that it interferes with their "*esprit du corps*," that they could secure a large attendance and more satisfactory results if they were allowed to practice as a regiment, and that it is unjust to compel them to practice by detachments, because others have a low standard of discipline; and these views are shared by several brigade commanders.

The views of the Brigade Inspectors of Rifle Practice of the First and Second Divisions, as expressed at a conference, called by me, on June 22, 1876, being that it would be advantageous to try the experiment, and the officers of the Third Brigade being anxious that it should be done, I addressed a letter on June 27, 1876, to the Inspectors of Rifle Practice of the First and Second Divisions, suggesting that, in the practice by the second class, then about to commence,

the troops should be sent to Creedmoor by regiments, or in such manner as the various brigade commanders should deem best fitted to improve the rifle practice and make it popular, provided that the division commanders should consider it judicious to do so. As the change thus requested was not made in either division, I presume their commanders considered it was not advisable. I regret, however, that the experiment was not tried, as I feel satisfied that the results would have been beneficial. I think it for the best interests of the National Guard, under the circumstances, that hereafter the practice of Creedmoor should be by regiments, whenever so desired by the various brigade commanders, the necessary markers being detailed from another regiment from that shooting, and the general practice being supervised by the Brigade Inspector of Rifle Practice, as at present.

I also think it important that the number of targets placed at the disposal of the National Guard at Creedmoor should be increased from fifteen to twenty or twenty-five. The additional expense would be but slight, and be inconsiderable in comparison with the benefits which would result from the saving of time, and the opportunity afforded for more thorough instruction. At present, when the number on the range has been large, the Inspectors have been obliged, in order to get through in time, to hurry the men too much. Since the completion of the ten new targets the National Rifle Association have allowed the troops to use more than the fifteen targets to which they were entitled and for which the State paid, where they would provide the additional markers, and it has been done in many instances with beneficial results. So long as the National Guard are kept occupied upon a rifle range, and feel that they are learning something, they are interested and anxious to excel, and do not begrudge the two days a year they are required to spend there. On the other hand, when they are obliged to wait the greater part of the day for an opportunity to hurriedly fire a few shots, without supervision or instruction, they naturally feel as if they were wasting their time.

Although the instruction upon the range must necessarily be limited, I think that several aiming tripods should be kept at Creedmoor, to be used by those waiting for their turn to fire. The time could also be used to advantage in teaching those awaiting their turns to shoot to estimate distances, a most important part of rifle shooting, and one which is indispensable to the soldier in the field. I would also deem it wise that prizes should be offered to encourage the men

to take an interest in learning to be correct judges of distances, and that in time it should be required as a qualification for the marksman's badge.

The rifle practice of the First and Second Divisions during the past year has been as follows: One day in May was devoted to a competition for the marksman's badge (five shots standing at 200 yards, and a like number lying at 500 yards), by those in each division who were qualified in 1875 as marksmen, or were certified by the various Inspectors of Rifle Practice to be sufficiently skilled to render it unnecessary for them to shoot through the class firing. All who made twenty-five points (out of a possible fifty) became marksmen, and were exempt from further practice during the year. Each company was required to devote one day to third-class shooting (100 and 150 yards standing, five shots each distance), those making twenty-five points (out of fifty) shooting on the same day in the second class (300 yards kneeling and 400 yards lying, five shots at each distance). Those who failed to qualify at 100 and 150 yards were required to repeat the practice on another day later in the season. Those who did, shot on a subsequent day in the second class, and also on a later day, for the marksman's badge, if they succeeded in qualifying in that class. The number competing for the marksman's badge being small, and those qualifying being exempt from further practice, the time required from each man was thus practically reduced to two days, with the exception of the few who did not succeed until their second visit in qualifying in the third class, and also failing on that day to qualify in the second class, were sent with the latter on their final practice. In addition, Inspectors of Rifle Practice were authorized (with the approval of their commanding officers) to allow the official score in any match of a recognized rifle association made at the proper distances, and with the regulation rifle and ammunition, as a qualification for the marksman's badge, and a number who failed to qualify in the regular practice availed themselves of this privilege. The same general system was prescribed for the other divisions. This system of practice announced in my circular No. 3, April 22, 1876, contemplated that those members of the third class who were such poor shots as to be unable to qualify at 100 and 150 yards should practice over again at those distances upon the same day, it being supposed that the ten new targets then in course of erection at Creedmoor would be finished in time to be available for that purpose. Those, however, were not completed

until August 8, 1876, when the practice of the troops was half finished. The method recommended was followed in the First Division after that date, but not in the Second Division.

As the experience obtained in the first practice enables a large proportion of those who failed to qualify to do so upon a second attempt, if made on the same day (as will be noticed particularly in the report of the First Brigade, who were careful to follow this system), it is a matter of regret that it was not more extensively followed.

When it is not done the men who fail to qualify, numbering from forty to fifty per cent of the detachment, are kept idle. If discipline is enforced, they are discontented. If not, they are apt to become disorderly. In order to make rifle practice attractive, it is necessary that when men are taken to the range they should be kept shooting; for if they spend an entire day, and are allowed to fire only ten shots, they feel as if they had wasted their time.

Moreover, the great object to be kept in view is, not the training of a few skilled marksmen, but the instruction of the entire rank and file so as to enable all to have a fair degree of skill with their rifles, and those men who fail to qualify on the first trial are precisely the ones in regard to whose instruction the most attention should be paid.

DISCIPLINE.

The discipline and order displayed by the troops practicing at Creedmoor has been unexceptionable. But one serious breach of discipline occurred, that of Capt. Max Ebler, commanding Company G, Fifth Regiment, who, having become intoxicated, relieved a sentry without authority and refused to obey his superior officers. For this he was placed under arrest, his insignia of rank taken from him, and he was expelled from the range. Subsequently, having been convicted by a brigade court-martial of "drunkenness on duty, insubordinate conduct, to the prejudice of good order and military discipline, and disobedience of orders," he was dishonorably cashiered and incapacitated from holding any military commission, and in addition was fined \$100, which sentence has been confirmed by the Commander-in-Chief. The behavior of the troops upon the other ranges has also been good, as far as reported to me.

STATE RIFLE MATCHES.

The annual competition for the State prize took place at Creedmoor on September 19, 1876, and was participated in by teams of twelve

from seventeen regiments. The following are the aggregate scores made by the different teams, the detailed being hereto annexed marked :

	300 yds.	500 yds.	Total
Forty-eighth Regiment, Oswego.....	209	198	407
Forty-ninth Regiment, Auburn	200	190	390
Eighth Regiment, New York.....	200	189	389
Seventh Regiment, New York.....	218	163	381
Seventy-first Regiment, New York.....	204	152	356
Twelfth Regiment, New York.....	204	144	348
Fourteenth Regiment, Brooklyn	199	147	346
Twenty-third Regiment, Brooklyn	203	142	345
Ninth Regiment, New York.....	190	136	326
Forty-fourth Battalion, Binghamton.....	190	134	324
Forty-seventh Regiment, Brooklyn	197	123	320
Thirteenth Regiment, Brooklyn.....	194	120	314
Thirty-second Regiment, Brooklyn.....	200	103	303
Twenty-second Regiment, New York.....	177	122	299
Twenty-first Regiment, Poughkeepsie	187	109	296
Sixty-ninth Regiment, New York.....	175	84	259
Twenty-eighth Battalion, Brooklyn.....	160	66	226

The team from the Forty-eighth Regiment, Oswego, made the highest score (407 points). A protest was, however, entered by the Seventh Regiment against their being awarded the prize, on the ground that they had filed the sights of their rifles, the rules of the National Rifle Association, under which the match was shot, stating that "filing the sights or using them in any other way than as issued is prohibited."

This protest was sustained by the executive committee of that association after hearing the evidence, and their scores rejected. Additional evidence having been submitted by the Forty-eighth to prove that their sights had not been filed, the matter was reopened by the executive committee, and referred to the directors of the National Rifle Association for decision. This board, after having given notice to all the parties concerned, heard the case upon sworn testimony on November 23, 1876, sitting from 8 P. M. to 2 A. M., and by a unanimous vote sustained the protest.

This case is the first that has arisen in the State where a team has been accused of altering their pieces. It has excited much ill-feeling,

and it is to be regretted that it ever occurred. As you yourself were a member of the board that heard the testimony, it is unnecessary that I should comment upon it further than to express the hope that nothing of the kind will happen hereafter.

CAVALRY MATCH.

The competition for the prize offered by the State to the cavalry, took place at Creedmoor on September 19, 1876, open to teams of five from each troop of cavalry in the State, using carbines, five shots, 200 yards, and was competed for by thirteen teams.

The following is a summary of the scores :

Yates Dragoons, Syracuse.....	118
Washington Greys, New York.....	99
Separate Troop, Fifth Brigade, Brooklyn.....	95
Troop F, Third Cavalry, New York.....	90
Troop K, Third Cavalry, New York.....	89
Troop H, Third Cavalry, New York.....	78
Troop D, Third Cavalry, New York.....	75
Troop G, Third Cavalry, New York.....	72
Gatling Battery, Eleventh Brigade, Brooklyn.....	72
Separate Troop, First Division, New York.....	71
Separate Troop, Twenty-fourth Brigade, Oswego.....	63
Separate Troop, Eleventh Brigade, Brooklyn.....	59

Troop B, Third Cavalry, New York, retired.

DIVISION MATCHES.

The matches for the prizes offered by the State to the several divisions took place as follows :

The First Division match was shot at Creedmoor, on September 19, 1876, by teams of twelve from each regiment, at 200 and 500 yards, five shots at each distance. The following is a summary of the scores :

Regiment.	200 yds.	500 yds.	Total.
Seventy-first	224	199	423
Seventh	220	189	409
Eighth	202	204	406
Twelfth	196	198	394
Twenty-second	178	158	336
Ninth	191	133	324
Sixty-ninth	189	108	297

The Second Division match was shot at the same time and place, and upon the same conditions. The following is a summary of the scores:

Regiment.	200 yds.	500 yds.	Total.
Twenty-third.....	212	166	378
Fourteenth	190	162	352
Thirty-second	186	142	328
Forty-seventh	190	119	309
Thirteenth	176	129	305
Twenty-eighth Battalion.....	157	71	228

In all the foregoing matches the wind was more unfavorable than was the case last year, and the scores are slightly lower.

There was no match for the State prize in either the Third or Fourth Divisions, for want of a range.

The Fifth Division prize was shot for at Poughkeepsie, October 25, 1876, on the following conditions: Open to teams of twelve from each regiment; distances, 200 yards standing, 400 kneeling, 500 lying, five shots each distance.

The following is a summary of the scores:

Twenty-first Regiment team.....	543
Sixteenth Battalion team.....	417
Twentieth Battalion team.....	372
Twenty-seventh Regiment team.....	363

The Sixth Division prize was shot for, at Syracuse, on October twenty-fifth, on the following conditions: Open to teams of five from each company, troop or battery in the division, each company being at liberty to send one or more teams; distances for infantry, 200 and 500 yards; cavalry and artillery, using carbines, 200 and 300 yards; five shots each distance.

The official report of this match has not been received.

The Seventh Division prize was shot for at Rochester, on November 15, 1876, on the following conditions: Open to teams of five from each company, troop or battery in the division. Infantry shooting at 200 and 500 yards, cavalry and artillery at 200 and 300 yards, five shots at each distance. The match was closely contested, and protests filed against all the teams upon one ground or another, the result being that all the scores were thrown out by Lieut.-Col. James R. Campbell, the Division Inspector of Rifle Practice, and a new

match ordered. This took place November 24, 1876, the aggregate scores being as follows:

Company H, Fifty-fourth Regiment.....	122
Cavalry Troop, Twenty-fifth Brigade.....	102
Company C, Fifty-fourth Regiment.....	95
Company E, Fifty-fourth Regiment.....	95
Company B, Fifty-fourth Regiment.....	77
Company G, Fifty-fourth Regiment.....	74
Battery A, Twenty-fifth Brigade.....	66
Company A, Fifty-fourth Regiment.....	61

Col. Campbell reports that the result of throwing out the scores made in the first competition was extremely beneficial; that on the second occasion the rules were strictly observed, and the demeanor of the men faultless, and that hereafter there will be no need of protests.

The Eighth Division prize was shot for on Bay View range, at Buffalo, on October twenty-fifth, on the following conditions: Open to teams of five from each company, troop or battery in the division; distances 200 and 500 yards; five shots each distance. The following is a summary of the scores:

B Company, Seventy-fourth Regiment.....	135
Fourth Separate Company, Warsaw.....	130
F Company, Sixty-fifth Regiment.....	126
C Company, Seventy-fourth Regiment.....	122
D Company, Seventy-fourth Regiment.....	95
Battery A, Thirty-first Brigade.....	91
G Company, Seventy-fourth Regiment.....	80
F Company, Seventy-fourth Regiment.....	74
First Separate Cavalry Troop, Eighth Division.....	64

The detailed scores in all the foregoing matches are hereto annexed.

In my opinion the shooting of the division matches throughout the State is postponed until too late in the fall. It would be better for many reasons that they should occur before the fall meeting at Creedmoor, which takes place in September.

INTER-STATE MATCH.

The Inter-State match was shot at Creedmoor, September 20, 1876, Connecticut being the only State sending a team. The New York

team was selected in the same manner as last year, from the men making the highest individual scores in the State match. Connecticut was successful, two of the best shots in the New York team making unaccountably low scores. This result, however, is not to be regretted, as it will undoubtedly lead to a large representation from the other States in subsequent matches. The following are the scores made in this competition :

INTER-STATE MILITARY MATCH.

Team of Connecticut National Guard.

Regiment.	NAMES.	300 Yards.				Total.	500 Yards.				Total.	Aggregate.
2	Corporal G. G. La Barnes.....	44	43	33	34	35	45	55	54	45	44	79

SIGHTS.

To prevent future disputes in regard to the filing of sights by competitors, as well as to improve the marksmanship of the National Guard, I would recommend that an established gauge be adopted for the sights of the infantry rifle, based upon the most approved models, and that all sights be allowed to be altered, so as to conform to that gauge. In this manner the sights would be improved without the cost to the State which would follow an attempt to purchase new ones, while the gauges (which would be in the hands of all range officers)

would form a standard which would enable a decision to be made on the spot as to whether a rifle had been improperly tampered with.

I would renew my recommendation of last year in regard to the sights of the carbines. Those now in use do not permit of accurate shooting, even at the short ranges at which the carbine is available, as they are placed so high upon the barrel as to cause them to carry over at short range, while there is no means of graduating the elevation for the longer distances. Lieut. A. T. Decker, of the Washington Grey Troop, has, after a number of experiments, devised a sight for the carbine which, I trust, will be found an improvement. He has devoted much time in endeavoring to improve the shooting of the cavalry, and I desire to express to him my obligation for the assistance he has given me. As the interest taken by the cavalry in shooting is hampered from the imperfect manner in which their carbines are sighted, I would recommend that new sights should be issued, as the expense would be small, their number being limited.

CARBINES.

I feel constrained to report unfavorably in regard to the carbine as a military weapon. The model in use by the cavalry of this State, with the exception of the size of the calibre (50), will compare favorably with any other I know of, but, in my opinion, the principle of the weapon is wrong. Three hundred yards is practically the limit at which accurate results can be obtained and at distances exceeding 400 yards it is useless, while the recent English cavalry regulations fixes their usual fighting distance at from 200 to 400 yards. This places cavalry at a serious disadvantage, a fact which is demonstrated in the accounts of the recent Indian fights on the plains, where both officers and correspondents agree as to the inability of the Springfield carbine to cope, upon equal terms, with either the Winchester or the infantry rifles used by the Indians.

At the present more, perhaps, than at any other period, the tendency is toward having cavalry use their carbines only when dismounted.

In the British army the drill in mounted firing has been discontinued. In our own service the cavalry use their carbines mainly on foot, and with militia it would be absolutely necessary that they should do so.

Under these circumstances I consider that they should be armed with a weapon which will, by insuring accuracy up to 600 yards,

enable them to meet infantry upon something like equal terms. I am inclined to the belief that much of the fault found with the carbine arises from the disproportion existing in the cartridge between the weight of the ball and that of the powder. Thus, the cartridge for the infantry rifle contains seventy grains of powder and 450 grains of lead, while that for the carbine, which contains but fifty grains of powder (a reduction of two-sevenths), uses a bullet weighing 400 grains (a reduction of but one-ninth). The consequence of this is that, in target practice, to hit the target with the carbine at 200 yards, during a smart breeze, aim must be taken four feet or more to one side, while the Winchester rifle, using forty grains of powder, but with a ball weighing but 200 grains, requires under the same circumstances, but an allowance of a few inches. In view of the large caliber (50) of the carbine, it is, however, difficult to devise a lighter bullet that will not be too short.

The experiments that have been instituted during the past season toward using the infantry cartridge in the carbine have not been satisfactory, the recoil being so great that few, even of the most experienced shots, were able to endure it, while it destroys the shooting of all others by making them "flinch" when firing. The military advantage to be obtained from the infantry and cavalry, being able to use the same ammunition, is very decided. It does not exist, however, when, as at present, the carbine used is so light as to render it impracticable to do so.

The advantages that result from the saving of two pounds (the difference between the weight of the carbine and infantry rifle) I cannot consider as being sufficient to counterbalance the drawback arising from its practically preventing the use of the infantry cartridge, and causing the diminished range which follows from the use of the present ammunition. Moreover, to obtain this reduction in weight, the carbine barrel is tapered so much as to require a very long foresight, which is exposed to injury, and which makes it difficult to take correct aim. The barrel is also made so short (twenty inches) as to make the least variation in aiming produce a material deviation. I am, therefore, of the opinion that the present carbine should be replaced by a short rifle (of about twenty-six-inch barrel, and weighing about nine pounds) having the same sights and using the same ammunition as that carried by the infantry.

If this should be too heavy to be carried in the sling it may be attached to the saddle. This, in the opinion of many cavalymen,

is the proper place for it. I cannot but think myself that a carbine dangling from a sling is liable to have the sights bent, its barrel indented, or its accuracy impaired in some similar way, while, as it is so seldom fired from the saddle, the advantages of its being carried in this manner are scarcely equal to the drawbacks connected with it.

REMINGTON RIFLE.

The Remington rifle used by the infantry continues to give satisfaction. It is exceedingly accurate, and no accident has ever happened with it to my knowledge, except that, during the practice of the First Brigade, one of the rifle barrels burst, but without injuring any one. I would renew my recommendation that the barrels of the rifles should be browned.

AMMUNITION.

The ammunition issued by the State is considered an improvement over that used last year. I have heard of no accident, except that, during the practice of the Eleventh Brigade, Lieut.-Col. Banker, chief of staff, was injured from a defective shell. Ammunition has been liberally issued for general instruction on the theory that if the National Guard were willing to devote their time to becoming skillful marksmen, it was wise policy for the State to allow them sufficient ammunition for that purpose. The quantity allowed for team practice, however, has been limited.

TARGETS.

Considerable trouble has been experienced in procuring the manufacture of the proper kind of iron targets. As stated in my last report, the short range practice of the troops tries them severely. If made too soft, they indent and curl up at the sides. If, on the other hand, they are too hard, they break. It was not until the third attempt that Messrs. J. B. & J. M. Cornell, who had taken the contract to supply them to the State, succeeded in making them so as to stand. At the best the life of an iron target is but short, and many attempts have been made to improve upon them. At the time of my last report, it was supposed that canvass targets would be found an improvement, but this did not prove to be the case. Targets of this description, constructed upon three different plans, the Wimbleton, the Canadian, and upon a method invented by Major H. S. Jewell, Inspector Rifle Practice, Fifth Brigade, have been introduced and thoroughly tried at Creedmoor during the past year, but have not

given satisfaction, competitors declining to use them if they could avoid it.

They have been much improved by being covered with light sheet-iron, but still are not liked as well as the iron slabs (except in case of rain), and have been found more expensive to operate.

A stone target, made by the Potsdam Sandstone Company, has also been tried since September last, and, so far, has stood as well as the iron targets, much to the surprise of all riflemen. In wet weather it is preferred to the iron targets. Its great weight, however, renders it difficult to handle, and it cannot be altered in size for the different classes as can be done with the iron slabs. Its costs, on the other hand, is but half that of the latter, and, if it continues to stand the impact of the shots, as it has done so far, it may be wise to issue it where permanent targets are needed.

NEVADA BADGE.

The match for the "Nevada Badge," a gold badge presented by the National Guard of Virginia City, Nevada, to that company of the National Guard of this State annually making the highest average score at 200 and 500 yards, five shots each distance, not less than forty-six men being required to enter, was shot for by Company A, Forty-eight Regiment, Lieut. H. H. Herron, commanding; Company I, Seventh Regiment, Capt. William C. Casey, commanding; and Company A, Twenty-third Regiment, Captain Joseph G. Story, commanding; the Forty-eighth shooting at Oswego, on October 27, 1876, under your supervision, and the others at Creedmoor, on October 28, 1876, under my own. The weather on both days was very disagreeable, and impaired the quality of the shooting. The badge was won by Company A, Forty-eighth Regiment, which also won it last year. The following is a synopsis of the match :

	Number present	Total score, 200 yds.	Total score, 500 yds.	Grand total.	Average per man.
Company A, Forty-eight Regiment	46	766	464	1,230	26.19-46
Company G, Seventh Regiment	46	636	406	1,042	22.30-46
Company A, Twenty-third Regiment	46	677	379	956	20.82-46
Company D, Seventy-first Regiment	44	866	19.30-44

The detailed scores in this match are annexed to this report. Company D, Seventy-first Regiment, also shot for this badge, but only forty-four men being present this score could not be counted.

This match is a valuable one and would excite much more interest among the National Guard if the number of men which the competing companies are required to parade was not so great.

CIRCULARS.

I annex hereto copies of all the circulars issued by me during the present year.

TRANSPORTATION.

The arrangements for the transportation of the troops practicing at Creedmoor have been the same as during last year. Nothing was paid the ferry company, as section 261, Military Code, authorizes the free passage of the National Guard over all ferries. This, as I stated in my report of last year, would seem to be a heavy tax to be imposed upon a single company.

ACCIDENTS.

During all the practice of the National Guard, not only at Creedmoor but throughout the State, I know of but one serious accident. This was to a marker, who lost one eye at Creedmoor, during the practice of the Second Brigade, and was owing to his own carelessness. The changes in the form of the butts introduced this season have prevented the injuries to the markers from the "splash" of the bullets which formerly were so apt to follow from firing on a wrong target, and which threatened to become a serious drawback to the use of iron targets.

DRAWBACKS.

The rifle practice of the year has suffered from the interest taken in the Centennial Exposition, politics, and more particularly from the business depression which has prevailed throughout the country.

Both officers and members of the National Guard have found it difficult to spare the time or money that they desired to devote to shooting, and many have been unable to accompany their regiments to the range.

In view of the drawbacks arising from these causes the improvement during the year has been gratifying.

Very respectfully yours. . .

GEORGE W. WINGATE,

Colonel and General Inspector of Rifle Practice, S. N. Y.

Maj.-Gen. JOHN B. WOODWARD, *Inspector-General.*

INSPECTOR-GENERAL'S DEPARTMENT, STATE OF NEW YORK,
OFFICE OF GENERAL INSPECTOR OF RIFLE PRACTICE,
208 BROADWAY, NEW YORK, *January 17, 1876.*

CIRCULAR No. 1.

The various Division, Brigade and Regimental Inspectors of Rifle Practice are requested to be present at the meeting of the State Military Association, to be held at Agricultural Hall, Albany, on the 25th instant, at 3.30 P. M., to confer with the undersigned in regard to rifle practice in their several organizations. Fatigue uniform will be worn at the meeting, and full dress at the Adjutant-General's reception, 26th instant.

GEORGE W. WINGATE,

Colonel and General Inspector of Rifle Practice, S. N. Y.

Approved:

JOHN B. WOODWARD, *Inspector-General, S. N. Y.*

INSPECTOR-GENERAL'S DEPARTMENT, STATE OF NEW YORK,
OFFICE OF GENERAL INSPECTOR OF RIFLE PRACTICE,
208 BROADWAY, NEW YORK, *March 15, 1876.*

CIRCULAR No. 2.

I. All Brigade Inspectors (with the exception of those who have done so during the present year) are requested, upon the receipt of this circular, to personally inspect the armories of the various organizations belonging to their respective brigades, in reference to the arrangements for rifle practice contained therein, and to advise and assist commanding officers and Regimental Inspectors in providing proper facilities for that purpose. They will incorporate in their annual report a reference to these inspections, with a statement of any improvements, in this respect, that may have been introduced, into the various armories during the year.

II. The attention of all Regimental Inspectors of Rifle Practice, is called to paragraphs 5 and 18, "Manual of Rifle Practice."

III. Inspectors of Rifle Practice should be particular to impress upon the officers and men composing the organization to which they are attached, that the regimental "*figure of merit*" will depend more upon the average points made in the *third class* practice than upon the possession of a few skilled shots; and that in calculating the

averages composing it, each man absent from practice, counts as if present and missing all his shots. While being careful not to interfere with the regular drill, they should use their utmost endeavors to secure a general instruction of the rank and file in rifle practice, and to stimulate their interest in the subject.

IV. The attention of all Inspectors is called to the following paragraph from General Orders, No. 14, A. G. O., series 1875: "As the efficiency to be attained by the several regiments and battalions will depend upon the qualifications of Inspectors of Rifle Practice, no person should be appointed to that position who is not a good shot and interested in the subject."

It is necessary that they should familiarize themselves with their duties by study of the "Manual," and by practice in "aiming drill," and upon the range acquire the necessary personal skill to enable them to act as instructors. They will be required to qualify for the "*Marksman's Badge*," as early in the season as practicable, under the supervision of the Brigade, or in case of Brigade Inspectors, of the Division Inspector of Rifle Practice.

V. The names of all Inspectors of Rifle Practice in each division who have not qualified as marksmen, with the reason therefor, will be forwarded to the undersigned by the respective Division Inspectors during the first week in August next.

VI. Commanding Officers and Inspectors of Rifle Practice are notified that the first day's practice in each division, during the coming season, will consist of a day devoted to practice for the "*Marksman's Badge*," by such members of the division as are now in the *first class* in rifle practice (including the present marksmen), together with those certified to be sufficiently skilled (Manual of Rifle Practice, par. 288), and that *all who may qualify on this occasion will be exempt from further practice during the year*, and will be presented with the "*Marksman's Badge*" by the State, and their names announced in General Orders.

VII. In view of the advantages resulting from having a large proportion of men sufficiently skilled to qualify directly as "*marksmen*," Commanding Officers are requested to bring the matter to the attention of their respective commands, and to urge them to pay such attention to their "aiming drill," and other practice, as will enable as many as practicable to secure this distinction without passing through the class firing.

VIII. While the use of the sub-caliber rifle in armory practice is

recommended for its economy and avoidance of smoke and noise, instructors are reminded that recruits should be occasionally exercised with the full cartridge, to accustom them to the recoil and report. (Manual, p. 97.)

IX. The attention of all Commanding Officers is called to the spring matches of the National Rifle Association, which will take place at Creedmoor, on May 25, 1876. It is hoped that the prizes, and particularly the trophy offered for competition, at 200 yards off hand, by teams of five from each company or troop of the National Guard, will insure a large representation from its ranks, and excite a healthy emulation among the different regiments.

X. In the case of regiments having facilities for shooting in their armeries, the practice of frequent competitions by teams from the various companies (the same teams not being allowed to shoot twice in succession) for the championship of the regiment, has been found so beneficial in inspiring a personal interest in rifle practice, that its adoption is recommended wherever practicable.

GEORGE W. WINGATE,

Colonel and General Inspector of Rifle Practice, S. N. Y.

Approved:

JOHN B. WOODWARD, *Inspector-General, S. N. Y.*

INSPECTOR GENERAL'S DEPARTMENT, STATE OF NEW YORK,
OFFICE OF GENERAL INSPECTOR OF RIFLE PRACTICE,
208 BROADWAY, NEW YORK, April 22, 1876. }

CIRCULAR No. 3.

I. The rifle practice of the several divisions during the coming season will be conducted in accordance with the following general regulations, as far as the situation of the commands and the location of the ranges within the several division districts will permit, and the various division commanders are respectfully requested to issue the necessary orders to secure their being observed by the troops under their command. The undersigned would also request that he may be furnished with a copy of all orders in relation to rifle practice issued by any commanding officers.

II. The first practice in each division should be for the marksman's badge by the present marksmen and first-class shots with those certified to be sufficiently skilled. All qualifying will be exempt from further practice during the year. (See Manual, par. 288, 332.)

III. Inspectors of Rifle Practice may be authorized by their commanding officers to allow official scores made in any military match of a regular rifle association, at the prescribed distances and with the regulation rifle, as a qualification for the marksman's badge.

IV. Marksmen's badges will be issued through brigade commanders, who should prescribe the time and manner of their presentation. The marksmen of 1875 will retain their badges until the end of the year, when, if they have failed to qualify, they will be required to surrender them.

V. The troops not qualifying as marksmen should practice in the third class (100 and 150 yards), and those qualifying in the second class (300 and 400 yards) as prescribed in the Manual, pages 158, 159. Whenever the time and the arrangements of the range will permit, those failing to qualify in any class should fire a second time in that class on the same day, and those qualifying in the first class may shoot for the marksman's badge.

VI. In the latter part of the season, the practice by those remaining in the third and second classes should be repeated as above prescribed, and those who have passed into the first class should shoot for the marksman's badge.

The division commanders are also authorized, in their discretion, to devote a day for a final practice for the marksman's badge, but the regular course prescribed is intended to require, on the average, but two days from each man.

VII. The attention of Inspectors is called to paragraphs 367, 370, 388 and 389, Manual. It is recommended that the scores in class firing should be kept by an officer or sergeant of a different regiment or company from that shooting.

VIII. No one except officers and instructors should be allowed to shoot with any class he does not belong to.

IX. Whenever troops are not firing, they should be practiced in estimating distances under 300 yards, if it can be done without delaying the firing (Manual, par. 223, 224, 250, and page 196).

X. Creedmoor may be used by members of the National Guard, when in uniform, on Mondays, Thursdays and Fridays, without charge.

GEO. W. WINGATE,

Colonel and General Inspector of Rifle Practice, S. N. Y.

Approved:

JOHN B. WOODWARD, *Inspector-General, S. N. Y.*

INSPECTOR-GENERAL'S DEPARTMENT, STATE OF NEW YORK,
OFFICE OF GENERAL INSPECTOR OF RIFLE PRACTICE,
208 BROADWAY, NEW YORK, *August 10, 1876.*

CIRCULAR No. 4.

I. The Nevada Badge presented by the National Guard of Virginia City, Nevada, will be open to competition during the present year, upon the following terms, prescribed by the donors, and Colonel William C. Church, as their trustee.

II. Open to only companies in the National Guard, not less than forty-six officers and men to shoot, and all competitors to be certified to be regularly enrolled members of the company they represent and to have been such on July 3, 1876. Weapon, Remington Rifle, State model, as issued, with regulation ammunition. Distance, 200 and 500 yards, five scoring and two sighting shots at each distance. Position, targets, etc., to conform to the rules of the National Rifle Association.

III. Companies may select any time and place within the State at which to shoot, provided that two weeks' written notice thereof shall have been previously given to the General Inspector of Rifle Practice, and that the returns of practice are forwarded to him before November 1, 1876.

IV. Companies intending to compete are requested to notify the General Inspector of Rifle Practice of such intention at as early a day as practicable, either with or without the designation of the day selected for the competition. All companies sending such notice will be informed by such General Inspector of the time and place of all competitions by other companies, and will be authorized to send representatives to all competitions to see that the same are fairly conducted.

V. The several Division, Brigade and Regimental Inspectors of Rifle Practice should attend all competitions for the badge, and see that the practice is properly conducted.

VI. In case of stormy or tempestuous weather, the Division, or in his absence, the Brigade Inspector of Rifle Practice is authorized, on the request of the commanding officer of any company that may have selected that day for competition, to adjourn the same to the following day. This, however, will only be done in exceptional cases and for no longer time.

VII. The Nevada Badge will be held by its present possessors, Company A, Forty-eighth Regiment, National Guard, Oswego, until

November 1, 1876, when it will be put at the disposition of Colonel Wm. C. Church, of the Army and Navy Journal, he having been appointed by the donors of the badge, trustee for the same. Colonel Church will transfer the badge to the company certified by Regimental, Brigade, Division and General Inspector of Rifle Practice to have made the best score under the foregoing regulations, their certificate to be accompanied by a copy of the score, the same to be published in the number of the Army and Navy Journal following its receipt. The winning company will hold it for one year, and will be required to give bonds for its safe-keeping and return November 1, 1877, to the same party, or his properly appointed successor, following the result of the competitions of 1877.

VIII. Ammunition for two practices and one competition for the "Nevada Badge," will be issued to all companies of the National Guard giving notice of their intention to compete therefor, and possessing the requisite strength (forty-six men). It is hoped that as many companies as possible will engage in this contest. Regimental Commanders are authorized, with the approval of their Brigade Commander, to allow the scores made in the competition as a qualification for the marksman's badge.

IX. Attention is called to the State and inter-State matches taking place at Creedmoor, September eighteenth and nineteenth. The team to represent the State of New York in the inter-State match will be selected from the fifteen making the highest individual scores in the State match, by the General Inspector of Rifle Practice (who will command the team); such selection being based, not only upon the scores made in such match, but upon the general steadiness and reliability of the men, as certified by the Captains of the regimental teams to which they respectively belong. The entrance fee for the team will be paid by the State.

X. The railroad fare of all "teams" sent from regiments outside the limits of the First and Second Division, and participating in the State match, will be paid by the State, upon requisition of the Regimental Commander, certifying that such team participated in such match. The teams will also be provided with tents and camp equipment upon the range, without charge, in case a requisition is made therefor prior to September 5th.

XI. Where two or more teams from any of the divisions of the National Guard (excluding the First and Second Divisions) will participate in such match, the one of such teams making the highest

score will be presented with the prize offered by the State to such division (costing \$100), unless a separate competition therefor shall have been provided for by the Inspector of Rifle Practice of such division, as hereinafter prescribed.

XII. Inspectors of Rifle Practice of each division of the National Guard (excluding the First and Second Divisions) are requested, at as early a day as possible, to arrange for the competition by the troops of their divisions, for the prize offered by the State to such divisions. Such match should be held in the division district wherever proper grounds can be obtained. It is hoped that a division match will be held in as many division districts as possible during the fall, and that every regiment of the National Guard will be represented in the State and other team matches at the meeting of the National Rifle Association.

XIII. Attention is called to the fact that no sighting shots are allowed in class firing, except for the marksman's badge. (Manual, paragraphs 281 to 285.)

XIV. The delay in the delivery of targets to many of the ranges having prevented a number of Inspectors of Rifle Practice from, qualifying as marksmen, the return of those not having qualified, requested in paragraph V, Circular No. 2, C. S., from this office, will be postponed to November first.

GEO. W. WINGATE,

Colonel and General Inspector of Rifle Practice, S. N. Y.

Approved:

JOHN B. WOODWARD, *Inspector-General, S. N. Y.*

INSPECTOR-GENERAL'S DEPARTMENT, STATE OF NEW YORK.

OFFICE OF GENERAL INSPECTOR OF RIFLE PRACTICE,

208 BROADWAY, NEW YORK, *November 13, 1876.*

CIRCULAR No. 5.

I. The attention of all Inspectors of Rifle Practice is called to the necessity of having their returns made during the present month, so as to enable them to be referred to in the Adjutant-General's report, and the list of marksmen to be included in the orders from general headquarters. If any organization has not received the blanks sent them, others will be issued on application to this office.

II. In making their returns, Inspectors are requested to see that the names of the marksmen are written distinctly (particularly

when they are not English names), and that the names of those who have qualified for the second time are distinguished by a line being drawn underneath them. These returns should be forwarded through the various headquarters. The marksman's badges will be delivered by Messrs. Baker and McKinney on the order of the Brigade Inspectors, after the returns have been received at this office.

III. The marksman's badges should always be presented in front of the regiment, and, if possible, by the Brigade or Division Commander. The names of the winners should be announced in orders, and every exertion made to have the badge regarded as an honorable distinction.

Commanding officers are requested to see that the marksmen who failed to qualify during the present year are required to turn in their badges.

IV. In filling up the blanks, the number present at last inspection is to be taken as a basis. The third class is the remainder left after deducting from those present at inspection the number who have qualified in that class. The second class is the remainder left after deducting from that class the number who qualified in it who constitute the first class, and should include all the marksmen. The column headed "Marksmen qualifying in the first instance" is intended to contain the number who qualified as marksmen without shooting through the classes.

V. Inspectors of Rifle Practice are requested, in forwarding their returns, to report the general condition of rifle practice in their respective regiments, brigades or divisions, with such suggestions as they may deem proper as to how, in their opinion, it can best be improved. Those belonging to divisions, other than the First and Second, are also requested to report the condition of the various ranges within their military districts, and the extent to which they have been used by the commands to which they are attached during the past year.

VI. The Brigade and Division Inspectors of Rifle Practice are requested to report at once the names of all Inspectors of Rifle Practice who have not qualified as marksmen during the past season, with the reasons, if any, for their not doing so.

GEO. W. WINGATE,

Colonel and General Inspector of Rifle Practice, S. N. Y.

JOHN BODINE,

Lt.-Col. and Inspector Rifle Practice, Fifth Div., N. G. S. N. Y.

HEAD-QUARTERS FIRST DIVISION, N. G. S. N. Y. }
 NEW YORK, *December 27, 1876.* }

GENERAL.—I have the honor to present herewith the brigade reports of the result of the rifle practice at Creedmoor during the past season, of the troops of the First Division, N. G. S. N. Y. Complying with your request that I should accompany them with such suggestions as have presented themselves to my mind in connection therewith, I beg to say :

First. That I am convinced, from the experience which I have had during the past season, that there is great need of radical change in the system of military rifle practice at Creedmoor, if the object of the establishment of a rifle range of such importance is to develop the highest degree of excellence of marksmanship on the part of the troops which practice there.

It seems to me, that under the system of rifle practice as carried on at Creedmoor thus far, the result has been simply to perfect into better shots those who understood how to handle their pieces, and who were fair, or good shots before, without tending to educate the majority of the troops up to the standard to be desired. I do not know that I can say any thing, or offer any suggestion that can be regarded as a practical way of bettering the system, but I take leave to present my views upon the subject for your consideration. Creedmoor, as it seems to me, should become for the soldier of the First Division a place where he can be made thoroughly adept in the use of the rifle. Before he can become so, however, he must be made to

understand how to handle his piece naturally, easily and with nerve and firmness. I mean in the mere matter of aiming drill, and loading and firing with accuracy. Merely taking the soldier to Creedmoor who is not practically familiar with these rudimentary movements, to shoot one or two days in the season a given number of shots, at one or more distances, in regular routine, along with several hundred of his fellows, with no time to devote, and none which can be devoted, to his real *instruction*, is simply to take up so much of his time, put the State to the expense involved in his transportation and in the ammunition which he necessarily expends, with very little, if any, real benefit being derived in the way of the development of "a good shot." It is, to my mind, utterly impossible to have it otherwise under the existing system. How to better this system is the problem presented for solution.

If it were practicable to establish a camp of instruction at Creedmoor, where each regiment of the division should be required to remain for a given number of consecutive days in each season, under a rigid system of rifle practice, from its rudiments up, I am convinced that the troops of the First Division would soon attain a standard of excellence unsurpassed the world over. This would be the simple and thorough way of solving the problem. I assume, however, that the men comprising the division could not devote so much time to rifle practice during a season, and therefore this plan would not be regarded as practicable.

The next remedial measure to overcome the weak point which I have named would be, to my mind, to institute a rigid system of armory practice in aiming drill, and firing with half loaded cartridges until the men *all* possess a thorough practical knowledge of aiming, loading and firing. I mean by such armory practice that it should be carried on under fixed orders, covering so many days or evenings in each month, and exempting no member of the division until he shall be certified to by his regimental or company rifle inspector as having acquired the necessary practical knowledge of the use of his weapon to render him competent for field practice. Nor would I admit any soldier to practice at Creedmoor until he has first been so certified to by his company or regimental inspector. The result would be that all the troops of the division practicing at Creedmoor would then exhibit a familiarity with the use of their pieces that would not only inspire confidence in themselves, but would make a record of general marksmanship which would be hard to rival.

In saying so much I do not wish to be understood as conveying the idea that there is not a very high standard of excellence prevailing already among hundreds of soldiers of the several regiments comprising the division. The records of practice show this conclusively. I have reference only to the very large number of soldiers of the division, whatever the proportion may be, who certainly stand in need of the primary instruction which I have suggested, and whom it is useless to send to Creedmoor until they have had such primary instruction.

I have the honor to be, with great respect,
Your obedient servant.

W. B. FARWELL,

Lieut.-Col. and Inspector of Rifle Practice.

Major-General ALEX. SHALEB, *Com. First Division, N. G. S. N. Y.*

HEAD-QUARTERS FIRST BRIGADE, FIRST DIVISION, }
N. G. S. N. Y., 24 PINE STREET, }
NEW YORK, *December 6, 1876.* }

COLONEL.—In compliance with your circular No. 5, C. S., I have the honor to hand you the returns of rifle practice for this command, and I respectfully submit the following report :

DRILL SEASON, 1875-76.

The Fifth Regiment gave no important attention to rifle practice. The members of the Twelfth regiment were instructed in firing. I judge that nothing was done in the Twenty-second Regiment, their Inspector having failed to comply with my repeated demands for a report. The present Inspectors for the Fifth and Twelfth, respectively, were appointed last spring, and commissioned last summer. These officers, Captains Ottmar L. Wenz and Wm. R. Greene, will promote efficiency in their department.

PRACTICE AT CREEDMOOR.

May fifteenth. A detachment from this command formed part of the division detachment, ordered for practice in the first class.

The range was occupied by troops from the First Brigade upon June second, fifteenth and twenty-sixth, and August third, seventeenth and twenty-eighth — six days. Copies of orders are appended.

I was anxious that the men should get the greatest possible benefit from each day's practice, and I therefore urged dispatch in all the preparations for firing, and in the moving of troops from one point to another. Officers were required, however, to instruct their men and to allow the utmost deliberation in aiming and firing. Whenever it was possible to repeat the practice in any class, such practice was repeated in pursuance of the instructions of section 5 of your circular No. 3, C. S.

June second and fifteenth. The command practiced in the whole course, excepting that the men who made small scores in one stage of the first class, and therefore could not qualify in this class, were not given time to fire in the other stage. Thirty-six officers and men won the "Marksman's badge," and exemption from further practice.

June twenty-sixth. The troops practiced in the third and second classes. It was impossible to do more because of the intense heat, a serious breach of discipline, herein mentioned, and the presence of an unusually large number of men.

August third. First day for repetition of third-class practice. By order of the General, the men were given a position and aiming drill before any rounds were fired. The troops practiced in the third and second classes.

August seventeenth. Conclusion of third-class repetition. A heavy rain storm kept the command under cover during the morning. Light rain in the afternoon delayed the marking for third-class practice, and darkness cut short the second-class practice.

August twenty-eighth. Second and first classes. A large proportion of men failed to qualify in the second class, and I directed an immediate repetition for their benefit. The men who had qualified were sent into the field at the left, and there fired in the first stage of the first class. Those men who qualified in the second class at the second trial, were also passed into the left field. At five o'clock the day's work had been finished, excepting the second stage of the first class, 500 yards distance. A target was allowed for each squad of eight men from the Twelfth and Twenty-second Regiments, and for each squad of nine men from the Fifth. The seven rounds had, therefore, to be fired at the rate of a shot a minute, in order to complete the practice in one hour. I consider this rate not too rapid for accuracy, and my opinion is strengthened by the fact that fifty minutes sufficed for the obtaining of good results in the Fifth's detachment. Adjutant Louis Pløger, an efficient officer, acted as

their Inspector, and found no necessity for hurrying his men, even with more per firing point than in the other detachments. At six o'clock all firing ceased, and the Twelfth and Twenty-second were left with an unfinished record. It seems proper to attribute this to mismanagement in the Twenty-second, and to a desire for failure in the Twelfth, several of whose officers had unnecessarily predicted such failure to result from the second-class repetition. The General was present, unofficially, for a few hours, and the next morning's Times charged him with ordering a repetition that would have been well if there had been more hours left in the day. I at once wrote a statement of the case for that journal, but my note did not get into print.

The want of preinstruction was apparent upon each practice day, and much time was necessarily consumed in teaching men their positions for firing. The officers of the Twelfth Regiment instructed their men in the most thorough manner. Many officers of the Twenty-second did as well. In the Fifth a great deal of hard work was done by a minority of officers. The troops of this brigade always manifested a strong disposition to learn, and great pride in making creditable scores, and in order to encourage the men, I allowed second trials for qualification, particularly in the third class, whenever the time permitted. In such cases the first scores were destroyed, and the second were recorded, whether better or not. I have the honor to call your attention to the table here given, by which you may compare this season's results with the results of last season. Much praise is due to the officers of the Twelfth Regiment for getting more men into the first class than have been left in the third class. It seems to me that such improvement is far more important than an increase merely in the number of "marksmen." I believe that the third-class men outnumbered the first-class men in every regiment at the close of 1875.

REGIMENT.	Year.	No. present for practice.	No. present last inspection.	Average points, third class.	MARKSMEN.		FIRST CLASS.		SECOND CLASS.		THIRD CLASS.		Figure of merit.
					Number.	Per centage.	Number.	Per centage.	Number.	Per centage.	Number.	Per centage.	
Twelfth	1875	388	300	21.76	50	16.66	67	22.23	133	61.00	145	48.33	38.86
Twelfth	1876	455	338	23.06	61	13.50	151	46.02	89	27.13	88	26.85	63.73
Twenty-second	1875	379	449	22.70	35	7.79	83	13.90	143	31.84	273	82.85	30.49
Twenty-second	1876	495	466	22.67	54	11.68	103	23.19	130	27.89	233	48.92	34.25

Fifth	1876	504	515	20.45	33	6.40	66	12.81	180	34.96	269	52.23	26.85

DISCIPLINE.

The only serious breach was that of Max Ebler, then, June twenty-sixth, a Captain in the Fifth Regiment. It appears improper and unnecessary to rehearse the case in this report. Ebler was tried by court-martial, convicted and was punished by the extreme penalty applicable to his offence. The General's order of approval is appended.

AMMUNITION.

I endeavored to make as light as possible the charge against the State for the First Brigade. The amount expended in the six days is 30,980 rounds, and the work could hardly have been done with less. The quality was good, but I think a quicker burning powder should be used, as the rifles now become too foul for perfect accuracy, when fired five or seven times without being cleaned.

BURSTING OF A RIFLE.

On August seventeenth, at the second round, rifle No. 9, C Company, Fifth Regiment, burst in the hands of Private John Soleder. The General appointed the Inspectors of Rifle Practice for the Twelfth and Fifth Regiments, and myself a board of survey. The board examined the rifle and listened to the statements of Captain Gimpel and Private Soleder, and found that the bursting was due to an imperfection of the barrel of the rifle.

INJURY TO A MARKER.

On August seventeenth, John MacDade lost an eye from the "splash" of a bullet. He was marking out one shot when another struck his target, and he being directly under, instead of being covered by his glass, received the "splash." The fault is therefore partly his own, and partly that of the soldier who fired while the trap was up. The accident occurred near the close of the day, and I then supposed that the rain and darkness had induced MacDade (with others) to abandon his task. When I learned of his injury it was too late to find by whom or from which squad the second shot had been fired. The unfortunate man's hospital bill was paid by the General and staff, and each regiment of this command gave twenty-five dollars. MacDade is now in destitute circumstances and is anxious to find employment.

SCORE CARDS.

Allow me to apologize for failing to comply with your request at the end of August, and to place the blame for my failure where it rightly belongs. During the whole season I had great difficulty in getting any thing done promptly by the Twenty-second Regiment's Inspector of Rifle Practice. He was particularly slow in making out score cards, and at the season's close you found me without his returns for August seventeenth and twenty-eighth, and with his incorrect card for June twenty-sixth. I have had the honor to hand you brigade cards, at times permitted by the convenience of this officer, and I respectfully trust that my own annoyance has been greater than yours. Adjutant Wm. H. Murphy generally acted as Inspector for the Twelfth Regiment, and handed me score cards before leaving the cars. The Fifth's cards were made out in ink, and reached my office within forty-eight hours of each practice day, and were always correct.

AUTUMN MEETING, N. R. A.

The first prize in the Judd match, seven rounds, off-hand, 200 yards, was won by a member of the Twenty-second Regiment, and I take pleasure in calling your attention to this remarkable fine score of Frank G. Fullgraff.

1	2	3	4	5	6	7	Total.
5	5	4	5	5	5	5	34
							<u>34</u>

The General and staff had offered a set of four guidons for the regiment of this brigade whose team should make the highest score in the State match. The trophy was won by the Twelfth's team, Private A. B. Van Husen leading with the following score.

Two hundred yards.					Total.	Five hundred yards.					Total.	Aggr.
1	2	3	4	5		1	2	3	4	5		
5	4	5	4	4	22	4	4	4	2	5	19	41
					<u>22</u>						<u>19</u>	<u>41</u>

This record gave Van Husen a place in the New York State team for the Inter-State match, where he proved to be New York's third man. The protest that was allowed against the Forty-eighth Regiment's team, gave the second prize in the Army and Navy Journal match, seven rounds, 500 yards, to the Twelfth Regiment, upon the score of 299 points. The Seventh Regiment's team won the first prize by a single point.

GENERAL REMARKS AND SUGGESTIONS.

Military Matches.

I very respectfully offer the opinion that questions which can be settled at the time of a match better than afterward, are now left for after consideration. It seems to me that the officer appointed to superintend a match should be considered as having passed final judgment, by simply allowing scores to be made, upon such questions as the using of filed sights or the using of other than the authorized rifle. If such questions could not be presented afterward, then the superintending officer would be assisted by Captains of teams desirous of detecting unfair advantage in competing teams. I should like to have the grounds for protests clearly defined and within narrow limits.

The State Arm.

When a rifle is found to carry accurately, its barrel is allowed to rust externally, only, and its sights are blackened. I respectfully but urgently suggest the bronzing of rifle barrels. This may be readily done at small expense. I should then have every rifle used in practice at Creedmoor, and whenever one proves to be faulty, let the imperfect part be condemned and be replaced. A movable carriage might be built for the purpose of absolutely testing each rifle supposed to be inaccurate. In due time the State would possess only such weapons as it could depend upon in an emergency.

Instruction in Armories.

The method is given in your manual, and the adoption of it by the State, I have the honor to think, entitles every man in the service to the prescribed course of instruction. I do not know the process of reasoning that leads officers to use discretionary power in this matter. I take the liberty to suggest that an order be issued directing Regimental Inspectors of Rifle Practice to instruct the officers of their respective organizations, in four lessons of an hour and a-half each, before the end of February, 1877; and directing commandants of companies to instruct their men in one lesson of an hour and a-half's duration, in each of the months of February, March, April and May, 1877, these taking the place of as many other drills. Commandants may avoid disgusting well-informed men, and may excite a more general interest in rifle practice, by using "marksmen" and some non-commissioned officers as assistants in the work of instruction.

The Second Class.

I respectfully offer the opinion, which is in accordance with that of many officers and men, to the effect that there is as great difficulty in qualifying in this class (300 and 400 yards, without sighting shots) as in the first class (200 and 500 yards, with sighting shots). For this reason and others herein given, I feel called upon to ask that the second-class practice shall consist of firing two sighting, and five scoring shots, kneeling position, 300 yards, qualification thirteen points. The whole course would then be fired in thirty-one instead of thirty-four shots, but the great saving of time in avoiding one change of distance, would enable detachments of the average strength to fire through the course upon a favorable day. There would always be a chance to win the "marksman's badge," and this would operate as an inducement for men to go to Creedmoor when ordered, and to do their best when there. Then, too, the firing of the course in one day instead of in two days, would save a large sum of money to the State, by reducing the bills for transportation of troops.

Markers.

I see no economy in limiting the number of markers per day. If the limit should be doubled the troops might practice a second time in a class and a larger percentage of men get through the course in a day. The expense for transportation having been incurred, I think that the amount of practice should not be limited, when it can be said that double the amount of practice may be had with double the number of markers, and that they cost no more at the rate of thirty a day than at fifteen for two days.

The Regimental Plan.

I am opposed to the ordering of troops to Creedmoor by regiments, as has been suggested. If this plan be adopted, some practice days will degenerate into picnics, and prove to be serious affairs for the farmers hard by. Then, a fair proportion of the men of some regiments carry flasks of liquor, and a squad of well-armed drunken soldiers can not be instantly put down by their own officers, aided only by their own men. Besides, when an exceptionally fine array of scores should be made by a regiment, the cry of "lead pencil scores" would be raised because the scoring had been done by members of the regiment.

Detachments.

In case the course of practice be modified, and the limit to the number of markers per day be doubled, I should recommend the ordering of detachments to be composed of a wing of each regiment in a brigade.

Practice Days.

At the beginning of the season, I should name two days for each brigade, the practice to be in the whole course and for all members without regard to previous record. If this plan should prove practicable, I should then name two more days for each brigade, for men who had not won "the badge," the practice to be in the second and first classes for men who had qualified in the second class, and the practice to begin in the third class for all others; the targets in the right field to be used for firing in the second class, and in the second stage of the first class; the targets in the left field to be used for firing in the third class, and in the first stage of the first class. I should name a final day for each brigade, the practice to be as on the next preceding days; but for this day I should exempt from fine for absence, those men who had qualified in the second class, and those men who had attended twice already.

In conclusion, I have the honor to trust that my recommendations are based upon principles of which you can approve. I believe that the National Guard as a body, may attain excellence of a certain grade in rifle practice, and that such attainment should lead to individual excellence of a higher grade, this being left to individual effort or ability. I should always hold out the "marksman's badge" as a prize, but should prefer, in orders, to seek a general excellence in short-range practice rather than individual excellence in the first class.

All of which is respectfully submitted.

J. H. COWPERTHWAIT,

Major and Inspector of Rifle Practice.

To Colonel GEO. W. WINGATE, *General Inspector of Rifle Practice,*
N. G. S. N. Y.

HEAD-QUARTERS FIRST BRIGADE, FIRST DIVISION, }
 N. G. S. N. Y., No. 24 PINE STREET,
 NEW YORK, 9th *May*, 1876. }

GENERAL ORDERS, No. 3.

I. The following order from head-quarters, First Division, is here-with promulgated for the information and guidance of this command:

HEAD-QUARTERS FIRST DIVISION, N. G. S. N. Y. }
 NEW YORK, *May* 6, 1876. }

GENERAL ORDERS, No. 3.

1. The infantry and cavalry organizations of this command will engage in rifle practice at Creedmoor as follows:

FOR THE MARKSMAN'S BADGE.

By all members who are now marksmen and those who are in the first class. Of the infantry organizations, on the fifteenth instant. Of the cavalry organizations, on the nineteenth instant.

FOR THIRD-CLASS PRACTICE.

Third Brigade on the twenty-second instant and ninth and twenty-second proximo.

Second Brigade on the twenty-ninth instant and twelfth and twenty-third proximo.

First Brigade on the second, fifteenth and twenty-sixth proximo.

Three companies of each regiment will practice on each of the two days first named for each brigade, and the remaining companies on the last day.

2. The troops will leave Hunter's Point on the 8.30 A. M. train, and will return as soon as the practice is concluded, at an hour to be designated by the commanding officers respectively. Requisitions for transportation, ammunition and scoring tickets must be made on the Chief of Ordnance and Acting Quartermaster-General, S. N. Y., through the Inspector of Rifle Practice, at least twenty-four hours before the time of departure.

3. The practice will be conducted in conformity with the provisions of circular No. 3, C. S. from the office of the General Inspector of Rifle Practice and the rules of the National Rifle Association, and will be supervised by the Division, Brigade and Regimental Inspectors of Rifle Practice.

By order of Major General Alexander Shaler.

HENRY A. GILDERSLEEVE,

Colonel, A. A. G. and Chief of Staff.

II. In compliance with the above, the commandants of regiments in this brigade, will assemble the marksmen, first class, and such others of their respective commands as are certified to as being qualified to compete for the marksman's badge, at their regimental armories on the fifteenth instant, in season to take the 8.30 A. M. train from Hunter's Point.

The enlisted men of the above classes, will be formed in each regiment into a provisional company under the charge of a Captain and two Lieutenants. The officers of each regiment who are marksmen, will accompany their respective detachments.

The whole to be under the command of Major Wm. J. A. McGrath, Twenty-second infantry, to whom all officers will report on arrival at Hunter's Point.

By order of Brigadier General Ward.

(Official.)

JOHN T. DENNY,

Lieutenant-Colonel and A. A. G.

HEAD-QUARTERS FIRST BRIGADE, FIRST DIVISION, }
N. G. S. N. Y., No. 24 PINE STREET, }
NEW YORK, 25th May, 1876. }

GENERAL ORDERS, No. 5.

I. In compliance with orders from head-quarters, First Division, the third class, in the several regiments of this brigade, will parade for rifle practice at Creedmoor as follows :

Three companies from each regiment, to be selected by the regimental commanders, on the second and fifteenth of June ; those remaining, on the twenty-sixth of June. They will march from their respective armories in season to take the 8.30 A. M. train for Hunter's Point.

II. The following officers are detailed to command the detachments :

Colonel John Ward, Twelfth Infantry, June second.

Colonel Josiah Porter, Twenty-second Infantry, June fifteenth.

Colonel Charles S. Spencer, Fifth Infantry, June twenty-sixth.

They will be charged with the preservation of good order and military discipline, and will make written reports to these head-quarters, at the close of their respective tours of duty.

III. Surgeon L. De Forest Woodruff will detail a medical officer from one of the regiments, to report for duty with the above detachment on each day.

By order of Brigadier General Ward,

(Official.) JOHN T. DENNY,
Lieutenant-Colonel and A. A. G.

HEAD-QUARTERS FIRST BRIGADE, FIRST DIVISION, }
N. G. S. N. Y., No. 24 PINE STREET,
NEW YORK, 10th July, 1876. }

GENERAL ORDERS, No. 8.

I. A court-martial is hereby appointed to convene at the armory of the Twenty-second Infantry, Fourteenth street—Sixth and Seventh avenues, on the 20th day of July, 1876, at two o'clock P. M., for the trial of Captain Max Ebler, Company G, Fifth Infantry.

DETAIL FOR THE COURT.

Major and Engineer Charles Watrous, First Brigade Staff.

Captain Charles S. Burns, Twelfth Infantry.

Captain Henry Gimpel, Fifth Infantry.

Major R. W. De Forest, First Brigade Staff, Judge-Advocate.

II. The court will sit without regard to hours, and will not adjourn for a period of more than two days at any one time; the interest of the service requiring the utmost promptness of action.

By order of Brigadier General Ward.

(Official.) JOHN T. DENNY,
Lieutenant-Colonel and A. A. G.

HEAD-QUARTERS FIRST BRIGADE, FIRST DIVISION, }
N. G. S. N. Y., No. 24 PINE STREET,
NEW YORK, 15th July, 1876. }

GENERAL ORDERS, No. 10.

The detail for the court-martial, ordered by General Orders No. 8, O. S., from these head-quarters, is hereby changed as follows:

Major and Inspector Robert Lenox Belknap, First Brigade Staff,

in place of Major and Engineer Charles Watrous, First Brigade Staff, who is hereby relieved on account of illness.

By order of Brigadier-General Ward.

(Official.) JOHN T. DENNY,
Lieutenant-Colonel and A. A. G.

HEAD-QUARTERS FIRST BRIGADE, FIRST DIVISION, }
N. G. S. N. Y., No. 24 PINE STREET, }
NEW YORK, 20th July, 1876. }

GENERAL ORDERS, No. 11.

I. In compliance with orders from division head-quarters, the third class of the several regiments of the brigade (comprising all those who have, by reason of absence or bad shooting, failed to qualify at 100 and 150 yards), will parade for rifle practice as follows:

One-half on Thursday, August third, the other half on Thursday, August seventeenth.

The second class of each regiment (comprising all those who have qualified at 100 or 150 yards and have failed to qualify at 300 and 400 yards) will parade for rifle practice on August twenty-eighth.

The foregoing detachments will be formed in each regiment, into one or more provisional companies, according to strength present, under charge of a suitable number of officers, and will be accompanied by the Regimental Inspectors of Rifle Practice. They will assemble at their respective armories in season to proceed to Creedmoor by the nine o'clock A. M. train from Hunter's Point on the days named.

II. The following officers are detailed to command the above detachments:

Lieutenant-Colonel John T. Camp, Twenty-second Infantry, for August third.

Major Wm. J. A. McGrath, Twenty-second Infantry, for August seventeenth.

Major Wm. G. Wilson, Twelfth Infantry, for August twenty-eighth.

III. Surgeon Bache McE. Emmett, Twelfth Infantry, is hereby detailed as Acting Brigade Surgeon, and will make a detail of medical officers to accompany the foregoing detachments.

By order of Brigadier General Ward.

(Official.) JOHN T. DENNY,
Lieutenant-Colonel and A. A. G.

HEAD-QUARTERS FIRST BRIGADE, FIRST DIVISION, }
N. G. S. N. Y., No. 24 PINE STREET, }
NEW YORK, 11th August, 1876. }

GENERAL ORDERS, No. 13.

I. Before a court-martial, convened pursuant to General Orders Nos. 8 and 10, Current Series, from these head-quarters, and of which Major Robert Lenox Belknap, Brigade Inspector, is president, was arraigned and tried Captain Max Ebler, Company G, Fifth Regiment, infantry, N. G. S. N. Y., on the following amended charges and specifications:

CHARGE FIRST — *Drunkenness on Duty.*

SPECIFICATION — In this that he, the said Captain Max Ebler, commanding Company G, Fifth Regiment, First Brigade, First Division, N. G. S. N. Y., was drunk whilst on duty with his company at rifle practice.

All this at Creedmoor, Queens county, New York, on the 26th day of June, 1876.

CHARGE SECOND — *Insubordinate Conduct to the prejudice of good order and military discipline.*

SPECIFICATION — In this that he, the said Captain Max Ebler, commanding Company G, Fifth Regiment, First Brigade, First Division, N. G. S. N. Y., did assault a sentinel while on duty, depriving him of his musket, and giving him orders without authority.

All this at Creedmoor, Queens county, New York, on the 26th day of June 1876.

CHARGE THIRD — *Mutiny.*

SPECIFICATION — In this that he, the said Captain Max Ebler, commanding Company G, Fifth Regiment, First Brigade, First Division, N. G. S. N. Y., after being ordered by his commanding officer, Lieutenant Colonel Peter Kraeger, to leave the grounds and return to his quarters, did proceed to his company and excite and cause them to resist the execution of said order.

All this at Creedmoor, Queens county, New York, on the 26th day of June, 1876.

CHARGE FOURTH — *Disobedience of Orders.*

SPECIFICATION — In this that he, the said Captain Max Ebler, commanding Company G, Fifth Regiment, First Brigade, First Division,

N. G. S. N. Y., after being ordered by his commanding officer, Lieutenant-Colonel Peter Kraeger, to leave the grounds at Creedmoor, did refuse and neglect so to do.

All this at Creedmoor, Queens county, New York, on the 26th day of June, 1876.

CHARGE FIFTH — *Breach of Arrest.*

SPECIFICATION — In this that he, the said Captain Max Ebler, commanding Company G, Fifth Regiment, First Brigade, First Division, N. G. S. N. Y., after being placed in arrest by his commanding officer, Lieutenant-Colonel Peter Kraeger, and ordered to leave the grounds and return to his own quarters, did not leave the grounds and return to his own quarters, necessitating his final removal from the grounds by the guard.

All this at Creedmoor, Queens county, New York, on the 26th day of June, 1876.

To which the accused, having been duly summoned, appeared and pleaded as follows :

To the specification, first charge — not guilty.

To the first charge — not guilty.

To the specification, second charge — not guilty.

To the second charge — not guilty.

To the specification, third charge — not guilty.

To the third charge — not guilty.

To the specification, fourth charge — guilty.

To the fourth charge — guilty.

To the specification, fifth charge — not guilty.

To the fifth charge — not guilty.

FINDINGS OF THE COURT.

The court, having maturely considered the evidence adduced, find the accused, Captain Max Ebler, Company G, Fifth Regiment, First Brigade, First Division, N. G. S. N. Y., as follows :

Of the specification, first charge — guilty.

Of the first charge — guilty.

Of the specification, second charge — not guilty of assaulting a sentinel; but guilty of depriving a sentinel, while on duty, of his musket, and relieving him from his post without authority.

Of the second charge — guilty.

Of the specification, third charge — not guilty.

Of the third charge — not guilty.

Of the specification, fourth charge — guilty.

Of the fourth charge — guilty.

Of the specification, fifth charge — guilty.

Of the fifth charge — not guilty.

And the court does therefore sentence him, Captain Max Ebler of the Fifth Regiment, Infantry, N. G. S. N. Y., to be cashiered, incapacitated from holding any military commission, and fined to the amount of \$100.

II. The proceedings, findings and sentence of the court are hereby approved.

III. The court-martial, of which Major Robert Lenox Belknap is president, is dissolved.

By order of Brigadier-General Ward.

(Official.) JOHN T. DENNY,
Lieutenant-Colonel and A. A. G.

HEAD-QUARTERS SECOND BRIGADE,
FIRST DIVISION, N. G. S. N. Y.,
NEW YORK, *December 15, 1876.*

COLONEL.—I have the honor herewith to forward the returns of rifle practice of this brigade for 1876.

It gives me pleasure to report that this important branch of the service has received much attention from the several regiments, and the returns show a marked improvement in the number of marksmen, and the general result is satisfactory.

THE NUMBER OF MARKSMEN.

	1875.	1876.
Ninth Regiment.....	39	86
Seventy-first Regiment	24	73
Eleventh Regiment	17	36

This shows a large percentage gained. The Inspector of the Seventy-first Regiment (Captain Hoffman) has especially distinguished himself in his endeavors to promote the interest taken in rifle practice in that command, and it is a matter of regret that this regiment has not a range in its armory, for with such additional practice they would next season undoubtedly stand high on the list.

The Ninth Regiment has shown its usual interest in shooting, by large attendance at Creedmoor on practice days and with a very gratifying result.

The Eleventh has been unfortunate in having an Inspector (Captain Davis) who neglected his duties and paid but little attention to the instruction and improvement of his men; however, he has now been superseded by Captain Burghard, and we may look for more satisfactory results in 1877.

Our practice days were almost without exception cloudy and rainy, accompanied by strong winds.

I strongly urge the necessity of providing some shelter from inclement weather, either portable tents or buildings of some sort.

In general the discipline of the men has been good.

Very respectfully,

Your obedient servant.

CHAS. E. ORVIS,

Major and Inspector Rifle Practice Second Brigade.

To Col. GEO. W. WINGATE, *General Inspector Rifle Practice.*

HEAD-QUARTERS SECOND DIVISION, N. G. S. N. Y., }
BROOKLYN, December 30, 1876. }

COLONEL — I have the honor to report upon the matters of rifle practice in the Second Division of the National Guard of the State of New York during the year 1876, as follows:

The practice of the troops under general orders has been conducted at Creedmoor with a greater advance toward perfection in the working of details, and with more satisfactory general results in merit than in any of the preceding seasons.

Starting only two or three years ago, at a point where, it may safely be said, the number of troops in this division, familiar with the practical use of the State rifle and ball-cartridge, would not aggregate the full ranks of a single company, the close of the present season finds nearly fifty per cent of the rank and file of the Second Division able to use their weapons with excellent effect at ordinary distances, and nearly ten per cent of the number entitled to be ranked as experts with the rifle.

The number of marksmen who have won the "badge" in the command during the year 1876 is 213, as against 155 during the year 1875, but this comparison, favorable as it is, does not indicate

the full degree of improvement, inasmuch as many men have developed, at off-hand shooting at short range, a remarkable proficiency, which, not being supplemented by the required skill at longer range, failed to place them among the winners of the badge. The improvement is also evidenced by the fact that out of 3,210 men practicing during the season in this division, only 1,110, or about thirty-three per cent, remain in the third class at the close of the season; while at the close of the practice of 1875, more than fifty per cent remained in the third class.

There is still perceptible, in most of the organizations, a great lack of a system of well calculated instruction on the part of the company officers for their men. The duties of instruction in marksmanship have been too generally left to the Inspectors of Rifle Practice, whose province is to have general supervision and direction over actual rifle practice, and who are not called upon to instruct each individual in all the minor details which prepare him to enter upon such practice. This is a matter devolving upon company officers, who from the opportunities afforded by their office, are expected to acquire and to impart to their men, the rudiments of marksmanship and preparations for rifle practice.

In my opinion, not only should the company officers of each organization anticipate their required duties by thorough theoretical study and acquirements in this department of their office, but their Creedmoor practice should in all cases be upon a different day than that assigned for the rank and file. All their time when on the range with troops is required in attending to the details of the practice by their men. Too much of the duty of the company officer at the range has been left to the Inspector of Rifle Practice, and in many instances the officer has acted merely as a "scorer" or a "spotter" at the telescope, rather than a careful observer of the *personnel* of the man at the firing point, his rifle, and the manner of using it.

Above all, competition between the officers and the rank and file, which is attendant upon practice in common, is to be disapproved, as one of the most natural results is for the officer to allow the man to depend on his natural aptitude for his success, instead of aiding him by every suggestion in his power, and the anxiety with which his attention is devoted to the points to be made prevents the proper direction of his attention to the duties he owes his subordinates.

The general interest taken by the troops of this division in the

subject of rifle practice has not abated during the year. It has had an important influence upon the general public, whose enthusiasm has in turn reacted upon the troops. One evidence of this is the popularity of the "Creedmoor" entertainments, where opportunities given to the public to witness the proficiency of the men in armory competitions with the rifle are always highly appreciated.

The press has also entered into the matter with interest, and has been a useful and constant critic of the efforts of the troops in practice. The newspapers in Brooklyn have published a systematic and detailed record of the scores and incidents of the season's practice as it progressed, and to the military editor of the leading Brooklyn daily I am indebted for many statistics of practice not required to be furnished by the Inspectors of Rifle Practice.

The diligence of the troops in their attendance upon the duties of practice at Creedmoor has been commendable. In considering the reports of practice in this division, forwarded to you, it should be borne in mind, that a large portion of the practice took place during the oppressive days of the past summer, some of which were so hot as to compel the interference of the attendant surgeon in behalf of the troops.

A fact which becomes more and more apparent each year is, that there are large numbers of troops sent to Creedmoor every season, the result of whose attendance there is merely a waste of time, ammunition, and expense of transportation, because of their lack of preparation for the duties they are there to exercise. The range is not the school for instruction in the elements of marksmanship, but is the place where the soldier is to put in practice what he has learned elsewhere.

All the instruction and a large amount of the practice necessary to make a good marksman of the troops can be had in the armories. In my opinion compulsory armory practice should be a preliminary to range practice, and that no troops should be allowed to go to Creedmoor for rifle practice at State expense (unless on occasions of encampment), except such as had attained a required standard in armory practice.

The amount of time required of the troops during the year for their practice at Creedmoor has been felt by many to be a burden; not that the actual time spent in practice was excessive, but the number of times most of the troops were required to attend, together with the great amount of time consumed in going to and from the range, has magnified the real proportions of the duty required of them.

An encampment of two days at the Creedmoor range, for drill and rifle practice, would afford more beneficial opportunities for the troops, and at less expense to the State for transportation and ammunition, than the whole season's practice as heretofore ordered for each organization, and I am satisfied that such a system would be welcomed by most of the troops as a saving to them. This would also afford to the troops an opportunity for acquiring a practical knowledge of a very essential portion of the education of a soldier, not attainable elsewhere than in camp.

The duties of the Inspectors of Rifle Practice have become more arduous than ever, and the suggestion contained in the reports of some of the most competent of said officers, that they should be compensated for their services, is but reasonable. Their duties are much more tedious, constant and taxing than those of mere Inspectors, the latter of whom receive a compensation.

The unsightly appearance of the rifles of the practicing troops, has been a subject of unfavorable comment. It is the uniform and necessary practice of the good marksmen among the troops, to blacken the front sights of their pieces with paint or lampblack for the space of an inch or two at the muzzle. The bronzing or blueing of the whole rifle barrel, as is done with the United States regulation arm, would be of great assistance to the rifle practice, besides rendering the arm more serviceable. A brightly polished rifle-barrel would be at once discarded by an expert small-bore shot, and the reasons which would actuate him, hold good in their application to military shooting.

The errors in the graduation of the leaf-sights of the military rifles which I commented on in my last report have not yet been remedied.

COMPETITIONS FOR STATE PRIZES.

I attended in person, as required by law, the competitions for prizes offered by the State of New York to the troops of this division. As heretofore, the same were conducted under the auspices of the National Rifle Association, and were carried out with fairness. Said competitions were three in number, viz.: The "Second Division National Guard match," the "New York National Guard match," and the "Cavalry match;" in which the details, conditions, prizes, and the accomplishments of the troops of this division were as follows:

I.

"SECOND DIVISION NATIONAL GUARD MATCH."

Conditions.

Open to teams of twelve from each regiment or battalion of infantry in the Second Division of the National Guard, S. N. Y. All competitors to appear in the uniform of their corps (full dress or fatigue), and to be certified by their regimental commander to be regularly enlisted members in good standing of the regiment or battalion they represent, and to have been such on June 1, 1876.

Weapon, Remington rifle, State model. Distances, 200 and 500 yards; five shots at each distance. Position, standing at 200, any at 500 yards. Entrance fee, one dollar each man.

Prizes.

First. To the regiment or battalion whose team makes the highest aggregate score, the New York State Division Prize, value..... \$100

Second. To the regiment or battalion whose team makes the second highest aggregate score, the "Denslow Prize," a silver trophy, presented by Second Division Head-quarters, N. G. S. N. Y., value..... 100

"This prize is to remain the property of the regiment or battalion winning it in this match until won three times by an individual member of such regiment or battalion, in such competitions as shall be decided upon by such regiment or battalion."

Third. To the regiment or battalion whose team makes the third highest aggregate score, a trophy, presented by N. R. A., value 50

Three prizes, value..... \$250

The scores of the respective regimental teams in said match aggregated as follows:

SUMMARY OF SECOND DIVISION MATCH.

TEAM.	Points scored.	Average per man.	Prizes won.
Twenty-third regiment.....	378	31.50	State division. Denslow. N. R. A.
Fourteenth regiment.....	363	29.38	
Thirty-second regiment.....	336	27.08	
Forty-seventh regiment.....	309	25.75	
Thirteenth regiment.....	305	25.41	
Twenty-eighth regiment.....	228	19.00	

The details of individual scores in this match are included in the schedule annexed to this report, as it has been customary to set them forth, this being the special competition for the troops of the Second Division.

II.

"NEW YORK STATE NATIONAL GUARD MATCH."

Conditions.

Open to teams of twelve from each regiment or battalion of infantry of the National Guard of the State of New York, each man being certified to by his regimental commander to be a regularly enlisted member in good standing of the regiment or battalion he represents, and to have been such on June 1, 1876. All competitors must appear in the uniform of their corps (full dress or fatigue).

Distances, 200 and 500 yards. Position, standing at 200, any at 500. Weapon, Remington rifle, State model. Rounds, five. Entrance fee, one dollar each man.

Prizes.

First. To the regiment or battalion whose team makes the highest aggregate score, the New York State prize, a trophy, presented by the Commander-in-Chief, on behalf of the State of New York, value.....	\$500
Second. To the regiment or battalion whose team makes the second highest aggregate score, a Marquee tent, twenty-four by twelve feet, presented by Wm. H. Baily, Esq., of Dublin, Ireland, value.....	100
Third. To the regiment or battalion whose team makes the third best aggregate score, a trophy, presented by Messrs. Tiffany & Co., Union Square, New York, value.....	75
Fourth. To the regiment or battalion whose team makes the fourth highest aggregate score, a prize, value.....	50
Four prizes, value.....	<u>\$725</u>

In this competition the relative standing of the teams was changed, the scores as a general thing, being slightly less in the team aggregates, than in the division match.

SUMMARY OF THE NEW YORK STATE MATCH.

Team.	Points scored.	Average per man.
Fourteenth Regiment	346	28.88
Twenty-third Regiment	345	28.79
Forty-seventh Regiment	320	26.66
Thirteenth Regiment	314	26.16
Thirty-second Regiment	303	25.25
Twenty-eighth Regiment	226	18.88

III.

CAVALEY MATCH.

Conditions.

Open to teams of five from any troop or other organization armed with carbines, of the National Guard, S. N. Y., each being certified to by their commander to be a regular member in good standing of the troop he represents, and to have been such on June 1, 1876.

They shall appear in the uniform of their corps (full dress or fatigue). Distance, 200 yards. Position, standing. Rounds, seven. Weapon, Remington breech-loading carbine, State model, with either carbine or infantry ammunition. Trigger pull not less than six pounds. Entrance fee, one dollar each man.

Prizes.

- First. To the troop whose team makes the highest aggregate score, a silver-plated water cooler, presented by the Commander-in-Chief, on behalf of the State of New York, value, \$100
- Second. To the troop whose team makes the second highest aggregate score, a trophy, presented by the Adjutant-General, on behalf of the State of New York, value 50
- Third. To the troop whose team makes the third highest aggregate score, a trophy, value 25
- Fourth. A badge has been authorized for competition in this match, to be known as the "Second Division Headquarters prize," and to be presented to the cavalry team from the Second Division, N. G. S. N. Y., making the highest score. The Howitzer Battery of Artillery, Eleventh Brigade, to be entitled to compete for it the same as cavalry. This prize is to remain the property of the troop or battery winning it in this match, until won three times

by an individual member of such troop or battery, in such competitions as shall be decided upon by such troop or battery; value of prize..... \$50

Four prizes, value \$225

To Captain Sandhusen's Separate Troop of the Fifth Brigade, belongs the honors of the division so far as State prizes are concerned, the team from his command winning the third and fourth prizes in this match, among a list of thirteen competitors.

SUMMARY OF CAVALRY MATCH.

Team.	Points scored.	Average per man.
Separate Troop, Fifth Brigade.....	95	19
Separate Troop, Eleventh Brigade.....	59	11.8
Gattling Battery, Eleventh Brigade	72	14.5

The aggregate team score of almost every regiment, was lower than in the corresponding competitions of 1875, but while the scores of the chosen teams are less brilliant, the general average of marksmanship throughout the organization is higher.

I annex hereto a summarized statement of the team scores in the above, and the other competitions in which they were engaged at the annual prize meeting of the National Rifle Association in September, 1876, viz.:

Result.....	1,048	1,864	1,900	1,063	5,864	23.21	2.57

The officers of the Second Division Head-quarters have been conspicuous in giving aid and encouragement to rifle practice. As has been their custom heretofore, they offered a series of prizes for the troops of this division, at the prize meeting of the National Rifle Association, as follows:

PRIZES.

A silver trophy named the "Denslow Prize," of the value of, \$100

This was offered as a prize in the division match, and is to remain the property of the regiment winning it, until won three times by an individual member of the regiment.

A prize named the "Second Division Head-quarters Prize," of the value of..... 50

This was offered as a prize for the organizations of this division armed with carbines, and is to remain the property of the troop or battery winning it, until won three times by an individual member thereof.

In addition thereto they erected and maintained at Creedmoor, throughout the season, commodious quarters at which, during the centennial matches, and the preliminary practice, they entertained at different times, the several teams who came from abroad to compete for the "Centennial Trophy" in the International Rifle Match of 1876.

The marksmen of division head-quarters with their qualifying scores, are :

Major-General Thos. L. Dakin, commanding	4	4	5	3	4	20	5	3	2	5	4	19	39
Col. William J. Denslow, A. A. G.	0	4	3	4	4	15	3	3	3	5	4	18	33
Lt.-Col. Benj. E. Valentine, I. R. P.	5	4	2	5	4	20	3	0	2	3	5	13	33
Captain Robert Herbert, A. D. C.	3	0	2	4	2	11	3	5	4	0	4	16	27

THE FIFTH BRIGADE

Has this year advanced to the front in the matter of comparative improvement in rifle practice. The number of marksmen has been increased to 105 as against sixty in 1875, there being an increase in every regiment in the brigade.

There has been no change in the offices of Regimental Inspectors of Rifle Practice during the year.

The Fifteenth Battalion had no representation in the team competitions of the year, a remissness which, from the report of the Brigade Inspector of Rifle Practice, the Regimental Inspector seems accountable for.

The merits of the practice by the regiments in this brigade in detail, are presented in the report of Major H. S. Jewell, whose services in his office of Brigade Inspector of Rifle Practice, have been performed with assiduity and skill, and to whose efforts, the excellent showing made by the returns from this brigade for the work of the year, is largely due.

THE ELEVENTH BRIGADE

Has this year increased the number of its marksmen from eighty in 1875, to 108. This increase will be found, however, wholly in the Twenty-third Regiment and the Gattling Battery, each of the other regiments having lost instead of gained in the number of marksmen.

No marksmen have as yet qualified in the Separate Troop of the Eleventh Brigade.

The changes in the office of Inspector of Rifle Practice in this brigade during the year are,

Forty-seventh Regiment, Captain A. G. Brown, succeeding Captain G. C. Bradley, promoted.

Thirty-second Regiment, Captain C. F. E. Ritter, succeeding Captain G. Ross, resigned.

The Eleventh Brigade is fortunate in having an Inspector of Rifle Practice, with the experience and executive ability possessed by Major H. S. Manning.

The discipline and order during the practice of the year, have been so far as I am advised, unexceptionable, and there has been exemption from accidents to the troops.

It is admitted by all that the system of rifle practice inaugurated in this State has done much for the elevation and education of the National Guard, and with the modifications and corrections suggested by each year's experience, it will be brought to accomplish eventually, all that its projectors claimed for it.

All of which is respectfully submitted.

BENJ. E. VALENTINE,

*Lieutenant-Colonel and Inspector of Rifle Practice, Second Division,
N. G. S. N. Y.*

Col. GEORGE W. WINGATE, *General Inspector of Rifle Practice.*

HEAD-QUARTERS FIFTH BRIGADE

SECOND DIVISION, N. G. S. N. Y.,

BROOKLYN, December, 4, 1876.

COLONEL.—I have the honor to transmit herewith the consolidated brigade and regimental returns of rifle practice for the year 1876.

In the main, the results achieved by the different organization of the brigade have been good; by the table of comparative analysis given herewith, it will be observed, that in the matter of steady improvement and advance in the different classes, the Thirteenth Regiment stands first. In each and every point it has made an advance.

In no other regiment of the brigade has there been less than an increase of seven per cent of third-class shots, while the Thirteenth has decreased the number twenty-one per cent, and that too in the face of an increase present at last inspection of fifty-five; it has also increased by a very large per centage the number of second-class

shots, and have only been excelled in the number of marksmen made by a very small per centage.

The figure of merit of the regiment have been advanced only 2.22 per cent, and in that respect does not do it justice, and just here, I wish to call your attention to the tables of comparison of the Thirteenth and Fourteenth Regiments. By a comparison of the two tables it will be observed, that in every class, except the marksmen's, the first is a *very* heavy gainer over the second, yet by the system of computing the figure of merit, the second has beaten the first by advancing their figure of merit fifty-five per cent more. The work done by the Thirteenth during the year has been very satisfactory, and is, in a very large measure, due to the care and perseverance of the company officers, who, with one or two exceptions, have cordially co-operated with the Brigade and Regimental Inspector. If care be taken to fill the vacancy about to occur in this command, with a competent and energetic man, the stride of next year will be even greater than that of the past. I am in great hopes that the projected armory range will be built at once and constant practice kept up during the winter and spring.

The Fourteenth, although increasing its figure of merit more than any other regiment, has not made the advance of which it is capable, and which its able Inspector, under favorable conditions, can develop.

This is owing almost entirely to the lack of armory practice during last winter and spring; when the improvements and additions to their armory are completed, Captain Fagan will, without doubt, advance the regiment very fast. As it is, they are second on the list in general improvement, and their team was the only infantry team of the brigade that was able to cope successfully in the fall meeting of the National Rifle Association. The practice of the Fifteenth Battalion has not been satisfactory, and their poor showing has been entirely owing to the carelessness and neglect of its Rifle Inspector.

The results accomplished have been arrived at through no system whatever, and are entirely owing to the natural aptness of the men aided by the few officers who are able to impart instruction in this branch.

In the matter of returns Captain Kelly has displayed even less attention than to his other duties, and they were only obtained through persistent spurring.

The small number of officers and men, and the excellent material

there is to work on in this battalion would enable a faithful and careful Rifle Inspector to leave behind the larger regiments that can not be advanced proportionately. Owing to the size and nature of their armory, practice with ball cartridge can not be had ; why other practice is neglected no reason has been assigned. For the Twenty-eighth Regiment I have no data, except the unaccepted return of last year, by which to make comparison ; if that return was just and correct (you will notice I have used it as far as I could), the regiment has retrograded, but if the scores rendered the Inspector were not correct no just comparison can be made. I am of the opinion that the regiment has advanced, and with possibly a single exception no charge can be made against it. I believe the regiment will show well at the close of next season's practice. The Separate Troop of Cavalry have done well, and their figure of merit is second only to that of the Fourteenth Regiment, although falling four and twenty-eighth one-hundredths per cent below that of last year. Captain Sandhusen deserves great credit for the manner in which he has discharged the additional duties of Rifle Inspector, and for the very creditable showing he has made for his troop during the last two years.

In the matter of the expenditure of ammunition the brigade has probably been less wasteful than any in the State. Of the several series of practice the second, or that coming under the head of third-class practice, was the largest ; in it 1,938 officers and men practiced, using 21,714 rounds against 24,670 rounds consumed by the same number of men in the balance of the division. In the matter of scoring, I found it impossible to prevent false scores and dummy or substitute shooting, except through the use of double score sheets, which I submitted to you and which you have thought well enough of to adopt.

With the exception of the day on which the division practiced, all the scoring has been done on these blanks and without doubt has accomplished all for which they were designed. They have, together with the system of issuing ammunition which I have adopted, been the means of a large saving in ammunition, which otherwise would have been wasted.

Of course, if the scorer who is always detailed from another regiment, can be corrupted or bullied on the sly by the officers in charge of the target, false scores can be smuggled into the record, but not otherwise. No matter how many hands a regimental score sheet

may go through before it falls into the hands of the Regimental Inspector, or how much it may be doctored in transit, all irregularities will be at once discovered when the returns are made to the Brigade Inspector.

From the experience of the past season I am thoroughly convinced that the manner of sending troops to Creedmoor and the distances covered should be changed. I would suggest that for one season at least, the manner of sending troops to the range be left to the judgment of the brigade commanders who are good judges of that which would operate the best in their particular commands.

I would suggest that 200 and 300 yards standing be substituted for 300 yards kneeling, and 400 yards lying, and also increasing the qualifying score at 100 and 150 yards to thirty points, this would increase the amount of shoulder shooting, and develop the men faster and in a most efficient direction.

In the matter of cavalry practice, I suggest that it be so arranged as to be supervised by the Division Inspector; that a Brigade Inspector should be required for a whole day's practice of fifteen or twenty men is a hardship which should be removed.

With the orders for transportation and ammunition for the cavalry trouble has existed during all the past year, owing to the fact that they would only be issued for the division; the Inspector of this brigade has been obliged in every instance to accept them or nothing, and take the chance of their being obtained by the Inspector of the Eleventh Brigade.

Finally, I am of the opinion that in order to bring the National Guard up to the proper standard, the officers must be thoroughly proficient in the *theory* and *practice* of rifle shooting, and that they should not be allowed to shoot with enlisted men. As far as possible the men should be allowed to shoot through each season with one rifle, and for reasons that need no explanation.

All of which is respectfully submitted.

HERBERT S. JEWELL,

Major and Inspector of Rifle Practice, Fifth Brigade.

Col. GEO. W. WINGATE, *General Inspector of Rifle Practice, N. G. S. N. Y.*

HEAD-QUARTERS, FIFTH DIVISION N. G. S. N. Y.,

OFFICE OF DIVISION INSPECTOR OF RIFLE PRACTICE,

HIGHLAND, ULSTER COUNTY, N. Y., Nov. 29, 1876. }

CIRCULAR No. 1.

I. Pursuant to instructions from General and Division Headquarters, and from the General Inspector of Rifle Practice, the following directions are hereby promulgated for the instruction of the officers and members of the National Guard of this division in conducting rifle practice.

II. It is the earnest wish of the commanding General of the Fifth Division that his whole command should become proficient in the use of the military arm, and especially in the practical knowledge of rifle shooting. He hopes during the coming centennial year to produce a team that will not only reflect honor upon themselves, but also upon the division and National Guard of the State. To effect this purpose will require the co-operation of all commanding officers of organizations in the minor details which are indispensable to secure success. And to this end the hearty and enthusiastic support of company commandants is asked, in first, thoroughly instructing their commands in the principles of the sighting, position, and aiming drill, and candle practice, prescribed in Wingate's Manual; also by carefully observing and enforcing the provisions of this order; and he trusts that the regimental and battalion commanders will aid him in furthering this method of instruction in their several commands.

III. The Brigade, Regimental and Battalion Inspectors of Rifle Practice will have supervision of all matters appertaining to that portion of military instruction within the limits of their respective commands under the direction of their commanding officers. They will inspect, or cause to be inspected, from time to time, all armories, ranges, and practice grounds, and see that the necessary regulations for rifle practice are carried out, and that proper returns therefor are made, and report to the Division Inspector of Rifle Practice from time to time, as directed by him, the condition of rifle practice within the respective commands, and what practice of that description has been carried on therein within any period, together with all other matters appertaining to their duties. If, at the conclusion of the inspection of any armory, range or practice ground by any inspector, he shall find any property appertaining to rifle practice missing, injured, unsafe or deficient in any respect, or that such range or practice ground is dangerous, he shall forthwith report the facts in relation thereto to his commanding officer. The Regimental and Battalion Inspector of Rifle Practice shall attend all competitions, and see that the same are conducted with fairness and according to the prescribed regulations, and report to his commanding officer and to the Division Inspector of Rifle Practice the result of all such practice, with the names of the winners, together with such suggestions as he may see fit to make.

IV. Each Regimental and Battalion Inspector of Rifle Practice

will see that the proper provision is made in the armory of his regiment, or the several company armories, to enable the prescribed system of instruction to be carried out, and in case of the use of the sub-caliber rifle that the targets and appurtenances used therein, as well as the rifles of the command, are kept in good order, and will at once report to his Colonel all deficiencies or irregularities.

He is responsible to his commanding officer that the rifle practice of the several companies is carried out in conformity with the official manual of rifle practice, and will aid and assist the commandants of companies in all matters relating to rifle practice.

He will be charged with the supervision of the practice at the range of the members of his regiment or battalion; will see that the necessary targets and markers are in readiness at the time prescribed for the practice by the different classes; that the different companies and classes practice without interference with each other or with other persons using the range; that the scores are properly kept and returned; that order is preserved, and that special care is taken to secure perfect safety.

He will require any member who is intoxicated upon the range, or who, by carelessness or otherwise, endangers others, to desist from firing, and will at once prefer charges against such offender for action by the regimental or battalion court-martial.

He will personally supervise all competitions for the "marksman's badge." He will examine all company returns upon the subject of rifle practice, and add such remarks thereon as he shall deem proper; he will prepare all returns upon this subject required to be made by the regiment, together with all returns or other information that may at any time be required by the General Inspector or the Division or Brigade Inspectors of Rifle Practice.

He will act as umpire in his command in case of all disputed hits.

V. All Inspectors of Rifle Practice are required to qualify as "marksmen" as soon as practicable after their appointment; the Brigade Inspectors under the supervision of the Division Inspector of Rifle Practice, and the Regimental and Battalion Inspectors, under the supervision of the Brigade Inspectors, and they will habitually wear the "marksman's badge" when on duty with the view to encourage the members of their command to compete for such badge.

VI. The Inspectors of Rifle Practice, like Adjutants and Quartermasters, are appointed for the convenience of commanding officers,

in a particular branch of their military duties, but it is the latter alone who will be looked to for the carrying out of the proper instructions, and for the proper training of the officers and men of their command in rifle practice.

VII. All Inspectors of Rifle Practice are notified that they are expected to be familiar with the various details connected with rifle practice, and if without previous experience *must fit themselves for the important position they occupy, forthwith.* They are authorized to make requisition for a rifle and 200 rounds of ammunition for their own use.

VIII. All Inspectors are required to be entirely familiar with the construction of the rifle and the mechanism of the lock. They should be able to take the entire arm apart and to assemble it without the slightest difficulty. They should also be familiar with the names of the different parts of the lock, and should have a supply of parts on hand. They may be obtained by requisition on the Chief of Ordnance.

IX. All infantry organizations having a range available will practice as often as their circumstances will permit, and commandants of regiments, battalions and companies are especially enjoined to encourage practice to the utmost extent.

X. The following paragraphs from Circular No. 1, issued by the General Inspector of Rifle Practice are hereby promulgated for the information of this Division :

7. The target practice at ranges will be divided into three periods. All officers and men who have not been through the prescribed course, will be placed in the third class of rifle practice as if recruits. This class will fire five shots standing at a third class target (Creedmoor new rules) without sighting shots at 100 and 150 yards, and all making twenty-five points or over will be promoted into the second class.

In the second period the third class will practice as before. The second class will practice kneeling at a second-class target (new Creedmoor rules) without sighting shots at 300 and lying at 400 yards, five shots at each distance, when all making twenty-five points or over will be promoted into the first class.

In the third period the second and third classes will practice as before. The first class will fire at 200 yards standing, and 500 yards lying, five shots (with two sighting shots) being fired at each distance.

A final classification will be made in each class. Those who have made twenty-five points or over, in the first class, will be designated "marksmen." Those who have made twenty-five points in the second and third classes will be promoted as before.

9. All officers and members of the National Guard qualifying as marksmen will be authorized to wear a badge of crossed rifles, surmounted by the word "marksmen" worked in gold, on the left forearm, above the cuff, which will be furnished by the State, but they can only retain this badge by maintaining their efficiency at each annual course. The names of all marksmen, and of all in the first class, will be announced in regimental or battalion orders, and a roll of the same will be hung up in the regimental or company armory. The Regimental or Battalion Inspector of Rifle Practice will report to the commandant the names of all who become marksmen, and upon the issuing of the order the badge will be issued. Whenever practicable it will be publicly presented at a brigade, regimental or company parade.

XI. Regimental Inspectors of Rifle Practice are authorized to permit such members of their command as have in their opinion acquired the necessary skill by private practice or otherwise, to compete for the marksman's badge without firing in the second class, and all winners of such badge shall be exempt from practicing in such class. Applications to compete for the marksman's badge must be in writing, stating the grounds upon which the application is based, and must be forwarded to the Regimental or Battalion Inspector through the company commander, who shall indorse his opinion thereon. The application must also be approved by the Brigade Inspector of Rifle Practice. No such application shall be approved by such company commander, or Brigade Inspector of Rifle Practice, if there is a doubt as to the skill of the applicant.

Staff officers may qualify under the supervision of the Inspector of Rifle Practice on their respective staffs.

Those making the requisite score at the prescribed distances with the regulation rifle in a public rifle match, at any of the ranges of this division or at Creedmoor, will be considered as having qualified as marksmen.

XII. Squads from companies will be permitted to practice upon any division range for the purpose of qualifying as "marksmen," provided they are in uniform and the Regimental or Battalion Inspector shall be present to superintend the firing and scoring,

and ammunition may be issued by regimental and battalion commandants for such purpose. In case of the inability of the inspector to be present he may designate some commissioned officer, or the commandant of the regiment or battalion may detail an officer to act in his stead during his absence, who shall perform all the duties for the time being of Inspector of Rifle Practice. But such practice by squads shall be in strict conformity to the rules provided for all regular class practice, and the record shall be preserved in the same manner as provided in paragraph XIII.

XIII. All practice shall be under the superintendence of the Regimental and Battalion Inspector of Rifle Practice, except as herein otherwise provided, and the score of each guardsman shall be accurately recorded in a company book to be kept for that purpose by the company commander. Each day's practice shall be certified as correct *on honor* by the signature of the Regimental or Battalion Inspector of Rifle Practice, or such officer as may be detailed to act in his stead. The scores of all marksmen shall be forwarded by the Regimental or Battalion Inspector of Rifle Practice to the Brigade Inspector of Rifle Practice, who shall transmit a copy of the same to the Division Inspector of Rifle Practice. The marksman's badge will be furnished through brigade head-quarters.

XIV. Regimental and Battalion Inspectors of Rifle Practice will provide themselves with all the requisite scoring blanks before the days of practice. These blanks will be furnished through the Brigade Inspector of Rifle Practice.

XV. If after having fired one or more rounds at a distance a man becomes unable to complete the practice on account of illness, he is considered as not having fired at that distance unless the points obtained pass him into a higher class. In case of the weather preventing a squad or company from finishing a practice, it is to be completed at a subsequent occasion.

XVI. On December first of each year the practice of each regiment or battalion shall be tabulated by the Regimental or Battalion Inspector of Rifle Practice, and its "figure of merit" reported to the Brigade Inspector of Rifle Practice, and by the Brigade Inspector forwarded to the Division Inspector. Such figure of merit shall be obtained as follows:

1. Average points obtained by those shooting in the first period (those qualifying as marksmen in the first instance being put down as averaging twenty-five points).

2. Per centage of marksmen.

3. Per centage of first-class shots, less the per centage of third-class shots. Such per centages being calculated by dividing the number of officers and men (excluding musicians) present at the last regimental or battalion inspection and carrying out the result to two places in decimals.

XVII. The figure of merit of all regiments will be annually published by general head-quarters, and shall constitute the measure of efficiency by all organizations in rifle practice. The names of all marksmen, with their scores, will be published at the same time.

XVIII. All ammunition and requisites for rifle practice are issued by the Chief of Ordnance, Brigadier General Kilburn Knox, office at State arsenal, corner Seventh avenue and Thirty-fifth street, New York city, upon requisitions made directly upon him by regimental commanders and approved by Colonel George W. Wingate, General Inspector of Rifle Practice, office No. 208 Broadway. Such requisitions should be accompanied with a letter explaining for what they are required, and be approved by the Brigade Inspector of Rifle Practice. The Regimental and Battalion Inspector of Rifle Practice shall account to the Brigade Inspector of Rifle Practice for all ammunition used.

XIX. Inspectors of Rifle Practice will see that the necessary ammunition is shipped to the range on the day of shooting and supply each man as he approaches the firing point. Such ammunition must only be used for class firing as above prescribed.

XX. Transportation will be furnished troops to and from the ranges through the regimental or battalion commanders, who will apply for the same to Lieutenant-Colonel Joseph L. Proseus, Division Quartermaster, Yonkers, N. Y.

XXI. The senior general, field or line officer present shall command the troops at the range. He will see that an officer of the guard is appointed, and two guards posted thirty yards in rear of the firing point, where arms should be stacked; the guards shall patrol to and fro in front of the stack, upon a line parallel to the line of targets, and no person shall be permitted beyond this line or the prolongation of this line except the men about to fire, the scorers and commissioned officers, except by permission of the commanding officer. The command "rest" may be given, but the men must not go any distance from the stack. The detail for guard will consist of the officer of the guard, two non commissioned officers, and a suffi-

cient number to perform the necessary guard duty divided into two reliefs, the first of which will immediately be placed upon guard duty, and the second will proceed to rifle practice, the members thereof taking precedence upon the scoring lists of their respective companies. The officer of the guard at the range will observe that the men properly conduct themselves on guard; that they keep their piece either at a right shoulder or support; that they continue patrolling their post, maintaining their soldierly bearing and position without halting, and that they converse with no one unless in the discharge of duty, and that they make the proper salutes as officers pass. This will afford officers of the company an opportunity of instructing the members of their commands in their duty as guards. It would be well to fully instruct the first guards posted as to their duties and direct them to inform the relief, and for the relief to inform their relief; and, from time to time, it would be well for the commandant or officer of the guard to examine the guard for the purpose of ascertaining how thoroughly the guard received his instructions from the guard relieved, and correct any errors. Attention of officers is called to the general regulations respecting guard duty. An officer of the day may also be appointed if deemed necessary.

XXII. The men will march by twos to the firing point, commencing on the right of the squad or company. While firing they will remain two paces apart, and will fire in their assigned positions until they retire. No talking will be permitted by the men while marching to and from the firing point, nor will any of the troops be permitted to address them. All rules and regulations applicable to an encampment, especially all details of guard duty that may be necessary and practicable, will be strictly observed.

XXIII. Officers in command of troops at ranges are particularly enjoined to exercise great care and watchfulness in performing their duties, and in their command over the men they will be held to strict accountability. Any offenses committed in violation of this order, or any conduct subversive of good order or military discipline should be immediately suppressed, and, if necessary, the offending member should be immediately placed under guard, and charges subsequently preferred and a trial had by court-martial. They should impress the minds of the men with the necessity of coolness, self-possession, and silence while firing.

XXIV. The necessary preparation for scoring will be attended to by the Inspector of Rifle Practice before the firing commences.

XXV. No man shall fire under the name of another, or allow his name to be used by a substitute, under penalty of disqualification of both such men.

XXVI. No spirituous or malt liquors *of any kind* will be allowed on the ground.

XXVII. No man will be allowed to insert a cartridge in his rifle except at the firing point, on penalty of disqualification ; nor is he to fire until he is up to the firing point.

XXVIII. No rifle will be allowed at the firing points except the regulation State arm. The officers at the firing points will see that each man takes a proper position in firing, and that the sights upon his rifle are properly adjusted before he commences his score. They will also instruct the men in blacking their sights, which may be done with lampblack dissolved in ether, or by holding them in the flame of a lighted match.

XXIX. The troops must be kept in their places near their respective stacks of arms (though not necessarily in a standing position) during the whole time of practice, except at the intermission for lunch.

XXX. No ball playing, racing or other games will be allowed during the time of practice.

XXXI. Inspectors will be careful to see that in firing kneeling the men assume the proper position, and particularly that they sit firmly upon the right foot, and place the left elbow well in front of the left knee, leaning the body slightly forward. The practice of placing the elbow upon the knee-cap brings two round surfaces in contact and renders the position unsteady.

XXXII. Each man will practice with his own piece, the Regimental or Battalion Inspector assisting him in obtaining the correct elevation, and, if necessary, firing it, not to exceed twice for that purpose. If any piece is defective it will be reported without delay, and the ordnance officer will see that it is returned to the Chief of Ordnance, and either repaired or a new rifle issued in its stead.

XXXIII. It is advisable that the men practice in their fatigue uniforms, as the fitting of the dress coat and buttons interfere with good marksmanship.

XXXIV. The attention of regimental and battalion commandants is called to the alteration of trigger pulls, which, under no circumstances, should be permitted to the men. It should only be done by a competent gunsmith or armorer. *Under no circumstances* should

the men be permitted to tamper with the mechanism of the locks nor any part of the rifle. The minimum of the trigger pull is six pounds.

XXXV. Inspectors of Rifle Practice must see that the men have wooden wiping rods for wiping their guns, and under no circumstances should the iron ramrod be used for cleaning the gun when wooden wipers can be had. Arrangements should be made to have a quantity at each range. Wiping of the rifles will only be allowed between distances.

XXXVI. Commanding officers should not permit their men to sit or lean on their rifles. In ordering or stacking arms the men should be specially cautioned to avoid sudden shock or wrench to their rifles. They should be frequently told that their rifles in time of need are their best friends; that they are a delicate piece of mechanism and require very careful handling.

XXXVII. The men must be instructed that their rifles should be thoroughly cleaned and oiled immediately after finishing the day's practice. The guns should be examined at least once a week to prevent rusting, and an oil patch passed through the barrel. The best material for this purpose is cotton flannel with a drop or two of sperm or armor oil.

XXXVIII. In marching to and from the range bayonets will be habitually carried in the scabbard; and commanding officers of regiments, battalions and companies and file closers are especially enjoined, if at *route step*, to rigidly enforce paragraph 231 of Upton's Tactics, with regard to the men keeping the muzzles of their rifles elevated, so that in case of a rifle being accidentally loaded a premature discharge would not injure a comrade.

XXXIX. After the firing is completed, and before the troops leave the range, every rifle should be carefully inspected, for the purpose of ascertaining if any are loaded, and as to their cleanliness.

XL. The foregoing instructions are to be carried out with such other details not conflicting therewith as may be directed by the Brigade Inspector of Rifle Practice.

XLI. Blanks and circulars of instructions can be obtained upon application to the Division Inspector of Rifle Practice through the Brigade Inspectors of Rifle Practice.

XLII. Inspectors of Rifle Practice will, in corresponding with the Division Inspector of Rifle Practice, address Lieutenant-Colonel John Bodine, Highland, Ulster county, N. Y. All Regimental and

Battalion Inspectors of Rifle Practice must forward their communications to the Division Inspector of Rifle Practice through the Brigade Inspector of Rifle Practice, who will indorse thereon their views and opinions as to the questions referred to in such communications.

XLIII. The Inspectors of Rifle Practice will promptly, and without fear or favor, report to the commandant of their respective brigades, regiments or battalions, any improper conduct of the members of the organization shooting; and commandants of brigades, regiments and battalions are especially enjoined, and will be held strictly responsible, for the enforcement of the rules governing troops at ranges, and any violation of the provisions of this order or of general orders from general head-quarters upon this subject, should be followed by summary and adequate punishment.

XLIV. The Division Inspector of Rifle Practice would state for the information of the Division, that owing to the lateness of the season it will be impossible this fall to carry out the intention of the Division Commander in offering badges for the best shots, but he takes pleasure in announcing that arrangements are being perfected by which competitions may be had in the spring of 1876 for the best shot in the division, brigade, regiment, battalion and company, and that with the instruction which will be given during the winter months together with the practice that will be had for the competitions to be offered next spring and the competitions for the marksman's badge, he trusts that his highest anticipations may be realized by the production of a team that shall be second to none at the butts of Creedmoor in the fall meeting in 1876. And to this end let us all labor with an earnest and united purpose.

JOHN BODINE,

Lieut.-Col. and Inspector of Rifle Practice.

Approved

J. W. HUSTED, *Major-General Commanding.*

HEAD-QUARTERS FIFTH DIVISION, N. G. S. N. Y.
OFFICE OF INSPECTOR OF RIFLE PRACTICE, ULSTER COUNTY,
HIGHLAND, December 23, 1876.

Col. GEO. W. WINGATE, *General Inspector of Rifle Practice* :

COLONEL. — Herewith I have the honor to transmit the several brigade and regimental reports of rifle practice in Fifth Division, also reports from Colonel John T. Underhill, Twenty-seventh Regiment, and Captain Douglass Smythe, Sixteenth Battalion, on the location, condition and appointments of the ranges of "Glendrake" and "Morsemere," to which I will add such information as you may desire of the Fifth Division range at Poughkeepsie.

The sum of \$1,500 appropriated by the State for the Fifth Division was divided equally between the three ranges, "Glendrake," "Morsemere" and "Fifth Division range" at Poughkeepsie, the latter range being located one and a-half miles east of court-house in a lot containing about seventy acres. It is furnished with regulation iron slabs for five third-class targets which can be changed to three second-class or two first-class targets as needed. The butts are backed by a hill, at the foot of which stand the targets, put up on the Creedmoor plan from drawings and specifications furnished by yourself. The grounds permit a range from 100 to 1,000 yards inclusive.

With some projected improvements in leveling the ground, I think this range will compare favorably with the best in the State, except Creedmoor. It was formally opened on the first of August, and has since been used by the Twentieth and Twenty-first Regiments. I take pleasure in calling your attention to report of practice of Twenty-first Regiment as showing the proficiency attained by use of range this season. I cannot commend too highly the gentlemen and officers of the National Guard who have given their time and money so freely towards the perfecting of the three ranges before mentioned, and who have by their presence and example done so much to create a healthy emulation among the privates of the several organizations.

You will notice that each range has its peculiar construction, both of embankments and targets, and yet each seems to work to the satisfaction of its officers. It would seem, however, that the iron slab targets, all things considered, are much the best. I notice that the officers of "Morsemere" propose an improvement by which the target will be run back for marking so as not to expose the marker. This is the only safe course, as in military matches where numbers

of raw men are shooting, accidents are sure to occur sooner or later from any exposure of the person of the markers.

In pursuance of an order from division head-quarters directing a match to be held on "Fifth Division range" by teams of twelve from each regiment or battalion, for trophy offered by the State, and known as the Division prize—conditions: Rifles, Remington State military; distance, 200 yards standing, 400 yards kneeling, and 500 yards any allowed by regulations; five shots by each member of teams at each distance—match under direction of Division Inspector. A report in detail please find appended.

It is proper to add that in this match the Twentieth Battalion team was at a disadvantage, having had but little previous practice, and considering the circumstances done remarkably well. I was informed by Colonel Underhill that the Twenty-seventh Regiment team contained only a part of his best shots on account of missing the connection with a train.

The day was extremely chilly and quite gusty; I consider the scores good under the circumstances.

I think I am warranted in saying that with the marked improvement of the past year, and the interest displayed by both officers and men, that the Fifth Division bids fair to take a leading position in this important qualification of the soldier, but I have, in common with many others in this and other divisions, noticed the evident want of a more thorough and efficient aiming and position drill in the armory, as directed in the manual. This may in some cases be excusable for want of room in armories, or from the scattered location of components of regiments. I am of the opinion that, so far as practicable, no man should be allowed to expend ammunition at the targets before he has been taught the handling of his piece and correct position in firing.

The arms of the several organizations are in good condition, so far as I have been able to inspect the same.

It is a noticeable feature that since the introduction of rifle practice the guardsmen have been careful of their guns, knowing that this is indispensable to preserve their fine shooting qualities.

In conclusion I can only add my concurrence in the general opinion that the men should be supplied with overcoats, blankets and haversacks to protect them from sudden changes of wet and cold in the discharge of their duties in camp and on the range. The State can surely afford to deal liberally with the National Guardsman who is willing to give his time and means to insure the public a competent

and effective force in case of an emergency. I mention this as suggested at different times by the exposure of the men on the ranges in rifle practice.

I inclose Circular No. 1, issued by me since making last annual report, made up in part from circulars emanating from your office, with such additions as seemed necessary for the proper working of rifle practice in Fifth Division, and which I trust will meet with your approval.

Very respectfully,

Your obedient servant.

JOHN BODINE,

Lieut.-Col. and Insp. Rifle Practice, Fifth Division, N. G. S. N. Y.

P. S. — I have been unable to obtain a report from Twentieth Battalion.

HEAD-QUARTERS, SIXTEENTH BATTALION, INFANTRY,

N. G. S. N. Y., OFFICE OF INSPECTOR OF RIFLE PRACTICE,

111 BROADWAY, NEW YORK, *December 1, 1876.* }

Major F. SHONNARD, *Inspector of Rifle Practice, Seventh Brigade:*

MAJOR. — I have the honor to report to you the following statements concerning the condition and efficiency of the range of the Yonkers Rifle Association, at Yonkers :

APPOINTMENTS OF THE RANGE.

Morsemere range is provided with eight targets, all interchangeable as second and third class targets, with all distances up to 500 yards. The targets are of wood, made according to Creedmoor regulations. Each target is provided with a thick turfed butt or mantlet for the marker, a danger signal, telegraph bell, store and shelter for winter use. One target is used as a movable man-target, being a life-sized figure, running on an iron track. This is used up to 300 yards. Wires connect all the butts to the different firing points, and reduce all danger to markers and all mistakes in marking to a minimum. Rapidity and accuracy in marking shots compare favorably with Creedmoor. At the firing points tents are provided, most of them fitted up as winter quarters, with stoves, fuel, etc., and provided with glasses, stools, rubber blankets, blackboards, etc. Each firing point has blinds to insure shooting on the right target; there are several wind flags, and a large vane and wheel. A tight board fence,

twelve feet high, affords privacy to the range ; a restaurant has been built by the association, and kept in constant running order. The ground, which last year was in great part swampy, has been thoroughly drained, trees cut down, and shooting can now be had from every point on the range.

COMPETITIONS.

There have been over fifty competitions held at Morsemere during the last year, including short range, midrange, and military matches for prizes of a total value of over \$550. The shooting at 500 yards has developed at that range the finest shooting on record, notably, strings of consecutive bull's eyes of fifty, thirty-two, twenty-nine and twenty, and in team shooting an average of ninety-five and two-thirds in a team of six men. These results, I believe, have been attained nowhere else. Several members of the National Guard have been prominent in these competitions. There have been no accidents of any kind on the range.

The National Guard have had the free use of the range for practice and matches, and on most all occasions have had the help and advice of the skilled members of the association.

EXPENSES.

The cost of the range has been considerable during the last year, as many improvements have been made, chiefly in extending the range for the use of the National Guard. The principal items have been draining and leveling, construction of five new targets and butts, erecting restaurant and winter quarters, pay of superintendent, rent, renewal of targets.

The association, in spite of liberal contributions among its members, is in debt, and relies upon an appropriation from the State to carry it through successfully to another year.

One important change is contemplated for the ensuing year, rendered necessary by military practice : the targets, now stationary, are to be run into and out of the butts on iron tracks ; this will avoid all danger to markers ; although there has not as yet been an accident, it is always a possibility, when large bodies of men are shooting.

Very respectfully.

DOUGLASS SMYTH,

Captain and I. R. P., Sixteenth Battalion, N. G. S. N. Y.

HEAD-QUARTERS TWENTY-SEVENTH REGIMENT, INFANTRY, }
N. G. S. N. Y., TUOKAHOE, N. Y., Nov. 27, 1876. }

Major and Brevet Colonel FREDERICK SHOWNARD, *Inspector Rifle Practice Seventh Brigade, N. G. S. N. Y.:*

COLONEL. — This being the close of the shooting season I hasten to lay before you a report of the doings of my command for the year past in the matter of rifle practice.

The American Rifle Association, under whose management the range at Glendrake is conducted, intended to so perfect the accommodations for the general public as well as the National Guard during the past year that the range would be not only attractive, but self-supporting. To that end they expended a considerable amount of money, first in putting the targets and butts in the most perfect order; this has been done in the most substantial manner; each target is placed in a sliding frame or sash, which stands in a pit; when in use the target is raised, and on being struck is lowered into the pit; a notarial seal is placed over the hole and the target again raised; this of course after the shot has been marked. Each frame is so made that to take out a third-class and replace by a second-class target is but the work of a few moments. These pits which are walled on all sides and thoroughly drained, are connected by speaking-tubes and covered with a heavy roof of thick plank; when in use the half remains covered and when not in use the targets are lowered, the cover shut down and securely fastened. Thus far no accidents, even of the most trivial nature, have occurred. Second, the preparation for shooting at 500 and 600 yards were made most complete. Mounds were made at each firing point, grounds cleared and ample precautions taken for safety to both shooters and visitors, wind signals and every necessary properly considered and erected. Suffice it to say that the range is now in the finest working order.

The work of my regiment during the past year, owing to the close attention and energetic and persistent efforts of my Inspector of Rifle Practice, Captain A. W. Peck, will compare favorably with that of any other in the guard. Continuous practice has been held on the range; commencing in early spring and continuing steadily throughout the year. In June the Twenty-seventh was encamped at Camp Blauvelt, on the range, and each company was exercised at the targets for an hour each day. The encampment continued for seven days and has, I think, done the regiment more actual good than any

company drills, or occasional parades and battalion drills could ever accomplish.

From July seventeenth to August ninth, six competitions were held for places on the regimental team to compete for the Blauvelt badge, in accordance with circular giving instructions for such competitions. In these meetings ninety men competed for places. On the twenty-third of August a friendly match was shot between teams of the Seventy-first Regiment and Twenty-seventh Regiment; distance, 200 and 500 yards, five shots at each distance; team consisting of ten men each. In this the Seventy-first team were the conquerors, beating by seventeen points. When it is understood that the Seventy-first team was composed at least in one-half of members of the Scottish-American club, the best known shooting club with military rifle, and that the Twenty-seventh team led at 500 yards, I think this to be a subject of congratulation to the Twenty-seventh. On the thirtieth of the same month our team contended with a team from the Eighth Regiment; teams consisting of twelve men each; shots and distances same as before. Here again the Twenty-seventh were beaten by a score of but fourteen points, and here again they labored under the disadvantage of shooting against old marksmen. The score of the Twenty-seventh as before was the best at 500 yards. On the twentieth of September, Company I, Twenty-seventh Infantry, competed for a company medal, and during the month of October Company B, Twenty-seventh Infantry, was in almost constant practice. The result of the marksman competition has already been transmitted. It is my experience that the proximity of Creedmoor to Westchester county impedes in a great measure the progress of rifle practice at any of the several ranges located therein, and it is also my experience that unless transportation is furnished for practice of all kinds, supposing the practice to have been judiciously ordered by the proper authority, no satisfactory grade of merit will ever be reached. In my own command the companies located in Morrisania seldom or never appear before the targets unless positively ordered there, and the attendance is small and unwilling. Other companies respectfully request that they be excused from going to the range and that ammunition be furnished them to practice at some place nearer home. I consider the matter of rifle practice of the greatest importance, and one that no expense should be spared to perfect, and while on this subject permit me to say, that were the National Guard supplied with overcoats and knapsacks, the out-door practice could

extend throughout the year and not be crowded in with the fair weather parades. In conclusion, I take this occasion to call your attention to the effective labors of Captain A. W. Peck, Inspector Rifle Practice, Twenty-seventh Infantry. Taken from civil life, without any previous knowledge of military matters, he has in the short time he has been connected with the National Guard placed himself, by hard study and close attention to duty, in the front rank of instructors. The Twenty-seventh owes him a debt it can never repay.

I had omitted to mention before, that a team of the Twenty-seventh competed for the Fifth Division Trophy at Poughkeepsie; the score was inferior, owing to the fact that the regular team could not be got together.

I have the honor to be, Colonel,

Yours to command.

JNO. T. UNDERHILL,

Colonel Twenty-seventh Infantry, N. G. S. N. Y.

HEAD-QUARTERS SEVENTH DIVISION, N. G. S. N. Y., }
ROCHESTER, *December 13, 1876.* }

Colonel GEORGE W. WINGATE, *General Inspector of Rifle Practice, N. G. S. N. Y.:*

COLONEL.—I have the honor to forward herewith the returns of rifle practice of the Twenty-fifth Brigade.

The rifle practice of this division has been confined to the Fifty-fourth Regiment, the two batteries and the Separate Troop of Cavalry attached to the Twenty-fifth Brigade. The Twentieth Brigade at Elmira, and the Separate Company of Infantry at Penn Yan, are too far from the seventh division range to admit of frequent practice, although I think there is no reason why, at a very small outlay, ranges could not be constructed at Elmira, Corning and Penn Yan, which will be all that is necessary for practice not only, but that will give them sufficient encouragement to enter teams for the State prize at the division range at Rochester, in the fall, or in fact, any other matter or competitions.

This year has not been a good one for rifle practice owing to the exposition, politics and the many other matters incidental to the centennial year.

Lieutenant-Colonel J. R. Campbell, Division Inspector, Major F. Schoeffel, Brigade Inspector, Twenty-fifth Brigade, and Captain E. J. Phelps, Fifty-fourth Regimental Inspector, have qualified as "marksmen." The scores are detailed in the accompanying report. The other Rifle Inspectors of this division are unable to qualify, owing to the time it would take to reach the seventh division range and the unusual expense necessary thereto.

Herewith I forward the record of the Seventh Division competition for State prize. The competition for this prize was very exciting this year; so much so that after the match protests and counter-protests were plenty, and some of them very finely drawn. I could not see my way clear to decide in favor of any company team. The only point against Company C, Fifty-fourth Regiment, was the fact, that the Captain of the team fired his gun at the 500 yard target before he had completed his score. I was in some doubt about deciding against this team on that account, as the Captain was very positive he did not do it for practice and I did not see that it materially affected the score. Hence, my letter to you at that time asking for advice; your favor decided my course. I made my report to the Major-General commanding, that I could not decide in favor of any team and stated my objection, and recommended that the scores be declared null and void, another day appointed for the competition. General Brinker then issued the indorsed special order, No. 17, and competition took place as ordered and resulted in a victory for Company H., Fifty-fourth Regiment, N. G. S. N. Y.

I am of the opinion that my deciding not to give the prize to any competitor in the first match, did more good than a dozen matches ordinarily would have done. At the second match the men were on time, their dress was faultless, their equipments in good order with the guns at regulation pull of trigger, etc., etc., and their general deportment was unexceptionable. All were satisfied and I venture to say that the competition next year will be so conducted by both officers and men that there will be no need of protests.

I am, Colonel, very respectfully,
Your obedient servant.

JAMES R. CAMPBELL,

Lieut.-Col. and I. of R. P., Seventh Division, N. G. S. N. Y.

HEAD-QUARTERS SEVENTH DIVISION, N. G. S. N. Y.,
 ROCHESTER, November 22, 1876. }

SPECIAL ORDERS, No. 17.

Protests having been entered and allowed against certain teams who competed for the State prize on the fifteenth instant, and the other teams having been ruled out for violation of rules governing team shooting, the shooting on that day is hereby declared null and void.

Commandants will report with their teams, in fatigue dress, to Lieutenant-Colonel J. R. Campbell, Division Inspector of Rifle Practice, at the range, on Friday, November 24, 1876, at ten o'clock A. M. The shooting will be conducted according to the rules laid down in Wingate's Manual for team shooting.

By command of

(Official.) MAJ.-GEN'L HENRY BRINKER.

FRED'K COOK, *Colonel and A. A. G.*

HEAD-QUARTERS THIRTY-FIRST BRIGADE,
 EIGHTH DIVISION, N. G. S. N. Y.,
 BUFFALO, December 1, 1876. }

Col. GEORGE W. WINGATE, *General Inspector of Rifle Practice.*

COLONEL. — I have the honor to forward herewith report of Captain John T. Rees, Inspector of Rifle Practice, Seventy-fourth Regiment, with the scores made at the practice of that command during the past season in duplicate.

Captain Rees requests me to explain that but three of the companies have practiced more than once, and that, as they were ordered to the range in the afternoon, the lateness of the hour, when the second class had finished firing, made him decide to allow those who had qualified in that class to fire at 500 yards first, believing they could see to fire at 200 yards later, when they could not see in the regular order; he found, however, it was impossible, and thus no 200 yards practice appears on that score. Of those who have qualified as marksmen in the first class, it has been mostly in the presence of both Captain Rees and myself at the fall meeting of the range, or at the Eighth Division match for the State prize, which will also apply to those reported hereafter in this report. A few have qualified

before me, when I have accompanied them to the range that they might have a chance to do so, after they had made scores in private practice showing their ability to do so. Most of the practice of companies was had before I obtained from you the score blanks on which they are reported; therefore it was impossible to have them signed by the individual scorers.

I also inclose report of Battery A, Thirty-first Regiment, with rifles, under my personal inspection, by order of the Brigadier-General commanding, on the seventeenth of October, at which time only practice in the third class was had, three only passing into the second class, one of which has since qualified as a marksman at the division match. I allude to Corporal Frank Blank, whose score was, at 200 yards, 3, 3, 3, 3, 4—16; at 500 yards, 0, 2, 4, 4, 0—10; total, 26.

The Sixty-fifth Regiment, owing to its having no Inspector until very recently, has had comparatively little practice. Captain Henry A. Menker, the Inspector of the Sixty-fifth Regiment, is a gentleman well qualified for the position, and, I believe, will give good satisfaction and prove a valuable officer. I understand he has made several very good scores sufficient to have qualified, but not in my presence. I have only been present at the range with him once, when he made nineteen at 200 yards, and five at 500 yards, a total of twenty-four points. Captain Menker, having been called suddenly from town about two weeks since, and not having returned, I have been unable to obtain his report, but will procure it at the earliest possible moment and forward the same. The six separate companies of infantry attached to this brigade, and all but one recently organized, have had no practice that I am aware of except in private. The Fourth Separate Company, located at Warsaw, sent a team of five men to the Division match, three of whom qualified as marksmen, as follows;

W. W. Shermin, 200 yards.....	4	0	4	5	3	16	
W. W. Shermin, 500 yards.....	4	2	0	3	4	18	
							29
E. Buck, 200 yards	5	5	3	3	4	20	
E. Buck, 500 yards	4	0	2	4	0	10	
							30
G. C. Goodell, 200 yards.....	5	3	4	4	2	18	
G. C. Goodell, 500 yards.....	0	2	5	3	0	10	
							28

Of the men composing this team, of their soldierly bearing and gentlemanly conduct, I cannot speak too highly. I have the honor also to report the names of the following officers who have qualified in my presence :

Colonel A. J. Barnard, Inspector Eighth Division ; Colonel R. H. Plumb, Chief Artillery, Eighth Division ; Lieutenant-Colonel G. B. Rich, Ordnance Officer, Eighth Division ; Colonel Geo. E. Mann, Engineer, Eighth Division ; Major John A. Holloway, Inspector, Thirty-first Brigade ; Captain H. Willet Linderman, Battery A, whose scores I inclose herewith. The lateness in the season before the range was supplied with targets, together with the small number of the same, have made the practice this year comparatively light ; there has, however, been exhibited a growing interest in marksmanship, particularly since the fall matches ; and also a fair degree of proficiency. I believe another year will show very good results. I would respectfully recommend that the range be supplied with at least four more 500-yard targets. I would respectfully request that I be supplied with twenty-four marksman's badges to be presented to those who have qualified, as follows :

Seventy-fourth Regiment	13
Battery A, Thirty-first Brigade	2
Fourth Separate Company Infantry	3
Officers Eighth Division and Thirty-first Brigade Staff.....	6
	<hr/>
	24

I have the honor to be, Colonel,

Your obedient servant.

E. A. ROCKWOOD,

Major and Inspector R. P., Thirty-first Brigade, N. G. S. N. Y.

HEAD-QUARTERS SEVENTH REGIMENT, N. G. S. N. Y., }
NEW YORK, October 30, 1876.

I, W. C. Casey, Captain commanding I Company, Seventh Regiment Third Brigade, First Division, N. G. S. N. Y., hereby certify that the men whose scores are attached to this paper were members of said company upon the 3d of July, 1876, and are now active members of said company.

WILLIAM C. CASEY,

Captain Commanding I Co., Seventh Regt., N. G. S. N. Y.

I, Charles F. Robbins, I. R. P., Seventh Regiment, N. G. S. N. Y., do certify, upon honor, that I personally attended and superintended the shooting of Company I, Seventh Regiment, in the Nevada Badge Match at Creedmoor, on the 28th of October, 1876, the scores of which are hereto annexed; that said scores are correct, the points recorded being made by the men opposite whose names they are entered, with separate rifles of State pattern, and as issued, and with regular ammunition, State issue. And all such men are known to me, by certificate of Captain W. C. Casey, to have been duly enlisted members of said company, on or before 3d July, 1876.

CHARLES F. ROBBINS,

Captain and I. R. P., Seventh Regiment, N. G. S. N. Y.

HEAD-QUARTERS, SEVENTH REGIMENT, N. G. S. N. Y., }
NEW YORK, October 30, 1876. }

I, Joseph Holland, I. R. P., Third Brigade, First Division, N. G. S. N. Y., do certify that I personally attended and superintended the shooting of I Company, Seventh Regiment, N. G., in the Nevada Badge Match, on the twenty-eighth of October, said company being in the brigade in which I am commissioner; that I have examined said scores; that they are correct as attested by the Regimental I. R. P., in every particular.

JOSEPH HOLLAND,

Major and I. R. P., Third Brig., First Div., N. G. S. N. Y.

NEVADA BADGE MATCH.

The above score made in competition for the Nevada badge, was made under my personal supervision, and I hereby certify on honor that it is correct.

JAS. MANNING,

Lieut.-Colonel and I. R. P., Sixth Div.

SYRACUSE, October 28, 1876.

OFFICE OF GENERAL INSPECTOR OF RIFLE PRACTICE,
 No. 208 BROADWAY,
 NEW YORK, November 6, 1876.

Col. WILLIAM C. CHURCH, *Army and Navy Journal* :

COLONEL. — I have the honor to enclose herewith returns of rifle practice for the Nevada badge by the following organizations, viz.:

A Company, Forty-eighth Regiment.

I Company, Seventh Regiment.

D Company, of the Twenty-seventh Regiment, entered for the badge, but did not shoot, probably on account of the difficulty of being certain of parading forty-six men, who must, according to the terms of the match, be present to enable the badge to be competed for.

Very respectfully yours.

GEO. W. WINGATE,
Colonel and General Inspector of Rifle Practice.

COMPANY D, SEVENTY-FIRST REGIMENT, N. G. S. N. Y.,
 NEW YORK, October 31, 1876.

BROOKLYN, October 30, 1876.

I hereby certify that this is a true copy of the original scores now in my possession, and that I was present during the whole match; and also certify, upon knowledge and belief, that each man shot in his own name, and with a separate rifle, and was a member of this company on July 1st, 1876.

WINGFIELD G. BURTON,

Captain and I. R. P., Twenty-third Regiment, N. G. S. N. Y.

STATE OF NEW YORK:

PAYMASTER-GENERAL'S OFFICE,
ALBANY, December 30, 1876. }

To *His Excellency* SAMUEL J. TILDEN, *Governor and Commander-in-Chief*:

SIR. — I have the honor of making the following report from the Paymaster-General's office for the year 1876.

In payment of bounties there was disbursed through this department during the year, the sum of \$125, of which sum fifty dollars was paid from the "Proclamation of Governor Morgan Fund," and seventy-five dollars under chapter 184, Laws of 1863.

The number of applications for bounties during the year was 101, amounting to \$6,800, of which applications but two could be allowed and paid.

The details of these payments and of the balances of all moneys, will be found in the following table.

Respectfully submitted by your obedient servant,

HERMANN UHL,
Paymaster-General.

PAYMASTER-GENERAL'S OFFICE.

ANNUAL REPORT

OF THE

Auditor of the Canal Department

RELATIVE TO THE

EXPENDITURES ON THE CANALS

OF THE

STATE OF NEW YORK.

1876.

TRANSMITTED TO THE LEGISLATURE JANUARY 9, 1877.

JEROME B. PARMENTER, STATE PRINTER.

1877.

STATE OF NEW YORK.

No. 8.

IN ASSEMBLY,

January 9, 1877.

ANNUAL REPORT

OF THE

AUDITOR OF THE CANAL DEPARTMENT RELATIVE
TO THE EXPENDITURES ON THE CANALS OF THE
STATE OF NEW YORK, 1876.

STATE OF NEW YORK:

CANAL DEPARTMENT, }
ALBANY, *January 1, 1876.* }

To the Honorable the Speaker of the Assembly:

SIR. — I herewith transmit the annual report required by law from this department, showing the expenditures on the canals for the fiscal year ending on the 30th day of September, 1876.

I have the honor to be,

Very respectfully,

Your obedient servant.

G. W. SCHUYLER,

Auditor.

REPORT.

STATE OF NEW YORK:

CANAL DEPARTMENT, }
ALBANY, December 1, 1876. }

To the Legislature :

The Auditor of the Canal Department, in obedience to the requirements of the statute, submits the following report of expenditures on the several canals of this State for the fiscal year ending 30th September, 1876.

BY CANAL COMMISSIONERS.

The following is a summary statement of the amounts expended by the several commissioners during such fiscal year, the particular items of which are fully exhibited in the tables appended hereto, and particularly referred to in such summary :

	<hr/>	3,430 18

Genesee Valley Canal. See J.

John D. Fay.....	\$678 13	
James Jackson, Jr.....	10,933 90	
	<hr/>	11,612 03

Total on all canals.....	<hr/>	<hr/>	\$660,291 98
--------------------------	-------	-------	--------------

The following were the sums in the hands of the Canal Commissioners at the close of the fiscal year, viz. :

Adin Thayer.....	\$7,659 75	
Christopher A. Walrath.....	7,980 46	
James Jackson, Jr.....	5,215 99	
Reuben W. Stroud (deceased).....	4,472 48	
	<hr/>	\$25,328 68

The following table exhibits the expenditures by the Canal Commissioners for clerk hire and sundry individual expenses :

ITEMS.	Adin Thayer.	Benben W. Stroud.	Christopher A. Walrath.	James Jackson, Jr.	Totals.
Clerk hire.....	\$2,000 00	\$166 67	\$1,833 33	\$2,000 00	\$6,000 00
Rent	775 00	72 00	400 00	1,247 00
Stationery.....	390 76	570 87	961 63
Postage.....	192 36	66 00	38 00	296 36
Telegraphing.....	330 39	13 25	228 52	156 15	728 31
Incidentals	180 05	17 50	60 40	133 28	391 23
	\$3,868 56	\$197 42	\$2,831 12	\$2,727 43	\$9,624 53

BY ENGINEERS.

The expenses of the ENGINEER CORPS on the several canals in this State, during the last fiscal year, amount to the sum of \$48,419.38. Such expenditures are particularly set forth in statement K, appended hereto, and are distributed among the several canals, as follows:

Erie canal.....	\$16,881 76
Champlain canal.....	1,656 55
Black River canal.....	51 43
Oswego canal.....	492 69
Cayuga and Seneca canal.....	496 44
Chemung canal.....	240 94
Chenango canal.....	179 04
Oneida Lake canal.....	117 28
Genesee Valley canal.....	2,251 37
Erie canal (extraordinary repairs).....	2,110 50
Oswego canal (extraordinary repairs).....	6 00
Oneida Lake canal (extraordinary repairs).....	130 00
Enlargement Champlain canal.....	14,751 83
Survey of Erie canal.....	9,053 55
	<hr/>
	\$48,419 38
	<hr/>

BY CANAL COMMISSIONERS.

The expenses of the ENGINEER CORPS on the several canals in this State, during the last fiscal year, amount to the sum of \$21,091.81. Such expenditures are particularly set forth in statement L, appended hereto, and are distributed among the several canals as follows:

Erie canal	\$17,507 00
Champlain canal.....	1,134 00
Oswego canal.....	506 00
Cayuga and Seneca canal.....	525 50
Oneida Lake canal.....	1,323 31
Genesee Valley canal	96 00
	<hr/>
	\$21,091 81
	<hr/>

Statement M exhibits the expenditures of the engineer corps on the several canals of the State for the last ten years, with the following result:

1867.....	\$73,222 42
1868.....	73,572 46
1869.....	111,364 14
1870.....	145,738 00
1871.....	132,760 43

1872.....	\$116,801 66
1873.....	106,000 90
1874.....	105,944 67
1875.....	139,662 79
1876.....	69,511 19

Statement N gives the amount expended for repairs by each superintendent and Canal Commissioner.

Statement O gives the cost of repairs of breaches on each canal and on each Canal Commissioner's division, in 1875 and 1876.

Statement P gives the expenditures for repairs by the superintendents and Canal Commissioners, on each canal, for 1875 and 1876.

Statement Q gives the average cost per mile of each division of the Erie canal, by the superintendents from 1835 to 1876, inclusive.

Statement R gives the amount expended by the superintendents of repairs, and the average cost per mile on each and all the canals from 1826 to 1876, inclusive.

Statement S gives the amount expended for repairs of old, and the erection of new work on each division of the Erie canal by the superintendents, including payment to repair contractors and resident engineers, and also the expenditures by the Canal Commissioners and the average cost per mile on each section from 1835 to 1876, inclusive.

Statement T gives the total amount expended for the repairs of old, and the erection of new work on the Champlain canal, and the average cost per mile from 1835 to 1876, inclusive.

Statement U gives the expenditures for repairs by the superintendents, and Canal Commissioners for the fifteen years ending with 1876.

Respectfully submitted.

G. W. SCHUYLER,
Auditor.

DOCUMENTS.

(A.)
